Foreword

THE EUROPA YEAR BOOK was first published in 1926. Since 1960 it has appeared in annual two-volume editions, and has become established as an authoritative reference work, providing a wealth of detailed information on the political, economic and commercial institutions of the world.

Volume I deals with international organizations and the countries of Europe, as well as providing the first part of the alphabetical survey of the rest of the world, from Afghanistan to Burundi. Volume II lists the remaining countries of the world, from Cameroon to Zimbabwe.

Readers are referred to our regional books THE MIDDLE EAST AND NORTH AFRICA, AFRICA SOUTH OF THE SAHARA and THE FAR EAST AND AUSTRALASIA for additional information on the geography, history and economy of these areas as well as a Who's Who of influential personalities.

The information is revised annually by a variety of methods, including direct mailing to the institutions listed. Many other sources are used, such as national statistical offices, government departments and diplomatic missions. The editor thanks the innumerable individuals and organizations throughout the world whose generous co-operation in providing current information for this edition is invaluable in presenting the most accurate and up-to-date material available, and acknowledges particular indebtedness for material from the following publications: the United Nations' *Demographic Yearbook*, *Statistical Yearbook* and *Yearbook of Industrial Statistics*; the Food and Agriculture Organization of the United Nations' *Production Yearbook*, *Yearbook of Fishery Statistics* and *Yearbook of Forest Products*; and *The Military Balance 1981-1982*, published by the International Institute for Strategic Studies, 23 Tavistock Street, London, WC2E 7NQ.

CAMEROON

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The United Republic of Cameroon lies on the west coast of Africa, with Nigeria to the west, Chad and the Central African Republic to the east and the Congo, Equatorial Guinea and Gabon to the south. The climate is hot and humid in the south and west, with average temperatures of 26°C (80°F). The north is drier, with more extreme temperatures. The official languages are French and English. Approximately half of all Cameroonians follow traditional religious beliefs. About 35 per cent are Christians, and about 20 per cent, mostly in the north, are Muslims. The national flag (proportions 3 by 2) consists of a vertical tricolour of green, red and yellow with one gold star in the red stripe. The capital is Yaoundé.

Recent History

East Cameroon, once a League of Nations Mandate and later a United Nations Trusteeship Territory, was under French administration until it became independent as the Republic of Cameroon in January 1960. Ahmadou Ahidjo was elected its first President. West Cameroon, then part of the British-administered Trust Territory of Southern Cameroon, opted to join the Republic in February 1961, and a Federal Republic was created in October 1961. Under Ahidjo's leadership the two states became increasingly integrated. In 1966 the two governing parties and several opposition groups combined to form a single party, the *Union nationale camerounaise* (UNC). The party has grown to embrace almost all the country's political, cultural, professional and social organizations. The only significant opposition party, the *Union des Populations de Cameroun* (UPC), was finally crushed in 1971.

In June 1972, after approval by referendum of a new Constitution, the Federal Republic of Cameroon became the United Republic of Cameroon. A fully centralized political and administrative system was quickly introduced, and in May 1973 a new National Assembly was elected for a five-year term. After the re-election of Ahidjo as President in April 1975, the Constitution was revised and a Prime Minister appointed. Despite opposition from anglophone intellectuals agitating for a return to the federal system of government, Ahidjo was unanimously re-elected for a fifth five-year term of office in April 1980.

The United Republic has pursued an independent foreign policy. It withdrew from OCAM in July 1973, and negotiated a revision of its co-operation agreements with France in 1974. The visit by President Ahidjo to Paris in September 1981 confirmed the continuing close relationship with France. Relations with neighbouring states, however, were strained. Maritime border disputes with Nigeria occurred over the location of offshore oilfields, and in May five Nigerian soldiers were killed by Cameroon forces on the Rio del Rey during an incident in territorial waters claimed by both countries. The dispute was settled following OAU mediation. In the same month the Cameroon Government was forced to airlift 19,000 Cameroon nationals resident in Gabon following violence at a football match in Libreville.

Cameroon played an active role in attempts to find a political settlement to the civil war in Chad, and was heavily strained by the influx of over 200,000 Chadian refugees into the northern areas.

Government

Cameroon is governed by a President and a unicameral 120-member National Assembly, each elected for five years by universal adult suffrage. The age of majority is 21. The Prime Minister, Ministers and Vice-Ministers are appointed by the President, who also appoints a Governor to each of the seven provinces.

Defence

In July 1981 Cameroon had an army of 6,600 and 5,000 men in para-military forces. The navy numbered 300 and the air force 350 men. France has a bilateral defence agreement with Cameroon. The defence budget for 1980/81 was fixed at U.S. \$92 million.

Economic Affairs

Cameroon has one of the highest incomes per head in tropical Africa, though the basis of its economy is still essentially agricultural. About 32 per cent of G.D.P. is derived from agriculture, fishing and forestry, and 80 per cent of the population are engaged in these sectors. Cocoa, coffee and timber are the main exports, though palm products, bananas, rubber and cotton are also produced in quantity and help protect the economy against fluctuating commodity prices. Coffee and cocoa together provided 51 per cent of Cameroon's export earnings in 1979.

The major industries are aluminium smelting and the processing of agricultural raw materials. The aluminium smelters use imported bauxite and hydro-electric power from the Edéa Dam. A new dam at Song Loulou is soon to be operational, and bauxite deposits in northern and central Cameroon are being exploited by a Canadian company. Industrial production grew by about 15 per cent annually in the first decade of independence, and now amounts to nearly 25 per cent of G.D.P. As a means of accelerating growth, the Government has made available extensive tax and financing incentives. Although the rate of growth has declined since 1970, the expansion of the aluminium smelting industry in 1979 is increasing revenue and profits. In November 1980 a paper and wood-pulp plant opened at Edéa with a capacity of 126,000 tons.

In 1973 petroleum was discovered off Rio del Rey, and Cameroon's first oil exports were shipped in February 1978. Output in 1980 totalled 2.8 million metric tons, making oil the country's third most important export, and production is expected to reach 5 million tons by 1982/83. A refinery was opened at Victoria in 1980. Another offshore oil deposit was discovered near Kribi in October 1979, and drilling is in progress in the area. Considerable resources of natural gas have been discovered with the exploitation of petroleum deposits in these two areas, and plans for a liquefied gas plant at Kribi are in progress.

In 1978/79 Cameroon's G.D.P. was 1,113,200 million francs CFA. The economy grew by 6 per cent in real terms

each year from 1977 to 1980. Inflation in 1981 was running at approximately 10 per cent. The cost of living doubled between 1971 and 1977, and in 1978 there was an increase equivalent to 15 per cent annually. There was a slight fall in G.D.P. in 1979/80, but the trade deficit also fell, from 51,000 million francs CFA in 1978/79 to 15,000 million francs CFA in 1979/80. The transport system is being developed to permit exploitation of natural resources in remote parts of the country. The objectives of the fifth Five-Year Plan, for 1982-87, are the realization of self-sufficiency in food production and a more intensified research and exploitation of mineral and energy resources.

Transport and Communications

There are road links between the former French Equatorial states and Nigeria. A bridge is being constructed over the River Chari linking N'Djamena, Chad's capital, with Kousseri, while road links are planned with southern Chad. The main rail routes within Cameroon are between Douala and Yaoundé, and Yaoundé and Ngaoundéré. A major highway between Yaoundé and Douala is due for completion in 1984. International shipping lines call at Douala and Victoria. There are internal and international air services.

Social Welfare

The Government and Christian Missions maintain hospitals and medical centres but there are no welfare services covering the whole population. In 1976 Cameroon had 346 hospital establishments, with 16,734 beds.

Education

Education is provided by the government, missionary societies and private concerns. Education in state schools is free, and the government provides financial assistance for other schools; there is a bilingual primary school in

each province. In 1978 a programme of standardization of curricula was undertaken. In 1981 79 per cent of school-age children attended school overall, but only 32 per cent attended in the northern region. The State University at Yaoundé, founded in 1962, has been decentralized, and consists of five regional campuses. The budget for 1981/82 gave education top priority, with an allocation of 23,580 million francs CFA, almost 10 per cent of the total.

Tourism

Tourists are attracted by the cultural diversity of local customs, and by the national parks, game reserves and sandy beaches. The tourist trade is being expanded and in 1979 there were 126,337 visitors.

Public Holidays

1982: May 1st (Labour Day), May 20th (National Day, Ascension), July 23rd (Djoulde Soumae, End of Ramadan), August 15th (Assumption), September 1st (Union Nationale Camerounaise Day), September 29th (Festival of Sheep), December 25th (Christmas).

1983: January 1st (New Year), February 11th (Youth Day), April 1st (Good Friday), April 4th (Easter Monday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1981):

1 franc CFA = 2 French centimes;

£1 sterling = 545.6 francs CFA;

U.S. \$1 = 283.65 francs CFA.

FINANCE

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Coins: 1, 2, 5, 10, 25, 50, 100 and 500 francs CFA.

Notes: 100, 500, 1,000, 5,000 and 10,000 francs CFA.

Exchange rates (October 1981): 1 franc CFA = 2 French centimes;

£1 sterling = 545.6 francs CFA; U.S. \$1 = 283.65 francs CFA.

1,000 francs CFA = £1.833 = \$3.525.

Note: Between December 1958 and August 1969 the value of the franc CFA was 3.6 milligrammes of gold, equal to 0.4051 U.S. cent (U.S. \$1 = 246.853 francs CFA). Since January 1960 the franc CFA has been equivalent to 2 French centimes (1 French franc = 50 francs CFA). In August 1969 the franc CFA was devalued (in line with the French franc) to 3.2 milligrammes of gold, the exchange rate being 1 franc CFA = 0.3601 U.S. cent (\$1 = 277.71 francs CFA) until August 1971. From December 1971 to February 1973 the official rate was 1 franc CFA = 0.3909 U.S. cent (\$1 = 255.785 francs CFA). Since March 1973 the French authorities have ceased to maintain the franc-dollar rate within previously agreed margins. As a result, the value of the franc CFA has fluctuated on foreign exchange markets in line with the French franc. The average market rates of francs CFA per U.S. dollar were: 252.2 in 1972; 222.7 in 1973; 240.5 in 1974; 214.3 in 1975; 239.0 in 1976; 245.7 in 1977; 225.6 in 1978; 212.7 in 1979; 211.3 in 1980. In terms of sterling, the exchange rate between August 1969 and June 1972 was £1 = 666.503 francs CFA (1 franc CFA = 0.15004p).

THE CONSTITUTION

(Promulgated June 2nd, 1972, revised May 9th, 1975)

The People of Cameroon

The Constitution declares that the human being, without distinction as to race, religion, sex or belief, possesses inalienable and sacred rights. It affirms its attachment to the fundamental freedoms embodied in the Universal Declaration of Human Rights and the United Nations Charter and in particular to the following principles:

Equal rights and obligations for all, and freedom and security for the individual subject to the rights of others and the higher interests of the State. The home and the privacy of all correspondence are inviolate. Freedom of movement. Freedom within the law. Assurance of a fair hearing and that the law may not act retrospectively.

Freedom of belief. Freedom to practise a religion. The State is secular. Freedom of expression, freedom of the press, freedom of assembly, freedom of association, freedom of trade unions under conditions fixed by law.

Protection of the family as the natural basis of society.

The right to education, the provision and control of which is the duty of the State, the right of ownership unless in violation of public interests, and the right and duty to work. The duty of all to share the burden of public expenditure according to his means.

The State guarantees to all citizens of either sex the rights and freedoms set out in the preamble of the Constitution.

I Sovereignty

1. The Federal Republic of Cameroon, constituted from the State of East Cameroon and the State of West Cameroon, shall become a unitary State to be styled the United Republic of Cameroon with effect from the date of entry into force of this Constitution. The Republic shall be one and indivisible, democratic, secular and dedicated to social service. It shall ensure the equality before the law of all its citizens. Provisions that the official languages be

French and English, for the motto, flag, national anthem and seal, that the capital be Yaoundé.

2-3. Sovereignty shall be vested in the people who shall exercise it either through the President of the Republic and the members returned by it to the National Assembly or by means of referendum. Elections are by universal suffrage, direct or indirect, by every citizen aged 21 or over in a secret ballot. Political parties or groups may take part in elections subject to the law and the principles of democracy and of national sovereignty and unity.

4. State authority shall be exercised by the President of the Republic and the National Assembly.

II The President of the Republic

5. The President of the Republic, as Head of State and Head of the Government, shall be responsible for the conduct of the affairs of the Republic. He shall define national policy and may charge the Prime Minister with the implementation of this policy in certain spheres. The President may delegate to the Prime Minister his powers to direct, co-ordinate and control governmental activity in such spheres. Certain powers may also be delegated to other members of government.

6-7. Candidates for the office of President must hold civic and political rights and be at least 35 years old, and may not hold any other elective office or professional activity. Election is by a majority of votes cast by the people. The President is elected for five years and may be re-elected. Provisions are made for the continuity of office in the case of the President's resignation and for the Prime Minister to act as interim President should the President die or be permanently incapacitated.

8-9. The Prime Minister, Ministers and Vice-Ministers are appointed by the President to whom they are responsible, and they may hold no other appointment. The President is also head of the armed forces, he negotiates and ratifies treaties, may exercise clemency after consultation with

CAMEROON

The Constitution, The Government

the Higher Judicial Council, promulgates and is responsible for the enforcement of laws, is responsible for internal and external security, makes civil and military appointments, provides for necessary administrative services.

10. The President, by reference to the Supreme Court, ensures that all laws passed are constitutional.

11. Provisions whereby the President may declare a State of Emergency or State of Siege.

III The National Assembly

12. The National Assembly shall be renewed every five years, though it may at the instance of the President of the Republic legislate to extend or shorten its term of office. It shall be composed of 120 members elected by universal suffrage.

13-14. Laws shall normally be passed by a simple majority of those present, but if a bill is read a second time at the request of the President of the Republic a majority of the National Assembly as a whole is required.

15-16. The National Assembly shall meet twice a year, each session to last not more than 30 days; in one session it shall approve the budget. It may be recalled to an extraordinary session of not more than 15 days.

17-18. Elections and suitability of candidates and sitting members shall be governed by law.

IV Relations between the Executive and the Legislature

19. Bills may be introduced either by the President of the Republic or by any member of the National Assembly.

20. Reserved to the legislature are: the fundamental rights and duties of the citizen; the law of persons and property; the political, administrative and judicial system in respect of elections to the National Assembly, general regulation of national defence, authorization of penalties and criminal and civil procedure etc., and the organization of the local authorities; currency, the budget, dues and taxes, legislation on public property; economic and social policy; the education system.

21. The National Assembly may empower the President of the Republic to legislate by way of Ordinance for a limited period and for given purposes.

22-26. Other matters of procedure, including the right of the President of the Republic to address the Assembly and of the Prime Minister, Ministers and Vice-Ministers to take part in debates.

27-29. The composition and conduct of the Assembly's programme of business. Provisions whereby the Assembly may inquire into governmental activity. The obligation of the President of the Republic to promulgate laws, which shall be published in both languages of the Republic.

30. Provisions whereby the President of the Republic, after consultation with the National Assembly, may submit to referendum certain reform bills liable to have profound repercussions on the future of the Nation and National Institutions.

V The Judiciary

31. Justice is administered in the name of the people. The President of the Republic shall ensure the independence of the judiciary and shall make appointments with the assistance of the Higher Judicial Council.

VI The Supreme Court

32-33. The Supreme Court has powers to uphold the Constitution in such cases as the death or incapacity of the President and the admissibility of laws, to give final judgments on appeals on the Judgment of the Court of Appeal and to decide complaints against administrative acts. It may be assisted by experts appointed by the President of the Republic.

VII Impeachment

34. There shall be a Court of Impeachment with jurisdiction to try the President of the Republic for high treason and the Prime Minister, Ministers and Vice-Ministers for conspiracy against the security of the State.

VIII The Economic and Social Council

35. There shall be an Economic and Social Council, regulated by the law.

IX Amendment of the Constitution

36-37. Bills to amend the Constitution may be introduced either by the President of the Republic or the National Assembly. The President may decide to submit any amendment to the people by way of a referendum. No procedure to amend the Constitution may be accepted if it tends to impair the republican character, unity or territorial integrity of the State, or the democratic principles by which the Republic is governed.

TRANSPORT

RAILWAYS

There are 1,161 km. of track, the West Line running from Douala to Nkongsamba (172 km.) with a branch line leading south-west from Mbanga to Kumba (29 km.), and the Transcameroon railway which runs from Douala to Ngaoundéré (930 km.), with a branch line from Ngoumou to Mbalmayo (30 km.). The section from Yaoundé to Ngaoundéré (622 km.) was opened in 1974. An extension of its western branch is projected from Mbalmayo to Bangui, capital of the Central African Republic. Improvements to the line between Douala and Yaoundé were begun in 1974; those on the section between Yaoundé and Maloumé were completed in April 1978, and those between Douala and Edéa in 1981. Modernization work on the section between Edéa and Eseka, which will cut the present 90-km. line to 82 km., should be completed in 1982. Narrow-gauge railways totalling 147 km. are used in former West Cameroon between the plantations and the ports.

CANADA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Dominion of Canada occupies the northern part of North America (except Alaska and Greenland) and is the second largest country in the world. The border with the U.S.A. follows the upper St. Lawrence Seaway and the Great Lakes, continuing west along the 49th parallel. The climate is an extreme one, particularly inland. Winter temperatures drop well below freezing but summers are generally mild. Rainfall varies from moderate to light and there are heavy falls of snow. The two official languages are English and French, the mother tongues of 60.2 per cent and 26.9 per cent, respectively, at the general census in 1971. More than 98 per cent of Canadians can speak English or French. Forty-six per cent of the people are Roman Catholics. The largest Protestant churches are the United Church of Canada (17.5 per cent) and the Anglican Church (11.8 per cent) but almost every Christian denomination is represented. The national flag (proportions 2 by 1) consists of a red maple leaf on a white field, flanked by red panels. The capital is Ottawa.

Recent History

Following a five-year period as a minority administration, the Liberals, led by Pierre Trudeau, won a parliamentary majority in June 1968 and were again returned to office in general elections in 1972 and 1974. Foreign relations have altered significantly under the Trudeau governments, with less emphasis on traditional links with Western Europe and the U.S.A. and a fostering of relations with Far East countries, Africa and Latin America.

In 1975 Canada experienced the effects, belatedly and not so severely as most countries, of international economic recession. This led to the introduction of wage and price controls and to the erosion of the Government's popularity during 1975 and 1976, which again receded amid worsening economic conditions during 1978. Continuing discontent with the Government's economic performance resulted in the Liberals' defeat at general elections held in May 1979, although the Progressive Conservative Government formed by Joe Clark lacked an overall majority. In November, Trudeau announced that he was resigning as Liberal leader, but in the following month the Government was defeated on its budget proposals. Trudeau agreed to postpone his retirement, and at general elections in February 1980 the Liberals were returned with a strong majority. Trudeau, however, indicated that he would make way for a new leader of the Liberal Party before the next election.

Politically, separatism in Quebec, where four-fifths of the population speak French as a first language and which maintains its own cultural identity, has remained a dominant issue. At provincial elections in November 1976 the separatist Parti Québécois, led by René Lévesque, defeated the incumbent Liberals, and in 1977 made French the official language of education, business and government in Quebec. Certain sections of the bill were later declared unconstitutional by the Supreme Court of Canada. During 1977 Lévesque's Government reiterated its aim of sovereignty for Quebec; however in 1978 Lévesque denied that unilateral separation was contemplated and stated

that a "sovereignty-association", with a monetary and customs union, would be sought. A Quebec provincial referendum on this issue was held in May 1980, which resulted in the rejection of "sovereignty-association" by an electoral margin of 59.5 per cent to 40.5 per cent. The Parti Québécois was, however, again returned to power at provincial elections held in April 1981. At a party congress in December, delegates voted to abandon "sovereignty-association" and seek full independence for Quebec. This was opposed by Lévesque, and a party referendum on future policy was scheduled for February 1982.

In recent years, the topic of constitutional reform has been prominent in Canada. Between 1978 and 1980, a series of proposals was made by federal and provincial governments and various advisory bodies for the patriation of the Constitution (*see* Government), whereby the U.K. Parliament would transfer to Canada authority over all matters contained in British statutes relating to Canada, opening the way for the reform of central institutions and the redistribution of legislative powers between Parliament and the Provincial Legislatures.

A Federal-Provincial Committee of Ministers on the Constitution was formed in 1978, and formal meetings between the Prime Minister and the 10 Provincial Premiers were held in February 1979 and September 1980. No agreement emerged from these meetings, mainly because of the wish of several of the provinces to retain full control of their natural resources. In October 1980 the Federal Government announced that it would proceed unilaterally with a constitutional reform plan incorporating patriation and a charter of rights which would be binding on all provinces. Although Trudeau won an initial House of Commons vote on the plan, opposition within Canada remained determined. Eight of the 10 provinces challenged the plan in the Supreme Court of Canada, which ruled in September 1981 that, while the Federal Government was acting within its powers, further efforts should be made to obtain the provinces' agreement. A new round of talks between Trudeau and the provincial leaders was held in November, which resulted in all the provinces except Quebec accepting compromise proposals which included a revised charter of rights and a new formula for constitutional amendments made after patriation, whereby such amendments would require the support of at least seven provinces representing more than 50 per cent of the population. In December 1981 the plan was overwhelmingly approved by the Federal Parliament, and was expected to be considered by the U.K. Parliament in early 1982.

Government

Canada is a federal parliamentary state. Under the British North America Act of 1867, executive power is vested in the British monarch, as Head of State, and exercisable by her representative, the Governor-General, whom she appoints on the advice of the Canadian Prime Minister. The Federal Parliament comprises the Queen, a nominated Senate (104 members, appointed on a regional basis) and a House of Commons (282 members

elected by universal adult suffrage for single-member constituencies). A Parliament may last no longer than five years. The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers to form the Cabinet. The Prime Minister should have the confidence of the House of Commons, to which the Cabinet is responsible. Canada comprises 10 provinces (each with a Lieutenant-Governor and a legislature, which may last no longer than five years, from which a Premier is chosen) and two territories constituted by Act of Parliament.

Defence

Canada co-operates with the U.S.A. in the defence of North America, sends forces to NATO's Atlantic and European sectors, and takes part in UN peace-keeping operations. In 1981 the armed forces numbered 81,286: army 17,986, navy 10,717, air force 23,397 and 29,186 not identified by service. Defence expenditure for 1981/82 was estimated at C\$5,915 million.

Economic Affairs

The Canadian economy is closely linked with that of the U.S.A., which accounts for about 70 per cent of total trade in merchandise, although recent efforts have been made to develop alternative markets, notably in Japan, China and the EEC. Many sectors of Canadian industry rely heavily on foreign investment, although, as a result of changes of ownership and substantial public acquisitions since the early 1970s, foreign ownership had declined by 1979 to 28.5 per cent of non-financial (mainly petroleum) assets, of which share U.S.A. corporations held approximately 75 per cent. In October 1980 the Government announced that further purchases of U.S.-owned petroleum interests would reduce this proportion to 50 per cent by 1990. In November 1981 the Government stated that Canadian ownership had reached 35 per cent.

Canada is one of the world's leading industrial countries, although farming still accounts for about 4 per cent of the country's gross domestic product and is the leading primary industry in terms of employment. Canada is the world's fourth largest exporter of agricultural products. The main exports in 1980 were motor vehicles and parts, natural gas, wood pulp, wheat, newsprint paper, softwood lumber and crude petroleum. Canada is the world's largest producer of zinc and the second largest of nickel, asbestos and potash. The country is also rich in many other minerals, including gold, silver, aluminium, iron, copper, uranium, cobalt, elemental sulphur and lead. There are considerable petroleum and gas resources in Alberta, off the Atlantic coast and in the Canadian Arctic islands. In July 1980 the Government authorized construction of the initial section of the Alaska Highway Gas Pipeline, which will transport U.S. gas from Alaska to join existing pipelines in British Columbia and Alberta for distribution in the U.S.A. and, at a later date, in Canada. The project, costing an estimated C\$23,000 million, is due for completion in 1985.

In 1975 Canada began to be affected by the international slump, and inflationary pressures have contributed to Canada's economic problems. From the end of 1976 until 1981 there was a steady depreciation of the Canadian dollar, which by August 1981 had fallen to its lowest level against the U.S. dollar for 48 years. Inflation has remained high, rising from 9.8 per cent in 1979 to 11.2 per

cent in 1980. By late 1981 the inflation rate had risen to 12.5 per cent. The unemployment rate, 7.5 per cent in 1980, rose to 8.3 per cent in 1981. An anti-inflationary 1980/81 budget laid much stress on energy policy, levying a new tax on petroleum and natural gas producers' revenue and imposing government spending limits. Industrial output, which fell by 1.6 per cent in 1980, was expected to show some recovery in 1981. The 1982/83 budget forecast a 3.6 per cent growth rate in 1982, and, although inflation was expected to remain high, a fall in unemployment to 7.2 per cent was foreseen. Fiscal measures included increased taxation on corporate profits and higher-rate personal taxpayers with the aim of reducing the budget deficit.

Transport and Communications

Owing to the size of the country, Canada's economy is particularly dependent upon an efficient system of transport and communications by both land and water. The St. Lawrence Seaway allows ocean-going ships to reach the Great Lakes. In 1969 the North West Passage was negotiated for the first time, and in 1971 Canada took *de jure* control of the passage. In January 1977 the Government extended its coastal jurisdiction to 370 km. (200 nautical miles). There are nearly 85,000 km. (53,000 miles) of railway track and Canada's rail and canal system is being increasingly supplemented by roads, air services and pipelines. The Trans-Canada Highway is one of the major features of a network of 884,000 km. (553,000 miles) of roads.

Social Welfare

About 40 per cent of the federal budget is devoted to health and welfare. The Federal Government administers family allowances, unemployment insurance and war veterans' and old age pensions. Other services are provided by the provinces, the range varying from province to province. A Federal medical care insurance programme covers all Canadians against medical expenses, and a federal-provincial hospital insurance programme covers over 99 per cent of the insurable population.

Education

Education is a provincial matter and the period of compulsory education varies. French-speaking students are entitled by law, in some provinces, to instruction in French. Primary education is from 5-6 years to 13-14, followed by 3-5 years at secondary or high school. There are 65 degree-awarding institutions and 186 other institutions of higher education.

Tourism

Canada offers a wide range of outdoor tourist attractions and a variety of regional festivals and events. Its scenic, cultural and ethnic diversity add to its travel appeal, as do the developing attractions of its metropolitan centres. Most visitors are from the U.S.A. (38.5 million in 1980). Tourist spending in 1980 amounted to C\$3,300 million.

Public Holidays

1982: May 24th (Victoria Day), July 1st (Canada Day), September 6th (Labour Day), October 11th (Thanksgiving), November 11th (Remembrance Day), December 25th (Christmas Day).

1983: January 1st (New Year), April 1st (Good Friday), April 4th (Easter Monday).

Weights and Measures

The imperial system is in general use with the exception of the 2,000 lb. American ton; the metric system is being implemented gradually.

Currency and Exchange Rates

100 cents=1 Canadian dollar (C\$).

Exchange rates (December 1981):

£1 sterling=C\$2.275;

U.S. \$1=C\$1.183.

Coins: 1, 5, 10, 25 and 50 cents; 1 dollar.

Notes: 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 dollars.

Exchange rates (December 1981): £1 sterling = C\$2.275; U.S. \$1 = C\$1.183.

C\$100 = £43.96 = U.S. \$84.54.

Note: Between May 1962 and May 1970 the par value of the Canadian dollar was 92.5 U.S. cents, giving an exchange rate of U.S. \$1 = C\$1.081. In terms of sterling, the rate between November 1967 and May 1970 was C\$1 = 7s. 8½d. (38.54 new pence) or £1 = C\$2.5946. Since May 1970 the Canadian dollar has been allowed to "float" on foreign exchange markets. The average exchange rates (Canadian cents per U.S. dollar) were: 100.98 in 1971; 98.99 in 1972; 100.01 in 1973; 97.80 in 1974; 101.70 in 1975; 98.60 in 1976; 106.35 in 1977; 114.07 in 1978; 117.14 in 1979; 116.93 in 1980.

THE CONSTITUTION

Constitutional development has been based mainly upon four important acts of the British Parliament: the Quebec Act of 1774, the Constitutional Act of 1791, the Act of Union of 1840, and the British North America Act of 1867. The first is chiefly important as it established the French civil law throughout the then province of Quebec and guaranteed the free exercise of Roman Catholicism. The second is noteworthy for the division of the province into the French-speaking province of Lower Canada and the English-speaking province of Upper Canada, and for the concession of representative government through an elective Legislative Assembly which, however, had no control over the executive government except in so far as it could refuse to vote taxes (the non-tax revenue of the province was outside of its control). The Act of Union (Section 45) mentions the appointment by Her Majesty of the Executive Council, but does not refer to the responsibility of the Council. It can be stated that responsible government has existed in Canada by constitutional practice and precedent. It was recognized in the instructions which the Colonial Secretary of State transmitted to the Governors.

The fourth act separated the two Canadas from their existing legislative union to make them provinces, each administering its own local affairs, in a wider confederation, which within a comparatively short period so extended its boundaries as to take in the whole of British North America, except Newfoundland and Labrador.

The British North America Act 1867 provides that the Constitution of the Dominion shall be "similar in principle to that of the United Kingdom"; that the executive authority shall be vested in the Sovereign of Great Britain and Ireland, and carried on in his name by a Governor-General and Privy Council; and that the legislative power shall be exercised by a Parliament of two Houses, called the "Senate", and the "House of Commons".

The Statute of Westminster received the Royal Assent in December 1931. In its application to Canada the Statute emancipates the Legislatures of the provinces as well as the Dominion Parliament from the operation of the Colonial Laws Validity Act. A special section was, however, included providing that the Statute should not apply to the repeal, amendment or alteration of the British North America Acts of 1867 to 1930, and also preventing the Dominions and provinces, in the exercise of their enlarged legislative powers, from trenching upon provincial and Dominion fields of legislative power respectively. Numerous attempts to devise amendment procedures within Canada without reference to the United Kingdom Parliament have been made without success. In 1978 a Constitutional Amendment Bill was introduced in the Federal Parliament which would alter the composition of the Supreme Court and the Senate. These proposals were the subject of discussion between the Federal Government and Provincial Premiers in February 1979 and September 1980, but no agreement was reached. In November 1981, however, compromise proposals were agreed between the Federal Government and the Provincial Premiers, with the exception of Quebec. These proposals were endorsed by the Federal Parliament and were to be considered by the United Kingdom Parliament in early 1982.

The Government

The national government works itself out through three main agencies. There is **Parliament** (consisting of the Queen as represented by the Governor-General, the Senate and the House of Commons) which makes the laws; the **Executive** (the Cabinet or Ministry) which applies the laws; and the **Judiciary** which interprets the laws.

Particular features similar to the British system of government are the close relation which exists between the Executive and Legislative branches, and the doctrine of Cabinet responsibility which has become crystallized in the course of time. The members of the Cabinet, or executive committee, are chosen by the Prime Minister from the political party commanding a majority in the House of Commons. Each Minister or member of the Cabinet is usually responsible for the administration of a department, although there may be Ministers without portfolio whose experience and counsel are drawn upon to strengthen the Cabinet, but who are not at the head of departments. Each Minister of a department is responsible to Parliament for that department, and the Cabinet as a whole is responsible before Parliament for Government policy and administration generally.

Meetings of the Cabinet are presided over by the Prime Minister. From the Cabinet signed orders and recommendations go to the Governor-General for his approval, and it is in this way that the Crown acts only on the advice of its responsible Ministers. The Cabinet takes the responsibility for its advice being in accordance with the support of Parliament and is held strictly accountable.

The Federal Parliament

Parliament must meet at least once a year, so that twelve months do not elapse between the last meeting in one session and the first meeting in the next. The duration of Parliament may not be longer than five years. Senators (a maximum of 104 in number) are appointed until age 75 by the Governor-General in Council. They must be at least 30 years of age, British subjects, residents of the province they represent, and in possession of \$4,000 over and above their liabilities. Members of the House of Commons are elected by universal adult suffrage for the duration of Parliament.

Under the British North America Act, which is the basis of the Constitution, the Federal Parliament has exclusive legislative authority in all matters relating to public debt and property; regulation of trade and commerce; raising of money by any mode of taxation; borrowing of money on the public credit; postal service; census and statistics; militia, military and naval service and defence; fixing and providing for salaries and allowances of the officers of the Government; beacons, buoys and lighthouses; navigation and shipping; quarantine and the establishment and maintenance of marine hospitals; sea-coast and inland fisheries; ferries on an international or interprovincial frontier; currency and coinage; banking, incorporation of banks, and issue of paper money; savings banks; weights and measures; bills of exchange and promissory notes; interest; legal tender; bankruptcy and insolvency; patents of invention and discovery; copyrights; Indians and lands reserved for Indians; naturalization and aliens; marriage and divorce; the criminal laws, except the constitution of courts of criminal jurisdiction but including the procedure in criminal matters; the establishment, maintenance and management of penitentiaries; such classes of subjects as are expressly excepted in the enumeration of the classes of subjects exclusively assigned to the Legislatures of the provinces by the Act. Judicial interpretation and later amendment have, in certain cases, modified or clearly defined the respective powers of the Federal and Provincial Governments.

Both the Parliament of Canada and the legislatures of the provinces may legislate with respect to agriculture and immigration, but provincial legislation shall have effect

in and for the province as long and as far only as it is not repugnant to any Act of Parliament. Both Parliament and the provincial legislatures may legislate with respect to old age pensions and supplementary benefits, but no federal law shall affect the operation of any present or future law of a province in relation to these matters.

Provincial Government

In each of the ten Provinces (Newfoundland joined with Canada as the tenth province on April 1st, 1949) the Queen is represented by a Lieutenant-Governor, appointed by the Governor-General in Council, and governing with the advice and assistance of the Ministry or Executive Council, which is responsible to the Legislature and resigns office when it ceases to enjoy the confidence of that body. The Legislatures are unicameral, consisting of an elected Legislative Assembly.

The Legislature in each province may exclusively make laws in relation to: amendment of the constitution of the province, except as regards the Lieutenant-Governor; direct taxation within the province; borrowing of money on the credit of the province; establishment and tenure of provincial offices and appointment and payment of provincial officers; the management and sale of public lands belonging to the province and of the timber and wood thereon; the establishment, maintenance and management of public and reformatory prisons in and for the province; the establishment, maintenance and management of hospitals, asylums, charities and charitable institutions

in and for the province, other than marine hospitals; municipal institutions in the province; shop, saloon, tavern, auctioneer and other licences issued for the raising of provincial or municipal revenue; local works and undertakings other than interprovincial or international lines of ships, railways, canals, telegraphs, etc., or works which, though wholly situated within the province are declared by the Federal Parliament to be for the general advantage either of Canada or of two or more provinces; the incorporation of companies with provincial objects; the solemnization of marriage in the province; property and civil rights in the province; the administration of justice in the province, including the constitution, maintenance and organization of provincial courts both in civil and criminal jurisdiction, and including procedure in civil matters in these courts; the imposition of punishment by fine, penalty or imprisonment for enforcing any law of the province relating to any of the aforesaid subjects; generally all matters of a merely local or private nature in the province. Further, provincial Legislatures may exclusively make laws in relation to education, subject to the protection of religious minorities, who are to retain the privileges and rights enjoyed before Confederation.

Municipal Government

Under the British North America Act, the municipalities are the creations of the Provincial Governments. Their bases of organization and the extent of their authority vary in different provinces, but almost everywhere they have very considerable powers of local self-government.

JUDICIAL SYSTEM

FEDERAL COURTS

The Supreme Court of Canada: Wellington and Kent Sts., Ottawa, Ont. K1A 0J1; has jurisdiction as a Court of Appeal in both civil and criminal cases throughout Canada. The judgment of the Court is final and conclusive. The Supreme Court is also required to advise on questions referred to it by the Governor in Council. Under the Supreme Court Act, important questions concerning the interpretation of the British North America Act, the constitutionality or interpretation of any federal or provincial vinal law, the powers of Parliament or of the provincial legislatures or of both levels of government, among other matters, may be referred by the Government to the Supreme Court for consideration.

In civil cases, appeals may be brought from any final judgment of the highest court of last resort in a province. The Supreme Court will grant permission to appeal if it is of the opinion that a question of public importance is involved, one that transcends the immediate concerns of the parties to the litigation. In criminal cases, the Court will hear appeals as of right concerning indictable offences where an acquittal has been set aside or where there has been a dissenting judgment on a point of law in a provincial court of appeal. The Supreme Court may, in

addition, hear appeals on questions of law concerning both summary convictions and all other indictable offences if permission to appeal is first granted by the Court.

THE PRESS

The vastness of the country hampers distribution and the establishment of a strong national press, so the daily press in Canada is essentially local in coverage, influence and distribution. A national edition of the Toronto *Globe and Mail* was, however, introduced in 1981. In late 1981 there were 119 daily newspapers with a combined circulation of over 5.4 million, representing three-quarters of the country's households.

There is an increasing trend towards group ownership: over 50 per cent of daily newspaper circulation is represented by three major groups: Thomson Newspapers Ltd., Southam Inc. and the Peladeau Group. There are several smaller groups, but the number of independently owned dailies remains limited. In September 1980 the Government appointed a Royal Commission to investigate the effects of concentration of ownership in the newspaper industry. In August 1981 the Commission reported that the existing concentration constituted a threat to press freedom, and recommended that some groups should be compelled to sell some of their newspaper interests in areas where there was extreme ownership concentration. Government action on the report was still awaited in late 1981.

In 1981 about 1,000 weekly and twice-weekly community newspapers reached an estimated 5,000,000 people, mainly in the more remote areas of the country. A significant feature of the Canadian press is the publishing of newspapers catering for ethnic groups: there are over 80 of these daily and weekly publications appearing in over 20 languages.

There are numerous periodicals for business, trade, professional, recreational and special interest readership, although periodical publishing, particularly, suffers from substantial competition from publications originating in the U.S.A. Among periodicals, the only one which can claim to be national in its attitudes and readership is the weekly *Maclean's Canada's Magazine*.

RADIO AND TELEVISION

The 1968 Broadcasting Act set out the broadcasting policy of Canada, established the Canadian Broadcasting Corporation (CBC) as the national, publicly owned, broadcasting service and created the Canadian Radio-television and Telecommunications Commission (CRTC) as the agency regulating radio, television and cable television. The CBC is financed mainly by public funds supplemented by revenue from advertising. Broadcasters are responsible for content, but freedom of expression is guaranteed; programming is to use predominantly Canadian creative and other resources; and Canadians are entitled to broadcasting services in English and French. Broadcasting stations make radio and television service available to 98 per cent of the population: 55 per cent of Canadian homes subscribe to cable television service and existing circuits make this service, which is provided by 562 cable television systems, immediately available to 80 per cent of Canadian homes. Most television programming is in colour and 82 per cent of homes have colour TV sets.

Many privately-owned television and radio stations have affiliation agreements with the CBC and help to distribute the national services. The major private networks are CTV, TVA (which serves the province of Quebec) and Global (serving the province of Ontario), as well as the educational networks.

Canadian Radio-television and Telecommunications Commission (CRTC): Ottawa, Ont. K1A 0N2; f. 1968; regional offices in Montreal, Halifax, Winnipeg and Vancouver; Chair, Dr. JOHN MEISEL; Vice-Chair, JOHN E. LAWRENCE (Telecommunications), RÉAL THERRIEN (Broadcasting).

Canadian Broadcasting Corporation (CBC): 1500 Bronson Ave., P.O.B. 8478, Ottawa, Ont. K1G 3J5; f. 1936; financed mainly by public funds, with supplementary revenue from commercial advertising on CBC television; Pres. A. W. JOHNSON; Exec. Vice-Pres. PIERRE DESROCHES.

RADIO

The CBC operates two AM networks, in English and in French, and two FM stereo networks in English and French. In the north, the CBC's northern radio service provides both national network programming in English and French, and special local and shortwave programmes, some of which are broadcast in the languages of the Indian and Inuit peoples. In March 1980 there were 685 outlets for CBC radio (60 CBC-owned stations, 536 CBC-

owned relay transmitters, 120 private affiliates and rebroadcasters). CBC radio service is within reach of 99.3 per cent of the population. Radio Canada International, the CBC's overseas shortwave service, has its headquarters in Montreal and its transmitters near Sackville, New Brunswick. It broadcasts daily in 11 languages and distributes recorded programmes free for use by broadcasters throughout the world.

TELEVISION

The CBC operates two television networks, in English and in French. Northern television does not yet have the capacity for local production but it supplements the national programmes it carries with English and French programmes from other regions of Canada and with service broadcasting and film documentaries in the Inuktitut language. As of March 1980, CBC television was carried on 782 outlets (31 CBC-owned stations, 493 CBC-owned rebroadcasters, 258 private affiliates and rebroadcasters). CBC television is available to over 98 per cent of the population. CBC transmission methods include leased channels on the Canadian space satellite Anik. Anik 1 started operation in 1973 and was the world's first synchronous domestic communications satellite.

CTV Television Network: 42 Charles St. E., Toronto, Ont. M4Y 1T5 and Box 181, 48 Farnham, Place Bonaventure, Montreal, Que. H5A 1A9; Pres. and Man. Dir. M. CHERCOVER; Senior Vice-Pres. and Asst. to the Pres. J. RUTTLE; 26 privately-owned affiliated stations from coast to coast, with 204 rebroadcasters; 96.4 per cent coverage of Canadian TV households.

Global Television Network: 81 Barber Green Rd., Don Mills, Ont. M3C 2A2; Pres. DAVID MINTZ; six transmitters serving urban and rural markets in southern Ontario.

TVA: 1600 East Blvd. Maisonneuve, P.O.B. 170, Station C, Montreal, Que. H2L 4P2; Vice-Pres. CLAUDE BLAIN; French-language network, with 6 stations in Quebec and 7 rebroadcasters serving 98 per cent of the Province and French-speaking communities in Ontario and New Brunswick.

There are three educational services; those in Ontario and Quebec operate their own television stations and networks, and that in Alberta purchases time for educational cultural programming on the private TV stations of the Province.

ROADS

Provincial Governments are responsible for roads within their boundaries. The Federal Government is responsible for the construction of major roads in the Yukon and Northwest Territories and in National Parks. In 1976 there were 493,766 km. of roads of which 33 per cent were paved.

The Trans-Canada Highway extends from St. John's, Newfoundland, to Victoria, British Columbia.

INLAND WATERWAYS

The St. Lawrence River and the Great Lakes provide Canada and the United States with a system of inland waterways extending from the Atlantic Ocean to the western end of Lake Superior, a distance of 3,769 km. (2,342 miles). There is a 10.7-metre (35-foot) navigation channel from Montreal to the sea and an 8.25-metre (27-foot) channel from Montreal to Lake Erie. The St. Lawrence Seaway project was initiated partly to provide a deep waterway and partly to satisfy the demand for more electric power. Power development has been undertaken by the Provinces of Quebec and Ontario, and by New York State. The navigation facilities and conditions are within the jurisdiction of the federal governments of the United States and Canada.

CAPE VERDE

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Cape Verde is an archipelago of ten islands and five islets in the North Atlantic, about 500 km. west of Dakar, Senegal. All but three of the islands are mountainous and lie in a semi-arid belt, with little rain and high temperatures (yearly average 24°C (76°F)). The spoken language is Crioulo but Portuguese is the official language. The majority of the population is Roman Catholic. The flag has a vertical red stripe at the hoist and horizontal stripes of yellow and green. The red stripe bears a black five-pointed star enclosed by a wreath of palms. The capital is Cidade de Praia.

Recent History

The Cape Verde Islands were colonized by the Portuguese in the 15th century. From the 1950s liberation movements in the Portuguese Overseas Territories were working for independence and, in this context, the archipelago was linked with the mainland territory of Portuguese Guinea (now Guinea-Bissau). However, the *Partido Africano da Independência do Guiné e Cabo Verde* (PAIGC) at first made little progress in the islands, although regarding them as an integral part of its territory. When Guinea-Bissau was granted independence in 1974 the Cape Verde Islands elected to become independent rather than enter into an immediate federation with Guinea-Bissau. In December 1974 a transitional government was formed, comprising representatives of the Portuguese government and the PAIGC; members of other political parties were excluded. A National People's Assembly was elected in June 1975 with a majority voting for the PAIGC platform of ultimate union with Guinea-Bissau. Independence was granted on July 5th, 1975, and Aristides Pereira, Secretary-General of the PAIGC, became the country's first President.

Although Cape Verde and Guinea-Bissau remained constitutionally separate, the PAIGC supervised the activities of both states. President Pereira announced in 1977 that the two countries would continue to pursue common policies, but progress towards this goal was slow. Moreover, the Government disapproved of the 1980 coup in Guinea-Bissau, and in January 1981 the Cape Verde wing of the PAIGC was dissolved and the *Partido Africano da Independência de Cabo Verde* (PAICV) was created. In February President Pereira was re-elected unanimously by the National Assembly and all articles concerning ultimate union with Guinea-Bissau were removed from the Constitution.

Cape Verde professes a non-aligned stance in foreign relations.

Government

Legislative power is vested in the National People's Assembly, with 56 deputies elected by universal adult suffrage for five years. Executive power is held by the President, elected for five years by the Assembly. The President appoints and leads the Council of Ministers. The PAICV is the only political party permitted.

Defence

The Popular Revolutionary Armed Forces have been formed from ex-combatants in the liberation wars, and number between 3,000 and 4,000. There is also a police force and paramilitary People's Militia. In 1980 the U.S.S.R. supplied two torpedo boats as a nucleus of a navy.

Economic Affairs

Little was done under Portuguese rule to develop the natural resources of the islands, such as the fishing grounds and the large reserves of underground water, or to alleviate the effects of the recurrent droughts and severe soil erosion. The agricultural subsistence economy of the islands, which normally employs about three-quarters of the population (mainly on smallholdings), has suffered from the drought which was in its thirteenth consecutive year in 1981. By 1977 production of the staple crops, maize, beans and sweet potatoes, had fallen to less than a tenth of pre-drought levels, while 80 per cent of the live-stock had had to be slaughtered. Other crops normally grown include sugar cane, cassava, castor beans, bananas, coffee and groundnuts. However, substantial food imports are needed to combat the serious shortages and there is heavy rural unemployment, partly remedied by government employment schemes in soil and water conservation projects. A five-year reforestation plan was launched in 1978, and an investment programme was drawn up in 1981, involving expenditure of 3,814 million escudos. Priority remained with agriculture, especially in development of water resources.

Remittances from over 500,000 workers abroad (covering 39 per cent of the trade deficit in 1979) help to alleviate the economic problems, but foreign aid is indispensable, European and Arab countries, Japan, the U.S.A., the UN and the Africa Development Fund contributing in recent years. Fishing forms a large part of the islands' development potential and accounted for 70 per cent of export revenue in 1979. A cold-storage plant was opened at Mindelo in 1981 and a desalination plant was planned. The Government was to invest a total U.S. \$45 million to develop a modern fishing industry.

There is little industry except for a few small fish-processing and canning factories but the Government hopes to exploit the islands' resources of pozzolana, cement and salt, and to develop construction and packing materials, soft drinks, clothing, pasta and tobacco industries.

Transport and Communications

There were 1,300 km. of roads in 1978. There are four airports, the principal one being at Espargos on Sal Island, and four airfields. The principal port is at Mindelo on São Vicente, where it is hoped that a shipyard will be operational by 1982. There were about 2,000 telephones in 1977.

Social Welfare

Medical facilities are limited and there is a severe shortage of staff and buildings, although plans for a

CAPE VERDE

Introductory Survey, Statistical Survey

national health service are being implemented. In 1976 there were 2 hospitals of 200 beds each, and 37 health centres. Development plans include the building of over 300 small local health units. Technical assistance, including the services of a team of doctors, was offered by Portugal in 1978.

Education

Compulsory education is divided into *Instrução Primária* (for children aged 7-12 years, of whom 95 per cent were at school in 1980) and *Escola Preparatória* (12-14 years). From the age of 14, children may attend one of the three *liceus* which provide a three-year general course or a two-year pre-university course. In 1976 there was also one industrial and commercial school and three teacher training units. In 1980/81 50,661 pupils attended 436 primary schools.

Priority is being given to the building of schools, teacher training and the reduction of the 70 per cent illiteracy rate.

Tourism

The Government launched a tourist development

scheme in 1980. A large hotel already exists at Santa Maria beach on Sal Island, and another was being built in Praia in 1980. The islands of Santo Antão, São Tiago, Fogo and Brava offer a combination of mountain scenery and vast beaches.

Public Holidays

1982: May 1st (Labour Day), June 1st (Children's Day), July 5th (Independence Day), September 12th (Day of the Nation), December 25th (Christmas Day).

1983: January 1st (New Year), January 20th (National Heroes' Day), March 8th (Women's Day).

Note: Prior to 1977 the Cape Verde escudo was at par with the Portuguese escudo. Between September 1949 and August 1971 the official exchange rate (par value) was U.S. \$1=28.75 escudos (1 escudo=3.478 U.S. cents). From December 1971 to February 1973 the central rate was \$1=27.25 escudos. In terms of sterling, the exchange rate was £1=69.00 escudos from November 1967 to August 1971; and £1=71.006 escudos from December 1971 to June 1972. Since March 1973 the Portuguese escudo has been allowed to "float". The average exchange rate (escudos per U.S. dollar) was: 24.67 in 1973; 25.41 in 1974; 25.55 in 1975; 30.22 in 1976. In 1977 the link between the Cape Verde and Portuguese currencies was ended and the Cape Verde escudo was revalued in terms of a "basket" of currencies. The exchange rate (escudos per dollar) at December 31st was: 33.90 in 1977; 35.94 in 1978; 38.31 in 1979; 42.49 in 1980.

THE CONSTITUTION

(Adopted September 5th, 1980)

Summary

The President of the Republic is elected by the National Assembly and has a mandate of five years, as do the Assembly deputies, elected by universal adult suffrage. The Prime Minister is nominated by the same Assembly, to which he is responsible. The President of the National Assembly may act as interim President if necessary. He is not a member of the Government.

The Constitution abolishes both the death sentence and life imprisonment. Citizens have equality of rights and

duties, without sexual, social, intellectual, religious or philosophical distinction. This extends to all Cape Verde emigrants throughout the world. Citizens also have freedom of thought, expression, association, demonstration, religion, rights and duties and the right to health care, culture and education.

On February 12th, 1981, all articles concerning plans for eventual union with Guinea-Bissau were revoked, and an amendment for the creation of the PAICV inserted.

THE CENTRAL AFRICAN REPUBLIC

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Central African Republic lies in the heart of equatorial Africa and is bounded by Chad to the north, Sudan to the east, the Congo and Zaïre to the south and Cameroon to the west. Climate is tropical, with an average temperature of 26°C (79°F) and heavy rains in the south-western forest areas. The national language is Sangho, but French is the official language. Many of the population hold animist beliefs, but about one-third are Christians. The national flag (proportions 5 by 3) consists of horizontal bands of blue, white, green and yellow, divided vertically by a red band, with a yellow star and crescent in the top left-hand corner. The capital is Bangui.

Recent History

The former territory of Ubangi-Shari (Oubangui-Chari), within French Equatorial Africa, became the Central African Republic on achieving self-government in December 1958. Full independence was attained on August 13th, 1960. The leading figure in the campaign for self-government and the first President, Barthélemy Boganda, died in 1959. His successor, David Dacko, led the country to independence and in 1962 established a one-party state under the *Mouvement d'évolution sociale de l'Afrique noire* (MESAN). President Dacko was overthrown at the end of 1965 by a military coup which brought to power his uncle, Col. (later Marshal) Jean-Bédél Bokassa.

In 1966 Colonel Bokassa formed a new government, rescinded the Constitution and dissolved the National Assembly. Bokassa, who became Life President in 1972 and Marshal of the Republic in 1974, forestalled several alleged coups and used stern measures to suppress opposition.

In 1976 the Council of Ministers was replaced by the Council for the Central African Revolution, and ex-President Dacko was named personal adviser to the President. In December 1976 the Republic was renamed the Central African Empire (C.A.E.) and a new Constitution was instituted. Bokassa was proclaimed the first Emperor and Dacko became his Personal Counsellor. The Imperial Constitution provided for the establishment of a National Assembly but no elections were held.

The elaborate preparations for Bokassa's coronation in December 1977 were estimated to have consumed a quarter of the country's income. In May 1978 Bokassa reshuffled the army leadership and strengthened its powers. In July he dismissed the Council of Ministers and appointed a new Council headed by Henri Maidou, previously a Deputy Prime Minister. In January 1979 violent protests, led by students, were suppressed, reportedly with the help of Zairian troops. Following the alleged massacre of nearly 100 schoolchildren by Bokassa himself, the Emperor's ambassador in Paris, Sylvestre Bangui, resigned in protest, and in September he set up a government-in-exile, comprising four opposition groups. On September 20th, while Bokassa was in Libya, David Dacko deposed him in a bloodless coup, strongly backed by France, and resumed power as President. The country

thus became a republic again and Henri Maidou was appointed Vice-President.

The prime concern of President Dacko was to establish order and economic stability in the Republic, but his Government was not accepted without some opposition, particularly from students who objected to the continuation in office of C.A.E. Ministers. A government reshuffle in July 1980 did not still the growing unrest, now affecting many sectors of the population, and in September Dacko gave way to demands for the dismissal of both Henri Maidou and the unpopular Prime Minister, Bernard Christian Ayandho, resulting in a new government led by Jean-Pierre Lebouder, formerly Minister of Planning. Bokassa, now in exile, was condemned to death *in absentia* in December 1980.

A new Constitution was promulgated in February 1981 and elections held in March confirmed Dacko in the presidency. Following accusations by his opponents of electoral malpractice, rioting broke out and a state of siege was declared in Bangui. In April Simon-Narcisse Bozanga was appointed Prime Minister. Political tension increased after a bomb attack on a Bangui cinema in July, the left-wing *Mouvement centrafricain de libération nationale* claiming responsibility. As a result, this party was banned along with two other opposition parties, which were later reinstated. During July and August a state of siege was again declared and the army was called in to maintain order. The Chief of Staff of the Armed Forces, Gen. André Kolingba, deposed President Dacko in a bloodless coup on September 1st, citing "gross violations of democracy" as reasons for the military take-over. Elections were expected to take place within 12 months.

Government

All legislative and executive power rests with the *Comité militaire pour le redressement national*, headed by Gen. André Kolingba. The Council of Ministers consists entirely of army officers.

Defence

In July 1981 the armed forces numbered about 2,385 men, and there were 3,000 men in paramilitary forces. Military service is compulsory for adult males and for male and female civil servants. France maintains a garrison of 1,200 men at Bouar.

Economic Affairs

About 87 per cent of the population is engaged in agriculture, which accounted for 30 per cent of G.D.P. in 1980. The most important cash crops are cotton and coffee, but subsistence farming predominates. Since independence production and export of food crops have declined. Industrial production is minimal and accounted for 11 per cent of G.D.P. in 1980, the main activities being in timber, tanning, textile production, and brewing.

Diamonds are found in alluvial deposits, mainly in the west of the country, and were the major export earner from the mid-1960s until 1973. Coffee became the main export commodity in 1974 and cotton also surpassed diamonds in

CENTRAL AFRICAN REPUBLIC

Introductory Survey, Statistical Survey

1975, but production of both coffee and cotton fell in 1979/80 to 11,000 and 14,000 tons respectively. Timber has recently increased in importance, with greater exploitation of the extensive forests, while the proposed Bangui-Yaoundé railway and improvements to river navigation should increase removals efficiency. The contribution of diamonds to total export revenue fell from 53 per cent in 1968 to 17 per cent in 1976, after which the Government took steps to promote investment in the industry; revenue then steadily increased, and reached 50 per cent of exports in 1979. A feasibility study for a state uranium mining company, with French and Swiss participation, was begun in 1977; reserves are estimated at approximately 15,000 tons of metal at Bakouma, with a potential capacity to yield 1,000 tons per year. The possibility of oil reserves on the border with Chad is being investigated.

The 1980/81 emergency social and economic *Plan de Redressement*, involved expenditure of 98,000 million francs CFA, drawn largely from French and international aid, and was devoted to infrastructure and the agricultural sector. The first priorities of the new regime are to provide for the basic needs of the population and to reverse the declining economic trends; reforms are planned also for major state enterprises, which at present have no coherent policies or structure.

The C.A.R. is a member of UDEAC and has close economic links with France.

Transport and Communications

Bangui is about 1,450 km. from the sea but roads radiate east, north and west to Sudan, Chad and Cameroon respectively. There are no railways, and the chief artery of transport is the Oubangui river which flows into the Congo and thereby provides an outlet from Bangui to Brazzaville, from where a railway runs to the port of Pointe-Noire. There is an international airport at Mpoko,

near Bangui, and numerous airfields allow for extensive internal services.

Social Welfare

An Employment Code guarantees a minimum wage for 60,000 employees and provides for employment accident benefits. There are 36 prefectorial hospitals, 36 maternity hospitals, 108 welfare centres and 200 first aid centres.

Education

About half of children in the appropriate age-group receive primary education. Secondary education is available to only about 9 per cent of children. In 1975 there were 23,895 students in secondary and teacher-training schools.

Tourism

The main tourist attractions are the waterfalls, the forests and many varieties of wild animals. There is excellent hunting and also opportunities for fishing. In 1974 there were over 4,000 visitors.

Public Holidays

1982: May 1st (May Day), May 20th (Ascension), May 31st (Whit Monday), August 13th (Independence Day), August 15th (Assumption), November 1st (All Saints' Day), December 25th (Christmas).

1983: January 1st (New Year), April 4th (Easter Monday).

THE CONSTITUTION

Note: Following the coup of September 1st, 1981, the Constitution was suspended.

The Constitution of February 16th, 1959, was modified five times up until 1964, and was abrogated on January 4th, 1966, when a constitutional act was adopted giving the President full competence to act in all affairs of state. The Imperial Constitution of December 4th, 1976, was abolished with the overthrow of Emperor Bokassa in September 1979. A new Constitution, comprising the

basic principles of that of 1959, was drawn up during 1980 and was promulgated on February 6th, 1981, following a national referendum on February 1st. It provided for a multi-party state governed by a Council of Ministers, headed by the President, and a National Assembly, to be directly elected by universal adult suffrage.

TRADE UNION

Union Générale des Travailleurs du Centrafrique (U.G.T.C.): B.P. 877, Bangui; became the sole recognized union in 1964 (activities suspended in May 1981).

TRANSPORT

RAILWAYS

There are no railways at present but there is a long-term project to connect Bangui to the Trans-Cameroon railway.

A railway is also due to be constructed from Sudan's Darfur province into the C.A.R.'s Vakaga province.

ROADS

Compagnie Nationale des Transports Routiers: B.P. 330, Bangui; f. 1971; cap. 31m. francs CFA; Dir.-Gen. GEORGES YABADA; state-controlled.

In 1979 there were about 22,550 km. of roads, 7,790 km. of which were passable at all seasons by heavy vehicles. The total includes 4,950 km. of *routes nationales*, 6,300 km. of secondary roads and 11,300 km. of regional roads. Both the total road length and the condition of the roads is inadequate for the traffic that uses the road system and only 290 km. have a tarmac surface. Eight main routes leave Bangui, and those that are surfaced have been toll roads since 1971. Research into the Trans-African Lagos-Mombasa highway and the possibilities it may offer the C.A.R. is being undertaken at a cost of 29,000 million francs CFA.

INLAND WATERWAYS

Agence Centrafricaine des Communications Fluviales (ACCF): B.P. 822, Bangui; f. 1969; state-owned; Dir.-Gen. P. GOUNETENZI.

There are two navigable waterways. The first is open all the year, except in the dry season, and is formed by the Congo and Oubangui rivers; convoys of barges (of up to 800 tons load) ply between Bangui and Brazzaville. The second is the river Sangha, a tributary of the Oubangui, on which traffic is seasonal. There are two ports, at Bangui and Salo, on the rivers Oubangui and Sangha respectively. Efforts are being made to develop the stretch of river upstream from Salo to increase the transportation of timber from this area, and Nola will be developed as a timber port.

CIVIL AVIATION

There is an international airport at Bangui and several small airports for internal services.

Air Centrafrique: B.P. 1432, rue du Président Boganda, Bangui; f. 1966 as Air Bangui, reorganized in 1971; extensive internal services; fleet of one Caravelle and one DC-4; Dir.-Gen. JOSEPH DOUALE.

Air Afrique: B.P. 875, Bangui; the C.A.R. Government has a 7 per cent share in Air Afrique.

The C.A.R. is also served by the following foreign airlines: Aeroflot (U.S.S.R.), Air Zaire, Cameroon Airlines and UTA (France).

TOURISM

Direction Générale du Tourisme: P.O.B. 655, Bangui.

June. By September President Goukouni had finally renounced the proposed merger with Libya and requested the withdrawal of Libyan troops. This took place in November and a neutral inter-African force was installed under the auspices of the OAU.

Government

The Transitional Government of National Unity comprises a Council of Ministers headed by the President and representing the interests of all factions in Chad. Executive and legislative power is exercised by the Council, and for administrative purposes the country is divided into 14 Prefectures.

Defence

Chad's army numbered about 3,000 in July 1981. There are also some 200 men in the air force and 6,000 men in the National Guard and other paramilitary forces.

Economic Affairs

Chad's economy is essentially one of subsistence, based on agriculture, stock-breeding and fishing, which together employ 90 per cent of the working population. The only significant cash crop is cotton, which provides the basis for Chad's major industry and more than half of all export earnings. However, in 1979/80 there was a sharp drop in production of seed cotton to only 88,000 metric tons, compared with 140,000 tons in the previous year, while the area planted fell from 271,000 hectares to only 180,000 hectares. Groundnuts are grown, but not in sufficient quantities to meet local demand or to allow Chad's oil-mills to work at full capacity. Animal resources are under-exploited, despite government efforts to improve cattle stock and the construction of modern abattoirs. Lake Chad and the Lagone-Chari basin are well-stocked with fish, producing more than 100,000 tons annually. The Government supported projects to protect agriculture by irrigation and by extensive planting of acacia trees in 1978. However, crops were threatened by the reappearance of the drought which had seriously affected the Sahel region in the early 1970s, when the rains failed in 1977. Swarms of locusts also endangered agriculture in 1978, and again in 1980.

Industry is almost entirely based on agriculture. Textile production is the most important sector, followed by food and tobacco. There is little mining at present but deposits of petroleum and metallic minerals (notably tungsten) have been discovered near Lake Chad, and there are plans to build a petroleum refinery in N'Djamena. There are also known to be substantial deposits of uranium in the disputed northern territory. Chad's foreign trade is principally with France and usually shows a considerable deficit. French financial and technical aid is necessary to meet this deficit; after many years of civil war, the country

is now particularly dependent on foreign aid, with its economy in chaos, and many regions suffering a food shortage. Infrastructural projects forming part of the 1978-81 four-year Plan (which had a total investment target of 227,000 million francs CFA) were suspended because of the civil war.

Transport and Communications

There are no railways in Chad. The river Chari is navigable from N'Djamena to Sarh in the far south. Roads are inadequate and only short stretches have been surfaced. There is an international airport at N'Djamena and over 40 aerodromes.

Social Welfare

An Employment Code guarantees a minimum wage and other rights for employees. There are 4 hospitals, 28 medical centres, several hundred dispensaries and 40 qualified doctors.

Education

In 1977 about 43 per cent of children of 10 years old attended school and only 14 per cent of the population were literate. A National University was opened in 1971 and there are several technical colleges.

Tourism

Chad provides a variety of scenery from the dense forests of the south to the deserts of the north. Wild animals abound, especially in the two national parks and five game reserves.

Public Holidays

1982: May 1st (Labour Day), May 20th (Ascension), May 25th ("Liberation of Africa", anniversary of the OAU's foundation), May 31st (Whit Monday), July 23rd (Id ul Fitr, end of Ramadan), August 11th (Independence Day), August 15th (Assumption), September 29th (Id ul Adha, Feast of the Sacrifice), November 1st (All Saints' Day), November 28th (Proclamation of the Republic), December 25th (Christmas), December 28th (Maloud, Birth of the Prophet).

1983: January 1st (New Year), April 4th (Easter Monday).

Weights and Measures

The metric system is officially in force.

Currency and Exchange Rates

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1981):

£1 sterling = 545.6 francs CFA;

LEGISLATURE

ASSEMBLÉE NATIONALE

The National Assembly and the Economic and Social Council were both dissolved after the coup of April 13th, 1975, and had not been reconstituted by December 1981.

POLITICAL ORGANIZATIONS

There are no political parties in Chad but a number of groups exercise varying degrees of influence over different areas of the country. The largest of these is the *Front de Libération National du Tchad* (FROLINAT), established in 1966 to overthrow the southern Government, which has since developed into an umbrella organization uniting many Muslim groups. At different times factions have broken away from the main FROLINAT grouping, amongst them the Vulcan Force, led by MAHAMAT AHMAT ACYL, and the *Mouvement Populaire pour la Libération*

du Tchad known as the Third Army, with which LOU MOHAMED SHAWA was associated, but of unknown influence. The most important group after FROLINAT is the *Forces Armées du Nord* (FAN) led by Houssein Habré. Both these main factions derived support from Muslims in the north, while Christian southerners are represented in a number of other groups. The total of 11 factions with fundamental differences are all represented in the Government, although in practice the Muslims exercise the greater influence.

JUDICIAL SYSTEM

The Supreme Court was abolished after the coup of April 1975. There is a Court of Appeal at N'Djamena. A criminal court sits at N'Djamena, Sarh, Moundou and Abéché and wherever else it is necessary, and each of

these four major towns has a magistrates' court. There are 43 justices of the peace. In October 1976 a permanent Court of State Security was established, comprising eight civilian or military members.

CHILE

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Chile is a long, narrow country lying along the Pacific coast of South America from Peru and Bolivia in the north to Cape Horn in the far south. It is separated from Argentina to the east by the high Andes mountains. Both the mountains and the cold Humboldt Current influence the climate; between Arica in the north and Punta Arenas in the extreme south, some 4,000 km., the average maximum temperature varies by no more than 13°C. Rainfall varies widely between the arid desert in the north and the rainy south. The language is Spanish. There is no state religion but Roman Catholics represent over 85 per cent of the population. The national flag (proportions 3 by 2) is divided horizontally, the lower half red, the upper half with a white star on a blue square at the hoist and the remainder white. The capital is Santiago.

Recent History

Chile was ruled by Spain from the sixteenth century until its independence in 1818. For most of the nineteenth century it was governed by a small oligarchy of land-owners. Chile won the War of the Pacific (1879-83) against Peru and Bolivia. Most of the present century has been marked by the struggle for power between right- and left-wing forces.

In September 1970 Dr. Salvador Allende Gossens, the Marxist candidate of *Unidad Popular*, a coalition of five left-wing parties including the Communist Party, was elected to succeed Eduardo Frei Montalva, who was President between 1964 and 1970. Allende promised to transform Chilean society by constitutional means and imposed an extensive nationalization programme. The Government failed to obtain a congressional majority in the elections of March 1973 and was confronted with a deteriorating economic situation as well as an intensification of violent opposition to its policies. Accelerated inflation led to food shortages and there were repeated clashes between pro- and anti-Government activists. The armed forces finally intervened in September 1973, claiming that a military take-over was necessary because of the increasingly anarchic situation and economic breakdown. President Allende died during the coup.

Congress was dissolved, all political activity banned and strict censorship introduced. The military junta dedicated itself to the eradication of Marxism and the reconstruction of Chile, and its leader, Gen. Augusto Pinochet Ugarte, became Supreme Chief of State in June and President in December 1974. The junta has been widely criticized abroad for its repressive policies and violations of human rights. In November 1977 the first strike since the coup took place at the El Teniente copper mine, and anti-government demonstrations and protests became more widespread.

In September 1976 three constitutional acts were promulgated with the aim of creating an "authoritarian democracy." All political parties were banned in March

1977, when the state of siege was extended. Following a UN General Assembly resolution in December 1977 condemning the Government for violating human rights, Gen. Pinochet called a referendum in January 1978 to endorse the regime's policies. As over 75 per cent of the voters supported the President in his defence of Chile "in the face of international aggression", he felt able to lift the state of siege, in force since 1973, and replace it by a state of emergency.

A draft constitution, in preparation since 1975, was the subject of a hastily-announced plebiscite in September 1980. Voting was declared compulsory, on pain of imprisonment, and abstentions were classified as "yes" votes. The result showed 67 per cent in favour of the new proposals, but the poll has been denounced as fraudulent and void by opposition politicians. The new constitution is described as providing a "transition to democracy" but, although Gen. Pinochet ceased to be head of the armed forces, the state of emergency was extended and the additional clauses could allow him to maintain his firm hold on power until 1998. Opposition to the Government continued to be expressed verbally by the Catholic Church and trade unions in 1980 and 1981, and armed attacks on government property and personnel by political groups increased.

Foreign relations have been strongly influenced by the military Government's record on human rights. Pressure from abroad eased in 1981 when the U.S.A. lifted its ban on arms sales and its economic and military sanctions. In 1980 the United Kingdom restored full diplomatic relations and lifted its arms embargo (imposed in 1974) on the grounds of improvement in the human rights situation in Chile. Reports from Amnesty International and other human rights bodies in 1980 and 1981 did not suggest any improvement.

Chile has two border disputes: to the north with Bolivia and to the south with Argentina. In 1978 Bolivia broke off diplomatic relations with Chile on the grounds that it had not shown sufficient flexibility over the question of Bolivia's access to the Pacific. The issue of sovereignty in the Beagle Channel has, on occasions, brought Chile and Argentina to the verge of war. In December 1978 the case was referred to Papal mediation and the resultant proposals were presented to the two governments in December 1980. The proposals are unofficially said to have awarded the islands of Picton, Lennox and Nueva to Chile and designated the surrounding sea waters under shared jurisdiction. Chile formally accepted these terms in February 1981 but Argentina had made no formal reply by December.

Government

Chile is a republic, divided into 12 regions and a metropolitan area. Since the coup in September 1973 the country has been ruled by a military junta. In 1975 a Council of State was established to draft a new constitution, which was promulgated in March 1981 and will take full effect

from 1989 (see Constitution). Meanwhile, executive and legislative power is vested in the President and the junta. The clause stating that all Chilean nationals must obey the national authorities was effective from October 1980.

Defence

Military service in army or navy is compulsory for one year at 19 years of age. In July 1981 the army had a strength of 53,000, the air force 15,000 and the navy 24,000. Para-military security forces number about 27,000 carabincros. Defence expenditure for 1979 amounted to 25,600 million pesos.

Economic Affairs

In 1980 about 16 per cent of the working population were engaged in agriculture, but the sector contributes less than 10 per cent of the G.D.P. Although the country has great agricultural potential, land use is inefficient and the Government's refusal to protect domestic produce against cheaper imports resulted in the import of 1 million tons of grain in 1980, while total cultivated area fell by 12.8 per cent from 1979. Major crops include wheat, barley, oats, rye, sugar beet, maize, pulses, root vegetables and fruits. Timber products form the second most important export sector (after copper), accounting for nearly 10 per cent of export earnings in 1980. Fishing also has great development potential, with the total catch reaching 2,816,700 metric tons in 1980.

Chile is one of the world's largest producers and exporters of copper. Its total reserves are estimated to represent 23 per cent of the world's proven resources and are concentrated in the Chuquibambilla and El Teniente mines. Copper's share of total exports by value was reduced from 83 per cent in 1973 to 46 per cent in 1980, partly as a result of a policy of diversification and partly as a result of fluctuations in world demand. In 1981 the copper price was given a temporary boost by the six-week strike at El Teniente. There is considerable uncertainty over the future of the industry in view of the denationalization programme begun in 1980 in all sectors. One suggestion made in 1981 was that all new deposits would be privately managed.

Other minerals of economic importance are iron ore (for domestic consumption and export, mainly to Japan), molybdenum, manganese, lead, zinc, silver, mercury, gold, limestone, marble, coal, nitrates and iodine. Petroleum and natural gas are found in the south. Chile imports 70 per cent of its petroleum requirements but, with the discovery of large new deposits in the Magellan Straits, it is hoped to satisfy domestic oil consumption by 2003. It is planned to build a natural gas liquefaction complex at Cabo Negro, with an initial production of 7 million cubic metres of LNG per day by 1984. Other domestic resources of energy, such as coal and hydro-electricity (which accounted for 10 and 8 per cent respectively of national energy consumption in 1979), are also being developed rapidly.

Manufacturing, which accounts for about 20 per cent of the G.D.P., has faced very strong foreign competition since the Government's drastic reduction of import duties. Industrial production rose by 5 per cent in 1980, with the emphasis having been shifted from import substitution to export promotion. Growing sectors are steel, chemicals, electrical and electronic equipment, car

assembly and, with a growth rate of 17 per cent in 1980, the construction industry.

In 1973 the junta inherited an economy with inflation between 500 and 1,000 per cent, low reserves and a declining G.D.P. The Allende Government had introduced wide-ranging state control but the Pinochet Government is establishing a market-oriented economy by encouraging foreign investment, denationalizing most of the enterprises nationalized under the Allende Government and by drastically reducing import tariffs. After slow growth in earlier years, production expanded considerably in 1977, when the G.D.P. rose by 9.7 per cent, compared with a decline of 14.3 per cent in 1975. The growth rate was 6.5 per cent in 1980, compared with over 8 per cent in 1978 and 1979.

In order to remain competitive on the world markets, Chile cut tariff barriers and until June 1979 maintained a "crawling peg" policy for devaluing the peso. This resulted in considerable progress in the external sector, with exports rising by 94 per cent in 1979 and 1980 combined. This rise, however, was limited by the fall in world demand for copper, fish and timber and so failed to match the rise in value of imports of 124 per cent over the same two years. The cost of imports was affected by world increases in the price of wheat and petroleum and by domestic demand for consumer goods, especially cars. By 1980 the 1976 trade surplus of U.S. \$583 million had become a deficit of \$1,002 million.

Although the military government has been successful in one of its main economic aims, that of reducing inflation (from 506 per cent in 1974 to 31.2 per cent in 1980), by 1981 signs of recession were appearing. Foreign willingness to invest in Chile boosted the foreign debt from \$8,463 million in 1979 to \$11,239 million in 1980, the year when the trade balance showed a deficit. Commitment to the free market system has allowed several commercial enterprises to collapse, and the reduction in the official rate of unemployment from 12.6 per cent in 1980 to 8.7 per cent in 1981 was achieved largely by the minimum employment programme, which offers a very low wage.

Transport and Communications

The difficult topography of Chile, including mountains, forest and desert, make communications a formidable problem. The traditional means of communication is the sea. The chief ports are Valparaíso, Talcahuano, Antofagasta, San Antonio and Punta Arenas. In 1980 there were 7,472 km. of railways and in 1981 there were 79,583 km. of roads, of which 9,840 km. were paved. The principal airports are Chacalluta, 14 km. north-east of Arica, and Arturo Merino Benítez, 20 km. north-east of Santiago. There are plans to extend the provincial airport network.

Social Welfare

Employees, including agricultural workers, may receive benefits for sickness, unemployment, accidents at work, maternity and retirement, and there are dependants' allowances, including family allowances. In May 1981 social security was to be transferred to the private sector, to be run by the *Administradoras de Fondo de Pensiones*. A National Health Service was established in 1952. In December 1977 there were 35.4 hospital beds and 6 doctors per 10,000 people. Government expenditure on health was 9,217 million pesos in 1977.

Education

Primary education is free and compulsory for eight years. Secondary education lasts for a period of four years, and is divided into the general programme, geared towards general education and possible university entrance, and the technical-professional programme geared towards specialist training. The urban literacy rate is 90 per cent and the rural rate is 77 per cent. The university law of January 1981 banned all political activity in universities, reduced the number of degree courses from 33 to 12, halved future government funding and encouraged the establishment of private specialized universities.

Tourism

Chile has a wide variety of attractions for the tourist, including fine beaches, ski resorts in the Andes, lakes and rivers. There are many opportunities for hunting and fishing in the southern archipelago, where there are plans to make an integrated tourist area with Argentina, requiring investment of \$120 million.

Public Holidays

1982: May 1st (Labour Day), May 21st (Navy Day), August 15th (Assumption), September 18th (Independence Day), September 19th (Army Day), October 12th (Discovery of America), November 1st (All Saints' Day), December 8th (Immaculate Conception), December 25th (Christmas Day).

1983: January 1st (New Year's Day), April 1st-2nd (Good Friday and Easter Saturday).

FINANCE

100 centavos = 1 Chilean peso.

Coins: 10 and 50 centavos; 1 peso.

Notes: 5, 10, 50, 100, 500 and 1,000 pesos.

Exchange rates (December 1981): £1 sterling = 75.02 pesos; U.S. \$1 = 39.00 pesos.

1,000 Chilean pesos = £13.33 = \$25.64.

Note: The new Chilean peso was introduced in September 1975, replacing the escudo at the rate of 1 peso = 1,000 escudos. The Chilean escudo had been introduced in January 1960, replacing the old peso at the rate of 1 escudo = 1,000 pesos. In October 1953 the basic exchange rate was altered from U.S. \$1 = 31 pesos to \$1 = 110 pesos. However, a system of multiple exchange rates was in force until April 1956 and thereafter the free rate, which applied to external trade, fluctuated considerably, reaching 1,120 old pesos per U.S. dollar by the end of 1958. At the end of 1959 the rate was \$1 = 1,053 pesos, so the initial value of the escudo was 95 U.S. cents (\$1 = 1.05 escudos). Chile's currency, however, continued to depreciate. After mid-1970 the principal rate of exchange for overseas trade transactions fluctuated as follows: U.S. \$1 = 12.225 escudos from July 1970 to December 1971; \$1 = 15.80 escudos from December 1971 to August 1972; \$1 = 25.00 escudos from August 1972 to September 1973. In terms of sterling, the principal trading rate was £1 = 29.34 escudos from July 1970 to August 1971; and £1 = 41.17 escudos from December 1971 to June 1972. A number of other exchange rates were in force for specific transactions, e.g. imports of non-essential goods, and for non-trade purposes such as tourism. For converting the value of foreign trade the average rates of escudos per U.S. dollar were: 6.9 in 1968; 8.6 in 1969; 11.3 in 1970; 12.2 in 1971; and 20.8 in 1972. For July-September 1973 the average rate was \$1 = 42.0 escudos. On October 1st, 1973, the new military junta introduced a two-tier system with a single trading rate of \$1 = 280 escudos, representing a 91 per cent devaluation from the previous basic rate. By the end of 1973 the rate was \$1 = 360 escudos. The average rates (escudos per U.S. dollar) were 111 in 1973 and 832 in 1974. Many more devaluations subsequently occurred until by September 1975 the exchange rate was \$1 = 6,400 escudos. The initial rate for the new currency was thus \$1 = 6.40 pesos. The average exchange rate (new pesos per U.S. \$) was: 4.91 in 1975; 13.05 in 1976; 21.53 in 1977; 31.66 in 1978. A fixed rate of \$1 = 39.00 pesos was established in June 1979. The average rate for 1979 was \$1 = 37.25 pesos.

THE CONSTITUTION

Note: The 1925 constitution has been in abeyance since 1973. Government is based on the three Constitutional Acts (*see below*). A draft of a new constitution was approved by a plebiscite in September 1980, came partially into effect from March 1981 and will be fully effective from 1989.

The three constitutional acts of 1976 provide for a "new democratic structure" for Chilean society based on the family and rejecting class struggle. The following rights are guaranteed: the right to life and personal integrity, to a defence, to personal liberty and individual security; the right to reside in, cross or leave the country; the right of assembly, petition, association and free expression and the right to work. Men and women are accorded equal rights; no-one shall be obliged to join any association; any group considered to be contrary to morality, public order or state security shall be prohibited; the courts shall be able to prohibit any publication or broadcast considered to be contrary to public morality, order, national security or individual privacy.

The 1981 constitution, described as a "transition to democracy", separates the presidency from the junta and provides for presidential elections every eight years, with no re-election. The President may dissolve the legislature once during his term of office and may declare a state of emergency for up to 20 days. The bicameral legislature will consist of an upper chamber of 26 elected and nine appointed senators, who are to serve an eight-year term,

and a lower chamber of 120 deputies elected for a four-year term. All former presidents are to be senators for life. There is a National Security Council consisting of the President, the Junta (comprising the heads of the armed forces and the police) and the presidents of the Supreme Court and the Senate.

All Marxist and "totalitarian" groups are banned, limited political activity will be permitted only at the end of the "transitional period", and there is no amnesty for terrorists. There is limited freedom of assembly and of expression: workers in public or vital sectors may not strike and other employees may strike for no more than 60 days; it is illegal to disseminate doctrines of a "totalitarian" concept or ones which undermine public morals. The economy is based on the free market system. Abortion is prohibited.

Appended are 29 Transitory Clauses which had immediate effect in March 1981. The holding of elections is postponed until 1989, when the Junta will nominate the president and the "no re-election" clause will be suspended. The nomination will be submitted to a referendum.

JUDICIAL SYSTEM

The following are the main tribunals:

The Supreme Court, consisting of 13 members, appointed for life by the President of the Republic from a list of five names submitted by the Supreme Court when vacancies arise.

There are fifteen *Courts of Appeal* (in the cities or departments of Iquique, Antofagasta, Copiapó, La Serena, Valparaíso, Santiago, Presidente Aguirre Cerda, Rancagua, Talca, Chillán, Concepción, Temuco, Valdivia, Puerto Montt and Punta Arenas) whose members are appointed for life from a list submitted to the President by the Supreme Court. The number of members of each court varies. Judges of the lower courts are appointed in a similar manner from lists submitted by the Court of Appeal of the district in which the vacancy arises.

President of the Supreme Court: ISRAEL BÓRQUEZ MONTERO.

THE PRESS

Most newspapers of nationwide circulation in Chile are published in Santiago. Since the assumption of power by the military government there has been some form of censorship in force. A decree introduced in 1981 makes it illegal for the press to "emphasize or highlight news related to terrorist or extremist acts which have occurred within the country".

TRADE UNIONS

In September 1973 the Central Única de Trabajadores de Chile was outlawed as it was deemed to be a political organ of the Communist Party. Trade union activities have been severely curtailed under the present regime and in 1978 seven trade union federations, representing 529 trade unions and some 400,000 workers were banned, as they were deemed to be Marxist, and their property confiscated.

New labour legislation introduced in 1979 and embodied in the 1981 constitution included: the right of association; that unions are to be organized only on a company basis; that the Government's right to control union budgets is to be abolished; that union representatives must not engage in any political activity; that strikes involving stoppages to essential public services or which endanger national security are to be prohibited and that strikes may last no longer than 60 days.

THE PEOPLE'S REPUBLIC OF CHINA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The People's Republic of China covers a vast area of eastern Asia, with Mongolia to the north, the Soviet Union to the north and west, Pakistan to the west and India, Nepal and South-East Asia to the south. The climate ranges from sub-tropical in the far south to an annual average temperature of below 10°C (50°F) in the north and from the monsoon climate of East China to the aridity of the north-west. The principal language is Northern Chinese (Mandarin); in the south and south-east local dialects are spoken. The Xizangzu (Tibetans), Wei Wuer (Uighurs), Menggus (Mongols) and other groups have their own languages. The traditional religions and philosophies of life are Confucianism, Buddhism and Daoism. There are also small Muslim and Christian minorities. The national flag (proportions 3 by 2) is plain red with one large and four small five-pointed gold stars in the top left-hand corner. The capital is Beijing (Peking).

Recent History

The People's Republic of China was proclaimed in October 1949, following the victory of Communist forces, led by Mao Zedong, over the Kuomintang government, which fled to the island province of Taiwan. In 1971 the People's Republic was admitted to the United Nations in place of the Kuomintang regime. Most countries now recognize the People's Republic.

The economic progress during the early years of Communist rule enabled China to withstand the effects of the industrialization programmes of the late 1950s called the "Great Leap Forward", the drought of 1960-62 and the withdrawal of Soviet aid in 1960. To prevent the establishment of a ruling class, Chairman Mao Zedong launched the Great Proletarian Cultural Revolution in 1966. The excesses of the Red Guards caused the army to intervene; Liu Shaoqi, Head of State, and Deng Xiaoping, General Secretary of the Party, were disgraced. An attempted coup by the Defence Minister, Marshal Lin Biao, in 1971 failed, and by 1973 it was apparent that Chairman Mao and Premier Zhou Enlai had retained power. In 1975 Deng Xiaoping re-emerged as first Vice-Premier and Chief of the General Staff. Zhou Enlai died in January 1976. Hua Guofeng, Minister of Public Security, was appointed Premier and Deng was dismissed.

Mao died in September 1976. His widow, Jiang Qing, tried unsuccessfully to seize power, with the help of three radical members of the Party Politburo. The "gang of four" and six associates of Lin Biao were tried in November 1980. All were found guilty.

In October 1976 Hua Guofeng succeeded Mao as Party Chairman and Commander-in-Chief of the People's Liberation Army. The Eleventh Party Congress, held in August 1977, restored Deng Xiaoping to his former posts. In early 1978 the Fifth National People's Congress confirmed the appointments of Hua and Deng. In September 1980 Hua Guofeng resigned as Premier but retained his chairmanship

of the Communist Party. The election of Zhao Ziyang as Premier confirmed the dominance of the moderate faction of Deng Xiaoping.

In June 1981 Hua Guofeng was replaced as Chairman of the Communist Party by Hu Yaobang, former Secretary-General of the Politburo, and as Chairman of the Military Affairs Commission by Deng Xiaoping. The demotion of Hua to the post of a Party vice-chairman was the result of a sustained campaign by Deng to purge the Politburo of leftist elements.

China condemned Viet-Nam's invasion of Kampuchea in December 1978, and in February 1979 launched a punitive attack into northern Viet-Nam. Armed clashes across the border have continued, and talks between the two countries have failed. Relations with Western Europe and the U.S.A. are good, although the sale of U.S. arms to Taiwan remains a controversial issue. In October 1981 Taiwan rejected China's proposals for reunification, under which Taiwan would become a "special administrative region" with a high degree of autonomy, including the retention of its own armed forces.

Government

China is a unitary state. Directly under the Central Government there are 21 provinces, five autonomous regions (including Xizang) and three municipalities (Beijing, Shanghai, Tianjin). The highest organ of state power is the National People's Congress. The Congress consists of 3,478 deputies indirectly elected for five years by the provinces, autonomous regions, municipalities directly under the central government, and the People's Liberation Army. The Congress elects a Standing Committee to be its permanent organ. China has no Head of State but the equivalent functions are exercised by this Committee.

The State Council is the executive and is composed of the Premier, the Vice-Premiers and the Ministers heading ministries and commissions. The State Council is appointed by and accountable to the National People's Congress.

Local people's congresses are the local organs of state power. Local revolutionary committees, created during the Cultural Revolution, were abolished in January 1980 and replaced by local people's governments.

Defence

China is divided into 11 major military units. Total regular forces numbered an estimated 4,750,000 in July 1981. The People's Liberation Army numbered 3,900,000, the navy 360,000, and the air force 490,000. There is also a public security force and a civilian militia. All males are conscripted and military service lasts for 3 years in the army, 4 years in the air force and 5 years in the navy. Defence expenditure for 1981 was planned at U.S. \$12,500 million, but was subsequently cut to \$10,800 million.

Economic Affairs

Agriculture represents about one-quarter of China's

total national output, and employed about 75 per cent of the work force in 1979. China, with one-fifth of the world's population, accounts for 15 per cent of the world's cereal and groundnut production and almost 40 per cent of the world's pig numbers. China is the largest rice producer in the world, accounting for 38 per cent of the world harvest in 1979. The gross value of China's farm output increased by about 50 per cent in the decade up to 1978. In 1980 agricultural output grew by 2.7 per cent, compared to an 8.6 per cent increase in 1979.

China has large mineral deposits, such as coal and iron ore, which serve the iron and steel works at Anshan, Shanghai, Baotou, Wuhan and smaller plants elsewhere. Other important minerals include tungsten, molybdenum, antimony, tin, lead, mercury, bauxite, phosphate rock and manganese. The gross value of China's industrial output doubled in the decade to 1978. Since 1979 emphasis has shifted from heavy to light industry, resulting in an increase of only 1.4 per cent in the output value of heavy industry in 1980, compared with an 18.4 per cent rise in the value of light industry's output. The petroleum industry is expanding steadily, though four-fifths of the country's fuel and power needs are still met by coal. Since 1973 China has been self-sufficient in petroleum and its products, and produced 105.6 million tons of crude petroleum in 1980. China is developing its own petro-chemical industries, including fibres and plastics, and is a major producer and consumer of nitrogenous fertilizers.

The development of the economy since 1953 has been within the framework of five-year plans, but recessions occurred in the wake of the Great Leap Forward (1958-60) and during the Cultural Revolution (1966-68). In 1980 it was decided to replace the unrealistic 1976-85 Plan by a Ten-Year Plan (1981-90) and a Five-Year Plan (1981-85), and to slow down the "four modernizations" (agriculture, industry, defence, and science and technology). Since 1978 the Government's new policy on prices has provoked inflation, resulting in a 9.1 per cent increase in retail prices during the first five months of 1981.

In 1980 the value of imports rose by 19.8 per cent and exports grew by 28.7 per cent. In the first nine months of 1981 China's foreign trade increased by 10 per cent over the same period in 1980. Since the late 1970s China has pursued a much more liberal economic policy. Joint ventures and the acceptance of foreign loans are now permitted, and commercial links have been diversified. In 1980 the U.S.A. emerged as China's third largest foreign trade partner (behind Hong Kong and Japan). China has no serious balance of payments problems, but trade deficits are being met in part by deferred payments in Japan and Western Europe.

Transport and Communications

The total length of railways was over 50,000 km. in 1980. Roads are unevenly developed; national and pro-

vincial highways total 200,000 km. About 48,000 km. of inland waterways are navigable by steamships. Coastal shipping is important and the merchant fleet is expanding rapidly. There is an international airport at Beijing.

Social Welfare

Western and traditional Chinese medical attention is available in the cities, and to a lesser degree in rural areas. In 1979 there were 258,000 doctors of traditional Chinese medicine and 830,000 senior and junior doctors of Western medicine. About 1.6 million "barefoot doctors" or semi-professional peasant physicians assist with simple cures, treatment and the distribution of contraceptives. There were over 1.9 million hospital beds in 1979. Large factories and other enterprises provide social services for their employees. Industrial wage-earners qualify for pensions.

Education

The education system expanded rapidly after 1949. Much importance is attached to kindergartens. Primary schooling covers five years and middle school six years. During the Cultural Revolution PLA-worker teams took control of schools and universities, and selection for admission was based on political assessment. After 1977 there was a return to conventional standards, with the reintroduction of entrance examinations, but in 1979 China still had 120 million adult illiterates. In 1980 some 146 million pupils attended primary school, 56 million middle school, and 1.15 million received higher education.

Tourism

Tourism is developing rapidly. Tours are organized for groups of visitors, and Western-style hotels exist in Beijing, Shanghai, Guangzhou and elsewhere. In 1980 5.7 million foreigners and overseas Chinese tourists visited China.

Public Holidays

1982: May 1st (Labour Day), August 1st (Army Day), October 1st and 2nd (National Days).

1983: January 25th-27th* (Lunar New Year).

* From the first to the third day of the first moon of the lunar calendar.

Weights and Measures

1 catty (*jin*) = 0.5 kg. or 1.1023 lb.

1 zhang = 3.34 metres or 3.45 yards.

1 mu = 0.0667 hectare or 0.1647 acre.

Currency and Exchange Rates

100 fen = 10 jiao = 1 yuan.

Exchange rates (December 1981):

£1 sterling = 3.33 yuan;

U.S. \$1 = 1.73 yuan.

STATISTICAL SURVEY

Note: Wherever possible, figures in this Survey exclude Taiwan province. In the case of unofficial estimates for China, it is not always clear if Taiwan is included or excluded. Where a Taiwan component is known, either it has been deducted from the all-China figure or its inclusion is noted.

FINANCE

Renminbi (RMB or "People's Currency"):

100 fen (cents) = 10 jiao (chiao) = 1 Renminbiao (People's Bank Dollar), usually called a yuan.

Coins: 1, 2 and 5 fen.

Notes: 10, 20 and 50 fen; 1, 2, 5 and 10 yuan.

Exchange rates (December 1981): £1 sterling = 3.33 yuan; U.S. \$1 = 1.73 yuan.

100 yuan = £30.05 = \$57.80.

Note: The new yuan, equal to 10,000 old yuan, was introduced in March 1955. The initial exchange rate was U.S. \$1 = 2.4618 new yuan (1 yuan = 40.62 U.S. cents) and this remained in effect until August 1971. The market rate was \$1 = 2.2673 yuan from January to June 1972; \$1 = 2.2174 yuan from July to October 1972; and \$1 = 2.2401 yuan from November 1972 to January 1973. Since February 1973 the rate against the dollar has been frequently adjusted. The average exchange rate (yuan per dollar) was: 1.9612 in 1974; 1.8598 in 1975; 1.9414 in 1976; 1.8578 in 1977; 1.6836 in 1978; 1.5550 in 1979; 1.4984 in 1980. In terms of sterling, the exchange rate between November 1967 and June 1972 was £1 = 5.908 yuan.

THE CONSTITUTION

(Adopted on March 5th, 1978, by the Fifth National People's Congress; amended July 1st, 1979, effective January 1st, 1980.)

Preamble*(Summary)*

The founding of the People's Republic of China in 1949 marked the beginning of the historical period of socialism in our country. Since then, under the leadership of Chairman Mao and the Chinese Communist Party, the people have carried out Chairman Mao's proletarian revolutionary line and have won great victories in socialist revolution and socialist construction.

Chairman Mao Zedong was the founder of the People's Republic of China. All our victories in revolution and construction have been won under the guidance of Marxism-Leninism-Mao Zedong Thought.

The triumphant conclusion of the first Great Proletarian Cultural Revolution has ushered in a new period of development in China's socialist revolution and socialist construction. The general task for the people of the whole country in this new period is: to persevere in continuing the revolution under the dictatorship of the proletariat, carry forward the three great revolutionary movements of class struggle, the struggle for production and scientific experiment, and make China a great and powerful socialist country with modern agriculture, industry, national defence and science and technology by the end of the century.

We must persevere in the struggle of the proletariat against the bourgeoisie and in the struggle for the socialist road against the capitalist road. We must oppose revisionism and prevent the restoration of capitalism. We must be prepared to deal with subversion and aggression against our country by social-imperialism and imperialism.

Taiwan is China's sacred territory. We are determined to liberate Taiwan and accomplish the great cause of unifying our motherland.

In international affairs, we should establish and develop relations with other countries on the basis of the Five Principles of mutual respect for sovereignty and territorial integrity, mutual non-aggression, non-interference in each other's internal affairs, equality and mutual benefit, and peaceful coexistence. Our country will never seek hegemony, or strive to be a superpower. We should uphold proletarian internationalism. In accordance with the theory of the three worlds, we should strengthen our unity with the proletariat and the oppressed people and nations throughout the world, the socialist countries, and the third world countries, and we should unite with all countries subjected to aggression, subversion, interference, control and bullying by the social-imperialist and imperialist superpowers to form the broadest possible international united front against the hegemonism of the superpowers and against a new world war, and strive for the progress and emancipation of humanity.

Chapter 1**General Principles**

Article 1: The People's Republic of China is a socialist state of the dictatorship of the proletariat led by the working class and based on the alliance of workers and peasants.

Article 2: The Communist Party of China is the core of leadership of the whole Chinese people. The working class exercises leadership over the state through its vanguard, the Communist Party of China.

The guiding ideology of the People's Republic of China is Marxism-Leninism-Mao Zedong Thought.

Article 3: All power in the People's Republic of China belongs to the people. The organs through which the people exercise state power are the National People's Congress and the local people's congresses at various levels.

The National People's Congress, the local people's congresses at various levels and all other organs of state practise democratic centralism.

Article 4: The People's Republic of China is a unitary multi-national state.

All the nationalities are equal. There should be unity and fraternal love among the nationalities and they should help and learn from each other. Discrimination against, or oppression of, any nationality, and acts which undermine the unity of the nationalities are prohibited. Big-nationality chauvinism and local-nationality chauvinism must be opposed.

All the nationalities have the freedom to use and develop their own spoken and written languages, and to preserve or reform their own customs and ways.

Regional autonomy applies in an area where a minority nationality lives in a compact community. All the national autonomous areas are inalienable parts of the People's Republic of China.

Article 5: There are mainly two kinds of ownership of the means of production in the People's Republic of China at the present stage: socialist ownership by the whole people and socialist collective ownership by the working people.

The state allows non-agricultural individual labourers to engage in individual labour involving no exploitation of others, within the limits permitted by law and under unified arrangement and management by organizations at the basic level in cities and towns or in rural areas. At the same time, it guides these individual labourers step by step on to the road of socialist collectivization.

Article 6: The state sector of the economy, that is, the socialist sector owned by the whole people, is the leading force in the national economy.

Mineral resources, waters and those forests, undeveloped lands and other marine and land resources owned by the state are the property of the whole people.

The state may requisition by purchase, take over for use, or nationalize land under conditions prescribed by law.

Article 7: The rural people's commune sector of the economy is a socialist sector collectively owned by the masses of working people. At present, it generally takes the form of three-level ownership, that is, ownership by the commune, the production brigade and the production team, with the production team as the basic accounting unit. A production brigade may become the basic accounting unit when its conditions are ripe.

Provided that the absolute predominance of the collective economy of the people's commune is ensured, commune members may farm small plots of land for personal needs, engage in limited household sideline production, and in pastoral areas they may also keep a limited number of livestock for personal needs.

Article 8: Socialist public property shall be inviolable. The state ensures the consolidation and development of

the socialist sector of the economy owned by the whole people and of the socialist sector collectively owned by the masses of working people.

The state prohibits any person from using any means whatsoever to disrupt the economic order of the society, undermine the economic plans of the state, encroach upon or squander state and collective property, or injure the public interest.

Article 9: The state protects the right of citizens to own lawfully earned income, savings, houses and other means of livelihood.

Article 10: The state applies the socialist principles: "He who does not work, neither shall he eat" and "from each according to his ability, to each according to his work."

Work is an honourable duty for every citizen able to work. The state promotes socialist labour emulation, and, putting proletarian politics in command, it applies the policy of combining moral encouragement with material reward, with the stress on the former, in order to heighten the citizens' socialist enthusiasm and creativeness in work.

Article 11: The state adheres to the general line of going all out, aiming high and achieving greater, faster, better and more economical results in building socialism, it undertakes the planned, proportionate and high-speed development of the national economy, and it continuously develops the productive forces, so as to consolidate the country's independence and security and improve the people's material and cultural life step by step.

In developing the national economy, the state adheres to the principle of building our country independently, with the initiative in our own hands and through self-reliance, hard struggle, diligence and thrift, it adheres to the principle of taking agriculture as the foundation and industry as the leading factor, and it adheres to the principle of bringing the initiative of both the central and local authorities into full play under the unified leadership of the central authorities.

The state protects the environment and natural resources and prevents and eliminates pollution and other hazards to the public.

Article 12: The state devotes major efforts to developing science, expands scientific research, promotes technical innovation and technical revolution and adopts advanced techniques wherever possible in all departments of the national economy. In scientific and technological work we must follow the practice of combining professional contingents with the masses, and combining learning from others with our own creative efforts.

Article 13: The state devotes major efforts to developing education in order to raise the cultural and scientific level of the whole nation. Education must serve proletarian politics and be combined with productive labour and must enable everyone who receives an education to develop morally, intellectually and physically and become a worker with both socialist consciousness and culture.

Article 14: The state upholds the leading position of Marxism-Leninism-Mao Zedong Thought in all spheres of ideology and culture. All cultural undertakings must serve the workers, peasants and soldiers and serve socialism.

The state applies the policy of "letting a hundred flowers blossom and a hundred schools of thought contend" so as to promote the development of the arts and sciences and bring about a flourishing socialist culture.

Article 15: All organs of state must constantly maintain close contact with the masses of the people, rely on them, heed their opinions, be concerned for their weal and woe,

streamline administration, practise economy, raise efficiency and combat bureaucracy.

The leading personnel of state organs at all levels must conform to the requirements for successors in the proletarian revolutionary cause and their composition must conform to the principle of the three-in-one combination of the old, the middle-aged and the young.

Article 16: The personnel of organs of state must earnestly study Marxism-Leninism-Mao Zedong Thought, wholeheartedly serve the people, endeavour to perfect their professional competence, take an active part in collective productive labour, accept supervision by the masses, be models in observing the Constitution and the law, correctly implement the policies of the state, seek the truth from facts, and must not have recourse to deception or exploit their position and power to seek personal gain.

Article 17: The state adheres to the principle of socialist democracy, and ensures to the people the right to participate in the management of state affairs and of all economic and cultural undertakings, and the right to supervise the organs of state and their personnel.

Article 18: The state safeguards the socialist system, suppresses all treasonable and counter-revolutionary activities, punishes all traitors and counter-revolutionaries, and punishes newborn bourgeois elements and other bad elements.

The state deprives of political rights, as prescribed by law, those landlords, rich peasants and reactionary capitalists who have not yet been reformed, and at the same time it provides them with the opportunity to earn a living so that they may be reformed through labour and become law-abiding citizens supporting themselves by their own labour.

Article 19: The Chairman of the Central Committee of the Communist Party of China commands the armed forces of the People's Republic of China.

The Chinese People's Liberation Army is the workers' and peasants' own armed force led by the Communist Party of China; it is the pillar of the dictatorship of the proletariat. The state devotes major efforts to the revolutionization and modernization of the Chinese People's Liberation Army, strengthens the building of the militia and adopts a system under which our armed forces are a combination of the field armies, the regional forces and the militia.

The fundamental task of the armed forces of the People's Republic of China is: to safeguard the socialist revolution and socialist construction, to defend the sovereignty, territorial integrity and security of the state, and to guard against the subversion and aggression by social-imperialism, imperialism and their lackeys.

Chapter 2 The Structure of the State

SECTION I

THE NATIONAL PEOPLE'S CONGRESS

Article 20: The National People's Congress is the highest organ of state power.

Article 21: The National People's Congress is composed of deputies elected by the people's congresses of the provinces, autonomous regions, and municipalities directly under the Central Government, and by the People's Liberation Army. The deputies should be elected by secret ballot after democratic consultation.

The National People's Congress is elected for a term of five years. Under special circumstances, its term of office

may be extended or the succeeding National People's Congress may be convened before its due date.

Local people's congresses elect, and have the power to recall, members of the people's governments at the corresponding levels. People's congresses at county level and above elect, and have the power to recall, the members of the standing committees of the people's congresses at the corresponding levels, the presidents of the people's courts and the chief procurators of the people's procuratorates at the corresponding levels.

Deputies to local people's congresses at various levels have the right to address inquiries to the people's governments, people's courts, people's procuratorates and organs under the people's governments at the corresponding levels, which are all under obligation to answer.

Article 37: Local people's governments at various levels are the executive organs of local people's congresses at the corresponding levels and they are also local organs of state administration.

The local people's governments at various levels are formed as prescribed by law.

Local people's governments at various levels carry out the decisions of the people's congresses at the corresponding levels, and the decisions and orders of the organs of state administration at higher levels; and in the case of local people's governments at and above the county level, they also carry out the decisions of the standing committees of the people's congresses at the corresponding levels. Local people's governments at various levels direct the administrative work of their respective areas, and issue decisions and orders within the limits of their authority as prescribed by law. Local people's governments at county level and above appoint or remove the personnel of organs of state according to the provisions of the law.

Local people's governments at various levels are responsible and accountable to people's congresses at the corresponding levels and to the organs of state administration at the next higher level; when people's congresses at and above county level are not in session, local people's governments at the corresponding levels are responsible and accountable to the standing committees of the people's congresses, and all work under the unified leadership of the State Council.

SECTION IV

THE ORGANS OF SELF-GOVERNMENT OF NATIONAL AUTONOMOUS AREAS

Article 38: The organs of self-government of autonomous regions, autonomous prefectures and autonomous counties are people's congresses and people's governments.

The election of the people's congresses and people's governments in the national autonomous areas, their terms of office, their functions and powers and also the establishment of their agencies shall conform to the basic principles governing the organization of local organs of state as specified in Section III, Chapter 2 of the Constitution.

In autonomous areas where a number of nationalities live together, each nationality is entitled to appropriate representation in the organs of self-government.

Article 39: The organs of self-government of national autonomous areas exercise autonomy within the limits of their authority as prescribed by law, in addition to exercising the functions and powers of local organs of state as specified by the Constitution.

The organs of self-government of national autonomous areas may, in the light of the political, economic and cultural characteristics of the nationality or nationalities in a given area, make regulations on the exercise of autonomy and also specific regulations and submit them to the Standing Committee of the National People's Congress for approval.

In performing their functions, the organs of self-government of national autonomous areas employ the spoken and written language or languages commonly used by the nationality or nationalities in the locality.

Article 40: The higher organs of state shall fully safeguard the exercise of autonomy by the organs of self-government of national autonomous areas, take into full consideration the characteristics and needs of the various minority nationalities, make a major effort to train cadres of the minority nationalities, and actively support and assist all the minority nationalities in their socialist revolution and construction and thus advance their socialist economic and cultural development.

SECTION V

THE PEOPLE'S COURTS AND THE PEOPLE'S PROCURATORATES

Article 41: The Supreme People's Court, local people's courts at various levels and special people's courts exercise judicial authority. The people's courts are formed as prescribed by law.

In accordance with law, the people's courts apply the system whereby representatives of the masses participate as assessors in administering justice. With regard to major counter-revolutionary or criminal cases, the masses should be drawn in for discussion and suggestions.

All cases in the people's courts are heard in public except those involving special circumstances, as prescribed by law. The accused has the right to defence.

Article 42: The Supreme People's Court is the highest judicial organ.

The Supreme People's Court supervises the administration of justice by local people's courts at various levels and by special people's courts; people's courts at the higher levels supervise the administration of justice by people's courts at the lower levels.

The Supreme People's Court is responsible and accountable to the National People's Congress and its Standing Committee. Local people's courts at various levels are responsible and accountable to the people's congresses at the corresponding levels and to their standing committees.

Article 43: The Supreme People's Procuratorate exercises procuratorial authority to ensure observance of the Constitution and the law by all the departments under the State Council, the local organs of state at various levels, the personnel of organs of state and the citizens. Local people's procuratorates and special people's procuratorates exercise procuratorial authority within the limits prescribed by law. The people's procuratorates are formed as prescribed by law.

The Supreme People's Procuratorate directs the work of local people's procuratorates at various levels and of special people's procuratorates; people's procuratorates at the higher levels direct the work of those at the lower levels.

The Supreme People's Procuratorate is responsible and accountable to the National People's Congress and its Standing Committee. Local people's procuratorates at various levels are responsible and accountable to people's congresses at the corresponding levels and to their standing committees.

JUDICIAL SYSTEM

The general principles of the Chinese judicial system are laid down in Articles 41-43 of the January 1980 constitution (*see page 126*).

PEOPLE'S COURTS

Supreme People's Court: Beijing; f. 1949; the highest judicial organ of the State; directs and supervises work of lower courts; Pres. JIANG HUA (term of office four years); Vice-Pres. WANG HUIAN.

Special People's Courts.

Local People's Courts.

PEOPLE'S PROCURATORATES

Supreme People's Procuratorate: Beijing; acts for the National People's Congress in examining government departments, civil servants and citizens, to ensure observance of the law; prosecutes in criminal cases Chief Procurator HUANG HUOQING (elected by the National People's Congress for four years).

Local People's Procuratorates: undertake the same duties at the local level. Ensure that the judicial activities of the people's courts, the execution of sentences in criminal cases, and the activities of departments in charge of reform through labour, conform to the law; institute or intervene in, important civil cases which affect the interest of the State and the people.

RELIGION

During the Cultural Revolution places of worship were closed. Since 1977 the Government has adopted a policy of religious tolerance, and many churches and mosques are reopening.

ANCESTOR WORSHIP

Ancestor worship is believed to have originated with the deification and worship of all important natural phenomena. The divine and human were not clearly defined; all the dead became gods and were worshipped by their descendants. The practice has no code or dogma and the ritual is limited to sacrifices made during festivals and on birth and death anniversaries.

CONFUCIANISM

Confucianism is a philosophy and a system of ethics, without ritual or priesthood. The respects accorded Confucius are not paid to a prophet or god, but to a great sage whose teachings promote peace and good order in society and whose philosophy encourages moral living.

DAOISM

Daoism originated as a philosophy expounded by Lao Zi, born 604 B.C. The establishment of a religion was contrary to his doctrines, but seven centuries after his death his teachings were embodied into a ritual.

China Daoist Association: Beijing; Pres. CHEN YINGNING; Chair. LI YUHANG.

BUDDHISM

Buddhism was introduced into China from India in A.D. 61, and flourished during the Sui and Tang dynasties (6th-8th century). It now bears little resemblance to the religion in its original form, a number of native Chinese legends, traditions, rites and deities having been added. The Ch'an and Pure Land sects are the most popular.

Buddhist Association of China: f. 1953; Chair. ZHAO PUCHU; publ. *Dharma-ghosa* (bimonthly).

ISLAM

According to Muslim history, Islam was introduced into China in A.D. 651. It has over 11 million adherents in China, chiefly among the Wei Wuer and Hui people.

Beijing Islamic Association: Dongsu Mosque, Beijing; f. 1979; Chair. Imam Al-Hadji SALAH AN SHIWEI.

China Islamic Association: Beijing; f. 1953; Chair. MOHAMMED ALI ZHANG JIE.

CHRISTIANITY

During the 19th century and the first half of the 20th large numbers of foreign Christian missionaries worked in China.

Protestant Church: Chair. of Council Bishop DING GUANGXUN; 1 million adherents.

Roman Catholic Church: Catholic Mission, Si-She-Ku, Beijing; Bishop of Beijing MICHAEL FU TIESHAN.

Chinese Catholic Patriotic Association: Chair. Mgr. ZONG HUAIDE; 3,000 mems.

THE PRESS

There are 43 daily newspapers with a combined circulation of 34 million per issue. Each province publishes its own daily. There are approximately 1,200 periodicals published for national distribution, of which 900 deal with science and technology, 170 with politics and social sciences and 130 with art and literature. A further 610 periodicals are published in regional centres. Only the major newspapers and periodicals are listed below, and only a restricted number are allowed abroad.

TRADE FAIR

Chinese Export Commodities Fair (CECF): Guangzhou Foreign Trade Centre, Guangzhou; twice a year; April 15th-May 15th; October 15th-November 15th.

TRANSPORT

RAILWAYS

Ministry of Communications: Beijing; controls all railways through regional divisions. The railway network has been extended to all provinces and regions except Xizang, where construction is in progress. Total length exceeded 50,000 km. in 1980, of which about 1,170 km. was electrified. In addition, special railways serve factories and mines. Some of the major routes are Beijing-Guangzhou, Tianjin-Shanghai, Manzhouli-Vladivostok, Jiaozuo-Zhicheng and Lanzhou-Badou.

Note: An underground system serves Beijing. Its total length is 23 km. and further lines are under construction.

ROADS

In 1978 there were 890,200 km. of paved and unpaved roads of which 200,000 km. were national and provincial highways. Four major highways link Lhasa with Sichuan, Xinjiang, Qinghai Hu and Kathmandu (Nepal). Further construction of mountain roads is under way.

WATER TRANSPORT

Bureau of Water Transportation: Controls rivers and coast traffic. In 1978 there were 136,000 km. of inland waterways in China, 79,500 of which were open to motor ships. The main rivers are the Huanghe, Changjiang and Zhu. The Changjiang is navigable by vessels of 10,000 tons as far as Wuhan, over 1,000 km. from the coast. Vessels of 1,000 tons can continue to Chongqing upstream. Over one-third of internal freight traffic is carried by water. In 1981 the 1,782 km.-long, 1,400-year old-Grand Canal was opened to foreign tourists for the first time since 1949.

SHIPPING

The greater part of China's shipping is handled in nine major ports: Dalian, Qinhuangdao, Xingang, Qingdao, Lianyungang, Shanghai, Huangpu (Whampoa), Guangzhou and Zhanjiang. Three quarters of the handling facilities are mechanical, and harbour improvement schemes are constantly in progress. In 1980 China's merchant fleet totalled over 400 ships with a deadweight capacity of 7 million tons.

China Ocean Shipping Company (COSCO): 6 Dongchangan St., Beijing; br. offices: Shanghai, Guangzhou, Tianjin, Qingdao, Dalian; merchant fleet of 431 vessels of various types with a d.w.t. of 7.92 million tons; also operates chartered foreign ships amounting to 1.7 million d.w.t.; serves China/Japan, China/S. E. Asia, China/Australia, China/Gulf, China/Europe and China/N. America.

China's Ocean Shipping Agency: 6 Dongchangan St., Beijing; br. offices at Chinese foreign trade ports; the sole agency which undertakes business for ocean-going vessels calling at Chinese ports; arranges sea passage, booking space, transshipment of cargoes; attends to chartering, purchase or sale of ships etc.

Toho Line: Tokyo; serves Europe/China.

Lloydiano: Trieste; serves Mediterranean/China.

CIVIL AVIATION

General Administration of Civil Aviation of China (CAAC):

115 Dong-si (West) Street, Beijing; established in 1962, superseded the Civil Aviation Administration of China. CAAC controls all civil aviation activities in China, including the current domestic network of more than 166 routes, with a total length of 190,000 km. and with services to all 29 provinces and autonomous regions except Taiwan. External services operate from Beijing to Addis Ababa, Bangkok, Belgrade, Frankfurt, Hanoi, Karachi, London, Moscow, Nagasaki, New York, Osaka, Paris, Pyongyang, Rangoon, San Francisco, Sharjah, Teheran, Tokyo and Zurich; Dir.-Gen. SHEN TU; fleet of 3 Boeing 747, 4 707-320B, 6 707-320C, 5 Ilyushin Il-62, Il-18, Trident, Viscount 800, Antonov An-24, Il-14/Li-2 plus a number of smaller aircraft.

FOREIGN AIRLINES

The following foreign airlines also serve the People's Republic of China: Aeroflot (U.S.S.R.), Air France, British Airways, Cathay Pacific (Hong Kong), Civil Aviation Administration of the Democratic People's Republic of Korea, Ethiopian Airlines, Iran Air, JAL (Japan), JAT (Yugoslavia), Lufthansa (Federal Republic of Germany), PAL (Philippines), Pan Am (U.S.A.), PIA (Pakistan), SIA (Singapore), Swissair, TAROM (Romania), and Thai International.

Transport, Tourism, Atomic Energy

There are plans for the following airlines to operate flights into China: Alitalia, Canadian Pacific Airlines and KLM (Netherlands).

A new international airport at Beijing was opened in 1980. The construction of international airports at other major centres is planned.

TOURISM

China International Travel Service (Lixingshe): 6 Dongchangan, Beijing; makes travel arrangements for foreign parties; brs. in Guangzhou, Shanghai and Hong Kong.

Chinese People's Association for Friendship with Foreign Countries: Beijing; Pres. WANG BINGNAN.

General Administration for Travel and Tourism of China: Beijing; Dir. HAN KE HUA.

5.7 million tourists visited China in 1980, including many from Hong Kong and Macau. China's expanding tourist industry brought in \$617 million in foreign exchange in 1980, a rise of 35.6 per cent over 1979.

ATOMIC ENERGY

China was believed to have a total of about 40 nuclear reactors in operation at the end of 1966.

Atomic Energy Institute: Chinese Academy of Sciences, Beijing; contains an enriched uranium heavy water reactor and a cyclotron; Dir. JIAN SANJIANG.

Atomic Research Centre: Tarim Pendi, Xinjiang; f. 1953; Dir. WANG GANZHANG.

Military Scientific Council: Beijing; Dir. Dr. JIAN XUESAN.

CHINA (TAIWAN)

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of China, confined to the province of Taiwan since 1949, comprises the island of Taiwan (Formosa), the nearby Pescadore islets, and the islands of Quemoy and Matsu near the mainland. Taiwan itself lies 100 km. from the coast of south-eastern China. The average temperature is 23°C (73°F) and the average annual rainfall 2,565 mm. The official language is Mandarin Chinese. The predominant religion is Buddhism and there are Muslims, Daoists, Roman Catholics and Protestants. Confucianism has a large following. The national flag (proportions 3 by 2) is crimson, with a dark blue rectangular canton containing a white sun. The capital is Taipei.

Recent History

China's Kuomintang government, led by Gen. Chiang Kai-shek, was overthrown by the Communist revolution of 1949. Chiang and many of his supporters left the mainland and established themselves on Taiwan. In 1954 a mutual security pact was signed by which the U.S.A. pledged the protection of Taiwan and the Pescadores; in 1955 the offshore islands of Quemoy and Matsu were included in the protected area. The Taiwan regime, which still claims to be the legal government of all China, lost its seat at the United Nations to the Government of the People's Republic of China in 1971, and in 1981 was recognized by only 22 countries.

Elections were held in December 1972 for the first time in 24 years, to increase popular representation in local affairs. In 1973 the Government rejected a Beijing offer to hold secret talks on the reunification of China. This policy was strongly reaffirmed in December 1978. In October 1981 Taiwan rejected China's suggested terms for reunification, under which Taiwan would become a "special administrative region" and would have a high degree of autonomy, including the retention of its own armed forces and its relatively high standard of living.

Following the death of Chiang Kai-shek in April 1975, his son, General Chiang Ching-kuo, was elected leader of the ruling Kuomintang. In March 1978 he was also elected President of the Republic. Economic and political stability continues to be the main priority.

In January 1979 Taiwan suffered a serious setback when the U.S.A. established full diplomatic relations with Beijing and terminated the mutual security treaty with Taiwan. Commercial links are still maintained. Elections, postponed since December 1978, were held in December 1980 (see below), and in November 1981 the first major government reshuffle since Premier Sun Yun-suan's appointment in 1978 took place.

Government

The Head of State is the President, who is elected for terms of six years by the National Assembly. There are five Yuans (governing bodies), the highest legislative organ being the Legislative Yuan, to which the Executive Yuan (the Council of Ministers) is responsible. After the elections

in December 1980, the Legislative Yuan comprised 410 (mainly life) members, 70 new members having been elected and 26 appointed by the President. There are also Control, Judicial and Examination Yuans. The Legislative Yuan submits proposals to the National Assembly. Elections are by universal adult suffrage, but the great majority of Assembly seats are held by life members who formerly represented mainland constituencies. In 1980 the Assembly had 1,173 members; 76 new members were elected in December 1980.

Economic Affairs

The economy is progressing towards self-sufficiency, and Taiwan has become one of the leading exporters in Asia. Trade is chiefly with the U.S.A., Japan and South-East Asia, the most important exports being clothing, television and radio sets, plastic articles, plywood and cotton fabrics. The production of electrical goods is the main industry. Mineral resources include coal, marble, gold, petroleum and natural gas. In 1980 G.N.P. per head was NT\$82,146. In 1980 industry registered a growth rate of 7.7 per cent, and industrial production accounted for 45 per cent of G.N.P.

Defence

The armed forces totalled 451,000 men in July 1981: army 310,000, air force 67,000, navy 35,000, with a marine corps of 39,000. Military service lasts for two years. Defence expenditure for 1977/78 was estimated at NT\$63,470 million. In December 1978, as a result of the withdrawal of U.S. aid, the Government announced plans to increase military spending, as part of a programme to build up defences against mainland China.

Transport and Communications

There are 3,082.6 km. of railway and 17,487.7 km. of roads. The ports of Keelung, Hualien, Kaohsiung, Taichung and Suao handled 116.5 million metric tons of cargo in 1980. There are international airports at Taipei and Kaohsiung.

Social Welfare

The Labour Security Programme covers 2.5 million workers and provides benefits for injury, disability, birth, death and old age. In December 1980, 424,403 government employees were covered by a separate scheme. In 1978 a system of supplementary benefits for those with low incomes was introduced.

Education

Primary and junior high school education is free and compulsory between the ages of six and fifteen. Secondary schools consist of junior and senior middle schools, normal schools for teacher-training and vocational schools. There are also a number of private schools. Higher education is provided in universities, colleges, junior colleges and graduate schools. In 1980/81 there were over 2.2 million pupils enrolled in state primary schools and approximately 1.6 million in secondary schools. There are 16 universities and 11 independent colleges.

Tourism

Festivals, ancient art treasures and the island scenery are the principal attractions. In 1980 about 1.4 million tourists visited Taiwan. Japanese visitors accounted for about half of total tourist arrivals in 1980.

Public Holidays

1982: September 28th (Teachers' Day—Birthday of Confucius), October 10th (Double Tenth Day, anniversary of 1911 revolution), October 31st (Birthday of President Chiang Kai-shek—Veterans' Day), November 12th (Birthday of Sun Yat-sen), December 25th (Constitution Day).

1983: January 1st (Founding of the Republic), January 25th–27th* (Chinese New Year).

Coins: 10, 20 and 50 cents; 1 and 5 dollars.

Notes: 1, 5, 10, 50, 100, 500 and 1,000 dollars.

Exchange rates (December 1981): £1 sterling = NT\$72.92; U.S. \$1 = NT\$37.91.

NT\$1,000 = £13.71 = U.S. \$26.38.

Note: Multiple exchange rate systems were in operation from 1951 to August 1959. From March 1956 the certificate rate (used for foreign trade transactions) was U.S. \$1 = NT\$24.78 (NT\$1 = 4.04 U.S. cents). In 1958 the rate became U.S. \$1 = NT\$36.38 (NT\$1 = 2.75 U.S. cents). In August 1959 the currency was devalued and the exchange rate fluctuated close to U.S. \$1 = NT\$40.00 (NT\$1 = 2.50 U.S. cents), which became the par value in September 1970. Foreign trade was valued at this rate from January 1961 and it became the official basic rate in June 1961, though from October 1963 a selling rate of U.S. \$1 = NT\$40.10 came into force. These rates remained in effect until February 1973. From February 1973 to July 1978 U.S. \$1 = NT\$38.00 (NT\$1 = 2.63 U.S. cents). A new rate of U.S. \$1 = NT\$36.00 was introduced in July 1978. The market rate was adjusted to U.S. \$1 = NT\$36.10 in June 1979 but this was revised in 1980. The average rate (NT \$ per U.S. \$) was: 37.054 in 1978; 36.048 in 1979; 36.015 in 1980. In terms of sterling, the exchange rate was £1 = NT\$96.00 from November 1967 to August 1971; and £1 = NT\$104.23 from December 1971 to June 1972.

THE CONSTITUTION

The form of government incorporated in the Constitution, adopted in December 1946, follows the five-power system envisaged by Dr. Sun Yat-sen, which has the major features of both cabinet and presidential government. The following are the chief organs of government:

National Assembly: Composed of elected delegates; meets to elect or recall the President and Vice-President, to amend the Constitution, or to vote on proposed Constitutional amendments submitted by the Legislative Yuan.

President: Elected by the National Assembly for a term of 6 years, and may be re-elected for a second term (the two-term restriction is at present suspended). Represents country at all state functions, including foreign relations; commands land, sea, and air forces, promulgates laws, issues mandates, concludes treaties, declares war, makes peace, declares martial law, grants amnesties, appoints and removes civil and military officers, and confers honours and decorations. He also convenes the National Assembly, and subject to certain limitations, may issue emergency orders to deal with national calamities and ensure national security.

Executive Yuan: Is the highest administrative organ of the nation and is responsible to the Legislative Yuan; has five categories of subordinate organization:

Executive Yuan Council
Ministries and Commissions
Secretariat
Government Information Office and Personnel Administration Bureau
Directorate-General of Budget, Accounting and Statistics.

Legislative Yuan: Is the highest legislative organ of the state, composed of elected members; holds two sessions a year; is empowered to hear administrative reports of the Executive Yuan, and to change Government policy.

Judicial Yuan: Is the highest judicial organ of state and has charge of civil, criminal, and administrative cases, and of cases concerning disciplinary measures against public functionaries (*see* Judicial System).

Examination Yuan: Supervises examinations for entry into public offices, and deals with personal questions of the civil service.

Control Yuan: Is a body elected by local councils to impeach or investigate the work of the Executive Yuan and the Ministries and Executives; meets once a month, and has a subordinate body, the Ministry of Audit.

THE GOVERNMENT**HEAD OF STATE**

COLOMBIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Colombia lies in the north-west of South America, with the Caribbean Sea to the north and the Pacific to the west. Its continental neighbours are Venezuela and Brazil to the east, and Peru and Ecuador to the south, while Panama connects it with Central America. The coastal areas have a tropical rain forest climate, the plateaux are temperate and in the Andes there are areas of permanent snow. The language is Spanish. Ninety-five per cent of the population adhere to Roman Catholicism. There are small Protestant and Jewish minorities. The national flag (proportions 3 by 2) has horizontal stripes of yellow (half the depth), dark blue and red. The capital is Bogotá.

Recent History

Between 1948 and 1957 Colombia was torn by civil war between Conservative and Liberal factions. The dictator Gen. Gustavo Rojas Pinilla (1953-57) was overthrown by a military junta in May 1957. Democratic government was re-established in 1958 with an agreement to form a National Front, by which Liberal and Conservative Presidents would alternate in power for four-year periods and the Cabinet would be composed of equal numbers from each party. In 1966 Dr. Carlos Lleras Restrepo was elected Liberal President and, despite much political unrest and continuing guerrilla warfare, he was able to bring about economic recovery after the crisis left by Gen. Rojas. In the 1970 elections Dr. Misael Pastrana Borrero of the Conservative Party was elected. The bi-partisan form of government ended formally with the free presidential elections in April 1974, although the 1974-78 Cabinet remained subject to the parity agreement. The elections were won overwhelmingly by the Liberal Party candidate, Dr. Alfonso López Michelsen, who promised wide-ranging reforms and a more equitable distribution of income. After one year of government his failure to carry out these policies led to strikes, rioting and increased violent guerrilla activity. A state of siege was announced in June 1975, with political meetings banned and the right to *habeas corpus* rescinded. Throughout 1976 there was serious civil unrest and intensified guerrilla activity. The state of siege was lifted in June but reimposed in October.

A general strike called in September 1977 to protest against government policies and the high rate of inflation, and to demand a 50 per cent wage rise, led to the worst violence since the civil war. In the February 1978 Congressional elections the Liberal Party won a clear majority in both Houses, and the Liberal Party candidate, Dr. Julio César Turbay Ayala, won the June presidential elections. Dr. Turbay stated that he intended to keep to the spirit of the National Front agreement and promised to tackle the problems of urban terrorism and drug trafficking. The Government introduced a tough new security law and initiated measures to control drug production and smuggling, at a cost of U.S. \$125 million per year. Attempts to curtail terrorism have had little success. An amnesty offering the M-19 group political party status was rejected by them in July 1981, and martial law was imposed in the

south. The Government's fears of Cuban involvement in guerrilla activity, fuelled by the failed "invasion" in March of a small force apparently travelling from Cuba, resulted in the breaking of diplomatic relations. In October a peace commission was set up under Dr. Lleras Restrepo, a possible candidate in the presidential elections due in May 1982.

The long-standing border dispute with Venezuela has yet to be resolved, and in 1980 Nicaragua laid claim to the Colombian-owned islands of Providencia and San Andrés.

Government

Executive power is exercised by the President (assisted by a Cabinet) who is elected for a four-year term by universal adult suffrage. Legislation is carried out by Congress, consisting of the Senate (112 members elected for four years) and the House of Representatives (199 members elected for four years). The country is divided into 23 Departments, four Intendencies and three Commissaries.

Defence

At the age of 18 every male (with the exception of students) must present himself as a candidate for two years' military service. In July 1981 the strength of the army was 57,000, the navy 9,200 (including 3,000 marines) and the air force 3,800. The paramilitary police force numbers about 50,000 men. Defence expenditure for 1980 was 13,920 million pesos.

Economic Affairs

The economy depends principally on coffee, of which Colombia is the world's second largest producer and which accounted for 61 per cent of export earnings in 1980. Production rose from 8 million bags (each of 60 kg.) in 1974/75 to 13.3 million bags in 1980/81, but the fall in world prices in 1981 to the lowest level for five years left Colombia with a surplus of 3.5 million bags and attendant balance of trade problems. Other major cash crops are cotton, bananas, sugar, tobacco, cocoa and cut flowers. The principal food crops are rice, sorghum, maize, wheat and barley, and cattle and beef are also exported. Agricultural output accounts for about 25 per cent of the G.D.P., but in the years 1977-80 the increase in agricultural production was outstripped by the rise in domestic demand and in 1980 food imports reached record levels, while production grew by only 1.3 per cent. The illegal trade in Colombian marijuana and cocaine is increasing and it is believed that contraband exports of these drugs could rival the value of legal exports.

Manufacturing accounts for over 20 per cent of the G.D.P., and prominent industries are food processing, textiles, chemicals, metal products and transport equipment. By 1980, when production rose by only 2.6 per cent, the sector was suffering from loss of competitiveness abroad and credit restrictions at home. Worst hit was the textile industry, in which unemployment reached 20 per cent. The *Plan de Integración Nacional*, announced in May 1980, designated energy as its main investment sector. Of an estimated hydroelectric potential of 60,985 MW, only

4,560 MW is generated and consumption is rising by 10 per cent a year. Production of crude petroleum, which fell from 219,043 b.p.d. in 1970 to 123,836 in 1979, rose to 141,000 b.p.d. by November 1981, and 110 new wells were drilled in the first half of 1981. Known natural gas reserves total 4,716,000 million cubic feet. Average daily gas output rose from 335.1 million cubic feet in 1977 to 401.5 million in 1978 as the Guajira field came on stream in 1977. The gas will supply power for the proposed Palomino petrochemical complex.

Colombia possesses the most extensive coal reserves in Latin America. Total proven reserves are 1,267 million metric tons and potential reserves may be five times as great. The richest field is at El Cerrejón, for which Exxon undertook a U.S. \$3,000 million development contract in 1980. Export of coal is expected to reach 5 million tons in 1985 and 27 million after 1990. The vast Cerromatoso nickel reserves are estimated at 70 million tons and annual output is planned at 19,000 metric tons of ferro-nickel. Colombia also produces 95 per cent of the world's emeralds. Gold, silver, platinum, lead, zinc, copper, mercury, limestone and phosphates are also mined, and there are substantial reserves of uranium.

In the late 1960s and early 1970s Colombia's economic development was more promising than in most Latin American countries, with the annual G.D.P. growth rate averaging 6.2 per cent between 1966 and 1976. In 1979 the growth rate was 5.5 per cent, compared with 8.8 per cent in 1978. The volume of exports expanded by 270 per cent between 1970 and 1978. In 1980 and 1981, however, the economic situation deteriorated as the value of coffee exports fell from U.S. \$2,095 million in 1979/80 to \$1,565 million in 1980/81, and unrestricted imports continued. The foreign borrowing policy resulted in the doubling of the foreign debt between December 1978 and December 1980 to reach \$2,100 million. The decline of the external sector emphasized the high level of government spending and the private sector has called for help in the form of easier credit and a reduction in borrowing to curb inflation. The rate of inflation rose from 17.8 per cent in 1978 to 29.8 per cent in 1979 and 26.5 per cent in 1980, and was expected to exceed 25 per cent again in 1981. The inflow of currency from illegal exports and narcotics continued to have an inflationary effect.

Colombia is a member of ALADI and the Andean Pact, and joined GATT in May 1981.

Transport and Communications

The high mountains make land transport difficult so that the principal means of transportation is by air. There are more than 100 airports and six international airports. There were 53,852 km. of roads in 1978 and 3,043 km. of railways in 1980. There are plans to construct a new Jungle Edge highway to provide direct access to the interior. Major road projects are the Bogotá-Medellín highway, the final stretch of the Panamerican highway near the Panamanian border and the reconstruction of the Turbo-Medellín highway. The 1979-82 Plan provides for the construction of 550 km. of new roads, the reconstruc-

tion of 1,350 km. and the upgrading of a further 1,721 km. Much freight and cattle as well as passenger traffic is carried on the River Magdalena.

Social Welfare

There is compulsory social security paid for by the Government, employers and employees, and administered by the Institute of Social Security. It provides benefits for disability, old age, death, sickness, maternity, industrial accidents and unemployment. Large firms must provide life insurance for their employees and there is a comprehensive system of pensions. In 1977 there were 688 hospitals and clinics and 150 health centres, with 46,488 beds. The benefits of the health service do not reach all inhabitants, and a report issued by the Family Welfare Institute in 1981 put the level of infant mortality at 64 per 1,000 live births, one of the highest rates in the world.

Education

Elementary education is free and compulsory for five years. No child may be admitted to secondary school unless these five years have been successfully completed. Secondary education is for six years. In 1977 there were 174 institutions of higher education, of which 83 were classed as universities. Adult illiteracy averaged 15 per cent in 1979.

Tourism

The main tourist attractions are the Caribbean coast, including the island of San Andrés, the 16th-century walled city of Cartagena, the Amazonian town of Leticia, the Andes mountains of up to 6,000 metres, the extensive forests and jungles and pre-Columbian relics and monuments of Colonial art. In 1978 tourism was the second biggest foreign exchange earner. Most of the 826,000 visitors in 1978 came from Venezuela, Ecuador and the U.S.A.

Figures for births in 1970-73 and (except for Bogotá) marriages are based on baptisms and marriages recorded in Roman Catholic church registers. Figures for births after 1973 refer to births registered in the same year. Figures for deaths are based on burial permits. Registration is incomplete and the UN estimates average annual rates as: births 33.3 per 1,000 in 1970-75, 32.1 per 1,000 in 1975-80; deaths 9.0 per 1,000 in 1970-75, 8.2 per 1,000 in 1975-80.

THE CONSTITUTION

The Constitution now in force was promulgated in 1886 and has been amended from time to time. In 1957 it was amended to provide for the alternation of the presidency between the two major parties. All citizens over the age of 18 are eligible to vote. Civil rights and social guarantees include freedom of education, the right to strike (except in the public sector), public aid to those unable to support themselves, freedom of assembly, of the press, and the right to petition. All male citizens are required to present themselves for possible military service at the age of 18.

THE PRESIDENT

Executive power is vested in the President of the Republic, who is elected by popular suffrage for a four-year term of office. The President cannot hold office for two consecutive terms but may be re-elected at a later date.

The President is assisted in the government of the country by a Cabinet which he appoints. A substitute (*primer designado*) is elected by Congress, subject to bi-annual re-appointment, to act in the event of a Presidential vacancy. The President appoints the governors of the twenty-three departments, the four intendencies and the three commissaries.

CONGRESS

Legislative power is exercised by Congress, which is composed of the Senate and the House of Representatives. Members of both chambers are elected by direct suffrage for a period of four years. The Presidents in each House are elected for sixty days.

JUDICIARY

The administration of justice is in the hands of the Supreme Court, superior district tribunals, and lower courts. The magistrates of the Supreme Court of Justice are elected by Congress from lists presented by the President. The term of office is five years and the magistrates may be re-elected indefinitely.

NATIONAL ECONOMIC COUNCIL

Direction of the nation's finances is in the hands of the Controller-General, who is appointed for two years. A National Economic Council including five ministers and also representatives of banking, industrial and agricultural interests, has functioned since 1935.

LOCAL GOVERNMENT

For administrative purposes the country is divided into twenty-three departments, four intendencies and three commissaries. The departments are further divided into municipalities. Governors for the departments are appointed by the President, but regional legislatures are elected by the local inhabitants and enjoy considerable autonomy, including the management of local finances. Mayors for the municipalities are appointed by the governors.

AMENDMENTS

Various constitutional reforms were promulgated in December 1968, including the following amendments: to increase the membership of the Senate from 106 to 112, and the maximum membership of the Chamber of Representatives from 204 to 214; to increase from two to four years the term of office of representatives; to eliminate the two-thirds majority required for matters of importance; to enable the Government to legislate by decree for a maximum period of 90 days in any one year in the event of an economic crisis, though such decrees must relate only to the matters which caused the crisis; from 1970, proportional representation to be allowed in departmental and municipal elections; the same principle to apply to congressional elections after 1974. An amendment was also promulgated whereby the "minority" party must have "adequate" representation in government positions.

Note: A state of siege has been in force intermittently since 1948. It was last declared in October 1976.

JUDICIAL SYSTEM

The Supreme Court of Justice (Calle 11, No. 4-41, Bogotá) is divided into four subsidiary courts of Civil Cassation, Criminal Cassation, Labour Cassation and Constitutional Procedure. The twenty-four judges of the Supreme Court are elected for life although they may be removed from office if considered to be unfit by reason of conduct or age. Vacancies are filled from within the Court by election by the members. For matters of great importance and government business, the three courts of the Supreme Court sit together as a Plenary Court.

The country is divided into judicial districts, each of which has a superior court of three or more judges. There are also other Courts of Justice for each judicial district, and judges for each province and municipality.

In 1978 there were 3,000,000 radio receivers.

TELEVISION

Television services began in 1954 and are operated by the state monopoly, INRAVISION, which controls two commercial and one educational station. Broadcasting time is distributed among competing programmers through a public tender and most of the commercial broadcast time is dominated by programmers such as RTI, Punch, Caracol and Colvisión. The first channel broadcasts daily for 16 hours, the second channel for about 8 hours. The NTSC colour television system was adopted in 1979.

In 1978 there were 1,750,000 television sets in use.

THE COMOROS*

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Federal Islamic Republic of the Comoros is an archipelago lying between the East African coast and Madagascar. The group comprises four main islands (Njazidja, Nzwani and Mwali, formerly Grande-Comore, Anjouan and Mohéli respectively, and Mayotte) and numerous islets and coral reefs. The climate is tropical, with considerable variations in rainfall and temperature from island to island. The official languages are Arabic and French but the majority of the population speak Comoran, a blend of Swahili and Arabic. Islam is the state religion. The flag is green, bearing a white crescent moon and four five-pointed white stars. The capital is Moroni, on Njazidja.

Recent History

Formerly attached to Madagascar, the Comoros became a separate French Overseas Territory in 1947. The islands achieved internal self-government in December 1961, with a Chamber of Deputies and a Government Council to control local administration.

Elections held in December 1972 produced a large majority for parties advocating independence and Ahmed Abdallah became President of the Government Council. In June 1973 he was restyled President of the Government. A referendum in December 1974 resulted in a 96 per cent vote in favour of independence, despite the opposition of the Mayotte Party, seeking the status of a French Department for the island of Mayotte.

On July 6th, 1975, after France decided that any constitutional settlement must be ratified by all the islands voting separately, the Chamber of Deputies voted for immediate independence. The Chamber elected Abdallah to be first President of the Comoros and constituted itself as the National Assembly. France made no attempt to intervene but maintained control of Mayotte. President Abdallah was deposed in August and the Assembly was abolished. A National Executive Council was established, with Prince Said Mohammed Jaffar, leader of the opposition *Front National Uni*, as its head and Ali Soilih, leader of the coup, among its members. In November the Comoros was admitted to the UN as a unified state comprising the whole archipelago but France continued to support Mayotte, although recognizing the independence of the three remaining islands in December. In February 1976 Mayotte voted overwhelmingly to retain its links with France.

As relations with France deteriorated, all bureaucratic and technical staff were withdrawn and all development aid cut off. Ali Soilih was elected Head of State in January 1976. A new constitution was drawn up, leaving executive and legislative nominations in Soilih's hands. He began a series of reforms, and hundreds of citizens moved to Mayotte, reporting political repression.

In May 1978 Soilih was shot dead following a coup by a group of about 50 European mercenaries, led by a Frenchman, Bob Denard, on behalf of the exiled former President, Ahmed Abdallah. A Federal Islamic Republic was proclaimed. The mercenaries remained to run vital services, but their presence soon became an embarrassment and in July the Comoros was expelled from the OAU.

A new constitution was drawn up and approved by a referendum in October, on the three islands excluding Mayotte, by 99.31 per cent of votes. Abdallah was elected President in the same month, and in December elections were held to form a Federal Assembly. In January 1979 the Assembly approved the formation of a one-party state. Unofficial opposition groups, however, continue to exist, such as *FNUK-UNIKOM* and the *Comité National de Salut Public* (see Political Parties). In February 1981 rumours of an attempted coup were officially denied.

Diplomatic relations with France were resumed in July 1978 and in November the two countries signed agreements on military and economic co-operation, apparently deferring any decision on the future of Mayotte. The OAU readmitted the Comoros in February 1979.

Government

According to the Constitution of October 1978 (*q.v.*), the Comoros is ruled by a President, elected for six years by universal adult suffrage. He is assisted by a Council of Ministers headed by a Prime Minister. Legislative power lies with the Federal Assembly, with 38 members directly elected for five years, while each island has a certain amount of autonomy under a Governor and Council.

Defence

The national army, the *Forces Armées Comoriennes*, is between 700-800 strong; there are about 20 French officers.

Economic Affairs

The economy of the Comoros is in a disastrous condition. Apart from a minute industrial sector, which concentrates on the distillation of essences, vanilla processing, soft drinks and woodwork, the population work in primitive agriculture. Cassava, sweet potatoes, bananas and rice are the main food crops, but more than half of the islands' food is imported. The dominant sector, that of the colonial plantations, is geared exclusively to the cultivation of ylang-ylang, vanilla, cloves and copra for export to a world market in recession, and earnings are quite inadequate to cover the cost of imports. The soil is over-exploited, ill-suited to arable or pasture and, in places, severely eroded. Over-population, severe unemployment, poor harvests, landlessness, lack of natural resources, poor communications and the emigration of trained personnel to the Gulf states all add to the country's economic problems. However, the Government is aiming for self-sufficiency.

* Most of the information contained in this chapter refers to the whole Comoros Archipelago, which the independent Comoran state claims as its national territory. However, the island of Mayotte (Mahoré) is, in fact, administered by France. Separate information on Mayotte may be found in the chapter on French Overseas Possessions (p. 350).

THE COMOROS

ciency in basic foodstuffs, and by 1981 major maize, coconut and poultry projects had also been set up. Plans were made to develop stock-breeding and small fishing concerns, although the latter's potential is limited.

Until 1975 French aid kept the economy afloat, but no effort to develop a basis for an independent economy was made. When France cut off all aid in July 1975, it left the islands virtually bankrupt, with a 1976 budget deficit of 6,000 million francs CFA. After diplomatic relations were restored in July 1978, aid resumed, and in 1980 totalled 57 million French francs. Saudi Arabia, Kuwait, the United Arab Emirates and the EEC also contribute to development projects.

Transport and Communications

Transport facilities are very limited, even between the islands themselves, and most inland traffic is carried on by sailing boats. There are air and sea links with the rest of the world via Madagascar and East Africa. In 1980 work began on 70 km. of new roads, and improvement to Moroni and Hahaya airports and Mutsamudu port.

Social Welfare

In 1975 there were three hospitals and a number of general welfare centres and maternity units.

Education

Under French rule teaching facilities were grossly inadequate, only 23 per cent of children receiving any formal education, but this had risen to 40 per cent by 1981. In late 1975 secondary education ceased after the withdrawal of all French teaching staff, but some schools

Introductory Survey, Statistical Survey

were reopened with the aid of teachers from other French-speaking countries. According to a UNICEF study there are enough Comoran teachers to provide basic education for all children through traditional Koranic schools. An education project was launched in 1980, financed by the African Development Fund.

Tourism

There is a developing tourist industry but fewer than 2,000 tourists a year stay in the islands' four hotels. The chief attractions are the beaches, underwater fishing and mountain trips.

Public Holidays

1982: May 21st (Leilat al Meiraj, Ascension of Muhammad), June 23rd (Ramadan begins), July 6th (Independence Day), July 23rd (Id ul Fitr, end of Ramadan), September 29th (Id ul Adha, Feast of the Sacrifice), October 19th (Muharram, Islamic New Year), October 28th (Ashoura), November 12th, December 28th (Mouloud, birth of the Prophet).

Roads (1973): 750 km. of officially classified roads, of which 280 km. tarmacadamized; 3,600 motor vehicles.

International Shipping (1973): 279 vessels (displacement 112,000 net registered tons) entered; freight: 8,700 metric tons loaded, 54,391 metric tons unloaded.

Civil Aviation (1973): 15,227 passenger arrivals, 15,674 passenger departures, 909 tons of freight handled.

Note: Unless otherwise indicated, tables in this chapter include figures for Mayotte.

THE CONSTITUTION

The Constitution summarized below was approved by popular referendum on October 1st, 1978. It is not in effect on the island of Mayotte, which it envisages as "rejoining the Comoran community" at some later date.

GENERAL PRINCIPLES

The preamble affirms the will of the Comoran people to derive from the state religion, Islam, inspiration for the regulation of government, to adhere to the principles laid down by the Charters of the United Nations and the Organization of African Unity, and to guarantee the rights of citizens in accordance with the UN Declaration of Human Rights. Sovereignty resides in the people, through their elected representatives. All citizens are equal before the law regardless of origin, race, religion or beliefs. The country's motto is "Unity, Justice, Progress".

ISLAND AND FEDERAL INSTITUTIONS

The Comoros archipelago constitutes a Federal Islamic Republic. Each island has autonomy in matters not assigned by the Constitution to the federal institutions, which comprise the Presidency and Council of Government, the Federal Assembly, and the Supreme Court. There is universal secret suffrage for all citizens over 18 in full possession of their civil and political rights. The number of political parties may be regulated by federal law.

The President of the Republic is Head of State and is elected for six years by direct suffrage, and may not serve for more than two terms. He nominates a Prime Minister and not more than nine ministers to form the Council of

Government, on which each of the Governors of the islands may have a non-voting seat. The Governor of each island is directly elected for five years, and appoints not more than four Commissioners to whom administration is delegated. Each Governor is assisted by federal civil servants nominated by the President.

The Federal Assembly is directly elected for five years. Each electoral ward elects one deputy; there is a minimum of five wards per island. The Assembly meets for not more than 45 days at a time, in April and October and if necessary in extraordinary sessions. Matters covered by federal legislation include defence, posts and telecommunications, external and inter-island transport, civil, penal and industrial law, external trade, federal taxation, long-term economic planning, education and health.

The Council of each island is directly elected for four years. Each electoral ward, of which there may not be fewer than 10 or more than 35 per island, elects one councillor. Each Council meets for not more than 15 days at a time, in March and December and if necessary in extraordinary sessions. The Councils are responsible for non-federal legislation, including local taxation, and must be consulted on federal matters such as economic development which affect the island.

THE JUDICIARY

The judiciary is independent of the legislative and executive powers. The Supreme Court acts as a Constitutional Council in resolving constitutional questions and supervising presidential elections, and as High Court of Justice it arbitrates in any case where the Government is accused of malpractice (*see* section on the Judicial System).

THE GOVERNMENT

HEAD OF STATE

President and Minister of Defence: AHMED ABDALLAH ABDEREMANE (elected October 22nd, 1978).

Note: In January 1982 President Abdallah announced the dissolution of the Council of Ministers and the Federal Assembly.

COUNCIL OF MINISTERS

(November 1981)

Prime Minister: SALIM BEN ALI.

Minister of Justice and Information: MOHAMED ABDE-RAMANE.

Minister of Islamic Affairs: SAID ALI MOHAMED.

Minister of Production and Industry: ABDULLAH MOHAMED.

Minister of Foreign Affairs: ALI MROUDJAE.

Minister of Finance, Economy, Planning and Foreign Trade: SAID KAFE.

Minister of Education, Youth and Sports: MOUHAR AHMED CHARIF.

LEGISLATURE

ASSEMBLÉE FÉDÉRALE

Elections for a Federal Assembly of 38 members were held in December 1978.

President: MOHAMED TAKI.

POLITICAL PARTIES

During Ali Soilih's Presidency, political parties ceased to play an active role, though still legally in existence. The 1978 Constitution provided for the free activity of political parties, but in January 1979 the Federal Assembly voted for the establishment of a one-party system for the next twelve years.

However, unofficial opposition groups continue to exist, mostly based in France. These include **FNUK-UNIKOM** (f. from the merger of the *Front National Uni des Komores* and the *Union des Komoriens*), led by ABUBAKAR AHMED NURDIN; the **Comité National de Salut Public**, led by SAÏD ALI KEMAL; and the **Association des Stagiaires et des Etudiants Comoriens**.

U.S.A.: Antananarivo, Madagascar.
Yugoslavia: Antananarivo, Madagascar.

The Comoros also has diplomatic relations with Cuba, the Republic of Korea, Oman and the United Kingdom.

JUDICIAL SYSTEM

The **Supreme Court** consists of two members chosen by the President, two elected by the Federal Assembly, one by the Council of each island, and former Presidents of the Republic.

RELIGION

The majority of the population is Muslim.

RADIO

Radio-Comoros: B.P. 250, Moroni, Njazidja; formerly controlled by France-Régions 3, the radio was taken

over by the Comoran state in November 1975. Home service in Comoran and French.

In 1981 there were an estimated 37,600 radio sets.

In October 1981 it was announced that the **Banque de Développement des Comores** was to be established, with French and European assistance.

TRADE

Office National du Commerce: Moroni, Njazidja; Pres. SAÏD MOHAMED DJOHAIR.

TRANSPORT

ROADS

There are approximately 750 km. of roads serviceable throughout the year. A major road-improvement scheme was launched in 1979, with foreign assistance.

SHIPPING

Large vessels anchor off Moroni, Mutsamudu and Fomboni, and the port of Mutsamudu can now accommodate ships of medium tonnage alongside the quay. Goods from Europe come via Madagascar, and coasters serve the Comoros from the east coast of Africa.

Société Comorienne de Navigation: Moroni; services to Madagascar.

CIVIL AVIATION

The international airport is on Njazidja and each of the three other islands has a small aerodrome.

Air Comores (Société Nationale des Transports Aériens): B.P. 544, Moroni; f. 1975; government-owned; services to Nzwani, Mwali and Dzaoudzi and to Dar es Salaam, Mombasa, Antananarivo and Réunion; fleet of 3 DC-4 and one Bandeirante; Co-Dirs. DJAMALEDDINE AHMED, DAROUACHE ABDALLAH, ROBERT BALLESTER, Capt. RICHER DE FORGES and HASSAN ABDULKARIM.

The Comoros are also served by Air France, Air Madagascar, Air Mauritius, Air Tanzania and Royal Swazi Airlines.

TOURISM

Fewer than 2,000 tourists a year stay in the islands' four hotels, owing to limited accommodation, few flights to the islands and their political and commercial isolation. In 1981 the Government was studying two projects aimed at increasing tourism.

RELIGION

It is estimated that about half the population follow traditional animist beliefs. Just under half are Christians (Roman Catholics 530,000, Protestants 134,650). Muslims number about 41,540. In February 1978 the Government banned all religions and sects, except the Catholic Church, the Congo Evangelical Church, the Salvation Army, Islam and the followers of Simon Kibangou Prophet, Lassy Zephirin Prophet and Terynyko.

Roman Catholic Church: Metropolitan Archdiocese of Brazzaville and two suffragan dioceses (Owando and Pointe-Noire), dependent on the Sacred Congregation

for the Evangelization of Peoples. There are 130 priests.

- Chemin de Fer Congo-Océan:** B.P. 651, Pointe-Noire; a section of ATC; Gen. Man. FRANÇOIS BITA; there are 510 km. of track from Brazzaville to Pointe-Noire. A 286-km. section of privately-owned line links the manganese mines at Moanda (in Gabon), via a cableway to the Congo border at M'Binda, with the mainline to Pointe-Noire; a major realignment of the railway is in progress, to be completed in 1982. Dir. MÉDARD OKOUMOU.

INLAND WATERWAYS

The rivers Congo and Oubangui form two axes of a highly developed inland waterway system. The river Congo and seven tributaries in the Congo basin provide 2,300 km. of navigable river and the river Oubangui, developed in co-operation with the Central African Republic, 2,085 km.

COSTA RICA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Costa Rica lies in the Central American isthmus, with Nicaragua to the north, Panama to the south, the Caribbean to the east and the Pacific to the west. The climate is warm and damp in the lowlands—average temperature 27°C (81°F)—and cooler on the Central Plateau—average temperature 22°C (72°F)—where two-thirds of the population live. The language is Spanish. The state religion is Roman Catholicism. The national flag (proportions 3 by 2) consists of horizontal bands of blue, white, red, white and blue, the red band being twice the width of the others. The state flag, in addition, has on the red stripe (to the left of centre) a white disc enclosing the national coat of arms. The capital is San José.

Recent History

Following the civil war of 1948, José Figueres Ferrer, leader of the socialist Partido de Liberación Nacional (PLN), took power. He dominated national politics for decades, holding presidential office in 1948–49, 1953–58 and 1970–74. Under his leadership, Costa Rica became one of the most democratic countries in Latin America. His Government dissolved the armed forces, nationalized the banks and instituted a comprehensive social security system. In 1974 the PLN candidate, Daniel Oduber Quirós, was elected President and he continued the policies of extending the welfare state and of establishing friendly relations with communist states. Communist and other left-wing parties were legalized in 1975.

In February 1978 Rodrigo Carazo Odio, candidate of the conservative Partido Unidad Opositora (PUO) coalition (now the Coalición Unidad), was elected President and the PUO became the leading party in the Legislative Assembly. On taking office in May, President Carazo stated his intention to stamp out corruption, encourage private enterprise and modernize the police force.

The abolition of the army has helped Costa Rica to preserve a stable democracy in contrast to other Central American states. Although never Communist in sympathy, Costa Rica has aided left-wing elements in neighbouring countries, notably the Sandinistas in Nicaragua. By 1981 the regional instability was causing problems in Costa Rica, and border incidents and the inflow of refugees had created diplomatic tension. President Carazo was criticized for appearing too friendly towards Cuba and for his alleged involvement in illegal arms trafficking between Cuba and El Salvador, and in May relations with Cuba were broken off.

By 1981 financial problems were also becoming evident. The Government failed to implement the austerity measures required by the IMF, partly because it feared diminishing its reelected chances in the general and presidential elections due in February 1982. Repeated requests to the U.S.A. for financial assistance were unsuccessful, although military aid was offered.

Government

Under the Constitution of 1949, executive power is vested in the President assisted by two Vice-Presidents and a

Cabinet. The President is elected for a four-year term and must receive 40 per cent of the votes. The legislative organ is the unicameral Legislative Assembly of 57 members elected for four years. Parliamentary and presidential elections are held by compulsory adult suffrage.

Defence

There have been no armed forces since 1948. There is a Civil Guard of 5,000 men and a Rural Guard of 3,000 men. Spending on the security forces amounted to only 3.6 per cent of the total budget in 1979.

Economic Affairs

Costa Rica's economy is based on the export of coffee, bananas, meat, sugar and cocoa. Staples such as maize, beans and potatoes are also grown. In 1980 coffee and bananas accounted for 43 per cent of export earnings; the fall in the banana price was compensated for by a rise in production, but the fall in the world coffee price, which continued in 1981, considerably worsened the balance of trade. The Government is to develop the estimated 150 million tons of bauxite discovered in the Boruca region; construction of an aluminium smelter (annual production 280,000 metric tons) and an associated hydroelectric scheme is to be completed by 1986. The principal industries are food processing, textiles, chemicals and plastics. Investment is concentrated on the energy sector. Hydroelectric capacity totalled 357 MW in early 1981 and is scheduled to rise to about 1,000 MW by 1988 with the opening of four new stations. In 1981 a programme to develop fuel alcohol from sugar cane and bananas was operating.

From a comparatively healthy position in 1977, when the G.D.P. grew by 8.9 per cent, the economy faced severe problems by 1981. The trade deficit rose to U.S. \$526 million in 1980 as a result of the rising cost of petroleum, the fall in coffee prices and the increase in imports of consumer goods. The public sector foreign debt rose from \$833 million in December 1977 to \$1,800 million by December 1980 and \$2,400 million by September 1981. Agreement with the IMF for a \$320 million facility was reached in August 1980, but was invalidated in September when the Government broke one of its conditions by introducing a dual exchange rate for the colón. The rate against the dollar had been 8.6 since 1974 and fell to 12.5 by December 1980, when the colón was allowed to float. In an attempt to cover the foreign exchange gap, the Central Bank sold off virtually all its gold reserves in May 1981. Terms were again agreed with the IMF in June and again the Government failed to meet the conditions; in September it had to suspend payment on part of the total debt.

The rate of inflation, which had been reduced to 3.5 per cent in 1976, was around 20 per cent in 1980 and reached 46 per cent in the first 10 months of 1981.

Costa Rica is a member of CACM.

Transport and Communications

Excluding 683 km of the Pan-American Highway, there were 21,817 km. of roads in 1980. Three railway

companies operate 1,286 km. of track. The main ports handling external trade are Limón on the Caribbean coast and Puntarenas and Golfito on the Pacific coast, and there are local shipping services to other Central American ports. The main towns and outlying areas are connected by internal air services and there is an international airport outside San José.

Social Welfare

All social services are co-ordinated by the National Development Plan, run by the Ministry of Planning, and are organized by state institution. The Social Security Fund provides health services and general social insurance, the National Insurance Institute provides professional insurance and the Ministry of Health operates a preventive health programme through a chain of health units throughout the country. Benefits include disability and retirement pensions, workers' compensation and family assistance.

Education

All education is free and elementary education is compulsory between the ages of 6 and 13. Official secondary education is free and consists of a three-year basic course followed by a more highly specialized course of two years. At 94 per cent, Costa Rica has the highest literacy rate in Central America. Attendance figures are very high: 97 per cent of children between the ages of 6 and 13 years attend school. There are four universities, one of which is an "open" university. The education system received 34 per cent of the total budget in 1979.

Tourism

The main tourist features are the Irazú and Poás volcanoes, the Orosí valley, the ruins of the colonial church at Orosí and the jungle train to Limón. Tourists also visit San José, the capital, and the Pacific beaches of Puntarenas. Tourism is a major growth sector, although the political instability elsewhere in Central America has discouraged foreign visitors.

Public Holidays

1982: May 1st (Labour Day), June 10th (Corpus Christi), June 29th (SS. Peter and Paul), July 25th (Anniversary of the Annexation of Guanacaste Province), August 2nd (Our Lady of the Angels), August 15th (Assumption), September 15th (Independence Day), October 12th (Columbus Day), December 8th (Immaculate Conception), December 25th (Christmas Day), December 28th-31st (San José only).

1983: January 1st (New Year's Day), March 19th (Feast of St. Joseph), March 31st (Maundy Thursday), April 1st (Good Friday), April 11th (Anniversary of the Battle of Rivas).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 céntimos = 1 Costa Rican colón.

Exchange rates (December 1981):

£1 sterling = 38.53 colones;

U.S. \$1 = 20.03 colones.

1,000 Costa Rican colones=£25.96=\$49.93.

Note: Prior to September 1961 the par value of the colón was based on an exchange rate of U.S. \$1=5.60 colones. This rate was used for calculating the value of foreign trade transactions. The official buying rate corresponded to the par value and the official selling rate from 1951 was \$1=5.67 colones. At the same time there was a free market for currency in which the selling rate from 1952 was \$1=6.65 colones. In September 1961 the free market ended and a new par value was fixed at the rate of \$1=6.625 colones, which also became the trading rate. The official buying rate was \$1=6.62 colones and the official selling rate \$1=6.65 colones (i.e. the same as the old free market rate). The free market was reintroduced in 1967 and by the end of 1971 the free selling rate was \$1=8.60 colones. In April 1974 a new par value was fixed at \$1=8.57 colones. This remained in effect until December 1980, when the colón was allowed to "float". The Central American peso, used for transactions within the Central American Common Market, is at par with the U.S. dollar.

THE CONSTITUTION

The present Constitution of Costa Rica was promulgated in November 1949.

GOVERNMENT

The government is unitary: provincial and local bodies derive their authority from the national government. The country is divided into seven provinces administered by a governor who is appointed by the President. The provinces are divided into cantons, and each canton into districts. There is an elected municipal council in the chief city of each canton, the number of its members being related to the population of the canton. The municipal council supervises the affairs of the canton. Municipal government is closely regulated by national law, particularly in matters of finance.

LEGISLATURE

The government consists of three branches: legislative, executive and judicial. Legislative power is vested in a single chamber, the Legislative Assembly, which meets in regular session twice a year—from May 1st to July 31st, and from September 1st to November 30th. Special sessions may be convoked by the President to consider specified business. The Assembly is composed of 57 deputies elected for four years. The chief powers of the Assembly are to enact laws, levy taxes, authorize declarations of war and, by a two-thirds vote, suspend, in cases of civil disorder, certain civil liberties guaranteed in the Constitution.

Bills may be initiated by the Assembly or by the Executive and must have three readings, in at least two different legislative periods, before they become law. The Assembly may override the presidential vote by a two-thirds vote.

EXECUTIVE

The executive branch is headed by the President, who is assisted by his Cabinet. If he should resign or be incapacitated, the executive power is entrusted to the First Vice-President, and from him to the Second Vice-President, and finally to the President of the Legislative Assembly.

The President sees that the laws and the provisions of the Constitution are carried out, and maintains order. He has power to appoint and remove his ministers and diplomatic representatives; and to negotiate treaties with foreign nations (which are, however, subject to ratification by the Legislative Assembly). He is assisted in his duties by a Cabinet, each member of which is head of an executive department.

ELECTORATE

Suffrage is universal, compulsory and secret for persons over the age of 18 years.

DEFENCE

A novel feature of the Costa Rican Constitution is the clause outlawing a national army. Only by a continental convention or for the purpose of national defence may a military force be organized.

Costa Rica also has diplomatic relations with Albania, Burma, Grenada, Nepal, Papua New Guinea, Portugal, Saudi Arabia, South Africa and Uruguay.
 Relations with Cuba, previously broken off in 1961 and re-established in 1977, were broken off again in May 1981.

JUDICIAL SYSTEM

Ultimate judicial power is invested in the Supreme Court, the seventeen justices of which are elected by the Assembly for a term of eight years, and are automatically re-elected for an equal period, unless the Assembly decides to the contrary by a two-thirds vote. Judges of the lower courts are appointed by the Supreme Court in plenary session.

The Supreme Court may also meet as the *Corte Plena*, with power to declare laws and decrees unconstitutional. There are also four appellate courts, criminal courts, civil courts and special courts. The jury system is not used.

President of the Supreme Court: ULISES ODIO.

RELIGION

Roman Catholicism is the official religion of the country, but under the Constitution all forms of worship are tolerated. There were 1,852,021 adherents in 1976. Various protestant churches are represented.

CUBA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Cuba is an archipelago of two main islands, Cuba and Isla de Pinos, and about 1,600 keys and islets. It lies in the Caribbean, 145 km. south of Florida, U.S.A. Its other neighbours are Mexico, Jamaica and Haiti. The climate is tropical with the annual rainy season from May to October. The average annual temperature is 25°C (77°F) and hurricanes are frequent. The language is Spanish. The principal religion is Roman Catholicism. The national flag (proportions 2 by 1) has five horizontal bands, alternating blue, white, blue, white, blue, with a red triangle close to the staff, charged with a silver star. Havana (La Habana) is the capital.

Recent History

Cuba was ceded by Spain to the U.S.A. after the Spanish-American War of 1898. It became independent in 1902, although the U.S.A. retained its naval bases and reserved the right to intervene in Cuba's domestic affairs until 1934. General Fulgencio Batista's dictatorship (1933-59) was ended by a revolutionary movement, led by Dr. Fidel Castro Ruz, after many years of guerrilla war. Castro gradually established a communist system of government and nationalized all foreign property in Cuba. In 1961 Cuban exiles, with some U.S. support, attempted unsuccessfully to invade the island. The installation of Soviet rockets in Cuba precipitated a crisis with the United States in 1962. The U.S.A. broke off all relations and links with Cuba and began a total economic and political blockade. Cuba was also suspended from the Organization of American States (OAS).

In 1974 the country's first elections under Castro were held for municipal offices in Matanzas. Cuba's first "socialist" constitution was submitted to the First Congress of the Cuban Communist Party in December 1975 and came into force in February 1976 after being approved by popular referendum. The Congress also elected a new Central Committee, Secretariat and an enlarged Politburo. In addition, the existing six provinces were reorganized to form 14. In December 1976 the National Assembly of People's Power was inaugurated and Fidel Castro was elected President of the newly created Council of State. The Second Congress of the Party was held in December 1980. Fidel and Raúl Castro were re-elected First and Second Secretaries respectively, the Politburo and Central Committee were enlarged and details of the 1981-85 Plan were announced. In his final speech, Dr. Castro warned of the increased possibility of U.S. aggression towards Cuba consequent on the election of Ronald Reagan as U.S. President.

Although the OAS voted in favour of allowing countries to normalize relations with Cuba in 1975, Cuba remained excluded from membership. Relations with the U.S.A. deteriorated because of Cuban involvement in the Angolan war in 1976 and in the Ethiopian-Somali war in 1977, and withdrawal of Cuban troops from Africa was made the condition for lifting the U.S. trade embargo. The raising of emigration restrictions in April 1980 resulted in an attempt

by over 125,000 Cubans to enter the U.S.A. by landing in Florida. In 1981 the hostility between the two countries was exacerbated by U.S. allegations of the extent of Cuban political and military activity abroad and by the Cuban accusation that the U.S.A. had been instrumental in introducing the five agricultural diseases and epidemics which had decimated crops and livestock and killed over 150 people.

In 1981 Colombia, Costa Rica and Jamaica broke off diplomatic relations with Cuba, and relations with Ecuador and Panama were strained. Friendship with Mexico, however, was strengthened by the diplomacy shown by President López Portillo over Cuban exclusion from the Cancún Summit of October (*see* Mexico).

Government

In February 1976 Cuba's first socialist constitution came into force. Legislative power is vested in the National Assembly of People's Power, with 481 deputies elected for five years by municipal assemblies. The National Assembly elects from its number the Council of State, with 31 members, to be its permanent organ. The Council of State is the highest representative of the State and its President is both Head of State and Head of Government. Executive and administrative authority is vested in the Council of Ministers, appointed by the National Assembly on the proposal of the Head of State. Municipal, regional and provincial assemblies have also been established. The Communist Party of Cuba, the only authorized political party, is "the leading force of society and the state".

Defence

Conscription is for a three-year period from the age of 17; conscripts also work on the land. In July 1981 the army numbered 200,000, the navy 11,000 and the air force 16,000. Army reserves numbered a further 130,000. Paramilitary forces include 15,000 State Security troops, 3,000 border guards and a Youth Labour Army of about 100,000. In 1980 a local militia organization (*Milicias de Tropas Territoriales—MTT*) was formed. Estimated defence expenditure for 1980 was 811 million pesos. Considerable aid is received from communist countries, notably the U.S.S.R.

Economic Affairs

The state-controlled Cuban economy is basically agricultural and is heavily dependent upon the sugar crop, which provides the country with 80-85 per cent of its export revenue. The agricultural sector was severely hit in 1979/80 by sugar cane rust, blue mould which reduced the tobacco crop from the planned 45,000 tons to 5,000 tons, and an outbreak of swine fever in the province of Guantánamo. The 1980/81 sugar crop was the second largest in Cuban history and the CMEA plans to invest U.S. \$643 million (equivalent) in the years 1981-85 and \$451 million in 1986-90 to improve production, including the building of 11 new mills. In 1981 a programme was announced to raise annual production of raw sugar to 10

million metric tons by 1985. Tobacco is the second largest export crop and the 1980/81 harvest was expected to be the largest since 1927. Dairy cattle are being introduced on a large scale and citrus fruits are increasingly important. Heavy government investment in the fishing industry resulted in catches that rose from 27,100 metric tons in 1959 to a record 220,000 tons in 1978.

Cuba possesses about a tenth of the world's known nickel reserves and nickel is Cuba's second largest export. Production in 1980 was over 38,000 metric tons and it is proposed to expand the two existing processing plants and to construct two more. There are also deposits of copper, chromite, manganese, cobalt and iron ore. Cuba is dependent on the U.S.S.R. for 98 per cent of its petroleum requirements of 206,000 b.p.d. In 1981 the Mexican firm Pemex found petroleum deposits off the Cuban coast. In 1980 the U.S.S.R. undertook to aid Cuba in constructing seven nuclear energy plants.

The bulk of installed industrial capacity is made up of plants for processing agricultural produce and for the production of cement, fertilizers, textiles, domestic consumer goods and agricultural machinery. Industrial development is accorded high priority and during the 1976-80 Plan over 30 per cent of total investment went to industrial concerns. Steel output expanded by 32.1 per cent in 1977 to 330,900 tons and joint Cuban-Soviet plans announced in 1981 included an integrated steel mill with an annual capacity of 1.3 million tons. In 1981 the Karl Marx cement factory, with a capacity of 1.65 million metric tons per year, was completed at a cost of U.S. \$208 million (equivalent). Generation of electric energy grew by 10 per cent in 1978 and 1979 to reach over 9 million kWh.

In 1980 about 60 per cent of Cuba's trade was with the U.S.S.R., and total Soviet aid was estimated at U.S. \$3,000 million. In November 1980 an economic exchange agreement was signed, pledging Soviet aid up to the year 2000 at a total of at least \$35,000 million. Cuba's total debt to the U.S.S.R. was estimated at \$4,700 million in 1978; sugar, nickel and oil subsidies are considered as non-repayable grants and military aid is free. By doubling its trade surplus with other communist countries in 1978 and by cutting its deficit with the West, Cuba managed to reduce the trade deficit from \$520.5 million in 1977 to \$133.7 million in 1978, but the agricultural misfortunes of 1979/80 led to a deficit of \$542.2 million in 1980. In 1981 Canada became the leading non-Communist trading partner, surpassing Japan. Despite its hard-currency balance of payments position, Cuba is able to obtain credits from OECD countries, and at end-1978 its total debt to the West was \$2,600 million. From the mid-1970s Cuba has encouraged joint ventures with non-Communist countries, especially in the tourism and mining sectors.

The Five-Year Development Plan (1981-85), announced in July 1980, aims to increase efficiency by giving more freedom to market forces and introducing more and wider-ranging incentive schemes; basic wages will form between 15 and 25 per cent of take-home pay. There is to be an extension of free contracting of labour. A major aim is to increase the share of the industrial sector in the gross social product to 50 per cent, and strategic importance is to be given to the production of nickel and cobalt. The consequent rise in demand for electrical power will be met by the planned nuclear power plants.

Transport and Communications

In 1980 there were 18,115 km. of railways and over 30,000 km. of roads. An eight-lane highway running the length of the island from Pinar del Río to Santiago was under construction in 1980. The merchant fleet consisted of 67 vessels with a cargo capacity of 949,500 d.w.t. in 1981. The 1981-85 Development Plan envisages investment in port facilities of U.S. \$350 million, mostly in the two principal ports of Havana Bay and Cienfuegos. There are international airports at La Habana, Santiago de Cuba and Camagüey.

Social Welfare

Through the State Social Security System employees receive benefits for sickness, accident, maternity, disability, retirement and unemployment. Health services are free. In 1980 there were 54,309 hospital beds and 15,038 physicians. The 1981 budget allocation for health and education was 1,848.3 million pesos.

Education

Education is universal and free up to university level. Education is based on Marxist-Leninist principles and combines study with manual work. The 1981-85 Development Plan emphasizes improvement of professional and technological education, especially in medicine, economics, accountancy and teaching.

Pre-school national schools are run by the State for children of five years of age, and day nurseries are available for all children after their forty-fifth day. Primary education, from six to twelve years of age, is compulsory and secondary education lasts from thirteen to sixteen years of age. In 1980/81 there were 151,400 students in higher education. Workers undergoing university courses receive a state subsidy to provide for their dependants. Courses at intermediate and higher levels have an emphasis on technology, agriculture and teacher training. Adult education centres gave basic education to over 390,000 people in 1978/79.

Tourism

Cuba has much to attract the tourist—colonial cultural heritage, forests, mountains, and a coastline with many bays and inlets and excellent bathing. Tourism began to develop after 1977 with the lifting of travel restrictions by the U.S.A., and subsequently attracted European tourists. In 1979 over 100,000 tourists visited the island, compared with only 4,000 in 1973. Twenty-five new hotels were opened between 1976 and 1980, with a further eight due to be built or renovated between 1981 and 1985.

Public Holidays

1982: May 1st (Labour Day), July 25th-27th (Anniversary of the Revolution), October 10th (Wars of Independence Day).

1983: January 1st (Liberation Day).

THE CONSTITUTION

Following the assumption of power of the Castro regime on January 1st, 1959, the Constitution was suspended and a Fundamental Law of the Republic was instituted with effect from February 7th, 1959. In February 1976 Cuba's first socialist Constitution came into force after being submitted to the First Congress of the Communist Party in December 1975 and to popular referendum in February 1976.

POLITICAL, SOCIAL AND ECONOMIC PRINCIPLES

The Republic of Cuba is a socialist state in which all power belongs to the working people. The Communist Party of Cuba is the leading force of society and the state. The socialist state carries out the will of the working people and guarantees work, medical care, education, food, clothing and housing. The Republic of Cuba is part of the world socialist community. It bases its relations with the Union of Soviet Socialist Republics and with other socialist countries on socialist internationalism, friendship, co-operation and mutual assistance. It hopes to establish one large community of nations within Latin America and the Caribbean.

The State organizes and directs the economic life of the nation in accordance with a central social and economic development plan. Foreign trade is the exclusive function of the State. The State recognizes the right of small farmers to own their lands and other means of production and to sell that land. The State guarantees the right of citizens to ownership of personal property in the form of earnings, savings, place of residence and other possessions and objects which serve to satisfy their material and cultural needs. The State also guarantees the right of inheritance.

Cuban citizenship is acquired by birth or through naturalization.

The State protects the family, motherhood and matrimony.

The State directs and encourages all aspects of education, culture and science.

All citizens have equal rights and are subject to equal duties.

The State guarantees the right to medical care, education, freedom of speech and press, assembly, demonstration, association and privacy. In the socialist society work is the right and duty, and a source of pride for every citizen.

GOVERNMENT

National Assembly of People's Power

The National Assembly of People's Power is the supreme organ of the State and is the only organ with constituent and legislative authority. It is composed of deputies over the age of eighteen elected by the Municipal Assemblies of People's Power, for a period of five years. All Cuban citizens over the age of sixteen, except those who are mentally incapacitated or who have committed a crime, are eligible to vote. The National Assembly of People's Power holds two ordinary sessions a year and a special session when requested by one third of the deputies or by the Council of State. More than half the total number of deputies must be present for a session to be held.

All decisions made by the Assembly, except those relating to constitutional reforms, are adopted by a simple majority of votes. The deputies may be recalled by their electors at any time.

The National Assembly of People's Power has the following functions:

- to reform the constitution;
- to approve, modify and annul laws;

to supervise all organs of the State and government; to decide on the constitutionality of laws and decrees; to revoke decree-laws issued by the Council of State; to discuss and approve economic and social development plans, the state budget, monetary and credit systems; to approve the general outlines of foreign and domestic policy, to ratify and annul international treaties, to declare war and approve peace treaties; to approve the administrative division of the country; to elect the President, First Vice-President, the Vice-Presidents and other members of the Council of State; to elect the President, Vice-President and Secretary of the National Assembly; to appoint the members of the Council of Ministers on the proposal of the President of the Council of State; to elect the President, Vice-President and other judges of the People's Supreme Court; to elect the attorney-general and the deputy attorney-generals; to grant amnesty; to call referendums.

The President of the National Assembly presides over sessions of the Assembly, calls ordinary sessions, proposes the draft agenda, signs the Official Gazette, organizes the work of the commissions appointed by the Assembly and attends the meetings of the Council of State.

Council of State

The Council of State is elected from the members of the National Assembly and represents that Assembly in the period between sessions. It comprises a President, one First Vice-President, five Vice-Presidents, one Secretary and twenty-three other members. Its mandate ends when a new Assembly meets. All decisions are adopted by a simple majority of votes. It is accountable for its actions to the National Assembly.

The Council of State has the following functions:

- to call special sessions of the National Assembly;
- to set the date for the elections of a new Assembly;
- to issue decree-laws in the period between the sessions of the National Assembly,
- to decree mobilization in the event of war and to approve peace treaties when the Assembly is in recess;
- to issue instructions to the courts and the Office of the Attorney General of the Republic;
- to appoint and remove ambassadors of Cuba abroad on the proposal of its President, to grant or refuse recognition to diplomatic representatives of other countries to Cuba;
- to suspend those provisions of the Council of Ministers that are not in accordance with the Constitution;
- to revoke the resolutions of the Executive Committee of the local organs of People's Power which are contrary to the Constitution or laws and decrees formulated by other higher organs.

The President of the Council of State is Head of State and Head of Government and for all purposes the Council of State is the highest representative of the Cuban state.

Head of State

The President of the Council of State is the Head of State and the Head of Government and has the following powers:

- to represent the State and Government and conduct general policy;
- to call and preside over the sessions of the Council of State and the Council of Ministers;
- to supervise the ministries and other administrative bodies;

- to propose the members of the Council of Ministers to the National Assembly of People's Power;
- to receive the credentials of the heads of foreign diplomatic missions;
- to sign the decree-laws and other resolutions of the Council of State;
- to assume command of the Revolutionary Armed Forces.

In the case of absence, illness or death of the President of the Council of State, the First Vice-President assumes the President's duties.

The Council of Ministers

The Council of Ministers is the highest-ranking executive and administrative organ. It is composed of the Head of State and Government, as its President, the First Vice-President, the Vice-Presidents, the Ministers and the President of the Central Planning Board. Its Executive Committee is composed of the President, the First Vice-President and the Vice-Presidents of the Council of Ministers.

The Council of Ministers has the following powers:

- to conduct political, economic, cultural, scientific, social and defence policy as outlined by the National Assembly;
- to approve international treaties;
- to propose projects for the general development plan and, if they are approved by the National Assembly, to supervise their implementation;
- to conduct foreign policy and trade;
- to draw up bills and submit them to the National Assembly;
- to draw up the draft state budget;
- to conduct general administration, implement laws, issue decrees and supervise defence and national security.

The Council of Ministers is accountable to the National Assembly of People's Power.

LOCAL GOVERNMENT

The country is divided into fourteen provinces and 169 municipalities. The provinces are: Pinar del Río, Habana, Ciudad de la Habana, Matanzas, Villa Clara, Cienfuegos, Sancti Spiritus, Ciego de Avila, Camagüey, Las Tunas, Holguín, Granma, Santiago de Cuba and Guantánamo.

Voting for delegates to the municipal assemblies is direct, secret and voluntary. All citizens over sixteen years of age are eligible to vote. The number of delegates to each assembly is proportionate to the number of people living in that area. A delegate must obtain more than half the number of votes cast in the constituency in order to be elected. The Municipal Assemblies are elected for a period of two and a half years and are headed by Executive Committees elected from the members of the Municipal Assemblies. The members of the Executive Committees form five Regional Assemblies and the members of the Regional Assemblies in turn form Provincial Assemblies also headed by an Executive Committee. Membership of regional and provincial executive committees is proposed by a commission of Communist Party members and youth and trade union representatives. The President and Secretary of each of the regional and the provincial assemblies are the only full-time members, the other delegates carrying out their functions in addition to their normal employment.

The regular and extraordinary sessions of the local Assemblies of People's Power are public. More than half the total number of members must be present in order for agreements made to be valid. Agreements are adopted by simple majority.

JUDICIARY

Judicial power is exercised by the People's Supreme Court and all other competent tribunals and courts. The People's Supreme Court is the supreme judicial authority and is accountable only to the National Assembly of People's Power. It can propose laws and issue regulations through its Council of Government. Judges are independent but the courts must inform the electorate of its activities

at least once a year. Every accused person has the right to a defence and can be tried only by a tribunal.

The Office of the Attorney-General is subordinate only to the National Assembly and The Council of State and is responsible for ensuring that the law is properly obeyed.

The Constitution may be modified only by a two-thirds majority vote in the National Assembly of People's Power.

All workers have the right to become members of a national trade union according to their industry and economic branch.

The following industries and labour branches have their own unions: Agriculture, Chemistry and Energetics, Civil Workers of the Revolutionary Armed Forces, Commerce and Gastronomy, Communications, Construction, Culture, Education and Science, Food, Forestry, Health, Light Industry, Merchant Marine, Mining and Metallurgy, Ports and Fishing, Public Administration, Sugar, Tobacco and Transport.

TRANSPORT

The Ministry of Transport controls all public transport.

RAILWAYS

The total length of railways in 1980 was 18,115 km., of which nearly 12,000 km. were used by the sugar industry. The remaining 6,167 km. are public service railways operated by Ferrocarriles de Cuba. All railways were nationalized in 1960.

Ferrocarriles de Cuba: Ministerio del Transporte, Avda. de Rancho Boyeros y Tulipán, Havana; f. 1960; operates public services; Gen. Man. MANUEL ALEPÚZ LLANSANA; divided as follows:

División Occidente: serves Pinar del Río, Ciudad de la Habana, Havana Province and Matanzas; 2,627 km. of track.

División Centro: serves Villa Clara, Cienfuegos and Sancti Spiritus; 1,293.2 km. of track.

División Centro-Este: serves Camagüey, Ciego de Avila and Tunas; 1,181.4 km. of track.

ROADS

The total length of roads in 1975 was 29,543 km., of which 12,427 km. were paved. The Central Highway runs from Pinar del Río in the west to Santiago, for a length of 1,144 km. In addition to this paved highway, there are a number of secondary and "farm-to-market" roads. A small proportion of these secondary roads is paved, but the majority are unsurfaced earth roads. There are in addition many hundred kilometres of tracks and paths, some of which can be used by motor vehicles during the dry season.

SHIPPING

Cuba's principal ports are Havana, which handles 60 per cent of all cargo, Santiago de Cuba, Cienfuegos, Nuevitas, Matanzas, Antilla, Guayabal and Mariel. Maritime transport has developed rapidly since 1959 and in 1980 there was a merchant fleet of 88 ships and a coastal trading and deep-sea fleet of 65 ships.

DJIBOUTI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Djibouti, formerly the French Territory of the Afars and the Issas, is in the Horn of Africa at the southern entrance to the Red Sea. It is bounded on the north, west and south-west by Ethiopia and on the south-east by Somalia. The land is volcanic desert and the climate hot and arid. There are two main ethnic groups, the Issa, who are of Somali origin and comprise 50 per cent of the population, and the Afar, who comprise 40 per cent of the population and are of Ethiopian origin. Both are Muslim and speak related Cushitic languages. The flag is divided into three parts: a white isosceles triangle enclosing a red five-pointed star and two equal horizontal bands of blue and green. The capital is Djibouti.

Recent History

French involvement in Djibouti began in 1859 and centred on the port of Djibouti, whose position at the entrance to the Red Sea invests the country with its strategic importance and economic potential. In 1945 the area (then known as French Somaliland) was proclaimed an overseas territory and in 1967 was renamed the French Territory of the Afars and the Issas. The Afars and the Issas have strong connections with Ethiopia and Somalia respectively.

In the late 1950s divisions between the two communities were not marked, the Issas dominating local politics through their greater numbers in the port, but in the 1960s conflicting interests in the Horn and the French policy of favouring the minority Afar community combined to reveal tensions in the Territory. The French increased their presence and Ali Aref Bourhan, the Vice-President of the Council of Ministers, consolidated his power by adjusting constituencies in favour of the Afars. Demands for independence were growing, however, and the violence which had been sporadic since 1967 brought matters to a head in 1975, when Ali Aref lost the support of 13 of his deputies. International assurances to respect the rights of a free Djibouti ushered in negotiations for its independence.

Four conferences were held to draw up procedures leading to independence. In July 1976 Ali Aref, disagreeing with the conclusions of the second conference, resigned. Finally it was agreed that a referendum on independence and elections to a new Chamber of Deputies would be held simultaneously in May 1977 and that independence would follow in June; all parties united to form the *Rassemblement Populaire pour l'Indépendance*, which became the *Rassemblement Populaire pour le Progrès (RPP)* in 1979.

The Territory voted overwhelmingly for independence in the referendum, and in the parallel elections to the Chamber of Deputies 77 per cent of votes cast were in support of a single list of candidates. Hassan Gouled Aptidon was elected President and on June 27th Djibouti became independent.

The most important task facing the new state was that of resolving tensions between Afar and Issa. The first administration attempted to balance all ethnic and political interests but the Afars soon complained of discrimina-

tion and attacked the Government's pro-Somali policies; following the arrest of 600 Afars in December 1977, Ahmed Dini, the Prime Minister, and four other Afar Ministers resigned. A special Commission of Afars was created and the President agreed to its demands for more Afar representation in the Government, the civil service and the armed forces, and the release of most Afar detainees. In February 1978 a new Cabinet with a careful tribal balance was announced and in September Barkad Gourad Hamadou, a former Minister of Health, became Prime Minister and declared a policy of "rapid detribalization"; throughout 1979, however, the Afars continued to express discontent.

In June 1981 presidential elections were held, and President Gouled, the sole candidate, was re-elected, winning 85 per cent of votes cast. In January and October constitutional laws were passed (*see* Constitution) and the RPP became the only legal political party.

Separate treaties of friendship and co-operation were signed in 1981 with Ethiopia, Somalia, Kenya and Sudan in an effort to begin the peace process in East Africa.

Government

The Government is formed from the Chamber of Deputies, consisting of 65 members elected by universal adult franchise. It comprises a Council of Ministers presided over by a Prime Minister and an elected President, to whom it is responsible. The Republic forms a single electoral district.

Defence

Until independence France was responsible for defence. Since French withdrawal a large portion of the annual budget has been set aside for military expenditure. In 1981 there were about 4,000 French soldiers stationed in Djibouti. The total armed forces of Djibouti itself numbered 2,400 in 1981.

Economic Affairs

There is little arable farming. The land is volcanic desert, one of the least hospitable and productive terrains in Africa. Over half the population are pastoral nomads, herding goats, sheep and camels. The development of underground water supplies for irrigation is being studied and deep-water wells have been dug to combat the spells of drought. Agricultural and fisheries development schemes were under way in 1981.

Industry is limited to a few small-scale concerns. A mineral-bottling factory was opened in 1981 and a dairy plant was to be built. Political uncertainty has discouraged the creation of new industries, despite the existence of a free zone, and almost all consumer goods must be imported. By 1981 there were some 50,000 refugees from the Ogaden region of Ethiopia in Djibouti, placing a huge burden on the economy in spite of relief aid from foreign sources.

Djibouti's economic potential depends at present on its developing service economy, based on the expanding

port, modern airport, the Djibouti-Addis Ababa railway and the growing banking sector, which is aided by the freely convertible Djibouti franc and the absence of exchange controls. The war between Ethiopia and Somalia temporarily closed the railway, which carried about half of Ethiopia's foreign trade, thus threatening Djibouti's economic viability. Having suffered badly during the closure of the Suez Canal (1967-75), the port has also found it difficult to compete with the rising Arab ports nearby. Studies for an international container terminal to increase traffic were completed in 1981 and it was expected to be operational by 1984. Djibouti was established as a free port in 1981. Landlocked African countries, including Uganda and Zaire, air-freight their goods to Djibouti for export. Djibouti is dependent on foreign aid which, due to its strategic position, is readily forthcoming, particularly from France and the Gulf states, as well as from the U.S.A. and Europe.

In 1980 Djibouti became a member of the World Bank and of the International Finance Corporation. The Government hoped to launch its first development plan in 1982.

Transport and Communications

There are about 2,000 km. of roads, half of which are serviceable only during the dry season. The only railway in the Horn of Africa links the international port of Djibouti with Addis Ababa; of this, 100 km. lie in Djibouti. Djibouti has an international airport at Ambouli and there are six internal airports. There are plans to expand most transport facilities.

Area: 21,783 sq. km. **Population** (1976 estimate): 220,000; including Afars 70,000, Issas and other Somali 80,000, Arabs 12,000, Europeans 15,000, other foreigners 40,000. Mid-1980 population: 310,000 (UN estimate).

Principal towns (1976): Djibouti (capital) 102,000; Dikhil, Ali-Sabich, Tadjourah, Obock.

Livestock (1980, FAO estimates): 33,000 cattle, 317,000, sheep, 522,000 goats, 5,000 asses, 26,000 camels.

Livestock Products (metric tons, 1980): Meat 4,000, Goatskins 477 (FAO estimates).

Fishing: Total catch 2,000 metric tons (FAO estimate, 1979).

Currency: 100 centimes = 1 Djibouti franc. Coins: 1, 2, 5, 10, 20, 50 and 100 Djibouti francs. Notes: 500, 1,000 and 5,000 Djibouti francs. Exchange rates (December 1981): £1 sterling = 341.85 Djibouti francs; U.S. \$1 = 177.72 Djibouti francs; 1,000 Djibouti francs = £2.925 = \$5.627.

Note: The Djibouti franc was introduced in March 1949, with a par value fixed at 4.145 milligrammes of gold. From December 1958 the relationship to French currency was 1 old French franc = 43.425 Djibouti centimes (1 Djibouti franc = 2.3028 French francs) but the market value of the Djibouti franc was set at 2.3 old French francs or 4.140 milligrammes of gold. When the new French franc was introduced in January 1960, the market value of the Djibouti franc became 2.3 French centimes (1 French Djibouti franc = 2.3 French centimes (1 French franc = 43.478 Djibouti francs). The French franc was devalued by 11.1 per cent in August 1969 but the Djibouti franc retained its gold parity and a new rate of 1 French

Education

Since independence, the Government has assumed overall responsibility for education. In 1979/80 there were 13,740 pupils and 260 teachers in about 50 primary schools; 3,882 pupils and 220 teachers in 8 secondary schools (six *collèges d'enseignement secondaire* and two *lycées*); and one centre for adult vocational training with nine teachers.

Tourism

The Government is attempting to encourage tourists, aiming for 10,000 per year by 1985, the main attractions being the desert scenery of the interior and the potential for underwater sports on the coast. In 1981 there were 177 hotel rooms. A 200-bed hotel was opened in November 1981.

Public Holidays

1982: May 1st (Workers' Day), June 27th (Independence Day), July 23rd (end of Ramadan), September 29th (Id ul Adha, Feast of the Sacrifice), October 19th (Muharram, Muslim New Year), December 25th (Christmas Day), December 28th (Mouloud, Birth of the Prophet),

£1 sterling = 341.85 Djibouti francs.

U.S. \$1 = 177.72 Djibouti francs.

STATISTICAL SURVEY

franc = 38.6 Djibouti francs (1 Djibouti franc = 2.5907 French centimes) was established. The Djibouti franc's market value was set at 2,5875 French centimes (1 French franc = 38.647 Djibouti francs). Prior to August 1971 the exchange rate was U.S. \$1 = 214.39 Djibouti francs. Between December 1971 and February 1973 the rate was U.S. \$1 = 197.47 Djibouti francs. In February 1973 a new rate of \$1 = 177.72 Djibouti francs was introduced.

Budget (1979): 10,929 million Djibouti francs, of which 2.25 per cent was to be spent on debt servicing, 3.5 per cent on upkeep, 24.7 per cent on materials and 53.5 per cent on salaries. In 1977, revenue amounted to 1,200 million Djibouti francs. The 1980 budget expenditure was 13,155 million Djibouti francs. The 1981 budget projected revenue and expenditure to balance at 15,730 million Djibouti francs.

Gross Domestic Product (million Djibouti francs): 18,700 in 1975; 19,600 in 1976; 17,000 in 1977.

External Trade (1979—million Djibouti francs): *Exports:* 2,023 (including 1,763 to France). *Imports:* 31,477, including road vehicles (2,497), machinery and electrical equipment (1,810), textiles (2,018), dairy products (1,186), tobacco (1,891); principal suppliers France (14,733), Ethiopia (1,195), United Kingdom (2,658), Japan (2,413), Benelux (1,645).

THE CONSTITUTION

The Chamber of Deputies (*see* below) was charged with drawing up a constitution for the new republic in 1977. In February 1981 the National Assembly approved the first constitutional laws controlling the election and terms of office of the President, who is to be elected by universal suffrage for six years and will be able to serve no more than two terms. Candidates for the presidency must be

presented by a regularly constituted political party and represented by at least 25 deputies.

Deputies are to be elected for five years from a single list of candidates proposed by the *Rassemblement Populaire pour le Progrès*.

Laws approving the provisional establishment of a single-party system were passed in October 1981.

DOMINICA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Commonwealth of Dominica is the most northerly of the Windward Islands, lying in the Caribbean between Guadeloupe, to the north, and Martinique, to the south. The climate is tropical, though tempered by sea winds which often reach hurricane force, especially from July to September. The average temperature is about 27°C (80°F), with little seasonal variation. English is the official language but a local French patois is also spoken. Roman Catholics form the largest religious group, about 80 per cent of the population. The national flag has a green background with equal stripes of yellow, white and black forming a cross, on the centre of which is superimposed a red circle with a green parrot surrounded by ten lime green stars. The capital is Roseau.

Recent History

A British possession since the eighteenth century, Dominica formed part of the Leeward Islands federation until 1939. In 1940 it was transferred to the Windward Islands and remained attached to that group until the federal arrangement was ended in December 1959. Under a new constitution, effective from January 1960, Dominica (like each other member of the group) achieved a separate status, with its own Administrator and an enlarged Legislative Council. Dominica joined the newly formed West Indies Federation in January 1958 and remained a member until the Federation was dissolved in May 1962.

Meanwhile, at elections to the Legislative Council in January 1961 the ruling Dominica United People's Party was defeated by the Dominica Labour Party (DLP), formed from the People's National Movement and other groups. Edward LeBlanc, leader of the DLP, became Chief Minister. In March 1967 Dominica became one of the West Indies Associated States, gaining full autonomy in internal affairs, with the United Kingdom retaining responsibility for defence and foreign relations only. The Legislative Council was replaced by a House of Assembly, the Administrator became Governor and the Chief Minister was restyled Premier. At elections to the House in October 1970 the Labour Party was divided into two factions, one campaigning as the DLP and the other, led by the Premier, as the LeBlanc Labour Party. The Premier was returned to power and the DLP was subsequently reunited.

In July 1974 LeBlanc retired, being replaced as DLP leader and Premier by Patrick John, formerly Deputy Premier and Minister of Finance. Elections to an enlarged House of Assembly were held in March 1975, when the DLP was returned again, winning 16 of the 21 elective seats. Following a decision in 1975 by the Associated States to seek independence separately, Dominica became an independent republic within the Commonwealth on November 3rd, 1978. Frederick Degazon, formerly Speaker of the House of Assembly, became President, and Patrick John became Prime Minister. In December Dominica was admitted to the UN.

In May 1979 two people were killed by the defence force at a demonstration against the Government's attempts to

introduce legislation restricting union and press freedom. The killings fuelled increasing popular opposition to the Government and a Committee for National Salvation (CNS), formed to bring down the Government, demanded John's resignation. On his refusal, a general strike was organized which lasted 25 days, with John finally agreeing to hand over power to an interim President only after all his Cabinet ministers had resigned. Oliver Seraphine, the candidate proposed by the CNS, was elected Prime Minister and an interim government was then formed to prepare for elections in six months.

Elections were eventually held in July 1980, when the Dominica Freedom Party (DFP) gained a convincing victory, winning 17 of the 21 elective seats in the House of Assembly. Eugenia Charles, the party's leader, became the Caribbean's first woman Prime Minister. Both Patrick John, who contested the elections as leader of the DLP, and Oliver Seraphine, who stood as leader of the newly formed Democratic Labour Party of Dominica (DLPD, now DEMLAB), lost their seats. The DFP's victory was attributed to its continued integrity, while the DLP and the DLPD had suffered from major political scandals.

Fears for the island's security dominated 1981. In January the Government disarmed the defence force as a result of reports that weapons were being traded for marijuana. Several shooting incidents between police and Rastafarians were followed in February by the killings of two Rastafarians by police in a drugs raid on the village of Giraudel. On the same day Ted Honeychurch, the father of a local politician, was taken hostage in his home by a group of Rastafarians in reprisal for the deaths. They demanded the release of three Rastafarians sentenced to death, an inquiry into the deaths at Giraudel and an end to persecution of their cult. The Government declared a state of emergency and refused to negotiate with the kidnappers. In March a plot to overthrow the Government, with the aid of U.S. mercenaries, was uncovered, implicating former Prime Minister Patrick John and the two most senior officers in the defence force. In mid-1981 it was learned that Honeychurch had been shot dead in an escape attempt on the night of his capture. Acting under severe new anti-terrorist laws, police raided a Rastafarian camp near Belles in June, seizing a quantity of arms and killing three. The state of emergency was not lifted until August. An attempted coup in December, led by a former commander of the defence force, was thwarted.

Government

Dominica is a republic. Legislative power is vested in the unicameral House of Assembly, containing 31 members (nine nominated, one *ex officio* and 21 elected by universal adult suffrage). Executive authority is vested in the President, elected by the House, but in most matters the President is guided by the advice of the Cabinet and acts as a constitutional Head of State. He appoints the Prime Minister, who must be able to command a majority in the House, and (on the Prime Minister's recommendation) other Ministers. The Cabinet is responsible to the House.

Defence

The Dominican Defence Force was officially disbanded in April 1981. There is a police force of about 250.

Economic Affairs

Agriculture is the principal economic activity and bananas are the main crop. Dominica's bananas are sold almost exclusively to the United Kingdom. The industry has expanded rapidly in recent years. Bananas accounted for 70 per cent of exports and about 20 per cent of G.N.P. in 1978. There were no banana exports during a large part of 1980 because of hurricane damage, but regular shipments resumed in April 1981. Coconuts are also important, providing copra for export as well as edible oil and soap. Limes and other citrus fruits are also grown for export. Dominica is the world's largest exporter of bay oil.

Livestock production is not on a large scale, although the Government is attempting to establish a supply of good quality cattle and to train farmers in more modern methods of husbandry. Fishing is a traditional occupation for the islanders and a number of co-operatives have been established to provide vessels and equipment to fishermen on a hire basis. Quarrying of pumice was suspended in 1974 but resumed in 1977. Attempts are being made to exploit Dominica's extensive timber reserves to provide lumber for export and supply furniture manufacturers.

An Industrial Development Corporation was established in 1974 to promote and encourage the growth of new industries on the island. These now include the manufacture and refining of crude and edible oils and production of cigarettes, canned juices and soaps. A concession granted to a U.S. firm in 1981 to export some 2 million tons of water annually is expected to produce revenue of around U.S. \$1 million per year.

The island's crops and infrastructure are still recovering from the destruction of successive hurricanes in 1979 and 1980. Reconstruction is taking place with aid from Iraq, Trinidad and Tobago and an international consortium of aid donors and loans from international organizations. A loan of EC\$37 million has been secured from the IMF for balance of payments support for the period 1981-84.

Transport and Communications

There is no railway system and all internal traffic is carried by road. In 1976 Dominica had 467 miles (752 km.) of motorable roads. A deep water harbour is sited at Roseau. There is an international airport at Melville Hall, 40 miles (64 km.) from Roseau, and a small landing strip has been constructed a few miles outside Roseau.

Education

Education is free and is provided by a mixture of Government and denominational schools. There are also a number of schools catering for the mentally and physically handicapped. A teacher training college and two technical colleges provide further education and there is also a branch of the University of the West Indies on the island.

Tourism

Despite its many natural attractions, Dominica has never achieved the tourist success of its neighbours, and the effects of two recent hurricanes have cut back the growth experienced in 1978. The Government has designated areas of the island as nature reserves to ensure that there will always be areas of natural beauty to attract visitors.

THE CONSTITUTION

The Constitution came into effect at the independence of Dominica on November 3rd, 1978.

FUNDAMENTAL RIGHTS AND FREEDOMS

The constitution guarantees the rights of life, liberty, security of the person, the protection of the law and respect for private property. The individual is entitled to freedom of conscience, of expression and assembly and has the right to an existence free from slavery, forced labour and torture. Protection against discrimination on the grounds of sex, race, place of origin, political opinion, colour or creed is assured.

THE PRESIDENT

The President is elected by the House of Assembly for a term of five years. A presidential candidate is nominated jointly by the Prime Minister and the Leader of the Opposition and on their concurrence is declared elected without any vote being taken; in the case of disagreement the choice will be made by secret ballot in the House of Assembly. Candidates must be citizens of Dominica aged at least 40 who have been resident in Dominica for five years prior to their nomination. A President may not hold office for more than two terms.

PARLIAMENT

Parliament consists of the President and the House of Assembly, composed of 21 elected Representatives and nine Senators. According to the wishes of Parliament, the latter may be appointed by the President—five on the advice of the Prime Minister and four on the advice of the Leader of

the Opposition—or elected. The life of Parliament is five years.

Parliament has the power to amend the constitution.

Each constituency returns one Representative to the House who is directly elected in accordance with the constitution.

Every citizen over the age of 18 is eligible to vote.

THE EXECUTIVE

Executive authority is vested in the President. The President appoints as Prime Minister the elected member of the House who commands the support of a majority of its elected members, and other Ministers on the advice of the Prime Minister. Not more than three Ministers may be from among the appointed Senators. The President has the power to remove the Prime Minister from office if a resolution of "no confidence" in the Government is passed by the House and the Prime Minister does not resign within three days or advise the President to dissolve Parliament.

The Cabinet consists of the Prime Minister, other Ministers and the Attorney-General in an *ex officio* capacity.

The Leader of the Opposition is appointed by the President as that elected member of the House who, in his judgement, is best able to command the support of a majority of the elected members who do not support the Government.

THE DOMINICAN REPUBLIC

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Dominican Republic occupies the eastern part of the island of Hispaniola, which lies between Cuba and Puerto Rico in the Caribbean Sea. Its only border is with Haiti. The climate is sub-tropical, with an average temperature of 25°C (77°F). The island lies in the path of tropical cyclones. The official language is Spanish. Over 90 per cent of the population are Roman Catholics. There are small Protestant and Jewish communities. The national flag (proportions 23 by 15) is red and blue, quartered by a white cross, at the centre of which is the coat of arms. The capital is Santo Domingo.

Recent History

The Dominican Republic became independent in 1844, although it was occupied by U.S. military forces between 1916 and 1924. General Rafael Trujillo Molina overthrew the elected President, Horacio Vázquez, in 1930 and dominated the country until his assassination in 1961. After his death a Council of State was set up to organize free elections, which were held in December 1962. Professor Juan Bosch of the *Partido Revolucionario Dominicano* (PRD) was elected President but was overthrown in September 1963 in a military coup and his government replaced by a civilian junta led by Emilio de los Santos. In April 1965 the supporters of Juan Bosch overthrew the junta and civil war broke out between them and military units headed by General Elías Wessin y Wessin, who had played a leading role in the 1963 coup. The civil war was eventually put down by the intervention of some 23,000 U.S. troops, which were formally incorporated into an Inter-American peace force by the OAS after they had landed.

Following a period of provisional government under Héctor García Godoy, Dr. Joaquín Balaguer of the *Partido Reformista* (PR) was elected President in June 1966. In May 1970 Dr. Balaguer was re-elected for a further four years. In February 1973 a state of emergency was declared when guerrilla forces landed on the coast. Captain Francisco Caamaño Deñó, the leader of the 1965 revolt, and his followers were killed. Bosch and other opposition figures went into hiding. Bosch later resigned as leader of the PRD, undermining hopes of a united opposition in the May 1974 elections, when Dr. Balaguer was returned with a large majority. In June 1975 guerrilla forces of Dominican émigrés from Cuba landed on the island in an unsuccessful attempt to overthrow Balaguer.

In the May 1978 elections the PRD candidate, Silvestre Antonio Guzmán Fernández, was elected President. Despite an attempted military coup in favour of Dr. Balaguer, he took office in August, giving an assurance that his Government would amend the constitution to prevent future Presidents from serving more than one term of office. The PRD, which had not participated in any elections since 1966, gained a majority in the Senate but the PR retained its majority in the lower house. Opposition to President Guzmán, whose administration faced formidable economic problems, resulted in the PRD's dissociating itself from him in August 1980. In June 1981

Guzmán announced that he would not stand for re-election in May 1982, despite his earlier attempts to start a presidential campaign, but would support the candidacy of Vice-President Jacobo Majluta. In November the PRD rejected Majluta's candidacy in favour of Jorge Blanco.

Government

The Dominican Republic comprises 26 provinces, each administered by an appointed governor, and a *Distrito Nacional* (D.N.) containing the capital. Under the 1966 Constitution, legislative power is exercised by the bicameral National Congress, with a Senate of 27 members (one for each province and one for the D.N.) and a Chamber of Deputies (91 members). Members of both houses are elected for four years by universal adult suffrage. Executive power lies with the President, elected by direct popular vote for four years. He is assisted by a Vice-President and a Cabinet containing Secretaries of State.

Defence

Military service is voluntary and lasts for four years. In July 1981 the armed forces totalled 22,500 men: army 13,000, air force 5,000 and navy 4,500. Paramilitary forces number 10,000. Defence expenditure for 1979 was RD\$91 million.

Economic Affairs

Over 50 per cent of the population live off the land and 75 per cent of exports are agricultural. Traditionally, sugar is the principal cash crop, but the Government has encouraged the cultivation of coffee and cocoa in order to diversify exports, and tobacco and bananas are also grown. The agricultural sector is highly vulnerable, suffering from the loss of the entire pig population after an outbreak of African swine fever in 1978, from damage estimated at U.S. \$1,000 million inflicted by Hurricane David in 1979, from further weather hazards in 1981, and from declines in world prices for coffee, cocoa and tobacco in 1980 and for sugar in 1981.

The principal mineral products are bauxite, with reserves of 18 million tons at Cabo Rojo, and ferronickel. A fall in world demand for these products led to a decline in the mining sector of 14.5 per cent in 1980. Gold and silver mining have risen, the latter tenfold between 1975 and 1978. Foreign oil companies have been granted concessions to undertake exploration drilling, and in 1981 a deposit was discovered at Charco Largo, Barahona. Its potential output was estimated at 20,000 b.p.d., or half national consumption. The G.D.P. growth rate averaged 10.4 per cent over 1968-74, but fell subsequently because of rising petroleum prices and decreased sugar demand. The rate for 1980 was 5.3 per cent, and a lower figure was anticipated for 1981.

Between 1969 and 1976 great economic progress was made, due mainly to massive U.S. aid, the sugar boom, high public and private investment and increased foreign participation. Government investment has been concentrated on agriculture, energy and tourism. In 1980 the Sabana Yegua dam, designed to irrigate 600,000 hectares

of land, was opened. In 1981 construction began of the 125 MW station at Haina, the first coal-fired plant in the Caribbean. Tourism has priority because it is labour intensive. Unemployment is endemic in the Dominican Republic, and stood at about 25 per cent in 1981. There was a record trade deficit of U.S. \$470 million in 1980, and it was officially estimated that by the end of the 1980s the foreign borrowing requirement will have reached \$2,000 million. By the end of 1980 the total foreign debt had reached \$1,829 million, compared with \$1,068 million at the end of 1977. The rate of inflation, which stood at 3.5 per cent in 1978 and 8.2 per cent in 1979, was unofficially estimated at nearly 30 per cent by 1981.

Transport and Communications

Transport facilities are limited and about 80 per cent of the railways are used solely to carry sugar from the plantations. Roads, totalling 17,659 km. in 1980, are the main means of communication and the network includes some modern motorways. There is no inland waterway system and very little coastal shipping. A number of shipping lines link the island with the United States and other Caribbean islands. There are two international and several domestic airports.

Social Welfare

A voluntary national contributory scheme, introduced in 1947, provides cover for sickness, unemployment, accidental injury, maternity, old age and death. It is not yet universal. In 1977 there were 128 hospitals and clinics, 1,817 physicians and 9,131 hospital beds under the auspices of the public health and welfare department and the Institute of Social Security.

Education

Primary education is free and, where possible, compulsory from the ages of seven to fourteen. In 1976 primary

school enrolment totalled 867,592. There are five universities with almost 60,000 students in 1978. In 1970 adult illiteracy averaged 32.8 per cent (males 31.2 per cent, females 34.3 per cent).

Tourism

Strenuous efforts are being made to develop the tourist industry. Hotels, casinos and seaside resorts are being built and tours to the old Spanish colonial settlements have been organized. The Government plans to spend 150 million pesos on a tourism development programme to be completed in 1985. Tourist complexes are under construction at Puerto Plata, Samana, La Romana, La Altagracia and Santiago de los Caballeros.

Public Holidays

1982: May 1st (Labour Day), July 16th (Foundation of Sociedad la Trinitaria), August 16th (Restoration Day), September 24th (Our Lady of Mercedes), October 12th (Columbus Day), October 24th (United Nations Day), November 1st (All Saints' Day), December 25th (Christmas Day).

1983: January 1st (New Year's Day), January 6th (Epiphany), January 21st (Our Lady of Altagracia), January 26th (Duarte), February 27th (Independence), April 1st (Good Friday), April 14th (Panamerican Day).

Weights and Measures

The metric system is officially in force but the imperial system is often used.

Currency and Exchange Rates

100 centavos = 1 Dominican Republic peso (RD\$).

Exchange rates (December 1981):

£1 sterling = 1.92 pesos;

U.S. \$1 = 1.00 peso.

THE CONSTITUTION

The present constitution of the Dominican Republic was promulgated on November 28th, 1966. Its main points are:

The Dominican Republic is a sovereign, free, independent State; no organizations set up by the State can bring about any act which might cause direct or indirect intervention in the internal or foreign affairs of the State or which might threaten the integrity of the State. The Dominican Republic recognizes and applies the norms of general and American international law and is in favour of and will support any initiative towards economic integration for the countries of America. The civil, republican, democratic, representative Government is divided into three independent powers: legislative, executive and judicial.

The territory of the Dominican Republic is as laid down in the Frontier Treaty of 1929 and its Protocol of Revision of 1936.

The life and property of the individual citizen are inviolable; there can be no sentence of death, torture nor any sentence which might cause physical harm to the individual. There is freedom of thought, of conscience, of religion, freedom to publish, freedom of unarmed association, provided that there is no subversion against public order, national security or decency. There is freedom of labour and trade unions; freedom to strike, except in the case of public services, according to the dispositions of the law.

The State will set about agrarian reform, dedicating the land to useful interests and gradually eliminating the *latifundios*. The State will do all in its power to support all aspects of family life. Primary education is compulsory and all education is free. Social security services will be developed. Every Dominican has the duty to give what civil and military service the State may require of him. Every legally entitled citizen must exercise his right to vote, i.e. all persons over the age of eighteen and all who are or have been married even if they are not yet eighteen.

GOVERNMENT

Legislative Power is exercised by Congress which is made up of the Senate and Chamber of Deputies, elected by direct vote. *Senators*, one for each province and one for the *Distrito Nacional*, are elected for four years; they must be Dominicans in full exercise of their citizen's rights, over 25. Their duties are to elect judges, the President and other members of the Electoral and Accounts Councils, and to approve the nomination of diplomats. *Deputies*, one for every 50,000 inhabitants or fraction over 25,000 in each province and the *Distrito Nacional*, are elected for four years and must fulfil the same conditions for election as Senators.

Decisions of Congress are taken by absolute majority of at least half the members of each house; urgent matters require a two-thirds majority. Both houses normally meet on February 27th and August 16th each year for sessions of 90 days, which can be extended for a further 60 days.

Executive Power is exercised by the President of the Republic, who is elected by direct vote for a four-year term. He and the Vice-President must be Dominican citizens by birth or origin, over 30 years of age and in full exercise of their citizen's rights; they must not have engaged in any active military or police service for at least a year prior to their election. They take office on August 16th following their election. The *President of the Republic* is Head of the Public Administration and Supreme Chief of the armed forces and police forces. His duties include nominating Secretaries and Assistant Secretaries of State and other public officials, promulgating and publishing laws and resolutions of Congress and seeing to their faithful execution, watching over the collection and just investment of national income, nominating, with the approval of the Senate, members of the Diplomatic Corps, receiving foreign Heads of State, presiding at national functions, decreeing a State of Siege or Emergency or any other measures necessary during a public crisis. The

President may not leave the country for more than 15 days without authorization from Congress. In the absence of the President, the Vice-President will assume power, or failing him the President of the Supreme Court of Justice.

LOCAL GOVERNMENT

Government in the *Distrito Nacional* and the Municipalities is in the hands of local councils, with members elected proportionally to the number of inhabitants, but numbering at least five. Each Province has a civil Governor, designated by the Executive.

JUDICIARY

Judicial Power is exercised by the Supreme Court of Justice and the other Tribunals; no judicial official may hold another public office or employment, other than honorary or teaching. The Supreme Court is made up of at least nine judges, who must be Dominican citizens by birth or origin, at least 35 years old, in full exercise of their citizen's rights, graduates in law and have practised professionally for at least 12 years. There are also five Courts of Appeal, a Lands Tribunal and a Court of the First Instance in each judicial district; in each Municipality

and in the *Distrito Nacional* there are also Justices of the Peace.

Elections are directed by the Central Electoral Council. The armed forces are essentially obedient and apolitical, created for the defence of national independence and the maintenance of public order and the Constitution and Laws.

The artistic and historical riches of the country, whoever owns them, are part of the cultural heritage of the country and are under the safekeeping of the State. Mineral deposits belong to the State. There is freedom to form political parties, provided they conform to the principles laid down in the Constitution. Justice is administered without charge throughout the Republic.

This Constitution can be reformed if the proposal for reform is supported in Congress by one-third of the members of either house or by the Executive. A special session of Congress must be called and any resolutions must have a two-thirds majority. There can be no reform of the method of government, which must always be civil, republican, democratic and representative.

ECUADOR

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Ecuador lies on the west coast of South America. It borders on Colombia to the north, Peru to the east and south, and the Pacific Ocean to the west. The Galapagos Islands, 970 km. west of the Ecuadorean coast, form part of Ecuador. The climate is affected by the Andes mountains and the topography ranges from the tropical rain forest on the coast and in the eastern region to the tropical grasslands of the central valley and the permanent snowfields of the highlands. The official language is Spanish but Indian languages are very common. About 90 per cent of the population are Roman Catholic. The national flag (proportions 2 by 1) is a horizontal tri-colour of yellow, blue and red, the yellow stripe being half the total depth. The state flag also has the national emblem in the centre. The capital is Quito.

Recent History

Ecuador achieved independence in 1830 and until 1948 its political life was characterized by a succession of presidents, dictators and juntas. Dr. Galo Plaza Lasso, elected in 1948, was the first President since 1925 to complete his term of office. A 61-year-old tradition of Liberal presidents was broken in 1956 when the Conservative candidate, Dr. Camilo Ponce Enríquez, was returned on a minority vote. He was succeeded in September 1960 by a non-party Liberal, Dr. José María Velasco Ibarra, who was deposed by a revolt in November 1961 and succeeded by his Vice-President, Dr. Carlos Julio Arosemena Monroy. The latter was in his turn deposed in July 1963 by a military junta, the leader of which, Rear-Admiral Ramón Castro Jijón, assumed the office of President. In March 1966 the Air Force dismissed the junta and Clemente Yerovi Indaburu was installed as acting President, though he was forced to resign when the Constituent Assembly, elected in October 1966, proposed a new constitution which prohibited the intervention of the armed forces in politics. He was replaced as provisional President by Dr. Otto Arosemena Gómez until the elections of June 1968, when Dr. Velasco Ibarra returned from exile to win the Presidency for the fifth time.

In June 1970 President Velasco Ibarra assumed dictatorial powers. In February 1972 he was overthrown for the fourth time by a military coup, led by Brig.-Gen. Guillermo Rodríguez Lara who then became President. In January 1976 he resigned and a three-man military junta took power, announcing its intention to lead the country to a truly representative democracy. In January 1978 a national referendum approved a newly-drafted constitution and presidential elections took place in July. No candidate achieved an overall majority, and a second round of voting was held in April 1979, when a new Congress was also elected. Jaime Roldós Aguilera of the *Concentración de Fuerzas Populares* was elected President and he took office in August, when the Congress was inaugurated and the new constitution came into force. President Roldós promised social justice and economic development under democratic rule, and he guaranteed freedom for the press.

President Roldós met antagonism from both the conservative sections of the Congress and the trade unions. In May 1981 the President died in an air crash and was replaced by Vice-President Osvaldo Hurtado Larrea of the *Izquierda Democrática*, who stated his intention of following his predecessor's democratic programme. During his first months of office, however, he faced opposition from left-wing politicians and unions for his efforts to cut government spending and also from right-wing and commercial interests which feared encroaching state intervention in the private economic sector.

The long-standing border dispute with Peru over the Cordillera del Cóndor erupted into war in January 1981. A cease-fire was declared a few days later under the auspices of the guarantors of the Rio Protocol of 1942 (Argentina, Brazil, Chile and the U.S.A.). The Protocol was not recognized by Ecuador as it awarded the area, which affords access to the Amazon system, to Peru.

Government

The country is divided into 20 Provinces, including the Galapagos Islands. Each Province has a Governor appointed by the President. Executive power is vested in the President and legislative power in the unicameral 69-member Congress. Both are popularly elected for a five-year term. In April 1980 the future formation of an upper chamber was agreed.

Defence

Military service is selective for two years at the age of 20. In July 1981 there were 38,800 men in the armed forces: army 30,000, navy 4,000 (including 1,000 marines) and air force 4,800. Paramilitary forces numbered 5,800 men. Defence expenditure for 1980 was 5,282 million sucres.

Economic Affairs

Until the exploitation of petroleum in 1972, Ecuador's main source of wealth was agriculture, despite the fact that only 5 per cent of the land was cultivated. In 1980 the leading agricultural exports were bananas (providing 9 per cent of export revenue), coffee, sugar and cocoa. African palm, rice and other grains are also grown, and the whole sector grew by 3 per cent in 1980, compared with an average of 1.7 per cent annually between 1977 and 1979. Fishing has benefited considerably from official development programmes, and the total catch was a record 644,300 metric tons in 1980. Ecuador's extensive forests yield valuable hardwoods and Ecuador is the world's principal producer of balsawood.

With the completion of the trans-Andean pipeline (capacity 400,000 b.p.d.), linking the oilfields of Oriente Province with the tanker-loading port of Esmeraldas, in 1972, Ecuador became an oil-exporting nation. Cepe, the state oil concern, bought a 25 per cent share in Texaco-Gulf's operations in Ecuador in 1974 and bought Gulf's 37.5 per cent holding in 1977. Petroleum and derivatives continue to account for a substantial part of the total export revenue (51.8 per cent in 1980), although in 1980

half of total production was for domestic consumption and imports of refined products rose. The Government is making great efforts to extend exploration activities but in June 1981 the April production level of 225,000 b.p.d. had to be cut to 217,000 b.p.d. because earlier price rises had overpriced Ecuadorean crude on the world market. The demand for electric energy is rising by about 14 per cent annually. In 1981 07 per cent of generation was by thermoelectric plants, but the greater potential lies in the hydroelectric sector; a series of projects includes the 500 MW Paute scheme scheduled for completion in 1986. The Amistas natural gas deposit in the Gulf of Guayaquil contains proven reserves of 260,000 million cubic feet; Cepe estimated probable reserves of 665,000 million cubic feet. There are plans to build pipelines from Esmeraldas and Shushufindi to Quito and a gas-liquefaction plant on the Shushufindi oilfield, with a daily capacity of 25 million cubic feet. Gold and silver are mined and large deposits of low-grade copper have been discovered west of Cuenca.

Manufacturing, mainly consisting of textiles, food processing, cement and pharmaceuticals, developed rapidly in the 1970s despite shortages of electric energy. In 1980, however, revenue from industrial exports declined by 13.5 per cent, chiefly because of the 47.5 per cent drop in receipts for cocoa products. There is little heavy industry but some lines, such as petrochemicals, vehicle assembly and steel, are being developed through the Andean Group. An \$800 million petrochemical complex is due to be completed by 1983 and a \$180 million integrated steel mill by 1985.

With a growth rate of 13.6 per cent in 1974, Ecuador had one of Latin America's fastest growing economies due to the development of the oil sector. The growth rate fell to around 4 per cent in 1980 and 1981, and the falls in oil, coffee and cocoa prices demanded considerable revision of the 1981 and 1982 budgets. The current balance of payments registered a deficit of \$576 million in 1980, although there was a surplus on the balance of trade of \$257 million. The foreign debt reached about \$4,000 million by the end of 1980, and total debt-servicing in 1981 was expected to amount to \$733 million. The rate of inflation in 1980 was 12.6 per cent, compared with 10.1 per cent in 1979, and was sharply accelerated by the tripling of domestic oil prices in February 1981.

When he took office in May 1981, President Hurtado promised to adhere to the 1980-84 National Development Plan, which was centred on agricultural and infrastructural improvement and envisaged total expenditure of \$800 million. The financial problems of 1981, when the sucre came under pressure and devaluation seemed likely, and high U.S. interest rates encouraged an outflow of capital, made some scaling down of the Plan's more optimistic objectives necessary.

Ecuador is a member of the Andean group and of OPEC.

Transport and Communications

Communications are rendered difficult by mountains and forests. There were 965 km. of railway track in 1980 and 34,600 km. of roads. The Pan-American Highway runs for 1,392 km. through the country, with branch roads to the coast. The 1980-84 National Plan proposed the con-

struction of a new electrified railway network, as part of a future Andean rail system, to replace the inadequate and dilapidated existing diesel-operated network. Near the coast the lower reaches of the rivers Guayas, Mira and Esmeraldas are navigable for about 190 km. There are a number of seaports, of which Guayaquil and Manta are the most important. Three main Ecuadorean companies and some foreign lines operate internal and international air services.

Social Welfare

Social insurance is compulsory for all employees. Benefits are available for sickness, industrial accidents, disability, maternity, old age, widowhood and orphanhood. In 1980 about 125,000 peasants were integrated into social security schemes; the 1980-84 Development Plan aims to increase the number to 335,000. Hospitals and welfare institutions are run by Central Public Assistance Boards. In 1973 Ecuador had 221 hospital establishments, with 13,594 beds, and in 1975 there were 3,520 physicians.

Education

Education is compulsory and all public schools are free. Private schools continue to play a vital role in the educational system. Primary education covers the ages of 6 to 12 and secondary education, in general and specialized technical or humanities schools, 12 to 18. University courses extend for up to six years and include programmes for teacher training. A number of adult schools and literacy centres have been built aimed at reducing the illiteracy rate to under 5 per cent by 1984. There are 16 universities. In many rural areas Quechua and other Indian languages are used in education.

Tourism

The main tourist attractions are the magnificent mountain and forest scenery of the highlands, the tropical jungles of the Upper Amazon, the Galapagos Islands (although tourist numbers are limited by ecological considerations) and the relics of Indian and colonial Spanish cultures. There are a number of coastal resorts from which deep-sea fishing is possible.

Public Holidays

1982: May 1st (Labour Day), May 24th (Battle of Pichincha), July 24th (Birth of Simón Bolívar), August 10th (Independence of Quito), October 9th (Independence of Guayaquil), October 12th (Discovery of America), November 1st (All Saints'), November 2nd (All Souls'), November 3rd (Independence of Cuenca), December 6th (Foundation of Quito), December 25th (Christmas Day).

1983: January 1st (New Year's Day), January 6th (Epiphany), February 14th, 15th (Carnival), March 31st (Holy Thursday), April 1st (Good Friday), April 2nd (Easter Saturday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centavos = 1 sucre.

Exchange rates (December 1981):

£1 sterling = 48.09 sucres;

FINANCE

100 centavos = 1 sucre.

Coins: 10, 20 and 50 centavos; 1 sucre.

Notes: 5, 10, 20, 50, 100 and 1,000 sucres.

Exchange rates (December 1981): £1 sterling = 48.09 sucres; U.S. \$1 = 25.00 sucres.

1,000 sucres = £20.80 = \$40.00.

Note: From July 1961 to August 1970 the exchange rate was U.S. \$1 = 18.00 sucres. In August 1970 a new rate of \$1 = 25.00 sucres was introduced and this has been maintained despite two devaluations of the U.S. dollar, in December 1971 and February 1973. In terms of sterling, the exchange rate was £1 = 43.20 sucres from November 1967 to August 1970; £1 = 60.00 sucres from August 1970 to August 1971; and £1 = 65.14 sucres from December 1971 to June 1972.

THE CONSTITUTION

The 1945 constitution was suspended in June 1970. In January 1978 a referendum was held to choose between two draft constitutions prepared by various special constitutional committees. In a 90 per cent poll, 43 per cent voted for a proposed new constitution and 32.1 per cent voted for a revised version of the 1945 constitution. The new constitution was promulgated following the inauguration of a new President and legislature in August 1979.

CHAMBER OF REPRESENTATIVES

The Constitution of 1979 states that legislative power is exercised by the Chamber of Representatives which sits for a period of sixty days from August 10th. The Chamber is required to set up four full-time Legislative Commissions to consider draft laws when the House is in recess. Special sessions of the Chamber of Representatives may be called.

Representatives are elected for five years from lists of candidates drawn up by legally recognized parties. Twelve are elected nationally; two from each province with over 100,000 inhabitants, one from each province with fewer than 100,000; and one for every 300,000 citizens of fractions of over 200,000. Representatives are eligible for re-election.

In addition to its law-making duties, the Chamber ratifies treaties, elects members of the Supreme and Superior Courts, and (from panels presented by the President) the Comptroller-General, the Attorney-General and the Superintendent of Banks. It is also able to overrule the President's amendment of a bill which it has submitted to him for his approval. It may reconsider a rejected bill after a year or request a referendum, and may revoke the President's declaration of a state of emergency. The budget is considered in the first instance by the appropriate Legislative Commission and disagreements are resolved in the Chamber.

PRESIDENT

The presidential term is five years, and there is no re-election. The President appoints his own cabinet, the governors of provinces, diplomatic representatives and certain administrative employees, and is responsible for the direction of international relations. In the event of foreign invasion or internal disturbance, he may declare a state of emergency and must notify the Chamber, or the Tribunal for Constitutional Guarantees if the Chamber is not in session.

As in other post-war Latin-American Constitutions, particular emphasis is laid on the functions and duties of the State, which is given wide responsibilities with regard to the protection of labour; assisting in the expansion of production; protecting the Indian and peasant communities; and organizing the distribution and development of uncultivated lands, by expropriation where necessary.

Voting is compulsory for every Ecuadorean citizen who is literate and over 18 years of age. An optional vote has been extended to illiterates (under 15 per cent of the population by 1981). The Constitution guarantees liberty of conscience in all its manifestations, and states that the law shall not make any discrimination for religious reasons.

EGYPT

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Arab Republic of Egypt occupies the north-eastern corner of Africa, with an extension across the Gulf of Suez into the Sinai region which is usually regarded as lying in Asia. It is bounded to the north by the Mediterranean, to the north-east by Israel, to the east by the Red Sea, to the south by Sudan, and to the west by Libya. The climate is arid, with a maximum annual rainfall of only 200 mm. around Alexandria. More than 90 per cent of the country is desert, and some 99 per cent of the population live in the valley and delta of the Nile. Summer temperatures reach a maximum of 43°C (110°F) and winters are mild, with an average day temperature of about 18°C (65°F). Arabic is the official language. Many educated Egyptians speak English or French. Over 90 per cent of the population are Muslims (mainly Sunni). The remainder are mostly Christians, about 4 million of whom are Copts. The national flag (proportions 3 by 2) is a horizontal tricolour of red, white, and black; the white stripe is charged with an eagle emblem in gold. The capital is Cairo.

Recent History

After the Second World War, British forces withdrew from Egypt, except for a military presence in the Suez Canal Zone. When the British mandate in Palestine was ended in 1948, Arab armies intervened to oppose the newly-proclaimed State of Israel. A cease-fire was agreed in 1949, leaving Egyptian forces occupying the Gaza Strip.

In July 1952 a group of young army officers, the "Free Officers", seized power in Cairo. King Farouk was forced to abdicate and Gen. Muhammed Neguib installed as head of the military junta. Egypt was declared a republic the following June, when Neguib became President and Prime Minister, and Col. Gamal Abdel Nasser, who was leader of the Free Officers, Deputy Prime Minister. In November 1954 Neguib was relieved of his posts, and Nasser took over as acting head of state.

In October 1954 Britain and Egypt reached agreement on the Suez Canal, when provision was made for the withdrawal of British troops. In June 1956 a new constitution was approved by the people and Nasser was elected President. The following month, after Britain and the U.S.A. had withdrawn their offers of finance for the Aswan High Dam, Nasser announced the nationalization of the Suez Canal Company, so that Canal revenues could be used to finance the Dam. This was a cause of great concern to Israel, Britain and France, and Israel invaded Sinai on October 29th while Britain and France began operations against Egypt two days later. Strong UN and American pressure resulted in a ceasefire on November 6th and supervision by the UN of the invaders' withdrawal.

Egypt and Syria formed the United Arab Republic in February 1958, and ties with the Soviet and East European bloc strengthened. Syria withdrew from the union after the army had seized power there in September 1961, but Egypt retained the title United Arab Republic until 1971. Further attempts at federating Egypt, Syria and Iraq also came to nothing during the early 1960s and plans for union with Libya came to nothing in 1973. The Federation of

Arab Republics (Egypt, Libya and Syria) came into being in 1972, but proved ineffective.

Relations with Libya later deteriorated to such an extent that open warfare took place on the border in July 1977. Egypt's relations with the U.S.S.R. also deteriorated in the 1970s. In 1972 Egypt expelled the Soviet military advisers and in March 1976 broke off its Treaty of Friendship with the U.S.S.R. Relations with the U.S.A., on the other hand, became closer when Muhammad Anwar Sadat (who succeeded Nasser as President in September 1970) came to rely increasingly on American help.

The "Six-day War" in June 1967 between the Arabs and Israel left Israel in control of the Gaza Strip and a large area of Egyptian territory, including the whole of Sinai. The Suez Canal was blocked and closed until June 1975.

An uneasy ceasefire lasted until October 1973, when Egyptian troops crossed the Suez Canal to recover territory lost in 1967. After 18 days of fighting a ceasefire was arranged and Dr. Henry Kissinger, the U.S. Secretary of State, negotiated disengagement agreements in 1974 and September 1975, by which Israel evacuated territory in Sinai, and Israeli and Egyptian forces were separated by a UN Buffer Zone.

A dramatic peace-making initiative was made by President Sadat in November 1977, when he visited Israel and addressed the Knesset. Many Arab countries opposed the visit on the grounds that it undermined Arab unity. Syria, Libya, Algeria, Iraq and Yemen P.D.R., together with the PLO, condemned Egypt at their own conference in Tripoli in December 1977, and Egypt consequently broke off diplomatic relations with them.

It therefore proved difficult for Egypt to produce anything tangible out of Sadat's peace initiative, but in September 1978, after talks at Camp David in the U.S.A. under the guidance of President Carter, President Sadat and Menachem Begin, Prime Minister of Israel, signed two agreements. The first was a "framework of peace in the Middle East" and the second was a "framework for the conclusion of a peace treaty between Egypt and Israel". The first agreement provided for a 5-year transitional period during which the inhabitants of the Israeli-occupied West Bank of the Jordan and the Gaza Strip would obtain full autonomy and self-government, and the second agreement provided for the signing of a peace treaty between Egypt and Israel by December 17th, 1978. After some difficulties the peace treaty was signed in March 1979, and Israel subsequently made phased withdrawals from the Sinai peninsula, the last of which was due to take place in April 1982. Syria, Algeria, Libya and the PLO had met in Damascus in September 1978 and condemned the Camp David agreements, and in Baghdad in March 1979 the Arab League Council expelled Egypt from the League and introduced political and economic sanctions.

In 1974 Sadat began to introduce a more liberal political and economic regime. Foreign investment has been encouraged but has been slow to arrive. Inflation, overcrowding and administrative shortcomings have been the main internal problems.

Political parties (banned since 1953) were allowed in the 1976 elections for the People's Assembly. They were legalized in June 1977, and in July 1978 Sadat formed a new political party, the National Democratic Party, with himself as leader. Opposition parties were allowed, but were very much overshadowed by the National Democratic Party. More effective opposition to Sadat came from Muslim fundamentalists, whose influence grew stronger after the Iranian revolution in 1979. By September 1981 Sadat was having to resort to massive arrests of Muslim fundamentalists. Measures to control the disaffected Coptic minority had also become necessary. It was nevertheless something of a surprise when a group of Muslim fundamentalists succeeded in assassinating Sadat at a military parade on October 6th, 1981. An Islamic rebellion which broke out in Assut was quickly suppressed, and Vice-President Muhammad Hosni Mubarak was confirmed as President at a referendum on October 13th. No major changes in the direction of policy have resulted, but Mubarak has reshuffled the Government, while adhering to the "Camp David process" and trying to improve the living standards of ordinary Egyptians.

Government

Legislative power is held by the unicameral People's Assembly, with 392 members (10 nominated by the President and 382 directly elected for five years). The Assembly nominates the President, who is elected by popular referendum for six years (renewable). The President has executive powers and appoints one or more Vice-Presidents, a Prime Minister and a Council of Ministers. There is also a 210-member Advisory Council. The country is divided into 26 governorates.

Defence

In July 1981 Egypt had total armed forces of 367,000 (army 235,000, air defence command 85,000, navy 20,000, air force 27,000), with 335,000 reserves. There is a selective one-year period of National Service. The defence budget for 1979/80 was £E1,500 million.

Economic Affairs

Almost half the labour force is engaged in agriculture. The chief crops are cotton, onions, wheat, maize, millet, rice and sugar-cane. The country depends very largely on the waters of the Nile for its fertility, and the completion of the Aswan High Dam in 1970 increased the fertile land of Egypt by one-third.

Petroleum production is small by Middle East standards, averaging 658,000 b/d in 1980/81.

Under Nasser, and until 1973-74 under Sadat, Egypt's economy was conducted mainly on socialist lines. After the October 1973 war, while not abandoning socialism, Egypt put into practice a policy of encouraging foreign investment, both from other Arab countries and from Western sources, and embarked on a development plan which involved re-opening the Suez Canal and resettling and redeveloping the Suez area. Foreign investment did not arrive as quickly as was hoped, and in the late 1970s Egypt experienced severe economic difficulties, with inflation, a huge debt problem, an adverse balance of payments and a growing population. There was some concern in March 1979, when Egypt's official relations with

most of the Arab world were cut off after the signing of the peace treaty with Israel. Not all Arab aid ceased, however, and increased help from the U.S.A., larger oil revenues, Suez Canal dues and remittances from Egyptians working abroad gave some improvement to the economy in 1980 and 1981. Suez Canal revenue, for example, was expected to exceed U.S. \$1,000 million in 1981, compared with U.S. \$700 million in 1980.

Transport and Communications

The area of the Nile Delta is well served by railways. Lines also run from Cairo southward along the Nile to Aswan, and westward along the coast to Sollum. Roads link the towns. The chief ports are Alexandria and Port Said. More than 20,000 vessels, with a net tonnage of 281 million tons, used the Suez Canal, linking the Mediterranean and the Red Sea, in 1980. The River Nile carries much domestic freight and there are long-distance passenger services. Cairo is an important air centre and EgyptAir has branches all over the world. An oil pipeline (SUMED) links Suez to the Mediterranean.

Social Welfare

Great progress has been made in social welfare services in recent years. There are comprehensive state schemes for sickness benefits, pensions, health insurance and training.

Education

Primary education is extended to all children between the ages of 6 and 12, and is compulsory. Almost 8 million people were receiving state education in the 1977/78 school year. There are eight universities. Education is free at all levels.

Tourism

Egypt has always been a considerable tourist centre. Historical remains of ancient civilization include the Pyramids and the temples at Abu Simbel. The River Nile is popular for cruises. Over 1.2 million tourists visited Egypt in 1980.

Public Holidays

1982: June 18th (Evacuation Day, proclamation of the republic), July 23rd (Revolution Day and Id-ul-Fitr, end of Ramadan), September 29th (Id-ul-Adha), October 6th (Armed Forces Day), October 19th (Muslim New Year), October 24th (Popular Resistance Day), December 28th (Mv. aloud).

1983: January 1st (New Year), mid-April (Sham el Nessim).

Christian holidays include: Coptic Christmas (January), Palm Sunday and Easter Sunday (March-April).

Weights and Measures

The metric system is in force, but some Egyptian measurements are still in use.

THE CONSTITUTION

The Permanent Constitution of the Arab Republic of Egypt was approved by referendum on September 11th, 1971. There are six chapters with 193 articles, many of them based on the 1964 Interim Constitution, but chapters 3 and 4 show a considerable degree of liberalization of the former statutes.

CHAPTER I The State

Egypt is an Arab Republic with a democratic, socialist system based on the alliance of the working people and derived from the country's historical heritage and the spirit of Islam.

The Egyptian people are part of the Arab nation, who work towards total Arab unity.

Islam is the religion of the State; Arabic is its official language and the Islamic code is a principal source of legislation. The State safeguards the freedom of worship and of performing rites for all religions.

Sovereignty is of the people alone which is the source of all powers.

The protection, consolidation and preservation of the socialist gains is a national duty; the sovereignty of law is the basis of the country's rule, and the independence of immunity of the judiciary are basic guarantees for the protection of rights and liberties.

The Arab Socialist Union is the political organization of the State which represents the alliance of the working forces of the people; the farmers, workers, soldiers, the intelligentsia and national capitalism.

CHAPTER 2

The Fundamental Elements of Society

Social solidarity is the basis of Egyptian society, and the family is its nucleus.

The State ensures the equality of men and women in both political and social rights in line with the provisions of Muslim legislation.

Work is a right, an honour and a duty which the State guarantees together with the services of social and health insurance, pensions for incapacity and unemployment.

The economic basis of the Republic is socialism based on sufficiency and justice. It is calculated to prevent exploitation and to level up differences between classes.

The people control all means of production and regulate the national economy according to a comprehensive development plan which determines the role of Arab and foreign capital.

Property is subject to the people's control.

Property shall be expropriated only by law and against fair compensation. Nationalization shall also be by law for public interest considerations or socialist objectives.

Agricultural holding may be limited by law.

The State follows a comprehensive central planning and compulsory planning approach based on quinquennial socio-economic and cultural development plans whereby the society's resources are mobilized and put to the best use.

The public Sector assumes the leading role in the development of the national economy. The State provides

absolute protection of this Sector as well as the property of co-operative societies and trade unions against all attempts to tamper with them.

CHAPTER 3

Public Liberties, Rights and Duties

All citizens are equal before the law. Personal liberty is a natural right and no one may be arrested, searched, imprisoned or restricted in any way without a court order.

Houses have sanctity, and shall not be placed under surveillance or searched without a court order with reasons given for such action.

The law safeguards the sanctities of the private lives of all citizens; so have all postal, telegraphic telephonic and other means of communication which may not therefore be confiscated, or perused except by a court order giving the reasons, and only for a specified period.

Public rights and freedoms are also inviolate and all calls for atheism and anything that reflects adversely on divine religions is prohibited.

The freedom of opinion, the Press, printing and publications and all information media are safeguarded.

Press censorship is forbidden, so are warnings, suspensions or cancellations through administrative channels. Under exceptional circumstances as in cases of emergency or in war time, censorship may be imposed on information media for a definite period.

Egyptians have the right to permanent or provisional emigration and no Egyptian may be deported or prevented from returning to the country.

Citizens have the right to private meetings in peace provided they bear no arms. Egyptians also have the right to form societies which have no secret activities or are hostile to the government. Public meetings are also allowed within the limits of the law.

CHAPTER 4

Sovereignty of the Law

All acts of crime should be specified together with the penalties for the acts.

Recourse to justice, it says, is a right of all citizens, and those who are financially unable, will be assured of means to defend their rights.

Arrested persons may protest against their detention and their protests should be decided upon within a prescribed period otherwise they should be released.

CHAPTER 5

System of Government

The President, who must be at least 40 years old, is nominated by at least one-third of the members of the People's Assembly, approved by at least two-thirds, and elected by popular referendum. His term is for six years and he 'may be re-elected for another subsequent term.' He may take emergency measures in the interests of the state but these measures must be approved by referendum within 60 days.

The People's Assembly, elected for five years, is the legislative body and approves general policy, the budget and the development plan. It shall have 'not less than 350' elected members, at least half of whom shall be workers or farmers, and the President may appoint up to ten additional members. In exceptional circumstances the Assembly, by a two-thirds vote, may authorize the President to rule by decree for a specified period but these decrees must be approved by the Assembly at its next meeting. The law governing the composition of the People's Assembly was amended in May 1979 (see People's Assembly, below).

The Assembly may pass a vote of no confidence in a Deputy Prime Minister, a Minister or a Deputy Minister,

provided three days' notice of the vote is given, and the minister must then resign. In the case of the Prime Minister, the Assembly may "prescribe" his responsibility and submit a report to the President: if the President disagrees with the report but the Assembly persists, then the matter is put to a referendum: if the people support the President the Assembly is dissolved; if they support the Assembly the President must accept the resignation of the Government. The President may dissolve the Assembly prematurely, but his action must be approved by a referendum and elections must be held within 60 days.

Executive Authority is vested in the President, who may appoint one or more vice-presidents and appoints all ministers. He may also dismiss the vice-presidents and ministers. The President has 'the right to refer to the people in connection with important matters related to the country's higher interests.' The Government is described as 'the supreme executive and administrative organ of the state'. Its members, whether full ministers or deputy ministers, must be at least 35 years old. Further sections define the roles of Local Government, Specialized National Councils, the Judiciary, the Higher Constitutional Court, the Socialist Prosecutor General, the Armed Forces and National Defence Council and the Police.

CHAPTER 6

General and Transitional Provisions

No law shall normally have retroactive effect, but this may be changed, except in criminal matters, with the approval of a majority of the Assembly. Articles of the constitution may be revised, at the suggestion of the President or one-third of the Assembly, but the revision must be submitted for approval by a public referendum. The term of the present President shall date from his election as President of the United Arab Republic.

Political Parties

In June 1977 the People's Assembly adopted a new law on political parties, which, subject to certain conditions, permitted the formation of political parties for the first time since 1953. A new draft law was enacted in June 1978 by which the operation of political parties was made much more difficult but in July 1978 President Sadat announced the formation of his own political party, the National Democratic Party.

1980 Amendments

On April 30th, 1980, the People's Assembly passed a number of amendments, which were subsequently massively approved at a referendum the following month. A summary of the amendments follows:

- (i) the regime in Egypt is socialist-democratic, based on the alliance of working people's forces.
- (ii) the political system depends on multiple political parties; the Arab Socialist Union is therefore abolished.
- (iii) the President is elected for a six-year term and can be elected for "other terms".
- (iv) the President shall appoint a Consultative Council to preserve the principles of the revolutions of July 23rd, 1952, and May 15th, 1971.
- (v) a Supreme Press Council shall safeguard the freedom of the press, check government censorship and look after the interests of journalists.
- (vi) Egypt's adherence to Islamic jurisprudence is affirmed. Christians and Jews are subject to their own jurisdiction in personal status affairs.
- (vii) there will be no distinction of race or religion.

JUDICIAL SYSTEM

The Courts of Law in Egypt are principally divided into two juridical court systems: Courts of General Jurisdiction and Administrative Courts. Since 1979 the Supreme Constitutional Court has been at the top of the Egyptian judicial structure.

I. THE SUPREME CONSTITUTIONAL COURT

Is the highest court in Egypt. It has jurisdiction over: (i) judicial review of the constitutionality of laws and regulations; (ii) resolution of positive and negative jurisdictional conflicts and determination of the competent court between the different juridical court systems, e.g. Courts of General Jurisdiction and Administrative Courts, as well as other bodies exercising judicial competence; (iii) determination of disputes over the enforcement of two final but contradictory judgments rendered by two courts each belonging to a different juridical court system; (iv) rendering binding interpretation of laws or decree laws in the event of a dispute in the application of said laws or decree laws, always provided that such a dispute is of a gravity requiring conformity of interpretation under the constitution. The Supreme Constitutional Court is composed of the Chief Justice and nine Justices.

Chief Justice: HON. AHMED MAMDOUH ATTEYA.

II. COURTS OF GENERAL JURISDICTION

The Courts of General Jurisdiction in Egypt are basically divided into four categories, as follows: (i) The Court of Cassation (*Cour de Cassation*); (ii) The Courts of Appeal; (iii) The Tribunals of First Instance; (iv) The District Tribunals; each of the above courts is divided into Civil and Criminal Chambers.

(i) **Court of Cassation:** Is the highest court of general jurisdiction in Egypt. Its sessions are held in Cairo. Final judgments rendered by Courts of Appeal in criminal and civil litigation may be petitioned to the Court of Cassation by the Defendant or the Public Prosecutor in criminal litigation and by any of the parties in interest in civil litigation on grounds of defective application or interpretation of the law as stated in the challenged judgment, on grounds of irregularity of form or procedure, or violation of due process, and on grounds of defective reasoning of judgment rendered. The Court of Cassation is composed of the President, 15 Vice-Presidents and 80 Justices.

President: HON. MOUSTAFA SELIM.

(ii) **The Courts of Appeal:** Each has geographical jurisdiction over one or more of the governorates of Egypt:

Cairo, Alexandria, Tanta, Asyut, Mansura, Ismailia and Beni-Suef. Each Court of Appeal is divided into Criminal and Civil Chambers. The Criminal Chambers try felonies, and the Civil Chambers hear appeals filed against such judgment rendered by the Tribunals of First Instance where the law so stipulates. Each Chamber is composed of three superior judges. Each Court of Appeal is composed of President, and sufficient numbers of Vice-Presidents and Superior Judges.

(iii) **The Tribunals of First Instance:** In each governorate there are one or more Tribunals of First Instance, each of which is divided into several Chambers for criminal and civil litigations. Each Chamber is composed of: (a) a presiding judge, and (b) two sitting judges. A Tribunal of First Instance hears, as an Appellate Court, certain litigations as provided under the law.

(iv) **District Tribunals:** Each is a one-judge ancillary Chamber of a Tribunal of First Instance, having jurisdiction over minor civil and criminal litigations in smaller districts within the jurisdiction of such Tribunal of First Instance.

PUBLIC PROSECUTION

Public prosecution is headed by the Attorney General, assisted by a number of Senior Deputy and Deputy Attorneys General, and a sufficient number of chief prosecutors, prosecutors and assistant prosecutors. Public prosecution is represented at all levels of the Courts of General Jurisdiction in all criminal litigations and also in certain civil litigations as required by the law. Public prosecution controls and supervises enforcement of criminal law judgments.

Attorney General: HON. SALAH ELRASHEIDY.

III. ADMINISTRATIVE COURTS SYSTEM (CONSEIL D'ETAT)

The Administrative Courts have jurisdiction over litigations involving the State or any of its governmental agencies. The Administrative Courts system is divided into two courts: the Administrative Courts and the Judicial Administrative Courts, at the top of which is the High Administrative Court.

President of Conseil d'Etat: HON. TAHER ABDEL-HAMID.

RELIGION

About 90 per cent of Egyptians are Muslims, and almost all of these follow Sunni tenets. A preparatory committee for a Supreme Islamic Council was set up in November 1979. There are about 4 million Copts, forming the largest religious minority. Besides the Copts there are other Christian minorities numbering about a quarter of a million and consisting of Greek Orthodox, Roman Catholics, Armenians and Protestants. There is also a small Jewish minority.

Grand Sheikh of Al Azhar: Dr. MUHAMMAD ABDUL RAHMAN BISAR.

Grand Mufti of Egypt: ALI GAD AL-HAQ.

Coptic Orthodox Church: Anba Ruess Building, Ramses St., Abbasiya, Cairo; f. A.D. 61; Leader Pope SHENOUDA III; about 8 million followers in Egypt, Sudan, other African countries, the U.S.A., Canada, Australia; Europe and the Middle East. In September 1981 Pope Shenouda was banished to a monastery by President Sadat and a committee of five bishops was appointed to administer the Church.

Coptic Catholic Church: Patriarch Cardinal STEPHANOS I, SIDAROUS, 34 Sh. Ibn Sandar, Koubbeh Bridge, Cairo; 4 dioceses; 150,000 mems.; publs. *Al Salah*, *Sadik el Kahen*, *Al Risalat*.

Greek Catholic Patriarchate: P.O.B. 50076 Beirut, Lebanon; 16 rue Daher, Cairo; Patriarch of Antioch, of Alexandria and of Jerusalem His Beatitude MAXIMOS V HAKIM; 500,000 mems. in the Middle East.

Greek Orthodox Church: Patriarch NIKOLAUS VI.

Armenian Apostolic Church: 179 Ramses Ave., Cairo, P.O.B. 48-Faggala; Archbishop ZAVEN CHINCHINIAN; 12,000 mems.

Armenian Catholic Patriarchate: 36 Mohammed Sabri Abou Alam Street, Cairo; Archbishop RAPHAEL BAYAN.

Maronite Church: 15 Hamdi Street, Daher, Cairo; Archbishop JOSEPH MERHI.

Syrian Catholic Church: 46 rue Daher, Cairo; Bishop BASILE MOUSSA DAUD.

Jewish Community: Office of the Chief Rabbi, Rabbi HAIM DOUEK; 13 Sebil-el-Khazindar St., Abbassia, Cairo.

THE PRESS

Despite a fairly high illiteracy rate, the Egyptian Press is well developed. Cairo is the biggest publishing centre in the Middle East.

Legally all newspapers and magazines come under the control of the Higher Press Council. The four big publishing houses of al-Ahram, Dar al-Hilal, Dar Akhbar al-Yom and Dar al-Gomhuriya, operate as separate entities and compete with each other commercially. Dar al-Hilal is concerned only with magazines and publishes *al-Mussawar*, *Hawa'a* and *al-Kawakeb*. Dar Akhbar al-Yom publishes the daily newspaper *al-Akhbar*, the weekly newspaper *Akhbar al-Yom* and the weekly magazine *Akher Saa*.

Dar al Gomhuriya publishes the daily *al-Gomhuriya*, the daily English language paper *Egyptian Gazette*, the daily French newspaper *Le Progrès Egyptien* and the afternoon paper *al-Misaa*.

The most authoritative daily newspaper is the very old established *al-Ahram*. Other popular large circulation magazines are *Rose al-Youssef*, *Sabah al-Kheir* and *al Izaw wal Television*.

In February 1974 President Sadat ended press censorship, except on military matters, and foreign correspondents in Cairo were relieved of the duty of submitting their reports, except those on military matters, for censorship.

In May 1975 President Sadat set up the Supreme Press Council, under the Chairmanship of the First Secretary of the Arab Socialist Union, to supervise the Press.

In November 1978, however, President Sadat abolished the Ministry of Culture and Information, but major papers remained under government ownership. A Press Law of July 1980 liberalized the organization of the major papers and, while continuing to provide for 49 per cent ownership by the employees, arranged for the transfer of the remaining 51 per cent from the defunct Arab Socialist Union to the new Shura (Advisory) Council.

EL SALVADOR

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of El Salvador lies on the Pacific coast of Central America. It is bounded by Guatemala to the west and Honduras to the north and east. The climate varies from the tropical coastal plain to the temperate uplands. The language is Spanish. About 80 per cent of the population are Roman Catholic. The national flag (proportions 3 by 2) consists of three horizontal stripes, blue, white and blue, the central stripe bearing the national coat of arms. The capital is San Salvador.

Recent History

El Salvador was ruled by Spain until 1821 and became independent in 1839. Since then the country's history has been one of frequent coups and outbursts of political violence. General Maximiliano Hernández Martínez became President in 1931, and in 1932 put down a peasant uprising with an alleged 30,000 killings. He was overthrown in 1944 and the next elected President, Gen. Salvador Castañeda Castro, was overthrown in 1948. The next President, Lt.-Col. Oscar Osorio (1950-56), relinquished power to Lt.-Col. José María Lemus, who was then deposed by a bloodless coup in 1960. He was replaced by a military junta which was itself supplanted by another junta in January 1961. Under this junta the conservative *Partido de Conciliación Nacional* (PCN) was established and won all 54 seats in the elections to the Legislative Assembly in December 1961. A member of the junta, Lt.-Col. Julio Adalberto Rivera, was elected unopposed to the Presidency in 1962. He was succeeded by a former Minister of the Interior, Gen. Fidel Sánchez Hernández, the candidate of the ruling PCN, in 1967.

In the 1972 presidential elections Col. Arturo Armando Molina Barraza, candidate of the ruling PCN, was elected. His rival José Napoleón Duarte, the leader of the left-wing coalition party *Unión Nacional de Oposición*, launched an abortive coup in March and Col. Molina took office in July, despite allegations of massive electoral fraud. These allegations were repeated in the 1977 presidential elections, after which the PCN candidate, Gen. Carlos Humberto Romero Mena, took office.

Reports of abuse of human rights by the Government continued in 1979 despite the rescinding of arbitrary arrest in March. The polarization of left and right since 1972 became evident in the increase in guerrilla activity, which in 1979 included the occupation of the French, Costa Rican and Venezuelan embassies and of both cathedrals in San Salvador, the killing of the Minister of Education and a Swiss chargé d'affaires, and the kidnapping of government ministers and businessmen. In October President Romero was overthrown by a junta of civilians and army officers. The junta promised to install a democratic system and to call elections, declared a political amnesty and invited participation from the guerrilla groups, but violence continued between government and guerrilla forces and elections were postponed. In January 1980 an ultimatum from progressive members of the Government resulted in the formation of a new Government, a coalition of military officers and the *Partido Demócrata Cristiano* (PDC). The

PDC demanded changes in the security forces, dialogue with left-wing groups and the exclusion of private enterprise representatives from the Government. These provisions, however, alienated right-wing groups but failed to gain the allegiance of left-wing groups, and kidnappings and political murders continued.

In December 1980 José Napoleón Duarte, the 1972 presidential candidate and a member of the junta, was sworn in as President. Colonel Adolfo Arnoldo Majano was dismissed from the junta and went into exile, where he accused the Government of complicity in the murders of several prominent Salvadoreans and of four U.S. missionaries. In January 1981 the guerrillas launched their "final offensive" and, after initial gains, the opposition front, *Frente Democrático Revolucionario*—FDR (allied with the guerrilla front, the *Farabundo Martí de Liberación Nacional*—FMLN), called for negotiations with the U.S.A. The U.S. authorities referred them to the Salvadorean Government, which refused to recognize the FDR while it was linked with the guerrillas. Fighting was renewed in March and intensified in May with no final victory attained, although the FMLN appeared to be increasing its control of rural areas.

There has been considerable international concern over El Salvador for both humanitarian and political reasons. The death toll between January 1980 and August 1981 was 25,000, by which time the daily toll stood at 30 deaths. Nearly 200,000 people have become refugees, mostly fleeing to Mexico, Guatemala and Honduras. The political considerations focus on the question of foreign involvement; the junta has always been supported by the U.S.A. and in January 1981 the supply of U.S. \$5 million worth of non-lethal military aid and \$5.4 million of lethal military aid was agreed by the Carter Government. President Reagan continued support for the junta, although his policy was concerned less with backing the reforms advocated by the PDC than with countering suspected communist infiltration. A white paper published by the U.S. Administration in February made allegations of Cuban and Soviet military supplies to the guerrillas, which could not be substantiated. Several suggestions of mediation have been made, but the problem continued to be recognition of the FDR-FMLN and the increasing inability of President Duarte to hold the armed forces in check.

Government

Executive power is exercised by the Junta, which consists of the President, the Vice-President and two other members, assisted by an appointed Council of Ministers. Legislative elections were scheduled for March 1982, and presidential elections for 1983.

Defence

A period of national service is compulsory between the ages of 18 and 30. In July 1981 the army totalled 9,000 men, the navy 100 and the air force 750. Para-military forces number 7,000 men. Defence expenditure in 1980 was U.S. \$72 million.

Economic Affairs

The economy is primarily agricultural, with foodstuffs providing 70 per cent of export earnings in 1979. The principal crop is coffee, which accounted for 63.7 per cent of exports by value in 1979, while other major crops are cotton, sugar, maize, beans and rice. Export taxes on these primary products provide a third of the government's fiscal income. The agricultural sector was severely affected in 1980/81 by the fall in world coffee prices, bad weather and a credit squeeze. The continued rural warfare also reduced productivity, although output of maize, rice and beans was improved over the 1979/80 level. The 1981-83 Plan designated 40 per cent of its budget to agriculture, especially to production of staple crops, fisheries, livestock and land redistribution.

The agrarian reform plan, introduced in March 1980 as part of the junta's political and economic programme, provided for land expropriation in three stages: farms of over 500 hectares; farms of between 150 and 500 hectares; all rented cultivated land to be turned over to tenant farmers. By the end of 1981 only the first stage had been accomplished and the Government was under pressure from commercial and financial interests to shelve the plan and compensate landowners already deprived. The problems that the plan did not tackle were that most of the plots worked by small tenant farmers were inadequate to make them self-sufficient, and that the number of landless peasants was being increased by the political troubles, so that by 1980 an estimated 65 per cent of the rural population was unaffected by any reform of land tenure.

El Salvador is the most highly industrialized country in the C.A.C.M. Manufacturing, concentrated in food processing, textiles, clothing, leatherwork and pharmaceuticals, accounted for 15.4 per cent of the G.D.P. in 1979. The sector was hard hit by the armed conflict in 1980, when production fell by between 8 and 17 per cent. The sabotage campaign mounted by the left-wing guerrillas in mid-1981 caused damage estimated at U.S. \$4.8 million and all industry was operating at about 50 per cent capacity; over 170 business concerns had closed since 1979 and capital flight in the same period totalled 650 million colones. In 1981 the rate of unemployment was officially given as 30 per cent and unofficially as 50 to 60 per cent.

Diminished domestic agricultural and industrial production resulted in falls of 9 per cent in the G.D.P., 12 per cent in imports, 16 per cent in exports and 30 per cent in capital formation in 1980. A large part of the finance supplied by the Central Bank to cover the 1980 budget deficit was raised by increasing the note issue. By March 1981 the Government required \$240 million in balance-of-payments assistance and \$260 million in public sector investment. The Government has become increasingly dependent on foreign aid, which amounted to \$79.3 million in 1979, \$183.9 million in 1980 and \$464.9 million in 1981, with \$254 million of the 1981 total coming directly or indirectly from the U.S.A. No immediate improvement in the economy was anticipated in 1981. In the first six

months of the year inflation reached 32 per cent and income per head fell by 6 per cent.

El Salvador is a member of C.A.C.M., S.E.L.A. and the I.D.B.

Transport and Communications

The transport network is well developed. In 1978 there were 602 km. of railways. The Pan American Highway bisects the country and a parallel coastal highway with interconnecting roads is under construction. The chief ports are Acajutla and Cutuco. Ilopango Airport is a military base, and Cuscatlán Airport handles international air traffic.

Social Welfare

In 1949 the Instituto Salvadoreño del Seguro Social (ISSS) was established. This institute provides hospital facilities, medicines and benefits for industrial injury, sickness, accident, disability, maternity, old age and death. Health and welfare insurance is financed by contributions from workers, employers and the State. The Ministry of Health runs 250 medical units, including 14 hospitals. In 1978 its budget was 149 million colones, of which 36 million was allocated for investment programmes.

Education

In 1978 there were about 4,400 public and private schools, with over one million pupils. There is one national university and several private universities. Although state education is free and compulsory the illiteracy rate is about 50 per cent. The budgetary allocation for education in 1978 was 290 million colones.

Tourism

El Salvador was one of the centres of the ancient Mayan civilization and the ruined temples and cities are of great interest. The volcanoes and lakes of the uplands provide magnificent scenery and there are fine beaches along the Pacific coast. The civil war in progress since 1979 has devastated the tourist industry.

Public Holidays

1982: May 1st (Labour Day), June 10th (Corpus Christi), August 1st-6th (San Salvador Festival*), September 15th (Independence Day), October 12th (Discovery of America), November 2nd (All Souls' Day), November 5th (First Call of Independence), December 24th, 25th (Christmas).

1983: January 1st (New Year's Day), April 1st-4th (Easter).

* August 5th, 6th in other cities.

Weights and Measures

The metric system is in force although some old Spanish measures are also used, including:

25 libras = 1 arroba;
4 arrobas = 1 quintal (46 kg.).

Currency and Exchange Rates

100 centavos = 1 Salvadorean colón.

Exchange rates (December 1981):

£1 sterling = 4.81 colones;
U.S. \$1 = 2.50 colones.

THE CONSTITUTION

Note: Parts of the Constitution have been in abeyance since the coup of October 1979.

The Constitution of January 1962 provides for a republican, democratic and representative form of government, composed of three Powers—Legislative, Executive, and Judicial—which are to operate independently. Voting is a right and duty of all citizens over eighteen years of age. Presidential and congressional elections may not be held simultaneously.

The Constitution binds the country, as part of the Central American Nation, to favour the total or partial reconstruction of the Republic of Central America. The Executive may, with the approval of the Legislature, endeavour to bring this about in a federal or unitary form, without seeking the approval of a constituent assembly, provided that republican and democratic principles are respected and the basic rights of individuals and of groups fully guaranteed in the new State.

LEGISLATIVE ASSEMBLY

The Legislative Power is vested in a single Chamber, the Legislative Assembly, whose members are elected every two years and are eligible for re-election. The Assembly meets in ordinary session on June 1st and December 1st. Extraordinary sessions may be convened by the Executive or by the Permanent Commission. The Assembly's duties include the choosing of the President and Vice-President of the Republic from the two citizens who shall have gained the largest number of votes for each of these offices, if no candidate obtains an absolute majority in the election. It also selects the members of the Supreme and subsidiary courts; of the Elections Council; and the Accounts Court of the Republic. It fixes taxes; gives

power to the Executive to negotiate internal and external loans; sanctions the Budget; regulates the monetary system of the country; determines the conditions under which foreign currencies may circulate; and suspends and re-imposes constitutional guarantees. The right to initiate legislation may be exercised by the Assembly (as well as by the President through his ministers and by the Supreme Court). The Assembly may over-ride by a two-thirds majority the President's objections to a Bill which it has sent to him for approval.

PRESIDENT

The President is elected for five years, his term beginning and expiring on July 1st. The principle of alternation in the presidential office is established in the Constitution, which states the action to be taken should this principle be violated. The Executive is responsible for the preparation of the Budget and its presentation to the Assembly; the direction of foreign affairs; the organization of the armed and security forces; and the convening of extraordinary sessions of the Assembly. In the event of his death or incapacity, the Vice-President takes his place for the rest of the presidential term; and in case of necessity, the Vice-President may be replaced by one of the three Designates elected by the Legislative Assembly for a period of two years.

JUDICIARY

The Judicial Power is exercised by a Supreme Court and by other competent tribunals. The Supreme Court is composed of ten members elected by the Legislature. It alone is competent to decide whether laws, decrees and regulations are constitutional or not.

EQUATORIAL GUINEA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Equatorial Guinea consists of the islands of Bioko (formerly Fernando Póo and subsequently renamed Macías Nguema Biyogo under the regime of President Macías), Corisco, Great Elobey and Small Elobey, and Pagalu (also known as Annobón), and the mainland territory of Río Muni on the west coast of Africa. Cameroon lies to the north and Gabon to the east and south of Río Muni, while Bioko lies offshore from Cameroon and Nigeria. The small island of Pagalu lies far to the south, beyond the islands of São Tomé and Príncipe. The climate is hot and humid with average temperatures over 26°C (80°F). The official language is Spanish. In Río Muni the Fang language is spoken, as well as those of coastal tribes such as the Combe, Balemke and Bujeba, while in Bioko the principal local language is Bubi, though pidgin English and Ibo are also widely understood. About 80 per cent of the population are Roman Catholic. The national flag (proportions 3 by 2) has green, white and red horizontal stripes, with a light blue triangle at the hoist. The state flag has, in addition, the national coat of arms on the white stripe. The capital is Malabo (formerly Santa Isabel).

Recent History

After 190 years of Spanish rule, independence was declared on October 12th, 1968, following a referendum on the proposed constitution. In presidential elections held in September 1968 the Prime Minister of the autonomous government, Bonifacio Ondo Edu, was defeated by Francisco Macías Nguema. Macías formed a coalition government from all the parties represented in the new National Assembly. Relations with Spain became strained early in 1969 after a series of anti-European incidents and an attempted coup in March by the Foreign Minister, Atanasio Ndongó Miyone, who was killed.

In 1970 the President outlawed all existing political parties and formed the *Partido Unico Nacional* (PUN), which later became the *Partido Unico Nacional de los Trabajadores* (PUNT). Macías appointed himself Life President in July 1972. A new constitution, giving absolute powers to President Macías and abolishing the provincial autonomy previously enjoyed by Fernando Póo (then renamed Macías Nguema Biyogo), was adopted in July 1973. President Macías controlled both radio and press and all citizens were forbidden to leave the country, although many fled during his rule. In 1978 it was estimated that about 100,000 refugees from Equatorial Guinea were living in Africa, mostly in neighbouring Cameroon and Gabon, and about 7,000 refugees in Europe. During 1976 and 1977 there were many arrests and executions, particularly of opposition leaders and the educated. Nigerian treaty workers were repatriated in 1976 after reports of maltreatment and forced labour. The principal foreign nationals then remaining were East European and Cuban advisers and representatives of French and Spanish business interests.

On August 3rd, 1979, President Macías was overthrown in a coup led by his nephew, Deputy Defence Minister

Lt.-Col. Teodoro Obiang Nguema Mbasogo. Macías was later captured, tried on charges of treason, genocide, embezzlement and violation of human rights, and executed by a military firing squad.

The Spanish Government, which admitted prior knowledge of the coup, was the first to recognize the new regime, and has been the major supplier of financial and technical aid. Many exiles have returned to the country since the coup, but a number of opposition parties exist in exile and, in August 1981, several of them held a joint meeting in Río Muni. Under President Obiang Nguema, political parties have been banned and the country has been ruled by the armed forces.

A coup attempt against President Obiang Nguema was reported in April 1981, although the reasons for it appeared confusing. In August the President promised that a referendum on a new constitution would take place in 1982; he is also committed to returning government to a civilian democracy. Local elections took place in September 1981, following the division of the country into six provinces in the previous year.

Government

Since the coup of August 1979 a Supreme Military Council has ruled by decree. It was planned to hold a referendum in 1982 on a new constitution under which a President would be elected, a Prime Minister appointed, and government would be returned to civilians.

Defence

The Supreme Military Council has ordered the re-organization of the paramilitary and armed forces into an army, navy and air force. Spain has provided military advisers and training since October 1979.

Economy

The economy is based almost entirely on agriculture, the principal products being cocoa, coffee, palm oil, bananas and okoumé timber. About 90 per cent of all cocoa production comes from Bioko. Coffee and timber are produced mainly in Río Muni, which is heavily forested. Between 1970 and 1975, according to World Bank estimates, G.N.P. per head declined by 6 per cent annually, and with the departure of the Nigerian workers the economic situation deteriorated further. In 1966/67 the cocoa crop was 38,207 metric tons, but the subsequent political upheavals led to the abandonment of many plantations, while others were cut down and replaced with bananas. The 1980 crop was estimated at 5,500 tons, with 9,000 tons predicted for 1981. A programme of replanting, recruitment and training, and the possible return of Nigerian workers, should lead to gradual recovery. There are widespread food shortages and industry is minimal.

At the time of the overthrow of President Macías, the economy was effectively in ruins. The former President had turned the Central Bank into a private source of income. In Malabo the money supply had dried up and wages had long since ceased to be paid. Under President

Obiang Nguema (who uses the motto "Destruction is easy, reconstruction is difficult"), aid has been secured, principally from Spain, France, the EEC, the IMF and the People's Republic of China. Projects are under way to relaunch the economy in agriculture and fishing, transport and communications, electricity generation and supply, health and education. Spain has sent several hundred technical advisers, but former Spanish landowners have been reluctant to return. Spanish and French companies have had positive results from off-shore petroleum explorations, and there are opportunities for mining gold, and other metals and minerals in Río Muni. A law was announced in 1981 which declared all mineral deposits to be state property. These developments should provide the base for a return to economic viability, and possibly to future prosperity. The inconvertibility of the ekuele, which is worthless outside the country despite a 50 per cent devaluation in June 1980, remains a problem.

Transport and Communications

In December 1978 it was reported that only one road in Equatorial Guinea remained open, linking Bata with Mongomo, former President Macías' home village. There is no public transport and the principal communications between the provinces are by air. The main harbour is Malabo, which has regular services to Europe. There are no railways. Development aid has been allocated for road, airport and harbour improvements.

Social Welfare

Health services are extremely limited and diseases such as malaria, infectious hepatitis, whooping cough and dysentery are endemic. In 1971 the country had 25 physicians and 1,637 hospital beds, but by 1978 it was estimated that only 10 physicians remained.

Area: 28,051 sq. km. (Río Muni (Mbini) 26,017 sq. km.).

Population: 245,989 (1960): Río Muni 183,377 (2,864 Europeans); Bioko 62,612 (4,170 Europeans), including Pagalu 1,415; Malabo (capital) 37,237, Bata 27,024. Total estimated population 298,000 (June 30th, 1973).

The resident population has fluctuated because of political upheavals, but has been increasing since the 1979 coup.

Economically active population (mid-1980—estimates in '000): Agriculture, etc. 80; total 107 (*Source:* FAO, *Production Yearbook*).

Land Use (1979—'000 hectares): Arable land 130, Permanent crops 100, Permanent pasture 104, Forest and woodland 1,700, Other land 771, Total 2,805 (all FAO estimates).

Agriculture (1980—metric tons): Cassava 52,000, Sweet potatoes 33,000, Bananas 16,000, Cocoa beans 8,000, Coffee 6,000, Coconuts 7,000, Palm oil 4,700, Palm kernels 2,600 (all FAO estimates).

Livestock (1980): 4,000 cattle, 8,000 pigs, 34,000 sheep, 8,000 goats, 113,000 poultry (all FAO estimates).

Fishing: Annual catch 4,000 metric tons (FAO estimate for 1970-79).

Education

At independence, elementary schools provided compulsory education until the age of 12, continued at primary schools until 14. Secondary education was provided by one centre in Malabo, another at Bata and a third in the Río Muni frontier outpost of Ebebiyin. Bata had a technical secondary school. Malabo also had an Escuela Superior. Bata and Malabo each had a teacher-training school. The exodus of qualified teachers since 1969 has meant that very little schooling is available.

Tourism

During the rule of President Macías, very few foreigners were allowed into Equatorial Guinea. There was no tourism.

Public Holidays

1982: May 1st (Labour Day), May 25th (OAU Day), December 10th (Human Rights' Day), December 25th (Christmas).

1983: January 1st (New Year's Day), March 5th (Independence Anniversary), April 1st-4th (Easter).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 céntimos = 1 ekuele.

Exchange rate (December 1981):

1 ekuele = 50 Spanish céntimos;

£1 sterling = 369.8 ekuele;

U.S. \$1 = 192.4 ekuele.

STATISTICAL SURVEY

Forestry (1979): Roundwood removals (all non-coniferous) 463,000 cubic metres (fuel wood 413,000, industrial wood 50,000) (FAO estimates).

Electricity Production (1978): 24,000,000 kWh. (UN Statistical Office estimate).

Currency: 100 céntimos = 1 ekuele (ekuele).

Coins: 5, 10 and 50 céntimos; 1, 2½, 5, 25, 50 and 100 ekuele.

Notes: 50, 100, 500, 1,000 and 5,000 ekuele.

Exchange rates (December 1981): 1 ekuele = 50 Spanish céntimos; £1 sterling = 369.8 ekuele; U.S. \$1 = 192.4 ekuele; 1,000 ekuele = £2.70 = \$5.20.

Note: The Guinea peseta was renamed the ekuele in September 1975. It was at par with the Spanish peseta until June 1980. From November 1967 to August 1971 the central exchange rate was U.S. \$1 = 70.00 pesetas. Between December 1971 and February 1973 the rate was \$1 = 64.474 pesetas. In terms of sterling, the central rate between June 1959 and June 1972 was £1 = 168.00 pesetas. In February 1973 a new exchange rate of \$1 = 58.026 pesetas was established but since January 1974 the peseta has been allowed to "float". The average market rate (pesetas per \$) was: 58.243 in

1973; 57.688 in 1974; 57.407 in 1975; 66.903 in 1976; 75.967 in 1977; 76.663 in 1978; 67.125 in 1979. The ekuele was devalued in June 1980, the new exchange rate being 1 peseta = 2 ekuele.

Budget (1981 proposals, million ekuele): Revenue 1,951; Expenditure 2,025.

Balance of Payments (million SDRs, 1973): Merchandise trade -1.33, Services 0.36, Transfers -0.15, Total current account -1.22; Capital account 6.66, Net errors and omissions -0.63; Increase in reserve assets 4.81.

External Trade (million pesetas, 1970): Imports c.i.f. 1,472.1; Exports f.o.b. 1,740.9.

Transport (1967): *Shipping*: ships entering 663, ships leaving 663; *Civil Aviation*: passengers arriving Malabo 13,863, passengers leaving Malabo 14,166; passengers arriving Bata 7,350, passengers leaving Bata 7,681.

Education (1973) 35,997 pupils enrolled in 559 primary schools with 630 teachers; (1975) 4,523 pupils in secondary education.

THE CONSTITUTION

Since the coup of August 1979 Equatorial Guinea has been ruled by military decree. The main provisions of the July 1973 constitution (which replaced the independence constitution) were as follows:

Election of the President is to be by direct secret universal suffrage. (As President Macías Nguema had already been appointed Life President, the clause was suspended.) The President is empowered to dissolve the Assembly and call fresh elections, and to nominate and dismiss judges. No person is to be detained or sentenced

except by a competent authority under the laws in force at the time of the offence and subject to procedures established by law. These safeguards do not apply to persons accused of offences against the security of the State or subversion. No further distinction will be made between the mainland province of Mbini, the chief island of Bioko to the north, and various other islands which make up the state of Equatorial Guinea.

Note: In 1981 a new constitution, which would restore civilian rule, was being drafted.

THE GOVERNMENT

HEAD OF STATE

President: Lt.-Col. TEODORO OBIANG NGUEMA MBASOGO (took office August 25th, 1979).

SUPREME MILITARY COUNCIL

(December 1981)

Commissioner for Planning: FEDERICO MESA NKONGO.

Commissioner for Industry and Energy: EDUARDO MANSU MBA.

Commissioner of State in the President's Office: CARMELO OWONO NDGONO ANDEME.

POLITICAL PARTIES

All parties were merged in February 1970 into a *Partido Unico Nacional* under President Macías Nguema. The party was later renamed the *Partido Unico Nacional de los Trabajadores* (PUNT). The Supreme Military Council has instituted a ban on all political parties.

A number of organizations were founded by exiles to oppose the regime of President Macías Nguema. Following the coup of August 1979 exiles have continued to press for the restoration of democracy. Groupings include:

Alianza Nacional de Restauración Democrática (ANRD): B.P. 335, 1211 Geneva 4, Switzerland; f. 1974; Sec.-Gen. ESTEBAN NSUE NGOMO; publ. *La Voz del Pueblo*.

Reunión Democrática para la Liberación de Guinea Ecuatorial (RDLGE): f. 1981; Pres. MANUEL RUBEN NDONGO.

Revolutionary Command-Council of Socialist Guinean Patriots and Cadres: f. 1981; Leader DANIEL OYONO.

Equatorial Guinea also has diplomatic relations with Cameroon, the Central African Republic, Chile, Colombia, Cuba, Czechoslovakia, Egypt, the Federal Republic of Germany, Ghana, Hungary, the Republic of Korea, Panama, Poland, the Vatican City, Viet-Nam and Yugoslavia.

JUDICIAL SYSTEM

An independent and secure judiciary was theoretically guaranteed by the constitution. The Supreme Tribunal at Malabo is the highest court of appeal.

RELIGION

An estimated 80 per cent of the population are Roman Catholic. Traditional forms of worship are also followed.

Both Spanish bishops were expelled in 1973 as were the Spanish nuns of the Immaculate Conception, following disagreement with government policies. Most Catholic schools were closed or taken over by PUNT. All remaining Catholic nuns and priests in Equatorial Guinea were reportedly arrested.

In August 1979 the Supreme Military Council reversed the ban on the Catholic Church.

Bishop of Bata: RAPHAEL NZE ABUY, Obispado, Apdo. 82, Bata, Mbini.

THE PRESS

Ebano: Malabo; weekly.

NEWS AGENCY

Agencia EFE (Spain): Hotel "Impala", Calle Enrique Nvó. No. 60, Apdo. 62, Malabo.

RADIO AND TELEVISION

Dirección General de Correos y Telecomunicaciones: Malabo; Dir.-Gen. V. B. ETANE MATOMBA.

Diplomatic Representation, Judicial System, Religion, etc.

There are two radio stations, both operated by the Government, but it is reported that radio transmission is only intermittent. A new radio station in Bata, built with Chinese help, was handed over in 1977.

Radio Ecuatorial: Apdo. 57, Bata, Mbini; commercial station; Dir. (vacant).

Radio Malabo: Apdo. 195, Malabo; services in Spanish, Fang, Bubi, Annobonés, Combe and English; Dir. MANUEL EDU.

There were approximately 10,000 radio receivers in 1981.

FINANCE

BANKING

Banco de Crédito y Desarrollo: Malabo; branch in Bata.

Banco de Guinea Ecuatorial: Malabo; National Bank; bank of issue; branch in Bata.

Banco Exterior de Guinea Ecuatorial y España (Guinextel-banc): Malabo; external bank.

TRADE AND INDUSTRY

Comité Sindical del Cacao: Bioko (Fernando Póo); grouping of cocoa planters (mainly Spanish owners or lessors and some Portuguese) which buys, stocks and sells the product; used to have paramount role on the island.

Cámaras Oficiales Agrícolas de Guinea: Bioko and Mbini; buys cocoa and coffee from African planters, who are partially grouped in co-operatives.

Empresa Guineano-Española de Petróleos (GEPESA): Malabo; f. 1980; owned equally by Government and Hispanoil; legislation governing petroleum production passed in 1981 and first well drilled in early 1982.

TRANSPORT

ROADS

Bioko (Fernando Póo): a semi-circular tarred road serves the northern part of the island from Malabo down to Batete in the west and from Malabo to Bacake Grande in the east, with a feeder road from Luba to Moka and Bahía de la Concepción; total length about 160 km.

Mbini (Río Muni): a tarred road links Bata with Río Benito (Mbini) in the west; another road, partly tarred, links Bata with the frontier post of Ebebiyin in the east and then continues into Gabon; other earth roads join Acurenam, Mongomo de Guadalupe and Nsork; total roads: 1,015 km.

SHIPPING

The main ports are Malabo (general cargo), Luba (bananas), Bata (general), Río Benito and Kogo (timber).

A regular monthly service is operated by the Spanish Compañía Transmediterránea from Barcelona, calling at Malabo and Bata.

CIVIL AVIATION

There are international airports at Bata and Malabo.

The national airline, Líneas Aéreas Ecuatorial, apparently ceased operations in 1979.

Cameroon Airlines and Iberia (Spain) serve Equatorial Guinea.

ETHIOPIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Socialist Ethiopia extends inland from the Red Sea coast of Africa. It has a long frontier with Somalia near the Horn of Africa. Sudan lies to the west, the Republic of Djibouti to the east and Kenya to the south. The climate is mainly temperate because of the high plateau terrain, with an average annual temperature of 13°C (55°F), abundant rainfall and low humidity. The lower country and valley gorges are very hot. The official language is Amharic but English is widely used, and Arabic is spoken in the Eritrea province. The Ethiopian Coptic (Orthodox Union) Church has a wide following in the north and on the southern plateau. In much of the south and east there are Muslims and followers of animist beliefs. The national flag (proportions 3 by 2) has three horizontal stripes of green, yellow and red. The capital is Addis Ababa.

Recent History

Ethiopia was dominated for over 50 years by Haile Selassie, who became Regent in 1916, King in 1928 and Emperor in 1930. He ruled the country, except during the Italian occupation of 1936-41, until his deposition by the armed forces in September 1974 in the wake of serious regional famine, inflation and unemployment, and growing demands for democratic reform. The Emperor's rule was highly personal and autocratic, but he consolidated the expansion of Ethiopian territory and the gradual process of national modernization begun by the Emperor Menelik (1865-1913). Under Haile Selassie, the former Italian colony of Eritrea was merged with Ethiopia, in a federal arrangement, in September 1952. Eritrea's federal status was ended in November 1962, when it was annexed to Ethiopia as a province. Haile Selassie was a leading exponent of pan-Africanism and a founding member of the OAU, which has its headquarters in Addis Ababa. He died a captive of the present military regime in August 1975.

The revolution of September 1974 was engineered by an Armed Forces Co-ordinating Committee, known popularly as the Dergue, which controls ultimate power. The Dergue established a Provisional Military Government (PMG), headed by Lt.-Gen. Aman Andom. In November, after a dispute in the military leadership, Gen. Andom was deposed and shot. The PMG was replaced by a Provisional Military Administrative Council (PMAC), led by Brig.-Gen. Teferi Benti; the monarchy was abolished in March 1975.

In December 1974 Ethiopia was declared a socialist state and a national programme called Ethiopia Tikdem (Ethiopia First) was outlined and carried out the following year. Insurance companies, banks, financial institutions, large industries, rural and urban land and schools were nationalized, while peasant co-operatives and industrial workers' councils were established.

Widespread unrest continued throughout 1975 and 1976 despite moves by the Dergue to ease tension by releasing some detainees and promising a return to

civilian rule, at an unspecified date. Strains within the Dergue were reflected by its reorganization in December 1976. However, in February 1977, Lt.-Col. Mengistu Haile Mariam killed Brig.-Gen. Teferi Benti and his closest associates and replaced him as chairman of the PMAC and Head of State.

The Government continued to meet political and armed opposition from various groups, both Marxist and anti-Marxist. These were partially suppressed by counter-insurgency forces, including armed members of the kebelles (urban dwellers' associations) and peasant associations. During 1977 and 1978 thousands of opponents of the Government were killed or imprisoned in a programme of "rehabilitation" or "liquidation". Until July 1977 the Dergue was assisted by Meison (Marxist All-Ethiopia Socialist Movement) but later formed its own party, Abyot Seded (Revolutionary Flame), which sought to enlist civilian support. However, all political groupings were theoretically swept away in late 1979 when a Commission for Organizing the Party of the Working People of Ethiopia (COPWE) was established.

The Central Committee of COPWE, which is dominated by military personnel, held its first congress in June 1980. In February 1981 it announced that peasant co-operatives were to be encouraged, and mass organizations for youth, women, peasants and workers to be strengthened.

Numerous secessionist movements, encouraged by the confusion created by the revolution, seek the destruction of the empire created by Menelik and Haile Selassie. These are strongest in the Ogaden region and Eritrea. Somalia lays claim to the Ogaden, which is inhabited mainly by ethnic Somalis, and regular Somali forces have supported Western Somali Liberation Front (WSLF) incursions. In 1977 the Somalis made major advances in the Ogaden, but in 1978 were forced to retreat. By the end of 1980 the Ethiopian defence forces were in control of virtually the whole of the Ogaden. An OAU committee declared the Ogaden an integral part of Ethiopia in 1980.

Secessionist movements have existed in Eritrea since its annexation by Selassie's Ethiopia in 1962, and also in Tigre, claiming to control large tracts of the provinces. After spending 1978 in retreat, the strongest movement, the Eritrean People's Liberation Front (EPLF), launched a major offensive from its stronghold of Nakfa in December 1979. In mid-1980 there was a rift in the alliance, and later fighting, between the EPLF and the Eritrean Liberation Front (ELF). Despite a peace plan suggested by the EPLF in November, in which they made clear to the Government that an offer of regional autonomy for Eritrea might end the war, the Ethiopian army launched a major offensive which further weakened the guerrillas in December. Fighting continued during 1981, but at a lower level of intensity. In March 1981, encouraged by Saudi Arabia and Iraq, the EPLF, ELF and two other Eritrean groups formed a joint co-ordinating committee.

Earlier Ethiopian efforts to defeat the secessionists were hampered by its diplomatic isolation from its neighbours,

particularly Sudan, which harboured and supplied Eritrean guerrillas. The normalization of Ethiopian relations with Sudan during 1980 led to a closing of the border to the guerrillas. After Lt.-Col. Mengistu's coup in February 1977, the U.S.S.R. supplanted the U.S.A. as Ethiopia's principal arms supplier, and military support has also been received from other Eastern bloc countries, Libya and Cuba. A treaty of friendship and co-operation between Ethiopia and the U.S.S.R. was signed in 1978. In response to U.S. military interests in Somalia, Oman and Egypt, in August 1981 a treaty of friendship and co-operation was also signed between Ethiopia, Libya and the People's Democratic Republic of Yemen, which are all Soviet-influenced states. Ethiopia has also developed closer diplomatic links with its neighbours, Kenya and Djibouti, which have attempted to bring about a reconciliation with Somalia.

Government

Socialist Ethiopia has been ruled since November 1974 by a Provisional Military Administrative Council (PMAC), chaired by the Head of State. A General Congress comprising all members of the PMAC, or Dergue (whose original 120 members were reduced to about 80), decides policy; a Central Committee of 32, elected by the Congress, and a Standing Committee of 16 (reduced in 1979 to 8), elected from the Central Committee of the Congress, execute the decisions of the Congress. The powers of the largely civilian Council of Ministers, appointed by the PMAC, are closely defined. The Chairman of the PMAC presides over each of its three sections, is Chairman of the Council of Ministers, Head of State and Commander-in-Chief of the armed forces. Local government is carried out by kebelles (urban dwellers' associations) and peasant associations. These have elected committees of 15 members and extensive administrative and judicial powers. There are over 1,200 kebelles and about 30,000 peasant associations, organized into the All-Ethiopia Peasants' Association in 1978.

In 1979 a Commission for Organizing the Party of the Working People of Ethiopia was formed, which will establish a Marxist-Leninist workers' party and make possible the transfer of power from the PMAC to civilians.

Defence

Military service is compulsory. In July 1981 Ethiopia had a regular army of 75,000 men, an air force of 3,500 and a navy of 1,500. There is also a People's Militia of about 150,000 men. Reservists for all the services total 20,000 men. Ethiopia receives arms and technical assistance from Warsaw Pact countries and there are an estimated 11,000 Cubans serving in the armed forces and acting as military advisers. Defence expenditure in 1980 was 1,100 million birr.

Economic Affairs

The economy is mainly agricultural and pastoral, with agriculture producing 51 per cent of total G.D.P. in 1980, and almost all the country's exports. Revenue from coffee, about 87,000 metric tons of which were exported in 1980, accounts for about 75 per cent of all export receipts. Other important exports are hides and skins, pulses and oilseeds. Fishing and forestry are still small-scale activities. A radical land reform programme to stimulate agricultural

development by breaking down the feudal system of tenure was initiated in 1975 after all land had been nationalized. By 1981 about 400,000 hectares had been distributed to landless peasants, but since 1979 the establishment of producer co-operatives, with the eventual conversion to communal ownership, has been encouraged. Much of the production of cash crops takes place on state farms, which cover a total of about 300,000 hectares. Nevertheless, 45 per cent of production is at subsistence level. Soil erosion, due to poor agricultural techniques, deforestation and over-grazing, is an increasing problem, and land is becoming barren at an estimated rate of 200,000 hectares a year.

Industry contributes about 16 per cent to the G.D.P. of Ethiopia and is mainly confined to food processing and the manufacture of textiles and goods for local consumption. Half of Ethiopia's industry is in Eritrea, although the war there has forced many factories to close. Ethiopia has small reserves of gold, platinum, copper and potash, which are being exploited with the assistance of the U.S.S.R. There has also been Soviet exploration for petroleum. In 1980, 55 per cent of exports were spent on fuel imports, even though these are received from the U.S.S.R. at a concessionary rate. The capacity of the single oil refinery in the country is to be doubled to 1 million metric tons. In 1975 banks, insurance companies and many large industrial concerns were nationalized, and in 1976 a private enterprise decree regulated the functioning of the private sector. Shipping and maritime services were nationalized in 1979.

The budget is consistently in deficit, mainly due to heavy defence spending, which accounted for 32 per cent of expenditure in 1979/80. The trade deficit recorded in 1979/80 was birr 545 million, and by June 1980 Ethiopia's total foreign debt had reached birr 1,460 million.

Ethiopia suffered from severe drought and famine between 1977 and 1980. In 1981, although heavy rain caused flooding in places, up to 5 million people were still in need of food aid. The problem has been exacerbated by the fighting in Eritrea, the Ogaden and elsewhere, which has displaced millions. Relief attempts have been hindered by the continuing conflicts within Ethiopia, the lack of foreign exchange due to defence expenditure requirements, and obstacles created by political differences with the West.

Economic development is hampered by lack of adequate transport and communications, trained manpower and financial investment, and by the dislocations caused by political change. In 1978 the Government began a series of one-year plans under a National Revolutionary Development Campaign. In 1981 the Government announced a ten-year development plan, during which the average annual growth rate in G.D.P. was expected to be 7.5 per cent, compared with 5.6 per cent in 1979/80, but an average of only 0.4 per cent between 1973 and 1978. For the plan to be carried out in full, a massive increase in foreign assistance to the Government, from birr 504 million in 1980 to an annual average of birr 1,700 million, will be required. Ethiopia's G.N.P. was estimated at U.S. \$130 per head in 1979, and was the second lowest in Africa. Development aid received per head is the lowest for any of the U.N.-designated least developed countries.

Transport and Communications

There is a railway from Addis Ababa to the port of Djibouti, in the neighbouring Republic of Djibouti. In 1980 there were 12,989 km. of all-weather roads out of a total system of 23,520 km. of roads. The highway system is under rapid expansion, mainly financed by foreign loans. A highway links Addis Ababa with Nairobi, in Kenya, and forms part of the Trans-East African Highway. Bus services link provincial centres to the capital. There are 33 airfields. The port of Assab can handle up to a million tons of goods per year. Communications, particularly between Addis Ababa and the Red Sea, have been severely disrupted by the guerrilla campaign in Eritrea and the war in the Ogaden.

Social Welfare

The scope of modern health services has been greatly extended since 1960, but they still reach only a small part of the population. In 1978 Ethiopia had only 530 doctors, 87 hospitals with a total of 8,874 beds, and about 1,350 clinics and health centres. With foreign assistance, health centres and clinics are steadily expanding into the rural areas, but in times of famine Ethiopian health services are totally inadequate. In 1977 free medical care for the needy was introduced.

Education

Education in Ethiopia is free and, after a rapid growth in numbers of schools, it is hoped to introduce compulsory primary education shortly. A major literacy campaign was launched in 1979. By 1981 10 million people had been enrolled for tuition programmes, and the illiteracy rate reduced from 93 to 65 per cent. Ethiopia was awarded the 1980 UNESCO international literacy prize. The universities at Addis Ababa and Asmara have frequently been closed since 1974 and many students have been killed. Since September 1976 primary and secondary schools have been controlled by local peasant associations and urban

dwellers' associations. In 1978/79 there were 4,558 government schools, with 37,782 teachers and 1,607,945 pupils. A further 95,790 pupils attended mission and church schools.

Tourism

The chief tourist attractions are big game hunting, the early Christian monuments and churches and the ancient capitals of Gondar and Axum. Tourism has been adversely affected by political uncertainty since 1974, and in 1978 only 3,297 tourists visited the country. However, the Tourism and Hotel Commission launched a major campaign to win back tourists in 1980.

Public Holidays

1982: May 1st (May Day), July 23rd (Id ul Fitr, end of Ramadan), September 11th (New Year's Day), September 12th (Popular Revolution Commemoration Day), September 27th* (Feast of the True Cross), September 29th (Id ul Adha/Arafat), December 28th (Mouloud, Birth of the Prophet).

FINANCE

100 cents = 1 birr.

Coins: 1, 5, 10, 25 and 50 cents.

Notes: 1, 2, 10, 50 and 100 birr.

Exchange rates (December 1981): £1 sterling = 3.98 birr; U.S. \$1 = 2.07 birr.

100 birr = £25.12 = U.S. \$48.31.

Note: The birr was introduced in October 1976, replacing (at par) the Ethiopian dollar (E\$). Between January 1964 and August 1971 the par value of the Ethiopian dollar was 40 U.S. cents (U.S. \$1 = E\$2.50). From December 1971 to February 1973 the central exchange rate was U.S. \$1 = E\$2.3026 and the market rate U.S. \$1 = E\$2.3199. In February 1973 the central rate became U.S. \$1 = E\$2.0724 and the market rate U.S. \$1 = E\$2.07, although until February 1978 external trade was valued at U.S. \$1 = E\$2.0855. In terms of sterling, the central exchange rate between November 1967 and June 1972 was £1 = E\$6.00.

JUDICIAL SYSTEM

In October 1974 new military tribunals were set up to try former government officials for corruption. One Supreme and several District Tribunals have been established. Judicial tribunals are elected by members of the urban dwellers' associations and peasant associations. In April 1977 powers were introduced to detain suspected saboteurs for up to six months without trial. There is no appeal against the decision of the Supreme Military Tribunal.

The Supreme Court: Addis Ababa.

President: Ato TESHOME HAILE MARIAM.

The President sits with two other judges. The Supreme Court has jurisdiction only to hear appeals from the

High Court. Prior to the military take-over in 1974, appeals could go from the Supreme Court to the Emperor sitting in Chilot (*Court*) in accordance with Ethiopian custom.

The High Court: Addis Ababa; hears appeals from the Provincial and sub-Provincial Courts; has original jurisdiction.

Awraja Ghizat Courts (Provincial Courts): composed of three judges, criminal and civil.

FIJI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Fiji comprises over 300 islands, of which 100 are inhabited, situated about 1,930 km. (1,200 miles) south of the equator in the Pacific Ocean. The climate is tropical, with temperatures ranging from 16° to 32°C (60°–90°F). Rainfall is heavy on the windward side. Fijian and Hindi are the principal languages but English is also widely spoken. In 1966 about 51 per cent of the population were Christians (mainly Methodists), 40 per cent Hindus and 8 per cent Muslims. The national flag (proportions 2 by 1) is light blue, with the United Kingdom flag as a canton in the upper hoist. In the fly is Fiji's national shield. The capital is Suva.

Recent History

Fiji voluntarily ceded itself to the United Kingdom in 1874 and remained a British possession until 1970. In 1966 a constitution was introduced which provided for a ministerial form of government, an almost wholly elected Legislative Council and an enlarged franchise. Ratu Sir Kamisese Mara, leader of the multi-racial (but predominantly Fijian) Alliance Party, was appointed Chief Minister in 1967 and on independence (October 10th, 1970) became Prime Minister. His party won the general election of April 1972 and he has continued to hold the office.

Before independence Fiji was troubled by racial tensions. The descendants of Indian workers brought to Fiji in the late nineteenth century had grown to outnumber the native inhabitants but were discriminated against in political representation and land ownership rights. A new electoral system was adopted in 1970 to ensure a racial balance in the legislature and in 1976 a Royal Commission published a report recommending changes designed to remove some racial distinctions while preventing any single racial group from gaining overwhelming political advantage; the Government, however, rejected these recommendations.

At the general election held in March and April 1977 the National Federation Party (NFP), traditionally supported by the Indian population, won 26 of the 52 seats in the House of Representatives but was unable to form a government and subsequently split into two factions. The Alliance Party governed in a caretaker capacity until another election in September, when it was returned with its largest ever majority. While these two main parties profess multi-racial ideas, the Fijian Nationalist Party campaigned on a "Fiji for the Fijians" platform in order to foster nationalist feeling.

In 1980 Ratu Sir Kamisese Mara's suggestion that a government of national unity be formed was overshadowed by renewed political disagreement between the Alliance Party and the NFP (whose two factions have drawn closer together again) over land ownership. Fijians own 80 per cent of the land and are strongly defending their traditional rights, while the Indian population is pressing for greater security of land tenure.

Government

The Head of State is the British sovereign, who is represented by an appointed Governor-General. He is required

to act in accordance with the advice of government ministers except in certain constitutional functions. The Prime Minister, who heads the Cabinet, is chosen by the House of Representatives.

The House of Representatives is elected for five years by voting on national and communal rolls divided into three categories: Fijian, Indian and General (those ineligible for the first two rolls). Twelve Fijians, 12 Indians and 3 General members are elected on the communal rolls. Ten Fijians, 10 Indians and 5 General members are elected on the national rolls.

The Senate is an appointed Upper House. In this, eight members are appointed by the Great Council of Fijian Chiefs; seven by the Prime Minister; six by the Leader of the Opposition; and one by the Council of Rotuma (Island). Senators serve a six-year term.

Defence

The Royal Fiji Military Forces consist of men in the regular army, the Naval Squadron, the conservation corps and the territorials. The conservation corps was created in 1975 to make use of unemployed labour in construction work. In July 1981 the total armed forces numbered 2,051 men, 1,924 in the army and 127 in the navy. Defence expenditure in 1980 was estimated at U.S. \$9.88 million.

Economic Affairs

The economy is basically agricultural, with sugar as the main crop. The instability of the international sugar market seriously affected the Fijian economy in the mid-1970s but, as a signatory of the Lomé Convention since 1975, Fiji benefits from the Convention's subsidies and trade provisions. The International Sugar Agreement, in force from January 1978, was also expected to boost the industry. Fiji's principal trading partners are Australia, Japan, New Zealand, Singapore, the United Kingdom and the U.S.A. Tourism is developing with some difficulty but is still the second largest source of foreign exchange earnings, accounting for receipts of \$F108 million in 1980. Next in importance are gold and coconut products.

In an effort to diversify the economy and reduce the growing trade deficit, domestic industries such as cement, timber, cigarettes and tuna canning are being encouraged by income tax concessions and export incentive reliefs. The Seventh Five-Year Development Plan (1976–80) aimed to expand production and develop the infrastructure, and gave priority to agriculture. In 1978 an Australian aid project involving an estimated investment of \$A7.5 million over ten years was launched. It aims to bring 324,000 hectares of hilly and largely undeveloped land into production by establishing 103 individual farm holdings with an emphasis on livestock and grazing. In 1977 agreement was reached on the need for a policy of wage restraint to combat inflation, which stood at 14.5 per cent in 1980, after falling from 13.7 per cent in 1975 to 6.1 per cent in 1978. In 1980 G.D.P. fell by 1 per cent, compared with a 12 per cent rise in 1979.

Under Fiji's Eighth Five-Year Development Plan (1981–85), sugar production and tourism are to remain

the dominant industries, but the development of cocoa, ginger, citrus fruits, timber, beef, fish and dairy farming should diversify the economy. Reliance on petroleum products is to be reduced by the development of hydro-electricity (the important scheme at Monasavu was due to be completed in 1981) and by the processing of sugar cane into ethanol.

Transport and Communications

Fiji lies on the main route between Australia and New Zealand and North America, and is the centre of communications in the southwestern Pacific. The international airport is at Nadi, about 210 km. from Suva. Suva Wharf and Lautoka Wharf were reconstructed in 1962 and 1963. There are no main railways but 644 km. of narrow-gauge tracks carry sugar cane to the mills.

Social Welfare

The Fiji National Provident Fund, established in 1966, contains provision for retirement pensions, widows' pensions, an insurance scheme and housing loans. Employers and employees contribute equally. In 1978 there were 111,060 members. Medical and dental treatment is provided for all for a nominal charge. In 1978 there were 25 hospitals, 45 health centres and 78 nursing centres.

Education

Education is neither free nor compulsory. In 1978, however, about 96 per cent of children were attending school and the Government's plan to provide free primary education covered the first six years of schooling. State

subsidies are available for secondary and tertiary education in cases of hardship. In 1980 there were an estimated 656 state primary schools with an enrolment of 127,325 pupils and 137 state secondary schools with an enrolment of 35,238 pupils. There were 796 holders of Fiji government scholarships at the University of the South Pacific in Fiji in 1979.

Tourism

Scenery, climate and fishing attract visitors to Fiji and tourism is the island's second most important industry. In 1980 there were 188,414 visitors.

Public Holidays

1982: June 14th (Queen's Official Birthday), August 2nd (Bank Holiday), October 11th (for Independence Day), November 8th (for Prince Charles's Birthday), November 15th (Diwali), December 25th-27th (Christmas), December 28th (Birth of the Prophet Mohammed).

1983: January 3rd (for New Year's Day), April 1st-4th (Easter).

Weights and Measures

The metric system is in force.

FINANCE

100 cents = 1 Fiji dollar (\$F).
Coins: 1, 2, 5, 10, 20 and 50 cents.
Notes: 1, 2, 5, 10 and 20 dollars.

Exchange rates (December 1981): £1 sterling = \$F1.666; U.S. \$1 = 86.6 Fiji cents.
\$F100 = £60.01 = U.S. \$115.43.

Note: The Fiji dollar was introduced in January 1969, replacing the Fiji pound at the rate of £F1 = \$F2. From November 1967 the exchange rate was £1 sterling = £F1.045 (£F1 = U.S. \$2.2966) so the new rate was £1 sterling = \$F2.09, with the Fiji dollar valued at U.S. \$1.1483 (U.S. \$1 = 87.08 Fiji cents) until August 1971. The link with sterling was maintained and the exchange rate was \$F1 = U.S. \$1.2467 (U.S. \$1 = 80.21 Fiji cents) from December 1971 to June 1972, when the British currency was allowed to "float". The Fiji dollar also "floated", the exchange rate continuing at £1 = \$F2.09 until October 1972. The rate was £1 = \$F1.98 from October 1972 to September 1973; and £1 = \$F1.89 from September 1973 to February 1974. In February 1974 the link with sterling was broken and a new exchange rate of \$F1 = U.S. \$1.25 (U.S. \$1 = 80 Fiji cents) was established. This remained in effect until April 1975, since when the Fiji dollar has been valued in relation to a weighted "basket" of the currencies of the country's main trading partners. The average value of the Fiji dollar was U.S. \$1.213 in 1972; U.S. \$1.260 in 1973; U.S. \$1.244 in 1974; U.S. \$1.215 in 1975; U.S. \$1.111 in 1976; U.S. \$1.090 in 1977; U.S. \$1.181 in 1978; U.S. \$1.197 in 1979; U.S. \$1.223 in 1980.

THE CONSTITUTION

The Constitution is set out in the Fiji (Independence) Order of 1970. It contains provisions relating to the protection of fundamental rights and freedoms, the powers and duties of the Governor-General, the Cabinet, the House of Representatives, the Senate, the Judiciary, the Public Service and finance.

It provides that every person in Fiji regardless of race, place of origin, political opinion, colour, creed or sex is entitled to the fundamental rights of life, liberty, security of the person and protection of the law, freedom of conscience, expression, assembly and association; protection of the privacy of his home and other property and from the deprivation of property without compensation. The enjoyment of these rights, however, is subject to the proviso that they do not prejudice the rights and freedom of others, or the public interest.

EXECUTIVE

H.M. the Queen appoints a Governor-General as her representative in Fiji.

The Cabinet consists of the Prime Minister, the Attorney-General and any other Minister whom the Governor-General might appoint on the advice of the Prime Minister. The Governor-General appoints as Leader of the Opposition in the House of Representatives either the leader of the largest Opposition party or, if there is no such party, the person whose appointment would be most acceptable to the leaders of the Opposition parties in the House.

PARLIAMENT

The Fiji Parliament consists of a Senate and a House of Representatives. The Senate has 22 members: 8 nominated by the Council of Chiefs, 7 nominated by the Prime Minister, 6 nominated by the Leader of the Opposition and one nominated by the Council of the Island of Rotuma. Their appointments are for a six-year term. The President and Vice-President of the Senate are elected from members who are neither Ministers nor Assistant Ministers. The House of Representatives has 52 members: 27 elected on the communal roll and 25 on the national roll (a cross-voting system by which all races vote together). The House elects a Speaker and a Deputy Speaker from among its non-ministerial members.

The Overseas Departments (départements d'outre-mer) are integral parts of the French Republic, each administered by a Prefect, with elected General Councils and with elected representatives in the French National Assembly and Senate of the Republic in Paris. The administrative structure is the same as in other French Departments; however, Overseas Departments have their own Courts of Appeal.

FRENCH GUIANA

French Guiana lies on the coast of South America, with Suriname to the west and Brazil to the south and east. The climate is humid, with a season of heavy rains from April to July and another short rainy season in December and January. The capital is Cayenne.

French occupation commenced in the early seventeenth century, and after periods of Dutch and English rule Guiana reverted to France in 1816. It gained departmental status in 1946.

The economy is based on forestry and agriculture; cassava, bananas, maize and other tropical crops are grown for local consumption, while sugar cane is the only cash crop of importance. There are vast timber reserves, which it is planned to exploit more extensively, and important mineral resources, particularly of gold, bauxite and tantalite, from which extractive industries are being developed. Fishing has been increasing in importance since 1965 and is mainly for shrimps, most of which are exported to the U.S.A. The tourist industry is being expanded but facilities are not yet well developed. In 1968 a rocket launching base was established at Kourou, where *Ariane*, the European Space Agency's communications satellite launcher, is currently being developed. There was a successful test launching in December 1981.

GUADELOUPE

Guadeloupe is the most northerly of the Windward Islands in the east Caribbean; Dominica lies to the south, and Antigua and Montserrat to the north-west. Guadeloupe is formed by two large islands, Grande-Terre and Basse-Terre, separated by a narrow sea channel, with a smaller island, Marie-Galante, to the south-east. There are also a number of small dependencies. The capital is the town of Basse-Terre; the other main town and principal commercial centre is Pointe-à-Pitre on Grande-Terre.

Guadeloupe was first occupied by the French in 1635; and has been an integral part of the French Republic since 1815. It gained departmental status in 1946.

The economy is based on sugar cane, its by-products molasses and rum, and bananas, which are mainly exported to France, and to a lesser extent on coffee, vanilla and cocoa. As in the other island departments, there is consider-

able emigration; attempts are being made to create processing industries and to develop the tourist potential of the islands.

MARTINIQUE

Martinique is one of the Windward Islands in the east Caribbean, with Dominica to the north and Saint Lucia to the south. The island is dominated by the volcanic peak of Mont Pelée. The population is of mixed origin, including some descendants of immigrants from the former French Indochina. The capital is Fort-de-France.

Martinique became an integral part of the Republic in 1790 and gained department status in 1946.

The economy is agricultural, based on sugar cane and tropical fruits. The destruction of all the island's banana plantations by Hurricane Allen in August 1980 represented a major blow to the economy. Two industrial zones have been established and a number of tax exemptions are in operation to encourage industrial and commercial development. There is extensive emigration to France and to a lesser extent to French Guiana.

RÉUNION

Réunion is an island in the Indian Ocean about 800 km. east of Madagascar. The population is of mixed origin, including people of European, African, Indian and Chinese descent. The capital is Saint-Denis.

First occupied by France in 1642, Réunion gained departmental status in 1946 and became a region in 1974. In 1978 the OAU called for independence for the island but this appears to have little support among the people of Réunion themselves.

The economy is based on sugar cane and rum, and tourism is becoming more important. Tropical fruits, vanilla and other essences are produced in small quantities. In 1980 a hurricane destroyed many crops, and encouraged the Government to invest in diversification.

FRENCH OVERSEAS TERRITORIES

FRENCH POLYNESIA	page 347	MAYOTTE	page 350
FRENCH SOUTHERN AND ANTARCTIC TERRITORIES	350	NEW CALEDONIA	351
		WALLIS AND FUTUNA ISLANDS	355

The Overseas Territories (territoires d'outre-mer) are integral parts of the French Republic, each administered by a Governor, High Commissioner or Superior Administrator appointed by the French Government, a Territorial Assembly elected by universal suffrage and a Council of Government. Certain members of the Assembly sit in the National Assembly and Senate of the Republic in Paris. The Territories have varying degrees of internal autonomy.

FRENCH POLYNESIA

An Overseas Territory since 1958, French Polynesia consists of the following South Pacific Islands: Iles du Vent (the chief of which is Tahiti), Iles Sous le Vent (which with the Iles du Vent constitute the Society Archipelago), Tuamotu-Gambier Archipelago, Austral Islands, Marquesas Archipelago. The 120 islands cover a wide area lying about two-thirds of the way from the Panama Canal to New Zealand. Copra is the major export. French Polynesia's large trade deficit is partly offset by earnings from tourism and French government spending.

The Territory is administered by a High Commissioner appointed by the French Government. Since May 1975 there has been an autonomist majority in the Territorial Assembly divided into several factions. In February 1977 Francis Sanford, leader of the largest and most militant group, informed the French Government in Paris that, unless serious negotiations for increased local autonomy were begun, French Polynesia would seek immediate independence from France. The principles of a new statute for the islands had already been agreed in November 1976, and in March 1977 a revised draft was negotiated. The existing Territorial Assembly was dissolved and the newly-elected Assembly approved the draft statute.

Under the new statute, France retains responsibility for foreign affairs, defence, monetary matters and justice, but the powers of the Territorial Government Council were increased, especially in the field of commerce. The French Governor was replaced by a High Commissioner who presides over the Council of Government and is head of the Administration, but has no vote. The Council's elected Vice-President, responsible for domestic affairs, was granted greater powers. An Economic and Social Committee, responsible for all development matters, was also created, and French Polynesia's economic zone has also extended to 200 nautical miles (370 km.) from the coastline.

In 1977 a small radical group of Polynesians, the *Te toto tupuna* (The Blood of our Ancestors), emerged,

demanding immediate independence and the repatriation of French nationals, and there were outbreaks of violence at the end of the year. In 1978 the leaders of the two main parties in the Assembly, John Teariki and Francis Sanford, again called on the French Government to initiate moves towards independence. However, during a visit to French Polynesia in 1979, President Giscard d'Estaing stressed "Polynesia's French future"; and by November 1981 his successor, François Mitterrand, had given no indication of a significant change to this policy.

The testing of nuclear devices by the French Government began in 1966 at Mururoa Atoll, in the Tuamotu Archipelago, and, in spite of world-wide opposition (particularly from New Zealand, Papua New Guinea and other Pacific nations), tests have continued under President Mitterrand.

MAYOTTE

Since the Comoros unilaterally declared independence in July 1975, Mayotte has been administered separately by France. The independent Comoran state claims Mayotte as part of its territory and officially represents it in international organizations, including the United Nations. France has introduced a special status for the island, under which it is known as a "collectivité territoriale", something between an overseas territory and an overseas department. Following the coup in the Comoros in May 1978, Mayotte rejected the new government's proposal that it should rejoin the other islands under a federal system, and reaffirmed its intention of remaining linked to France. For further details of the recent history of the island, see the chapter on the Comoros (p. 173).

The economy of the island is entirely agricultural. Vanilla, ylang-ylang, coffee and copra are the main products. The principal towns are Dzaoudzi and Mamoudzou. The island is dependent on French aid, which came to over 105 million francs between 1977 and 1980.

THE CONSTITUTION

In a referendum in April 1976, the population of Mayotte voted to renounce the status of an overseas territory. They expressed their desire for departmental status, but this has been rejected by the French Government. The status of the island as a "collectivité territoriale" involved the election of a Council with 17 members to assist the Prefect in administering the island. In December 1979 the French National Assembly voted to extend this status for five years. A further referendum is to be held during this period.

NEW CALEDONIA

New Caledonia lies in the South Pacific, east of Queensland, Australia. Mining of nickel is the chief economic activity. New Caledonia possesses 30 per cent of the world's known reserves of nickel. The Territory is administered by a High Commissioner appointed by the French Government.

New Caledonian demands for a measure of self-government were answered in December 1976 by a new statute which gave the Council of Government responsibility for certain internal affairs. However, this statute was denounced as inadequate by the majority parties in the Territorial Assembly, and the elections held for this body in September 1977 were dominated by the problems of relations with France. Eleven political parties won seats in the Assembly, with a small majority going to those parties in favour of remaining a French possession.

A year later the opposition CU/PS parties obtained a majority of the posts in the Council of Government, putting them in a stronger position to press for further decentralization of power and eventual independence. The year 1978 was marked by riots and demonstrations by the pro-independence factions and continued dissent within the Territorial Assembly. The French Government dismissed the Council of Government in March 1979, following its

failure to support a proposal for a ten-year contract between France and New Caledonia because the plan did not acknowledge the possibility of New Caledonian independence. The territory was then placed under the direct authority of the High Commissioner. A new electoral law, recommended by the French Minister for Overseas Departments and Territories, ensured that minor political parties were not represented in the Assembly following the July general election. Consequently, mainly the Melanesian-supported, pro-independence groups were excluded, and the elections resulted in the two "national" parties loyal to France winning 22 of the 36 seats in the Assembly.

Strikes in the nickel mines in 1977 severely disrupted production and social unrest continued, aggravated by rising unemployment. Tension grew sharply in September 1981 after the assassination of Pierre Declercq, Secretary-General of the pro-independence party *Union Calédonienne*; there were demonstrations and violence by both supporters and opponents of independence for the territory. In November 1981 President Mitterrand called an urgent meeting of ministers in Paris to discuss the situation in New Caledonia and in the following month Christian Nucci, the newly appointed High Commissioner to the Territory, affirmed the French Government's recognition of the need for reforms.

THE GOVERNMENT

Chef du Territoire: CHRISTIAN NUCCI.

Secretary-General: ALAIN CHRISTNACHT.

COUNCIL OF GOVERNMENT

(December 1981)

The Council of Government is composed of seven members elected by the Territorial Assembly, either from its own members or, in certain circumstances, from outside. It is elected every five years, after the elections for the Territorial Assembly. The President of the Council is the High Commissioner and does not vote. All proposals to be submitted to debate by the Territorial Assembly or its Standing Committee are drawn up by the Council. The Council is in charge of all legislation over land matters.

President: CHRISTIAN NUCCI.

Vice-President: DICK UKEIWE.

Members:

PIERRE FROGIER, STANLEY CAMERLYNCK.
 PIERRE MARESCA, GASTON MORLET.
 FRANK WAHUZUE, ALBERT ETUVÉ.

TERRITORIAL ASSEMBLY

The Territorial Assembly is composed of 36 members elected by direct universal suffrage for a five-year term on the basis of proportional representation. According to the new electoral law in force at the 1979 elections, all parties gaining less than 7.5 per cent of the votes lose their deposits.

President: JEAN PIERRE AIFA (FNCS).

WALLIS AND FUTUNA ISLANDS

This self-governing French Overseas Territory comprises two groups: the Wallis Islands, including Wallis Island (also known as Uvea) and 22 islets on the surrounding reef, and, to the southeast, Futuna (or Hooru), comprising the two small islands of Futuna and Alofi. The islands are located north of Fiji and west of Samoa. The total area is 274 square kilometres and in 1976 the total population of the islands was 9,192. The inhabitants are Polynesians.

A French Protectorate since 1888, the islands chose by referendum in December 1959 to become an Overseas Territory. In July 1961 they were granted this status.

Copra, which formerly provided the main cash income for the islands, has been seriously affected by rhinoceros beetle. Most monetary income on the island is derived from government employment and remittances sent home by islanders employed in New Caledonia. Yams, taros, bananas, arrowroot and other food crops are also cultivated.

STATISTICAL SURVEY

Area (sq. km.): Wallis Island 159, Futuna Island and Alofi Island 115, total of all islands 274.

Population (census of March 26th, 1976): 9,192; Wallis Island 6,019 (chief town Mata-Utu), Futuna Island 3,173; Alofi Island uninhabited; about 11,000 Wallisians and Futunians live on New Caledonia and in Vanuatu.

Livestock: (FAO estimates): 4,000 pigs (1980); 11,000 goats (1979).

Currency: *see* French Polynesia.

Budget (1978): 8,164,950 French francs.

External Trade (1976): *Imports*: 217 million francs CFP; *Exports*: n.a.

Aid from France (1978): 18,410,296 French francs.

Transport: *Civil Aviation*, Wallis Island—1977: aircraft arrivals and departures 581, freight handled 171 metric

tons, passenger arrivals 4,555, passenger departures 4,300, mail loaded and unloaded 72 metric tons.

Education (1978): 3,000 pupils in 9 State-financed primary and lower secondary schools.

THE GOVERNMENT

The territory is administered by a French Administrateur Supérieur who is assisted by a 20-member Territorial Assembly. The Assembly, together with a senator and a deputy to the French Parliament, are elected locally on a common roll.

Administrateur Supérieur: ROBERT THIL.

President of the Territorial Assembly: MANUELO LISIAHI.

Representative to the National Assembly: BENJAMIN BIAL.

Representative to the Senate: SOSEFO MAKAPE PAPILO.

RELIGION

The entire population is nominally Catholic; Bishop of Wallis and Futuna Mgr. LOLESIO FUAHEA.

RADIO

In 1979 a radio station was opened on Wallis Island, broadcasting in Wallisian and French for 2 hours each day.

TRANSPORT

SHIPPING

Services to Nouméa (New Caledonia), Suva (Fiji), Port Vila and Santo (Vanuatu), are operated by the Compagnie des Chargeurs Calédoniens.

CIVIL AVIATION

UTA (France) operates three flights a week from Wallis to Futuna and external services. Air Nauru and Air Polynésie (French Polynesia) also serve Wallis Island.

GABON

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Gabonese Republic is an equatorial country on the west coast of Africa, with Cameroon to the north and the Congo to the south and east. The climate is tropical, with an average temperature of 26°C (79°F) and an annual rainfall of 250 cm. The official language is French but Bantu dialects are widely spoken. About 60 per cent of the population are Christians, mainly Roman Catholics. Most of the others follow animist beliefs. The national flag (proportions 4 by 3) consists of horizontal green, gold and blue stripes. The capital is Libreville.

Recent History

Formerly a province of French Equatorial Africa, Gabon gained internal autonomy in 1957. It joined the French Community in 1958 and attained independence in August 1960. In February 1961 Léon M'Ba was elected the Republic's first President. Shortly before elections called for February 1964, a military coup, led by Jean-Hilaire Aubame, a long-standing rival, deposed M'Ba. French intervention restored M'Ba to the Presidency, and elections held in April gave M'Ba's *Bloc démocratique gabonais* (BDG) a large majority in the National Assembly; during the next two years most of the opposition joined the BDG. In 1967 M'Ba created the post of Vice-President, and when he died in November that year he was succeeded by his deputy, Albert-Bernard Bongo. In March 1968 the *Parti démocratique gabonais* (PDG) was set up and one-party government was formally instituted.

In February 1973 Bongo was re-elected President. In April 1975 he abolished the Vice-Presidency, replacing it by a new post of Prime Minister. At the same time local administration was reorganized to confer considerable autonomous powers on the provinces.

President Bongo has taken a hard line against any form of protest or dissent in the country. At the same time, every effort has been made to attract foreign companies and investors to Gabon. Bongo has pursued a policy of close co-operation with France in the fields of economic and foreign affairs. Following official visits to Paris in 1980 and 1981, a Franco-Gabonese Commission was created; there were signs, however, that Bongo wished to increase his Government's share in the major French mining companies operating in Gabon.

In 1977 President Kerekou of Benin accused Gabon of having aided the airborne mercenary attack on Cotonou. President Bongo strongly denied these accusations, and ordered the expulsion of all nationals of Benin from Gabon. Altogether, 6,000 were expelled. In May 1981 several thousand Cameroonians resident in Gabon were airlifted back to Cameroon following violence against the Cameroon communities in Libreville and Port-Gentil.

At a Congress meeting of the PDG in January 1979, elections were held to the Central Committee, thus introducing an element of democracy into the system. Pressure was put upon President Bongo to increase efficiency in

administration by controlling bureaucracy and forbidding plurality of office.

Following his nomination by the PDG, President Bongo stood as the sole candidate in the presidential elections held in December 1979, when he was re-elected for a second seven-year term. Legislative and municipal elections were held in early 1980; for the first time since 1960, independents were free to stand against party candidates. All seats in the National Assembly were none the less won by members of the PDG. In a Cabinet reshuffle in November 1981, Bongo relinquished his ministerial posts and the title of Head of Government, now conferred upon the Prime Minister.

Government

The Constitution of 1967 vests executive power in the President, elected by universal adult suffrage for seven years. The President appoints, and presides over, a Council of Ministers. The legislative organ is the unicameral National Assembly of 93 members, of whom 84 are chosen by election and nine by nomination, for a five-year term. The country is divided into nine provinces, each under an appointed Governor, and 37 prefectures.

Defence

In July 1981 the army consisted of 1,500 men, the air force of one squadron of 300 men, and the navy of 150 men. There is also a *Force de Police Nationale* (FPN) which numbered 2,800 in 1981.

Economic Affairs

Well over half of the population of Gabon is engaged in subsistence agriculture, largely untouched by the expansion of the market economy. There is a little commercial agricultural production, the main crops being palm oil, coffee, cocoa and bananas. For many years the economy was largely dependent upon forestry, particularly production of *okoumé*, a wood used in the making of plywood. Despite the expansion of the forestry industry for a favourable world timber market, it accounted for only 2 per cent of G.D.P. in 1978, and mineral production has taken over as the leading activity since the late 1960s. A reforestation project amounting to 4,000 million francs CFA was incorporated into the 1976-80 Plan.

The economy has been heavily dependent on petroleum, which accounted for 79 per cent of exports and provided 60 per cent of total revenue in 1980. However, production, which was the fifth highest in Africa in 1976 at 11.3 million metric tons, is gradually decreasing, although exploration for new deposits continues. The manganese deposits at Moanda in the south form one of the world's richest sources, with production averaging 2 million tons per year. There are also plans for the exploitation of major iron ore deposits at Bélinga in the north-east, which are expected to produce 20-25 million tons per year in the 1980s. Other minerals produced are uranium, which is being developed to produce 1,000-1,500 tons annually by 1983, gold and natural gas. The development of both forestry and mining

is hampered by a lack of transport facilities. Gabon's manufacturing sector is relatively restricted, though it is being expanded, and accounted for 9 per cent of G.D.P. in 1979. However, shortage of labour and a high minimum wage, together with inadequate infrastructure, have prevented further expansion. There are petroleum refineries at Port-Gentil and Pointe Clairette, which serve the four states of the Customs and Economic Union of Central Africa (UDEAC), and there are tanker facilities for vessels of up to 25,000 tons. Since July 1972 the "Gabonization" of the economy has been undertaken. Foreigners have been replaced by Gabonese in positions of authority and the state has taken a share in the capital of foreign companies.

The World Bank estimated that G.N.P. was U.S. \$3,370 per caput in 1978, which makes Gabon the richest country in sub-Saharan Africa. Gabon is attempting to use the wealth created by petroleum revenues in developing mineral and timber exploitation and associated industries. The petroleum price rises of 1974 coincided with peak production from Gabon's oilfields, but in 1977 production began to level off and recession set in, as economic expansion had proceeded more rapidly than the availability of finance. An ambitious five-year plan was launched in 1976, of which the most important part was the Trans-Gabon railway, the total construction cost of which is estimated at nearly 500,000 million francs CFA. Lack of financial backing held up construction for several years but by 1982 nearly one-third of its total 900 km. was nearing completion. Development of the railway is essential if Gabon is to be able to exploit efficiently the mineral deposits inland (uranium, manganese and iron ore) when petroleum reserves run out in the mid-1980s. The completion of numerous other projects has had to be postponed for the same lack of finance.

Despite the country's valuable natural resources, Gabon's foreign debt was estimated to be 1,600 million French francs in 1978, which has necessitated a policy of budgetary restraint. In 1978, 58 per cent of the budget went to the service of foreign debt and the investment budget was cut back from 102,000 million francs CFA to 37,000 million, while Gabon tried to re-schedule its debts and raise further long-term loans. As a result of the austerity measures, the country's total debt fell by 15.5 per cent in 1979, and the situation is continuing to improve; a sharp cutback in state spending has effected a reduction of imports, while a steady 31 per cent of export revenue is contributing to debt servicing. In 1977 the balance of payments had a current deficit of 44,000 million francs CFA, but by 1980 it showed a surplus of 6,100 million francs CFA, and G.N.P. increased by 27 per cent in 1980. A 1980-82 *Plan Intérimaire* aims to stabilize growth and offset the predicted decline in oil production by diversifying the economy and developing the rural sector. Public investment will amount to 362,512 million francs CFA, and is to be spent on infrastructure and agricultural projects, with a view to exploiting more efficiently the country's resources. Development of the rural sector

should halt urban drift and reduce Gabon's dependence on imported foodstuffs. After a Franco-Gabonese trade seminar, held at the end of November 1980 in Paris, France agreed to give aid and co-operation for over 20 projects, including a cattle-rearing scheme.

Transport and Communications

The first section of the Trans-Gabon railway, from Owendo to Booué (332 km.), begun in 1974, was expected to be in use by 1982. Two other sections will run from Booué to Belinga in the north (240 km.) and to Franceville in the south (363 km.). In 1979 there were 7,082 km. of roads. The widespread forests make air transport very important and there is an airport capable of handling jets at Libreville, two other international airports, 65 smaller and 50 private airports. The main rivers are navigable only from about 300 km. inland. There are two Atlantic ports at Libreville-Owendo and Port-Gentil.

Social Welfare

There is a national Fund for State Insurance, and a guaranteed minimum wage. In 1981 Gabon had 16 hospitals, 87 medical centres and 258 dispensaries. There were 4,815 hospital beds and 269 physicians. As part of the 1980-82 *Plan Intérimaire*, two hospitals are under construction, each with 200 beds, at Franceville and Port-Gentil. Maternal and infant health is a major priority.

Education

Education is undertaken by state and mission schools, and there is a university in Libreville. Primary-level education is compulsory. Many students go to France for university and technical training.

Tourism

Tourism is being extensively developed with new hotels and several important projects, including a "holiday village" near Libreville opened in 1973, reorganization of Pointe-Denis tourist resort, and the promotion of national parks. There are approximately 2,000 hotel rooms.

Public Holidays

1982: May 1st (Labour Day), May 20th (Ascension), May 31st (Whit Monday), August 15th (Assumption), August 17th (Independence Day), November 1st (All Saints' Day), November 11th (Armistice Day), December 25th (Christmas).

1983: January 1st (New Year's Day), April 4th (Easter Monday).

Weights and Measures

The metric system is in official use.

Currency and Exchange Rates

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1981):

1 franc CFA = 2 French centimes;

THE CONSTITUTION

(Promulgated February 1961; revised February 1967, April 1975 and August 1981.)

Preamble: Upholds the Rights of Man, liberty of conscience and of the person, religious freedom and freedom of education. Sovereignty is vested in the people, who exercise it through their representatives or by means of referenda. There is direct, universal and secret suffrage.

Head of State: The President is elected by direct suffrage for a seven-year term and is eligible for re-election. He is Head of State, of the administration and of the Armed Forces. The President may, after consultation with his Ministers and leaders of the National Assembly, order a referendum to be held. There is a Prime Minister appointed by the President.

Executive Power: Executive power is vested in the President and the Council of Ministers, who are appointed by the President and are responsible to him. The President presides over the Council.

Legislative Power: The National Assembly is elected by direct suffrage for a five-year term and normally holds two sessions a year. It may be dissolved or prorogued for up to 18 months by the President, after consultation with the Council of Ministers and President of the Assembly. The President may return a Bill to the Assembly for a second reading when it must be passed by a majority of two-thirds of the members. If the President dissolves the Assembly, elections must take place within 40 days.

Judicial Power: The President guarantees the independence of the Judiciary and presides over the Conseil Supérieur de la Magistrature. There is a Supreme Court and a High Court of Justice. The High Court, which is composed of deputies of the National Assembly elected from among themselves, has power to try the President or members of the Government.

RADIO

The national network, "La Voix de la Rénovation", and a provincial network broadcast 24 hours a day on short and medium wave bands in French and local languages. A 100 kW. short wave transmitter at Libreville covers the whole country, but it is supplemented by relay stations throughout Gabon. A French-built international radio station, "Africa No. 1", the most powerful on the continent, was opened at Moyabi in February 1981, and will eventually broadcast 18 hours each day in French with four 500 kW. transmitters. In 1980 there were an estimated 96,000 radio receivers.

TELEVISION

The 50W. transmitters at Libreville and Port-Gentil were supplemented in 1972 by two 2kW. transmitters, and coverage now extends inland as far as Kango and Lambaréné. Programmes are transmitted by satellite to other African countries. Colour television broadcasts began in December 1975. In 1980 there were an estimated 9,000 television sets in use.

Location, Climate, Language, Religion, Flag, Capital

The Republic of The Gambia is a narrow territory around the River Gambia on the coast of West Africa, surrounded on three sides by Senegal. The climate is tropical and, away from the river swamps, most of the country is savanna bush. The average annual temperature in the capital, Banjul, is 27°C (80°F). English is the official language; the principal vernacular languages are Mandinka, Fula and Wolof. The main religions are Islam and Christianity, with some adherents of animism. The national flag (proportions 3 by 2) has red, blue and green horizontal bands, with two narrow white stripes bordering the central blue band. Banjul (previously Bathurst) is the capital.

Recent History

In 1962 a new constitution came into effect in The Gambia, then a British colony, and, after a general election, the leader of the People's Progressive Party (PPP), Dr. (later Sir) Dawda K. Jawara, took office as Premier. Full internal self-government followed in October 1963. On February 18th, 1965, The Gambia became an independent country within the Commonwealth and in April 1970 became a republic, with Sir Dawda Jawara as President. He was re-elected in 1972, when the PPP won 28 of the 32 seats in the House of Representatives, and again in April 1977, when the PPP held 28 seats in the enlarged House. In September 1978 the only United Party member remaining in the House of Representatives, following a by-election defeat in May 1977, joined the PPP, leaving only the five members of the National Convention Party as opposition. Demands for the establishment of a one-party state, however, have always been rejected by President Jawara.

In October 1980 the Government broke off diplomatic relations with Libya, banned two revolutionary opposition groups and was obliged to ask Senegal for troops to help maintain internal security under the terms of a mutual defence pact. A more serious threat was posed on July 30th, 1981, when a coup was staged during President Jawara's absence. Left-wing rebels formed a 12-man National Revolutionary Council, proclaimed their leader, Kukh Samba Sanyang, President and suspended the Constitution, political parties and courts. Senegalese troops again entered Banjul and by August 6th the rebellion had been crushed. Plans were announced in the same month for the integration of the two countries' security forces and for a merger of the two states, which had always had close links, in a confederation to be called Senegambia. These proposals were approved by the National Assembly in December, and came into effect on February 1st, 1982.

Government

Legislative power is held by the unicameral House of Representatives, with 43 members: 35 directly elected by universal adult suffrage for five years; four Chiefs' Representatives Members elected by the Chiefs in Assembly; three non-voting nominated members; and the

Attorney-General. The executive President is the leader of the majority party in the House. He is Head of State and appoints a Vice-President (who is leader of government business in the House) and a Cabinet consisting of elected members of the House or other nominees.

Defence

There are no armed forces as such, but the police force is over 750 strong. The Field Force, which numbered about 380 before the 1981 coup attempt, was to be integrated with Senegal's security forces.

Economic Affairs

The economy is based on peasant cultivation of groundnuts, which normally accounts for over 90 per cent of The Gambia's exports and makes it particularly vulnerable to fluctuations in its harvests and world price changes. Agriculture provides a living for 80 per cent of the population. Food, machinery and other manufactured goods constitute the country's main import requirements.

Erratic rainfall since 1977 badly affected crops, so that foreign aid, in the form of emergency food supplies, had to be provided. By 1981 groundnut production had fallen to its lowest level for 30 years, exports had declined sharply and there was a trade deficit of 225 million dalasi.

Development programmes have been concerned mainly with improving and diversifying The Gambia's infrastructure. A five-year project begun in 1976 emphasized rural development, irrigation, increased production of subsistence crops, including self-sufficiency in rice, and the expansion of education and health facilities. By 1981 projects to increase cotton, livestock and fish production had come into effect and studies for a joint desalination bridge-barrage with Senegal over the River Gambia were under way. The Second Five-Year Plan, being formulated in 1981, strongly emphasized agricultural development.

Tourism is an important source of revenue and the Government is expanding hotel accommodation and basic infrastructure. However, it was feared that the 1981 rebellion would have an adverse effect on the industry.

Transport and Communications

Roads in and near Banjul are bitumenized and this has now been extended to the provinces; 1,068 miles (1,720 km.) of about 1,858 miles (2,990 km.) of roads can be used in all seasons, but in outlying parts they may be closed during the rains, from mid-July to early November. Construction of a road linking the capitals of The Gambia, Senegal and Guinea-Bissau was being planned in 1979. There are no railways. However, the River Gambia is the best waterway in Africa. The port of Banjul receives about 300 ships annually, and there are intermittent sailings to and from North Africa, the Mediterranean and the Far East. The port was considerably enlarged in 1974. There is an airport of international standard outside Banjul at Yundum which is being further developed. There were 2,752 telephones in 1977.

Social Welfare

At the end of 1980 there were 43 government doctors, 23 private practitioners and five dentists. There were four hospitals and a network of 12 health centres, 17 dispensaries and 68 maternity and child welfare clinics throughout the country. A mother-and-child health scheme, primary health care, immunization and leprosy control programmes are being developed.

Education

In 1979/80 there were 132 primary schools with 34,468 pupils and 23 secondary schools with 8,328 pupils, mostly in the Banjul area. There was a total of 1,923 government-employed teachers. Primary education is free but not compulsory and lasts six years; in 1976 the entry age was raised from 6 to 8. Gambia High School at Banjul provides full secondary courses to university entrance, and the Catholic Mission, the Gambia Muslim Association and the Ahmediyya Mission run secondary schools. There are three centres of post-secondary education, including a teacher-training college at Yundum, which is to be replaced by Brikania College, where agricultural, health, domestic science and rural development courses will also be run. Education is being expanded in rural areas. In 1968 the literacy rate was estimated at around 15 per cent in English and about 20 per cent in Arabic. In 1977 The Gambia introduced Koranic studies in all stages of education.

Tourism

Tourism has been a major industry in The Gambia since 1971 and the Government is committed to its further expansion. It is now second only to agriculture in importance. In 1980/81 21,327 people visited The Gambia. There is a haven for bird watchers, over 400 species of birds having been recorded.

Public Holidays

1982: May 1st (Labour Day), July 23rd (Id ul Fitr, end of Ramadan), August 15th (Assumption), September 29th (Id ul Adha), December 25th (Christmas), December 28th (Mouloud, Birth of the Prophet).

1983: January 1st (New Year's Day), February 18th (Independence), April 1st-4th (Easter).

THE CONSTITUTION

The present Constitution came into effect on April 24th, 1970, when The Gambia became a republic.

The President is Head of State and Commander-in-Chief of the armed forces. He holds office by virtue of being the leader of the majority party in the House of Representatives. The President appoints a Vice-President, who is

leader of government business in the House, and other Cabinet Ministers from members of the House.

The House of Representatives consists of a Speaker and a Deputy Speaker (elected by the House) and 35 Members elected by universal adult suffrage, 4 Chiefs (elected by the Chiefs in Assembly), and 4 nominated Members.

THE GOVERNMENT

HEAD OF STATE

President: Alhaji Sir DAWDA K. JAWARA (took office April 24th, 1970).

JUDICIAL SYSTEM

The judicial system of The Gambia is based on English Common Law and legislative enactments of the Republic's Parliament which include a Muslim Law Recognition Ordinance by which a Muslim Court exercises jurisdiction in certain cases between, or exclusively affecting, Muslims.

The Supreme Court: Consists of the Chief Justice and the Puisne Judge; has unlimited jurisdiction; appeal lies to the Court of Appeal.

Chief Justice: Sir PHILLIP BRIDGES.**Master:** (vacant).

The Gambia Court of Appeal: Established in 1961 to succeed the Sierra Leone and the West Africa Court of Appeal. It is the Superior Court of Record and consists of a President, Justices of Appeal and other Judges of the Supreme Court *ex officio*. Final appeal is to the Judicial Committee of the Privy Council in the United Kingdom.

President (acting) and Justice of Appeal: Sir PHILLIP BRIDGES.

The Banjul Magistrates Court, the Kanifing Magistrates Court and the Divisional Courts: the subordinate courts are all courts of summary jurisdiction presided over by a Magistrate or in his absence by two or more lay Justices of the Peace. With effect from March 1974 a system of travelling magistrates was introduced to help promote more effective administration of justice in the Provinces. They have limited civil and criminal jurisdiction, and appeal lies from these courts to the Supreme Court.

The Muslim Courts have jurisdiction in matters between, or exclusively affecting, Muslim Gambians and relating to civil status, marriage, succession, donations, testa-

ments and guardianship. The Courts administer Muslim Law. A Cadi, or a Cadi and two assessors, preside over and constitute a Muslim Court. Assessors of the Muslim Courts are *Justices of the Peace of Muslim faith*.

Group Tribunals are established by the Government under the Group Tribunals Ordinance, 1933. These are appeal courts which deal with cases touching on customs and traditions. Each court consists of three district tribunal presidents, one of whom is selected as Chairman, and other court members from the area over which it has jurisdiction.

TRANSPORT

ROADS

By January 1974 there were about 1,858 miles (2,990 km.) of roads in The Gambia. Of this, about 1,068 (1,720 km.) were all-weather roads including 190 miles (306 km.) of bituminous surface and 330 miles (531 km.) of laterite gravel surface. The South Bank Trunk Road linking Banjul with the Trans-Gambian Highway is bitumenized as far as Soma where the two roads intersect. Thereafter the South Bank Trunk Road continues to Basse, about 240 miles (386 km.) from Banjul. It was decided in 1977 to upgrade the gravel surface to tarmac, with the aid of a 3.5 million dinar loan from the Kuwaiti Fund for Arab Development. The North Bank Trunk Road connects Barra with Georgetown. In 1977 various international organizations agreed to finance the construction of 360 km. of feeder roads. Under the 1975-80 development plan,

Trade and Industry, Transport, Tourism

all-weather roads linking Banjul to the eastern parts of the country were to be built.

Gambia Public Transport Corporation: Banjul; f. 1979; (formerly Gambian-Libyan Public Transport Corporation); fleet of 50 buses; Chair. Alhaji A. J. SENGHORE; Man. Dir. ARTHUR CARROL.

SHIPPING

Gambia Ports Authority: runs Banjul port which underwent substantial expansion with a World Bank loan and was completed in 1974; plans for further expansion, financed by an IDA loan of U.S. \$5 million, were announced in 1979; Man. Dir. Capt. BABUCARR SALLAH.

Gambia River Development Organization: f. 1976; a joint project with Senegal to develop the river and its basin.

Regular shipping services to Banjul are maintained by **Elder Dempster Agencies**. Other British and Scandinavian lines run occasional services. The Gambia is also served by **Nigerian National** and **Black Star Lines**.

A weekly river service is maintained between Banjul and Basse, and a ferry plies between Banjul and Barra. The Gambia and Senegal agreed in 1978 to construct a barrage across the river.

CIVIL AVIATION

The only airport is at Yundum, 17 miles (27 km.) from Banjul.

Gambia Airways: P.O.B. 268, Banjul; f. 1964; handling agency only; operated in partnership with British Caledonian Airways, Gambian Government majority shareholding from June 1973; owns no aircraft; Gen. Man. MICHAEL TURLEY.

FOREIGN AIRLINES

The Gambia is also served by Air Guinea, British Caledonian Airways, Ghana Airways, Air Mali and Nigeria Airways.

TOURISM

The total number of tourists was a record 29,572 in 1978/79, and 25,391 in 1979/80, mainly from Scandinavia, the Federal Republic of Germany and the United Kingdom. In 1980/81, however, this number fell to 21,237. There were 2,100 hotel beds in 1978; it was hoped to provide 6,000 by 1985.

GHANA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Ghana lies on the west coast of Africa between the Ivory Coast to the west and Togo to the east. It is bordered by Upper Volta to the north. The climate is tropical, with temperatures of 21°–32°C (70°–90°F) and rainfall of 2,000 mm. (80 inches) per year on the coast, decreasing inland. English is the official language, but there are eight major national languages. Many people follow traditional beliefs and customs. Christians make up 42 per cent of the population. The national flag (proportions 3 by 2) has three horizontal stripes of red, gold and green, the gold stripe being charged with a five-pointed black star. The capital is Accra.

Recent History

Ghana was formed by a merger of the Gold Coast, a former British colony, and the British-administered part of Togoland, a UN Trust Territory.

In the Gold Coast the 1951 elections were won by the Convention People's Party, led by Dr. Kwame Nkrumah, who became Prime Minister in March 1952. In May 1956, by a UN-supervised plebiscite, British Togoland voted to join the Gold Coast in an independent state. Ghana was duly granted independence, within the Commonwealth, on March 6th, 1957, and Dr. Nkrumah continued in power. The country was proclaimed a republic in July 1960, with Dr. Nkrumah as the first President, and in 1964 became a one-party state.

In 1966 President Nkrumah was overthrown. A National Liberation Council (NLC) of army and police personnel was established to rule by decree. Civilian government under a new democratic constitution was restored in 1969, following the electoral victory of the Progress Party, whose leader, Dr. Kofi Busia, became Prime Minister.

In the wake of increasing economic and political difficulties, the army seized power again in January 1972. The constitution was abolished and all political institutions were replaced by a National Redemption Council (NRC) under the chairmanship of Lt.-Col. (later Gen.) Ignatius Acheampong. In October 1975 supreme legislative and administrative authority was transferred from the NRC to a Supreme Military Council (SMC), also led by Gen. Acheampong.

In 1976 Gen. Acheampong put forward plans for a return to civilian rule without political parties, in the form of "union" government, in which it was envisaged that the military should continue to play a role. Fears that this would amount only to a continuation of military rule, and increasing dissatisfaction with the economic situation and the prevalence of smuggling and profiteering, led to unrest. In response the Government announced a definite programme for return to civilian government by July 1979, beginning with a referendum held in March 1978, which resulted in a vote of 54 per cent in favour of the Union Government. This result was, however, largely discredited.

In July 1978 Acheampong's deputy, Lt.-Gen. Frederick Akuffo, assumed power in a bloodless coup and declared

that the return to a popularly elected government would take place in July 1979 as planned. He introduced a number of civilians into the NRC and freed many political prisoners. A Constituent Assembly was set up in December to decide on the form of the new constitution. The six-year ban on party politics was lifted in January 1979. Of the 16 new parties which were registered, the main contenders inherited the characteristics of earlier parties, the People's National Party (PNP) and the Popular Front Party being formed by veterans of the former Convention People's Party and Progress Party respectively.

Only a fortnight before the elections were due to take place, a coup was staged by junior officers of the armed forces, led by Flight-Lt. Jerry Rawlings. Their main grievance was the fact that the military rulers past and present were evidently not going to be held responsible for the economic mismanagement and widespread corruption of recent times: the new draft constitution allowed former rulers immunity from financial investigation. Under Rawlings an Armed Forces Revolutionary Council (AFRC) took over power and began a "house-cleaning exercise" to stamp out *kalabule* (corruption) at all levels. A "Revolutionary Court" found Acheampong, Akuffo and seven other senior officers guilty of corruption and they were executed.

Although the return to civilian rule was postponed until September, the elections took place in June as planned. The PNP gained a majority of parliamentary seats and its leader, Dr. Hilla Limann, was elected President, taking office on September 24th, 1979.

During the next two years the Government took measures to improve the chronic food shortages, stamp out corruption and smuggling at all levels and to stem civil and tribal unrest. However, in October 1980 the United National Convention (UNC) broke their alliance with the PNP, accusing them of ineptitude, and left the latter with a one-vote majority in Parliament. In June 1981 the UNC joined three other parties to form the All People's Party, a viable alternative to the PNP.

Dissatisfaction with the Government came to a head in December 1981, when Flight-Lt. Rawlings once again took power in a military coup and established a Provisional National Defence Council (PNDC), with himself as Chairman. The Council of State was abolished, the Constitution suspended, Parliament dissolved and political parties banned. Rawlings announced the formation of "local defence committees" to fight corruption, and of special tribunals to judge crimes against the people.

Government

Upon its return to civilian rule in 1979, Ghana adopted an executive presidency with a separate Parliament. The President was Head of State and appointed Ministers of State, Regional Ministers and an advisory Council of State, all subject to Parliamentary approval. The President and Parliament (140 members from single-member constituencies) were elected by direct universal adult suffrage, for

terms of four and five years respectively. The Constitution, suspended after the December 1981 coup, forbade the establishment of a one-party state. Upon its accession to power, the PNDC dissolved Parliament and abolished the Council of State.

Defence

The defence forces consist of units of the army (12,700 in July 1981), air force (1,400) and navy (1,200). There is a paramilitary force of 5,000 and three Border Guard battalions. The headquarters of the Defence Commission of the OAU is in Accra.

Economic Affairs

Ghana is primarily an agricultural country, and cocoa accounts for over 60 per cent of total exports. Production has been declining since the early 1970s and estimated output fell from 470,000 metric tons in 1971/72 to about 290,000 tons in 1979/80, due to ageing and diseased trees, poor transport facilities, and considerable smuggling across Ghana's borders. Producer prices were tripled in 1981 as an incentive to farmers. Production of foodstuffs has suffered in recent years from adverse weather conditions and economic mismanagement; serious food shortages have had to be met by overseas aid. A two-year agricultural programme was launched in May 1980, aimed at self-sufficiency in staple foods, which included irrigation, mechanization and fisheries projects. It was hoped to diversify exports away from cocoa.

The timber and mining industries, although estimated to be working at only 25 per cent capacity, are next in importance after agriculture, with gold, bauxite, diamonds and hardwoods as major sources of foreign exchange. In 1981 a project was adopted to revitalize the ailing gold-mining industry which involved investment of 3,000 million cedis. There is considerable state participation in the major sectors of the economy, although it was hoped that a new investment code introduced in 1981 would attract more foreign capital. Ghana is seeking to develop its energy resources; oil and hydroelectric power are produced, whilst natural gas was discovered offshore in 1980.

Political instability and general mismanagement have had a disastrous effect on the economy. In recent years there have been heavy balance of payments deficits, a rapidly increasing money supply and soaring inflation, despite successive devaluations of the currency. Contributory factors include an artificially high exchange rate, over-reliance on imports, especially petroleum, shortages of raw materials and spare parts, the decline in world prices and markets, inadequate marketing and distribution facilities and smuggling. However, under the Limann Government, inflation slowed, import restrictions were liberalized and some minor foreign debts were settled.

Ghana is a member of ECOWAS. Overseas aid comes mainly from the EEC, particularly the United Kingdom and the Federal Republic of Germany, and also the UN, the People's Republic of China, Canada and the U.S.A.

Transport and Communications

The 953-km. rail network forms a rough triangle linking Accra and Takoradi on the coast with the inland centre of Kumasi. Ghana has some 32,000 km. of roads, but only about one-third of the 12,000 km. trunk road network is metalled. The Ghana Highway Authority co-ordinates and administers improvements to both trunk and feeder roads. A project to rehabilitate several hundred miles of road is being financed by the IDA and Canada. National air and shipping lines have been formed and a satellite communications station outside Accra was to be commissioned in June 1981.

Social Welfare

The Government provides hospitals and medical care at nominal rates, and there is a government pension scheme. The Department of Social Welfare and Community Development and the Department of Rural Development deal with both urban and rural problems including the need to improve literacy, child welfare and factory legislation.

Education

In April 1974 the NRC announced that a new educational structure would be introduced. It consists of an initial phase of six years' primary and three years' junior secondary education to be compulsory and free. A second phase would prepare pupils for "O" level technical and commercial courses. There are three universities. The new military regime stressed the need for education to be geared more closely to the country's practical needs. The illiteracy rate in 1970 was 69.8 per cent.

Tourism

Ghana's tourist industry is expanding. The attractions include fine beaches, game reserves, traditional festivals and old trading forts and castles. In 1978 revenue from tourism was about 13.6 million cedis and in 1979 there were 47,429 visitors. There were 2,220 hotel beds in 1980.

Public Holidays

1982: July 1st (Republic Day), December 25th-26th (Christmas).

1983: January 1st (New Year's Day), January 13th (National Redemption Day, anniversary of the 1972 coup), March 6th (Independence Day), April 1st-4th (Easter).

FINANCE

100 pesewas=1 new cedi.

Coins: ½, 1, 2½, 5, 10 and 20 pesewas; 1 cedi.

Notes: 1, 2, 5, 10 and 50 cedis.

Exchange rates (December 1981): £1 sterling=5.29 cedis; U.S. \$1=2.75 cedis.

100 cedis=£18.90=\$36.36.

Note: The original cedi was introduced in July 1965, replacing the Ghana pound (£G1=£1 sterling) at the rate of £G1=2.40 cedis (1 cedi=8s. 4d. sterling). The exchange rate was U.S. \$1=85.71 pesewas (1 cedi=\$1.167). This currency was itself replaced in February 1967 by the new cedi, valued at 10 shillings sterling or U.S. \$1.40 (\$1=71.43 pesewas), the exchange rate being 1 new cedi=1.2 old cedis. In July 1967 the new cedi was devalued by 30 per cent to 98 U.S. cents (\$1=1.0204 cedis), worth 7 shillings (£1=2.857 new cedis) until November 1967 and 8s. 2d. or 40.83 new pence (£1=2.449 new cedis) from November 1967 to August 1971. In December 1971 the new cedi was further devalued to 55 U.S. cents (\$1=1.8182 new cedis) or 21.11p (£1=4.738 new cedis). In February 1972, following the military coup, this devaluation was partially reversed and the new cedi was revalued at 78.125 U.S. cents (\$1=1.28 new cedis), worth 29.98p (£1=3.335 new cedis) until June 1972. From February 1973 to June 1978 the exchange rate was \$1=1.15 new cedis (1 cedi=86.96 U.S. cents). The new cedi was devalued in June 1978 and other devaluations followed. Since August 1978 the exchange rate has been \$1=2.75 new cedis (1 cedi=36.36 U.S. cents).

THE CONSTITUTION

Following the coup in December 1981, the Constitution was suspended. It had been promulgated by the AFRC in June 1979 and had come into effect on September 24th. The following is a summary of its main provisions:

The preamble declares the faith of the people of Ghana in freedom and justice, the principle that all powers of government spring from the sovereign will of the people, the principle of universal adult suffrage, the rule of law, and the protection of fundamental human rights and of national unity and stability.

Executive power is vested in the President who is Head of State, Head of the Government and Commander-in-Chief of the Armed Forces. He is elected by universal adult suffrage and must obtain more than 50 per cent of the votes. He holds office for a term of four years and for not more than two terms.

The Cabinet consists of the President, the Vice-President, and between 10 and 19 Ministers of State appointed by the President with the approval of Parliament. Members of Parliament who are appointed as Ministers must resign their seats. The President and Ministers of State may not hold any other office of profit or emolument.

Legislative power is vested in a Parliament with not less than 140 members, each representing one constituency, elected by universal adult suffrage. Parliament meets at least once a year and continues for five years after the date of its first sitting. Any 20 members may call for a meeting of Parliament.

The Council of State aids and advises the President and Parliament. Members include former Presidents, the President of the House of Chiefs, and others who are chosen by the President, with the approval of Parliament, from among former holders of public office, representatives of professional bodies and other eminent citizens; each Region must be represented. The Council meets at least four times a year.

JUDICIAL SYSTEM

Ministry of Justice: Attorney-General's Dept., Accra.

The civil law in force in Ghana is based on the Common Law, doctrines of equity and general statutes which were in force in England in 1874, as modified by subsequent Ordinances. Ghanaian customary law is, however, the basis of most personal, domestic and contractual relationships. Criminal Law is based on the Criminal Code, enacted at the end of the nineteenth century and dependent on English Criminal Law, and since amended at intervals. The **Superior Court of Judicature** consists of the Supreme Court, the Court of Appeal and the High Court of Justice; the **Inferior Courts** embrace the Circuit Courts, the District Courts and such other inferior courts as may be provided by law.

Supreme Court: The Supreme Court consists of the Chief Justice and not fewer than six other Justices of the Supreme Court. It is the final court of appeal in Ghana and has jurisdiction in matters relating to the enforcement or interpretation of the Constitution.

The Court of Appeal: The Court of Appeal consists of the Chief Justice and not fewer than five Judges of the Court of Appeal. It has jurisdiction to hear and determine appeals from any judgment, decree or order of the High Court.

The High Court: The High Court of Ghana consists of the Chief Justice and not fewer than twelve Justices of the High Court and has an original jurisdiction in all matters, civil and criminal, other than those for offences involving treason. Trial by jury is practised in criminal cases in Ghana and the Criminal Procedure Code, 1960, provides that all trials on indictment shall be by a jury or with the aid of Assessors.

The Circuit Court: Circuit Courts were created in 1960, and the jurisdiction of a Circuit Court consists of an original jurisdiction in civil matters where the amount involved does not exceed C8,000 on contractual matters and C15,000 on land issues. It also has jurisdiction with regard to the guardianship and custody of infants, and original jurisdiction in all criminal cases, except

offences where the maximum punishment is death or the offence, treason. Finally it has appellate jurisdiction from decisions of any District Court situated within its circuit.

District Courts: To each magisterial district is assigned at least one District Magistrate who has original jurisdiction to try civil suits in which the amount involved does not exceed C2,000. District Magistrates also have jurisdiction to deal with all criminal cases, except first-degree felonies, and commit cases of a more serious nature to either the Circuit Court or the High Court. A Grade I Circuit Court can impose a fine not exceeding C1,000 and sentences of imprisonment of up to two years and a Grade II Circuit Court may impose a fine not exceeding C500 and a sentence of imprisonment of up to 12 months. A District Court has no appellate jurisdiction, except in rent matters under the Rent Act.

Juvenile Courts are empowered to hear charges against juveniles, persons under 17 years, except where the juvenile is charged jointly with an adult. They consist either of three citizens selected from a panel of Juvenile Court Magistrates or of a Stipendiary Magistrate sitting with two of the panel. The public is excluded from proceedings of Juvenile Courts which can make orders as to the protection and supervision of a neglected child and can negotiate with parents to secure the good behaviour of a child.

Special Tribunal: replaced the Special Courts set up by the AFRC in 1979 to investigate allegations of corruption.

It was announced in January 1982 that, in addition to the usual courts, special **People's Tribunals** would be set up to judge "crimes against the people".

Chief Justice: F. K. APALOO.

President of the Court of Appeal: Justice K. E. AMUA-SEKYI.

President of the Special Tribunal: (vacant).

GRENADA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Grenada is the most southerly of the Windward Islands, in the West Indies. The country also includes some of the small islands known as the Grenadines. The climate is semi-tropical with an average temperature of 24°C (82°F); most of the rainfall occurs between June and December. The majority of the population speak English and belong to Christian churches. The national flag, displaying seven stars and a nutmeg, consists of a diagonally-quartered green and yellow rectangle on a red ground. The capital is St. George's.

Recent History

Grenada was initially colonized by the French but was captured by the British in 1762. Full internal self-government and statehood in association with the United Kingdom were achieved in March 1967. The political life of Grenada was dominated by Mr. (later Sir) Eric Gairy, who in 1950 founded the Grenada United Labour Party (GULP), with the support of an associated trade union. In 1951 GULP won a majority of the elected seats on the Legislative Council but in 1957 it was defeated by the Grenada National Party, led by Herbert Blaize. Gairy was Chief Minister in 1961-62, became Premier after the elections of 1967 and again after those of 1972, which he fought chiefly on the issue of total independence. Grenada became independent within the Commonwealth on February 7th, 1974, with Gairy as Prime Minister. Opposition within the country was expressed in demonstrations and a general strike, and in the reduction of GULP's majority in the elections of 1976.

In March 1979 Gairy was replaced in a bloodless coup by the leader of the left-wing New Jewel Movement (NJM), Maurice Bishop, and a People's Revolutionary Government was formed. The regime has come increasingly under pressure, both internally and externally, to hold promised elections and in October 1981 Bishop finally announced that elections were scheduled for 1982 pending public approval of a new constitution. However, involvement in government at local levels has been encouraged through community health and education councils, as the first step towards the Government's ideal of a "participatory democracy". The discovery of an ultra-leftist coup plot in May 1980, the attempted assassination of Bishop and his Cabinet at a rally in June and a spate of bombing and shooting incidents in the second half of 1980 convinced the Government of its vulnerability. In June 1981 the Government closed down a new newspaper, *The Grenadian Voice*, and arrested four of its owners in connection with an alleged CIA plot, subsequently banning the printing of all non-official newspapers for a year. Bishop appealed for help to the UN and foreign governments in July, when he became convinced that manoeuvres by U.S. forces off Puerto Rico were a trial run for an invasion of Grenada; this was strenuously denied by the U.S.A.

Government

Grenada has dominion status within the Commonwealth. The British monarch is Head of State and is

represented by a Governor-General. Following the coup in March 1979, Parliament was dissolved and replaced by a People's Revolutionary Government, comprising a Cabinet of Ministers and a Revolutionary Council. The regime has announced plans to create a People's Consultative Assembly to draft a new Constitution.

Defence

There is a People's Revolutionary Army numbering over 1,000, the Royal Grenada Police Force, and the People's Militia which consists of over 25,000 volunteers.

Economic Affairs

The economy of Grenada is essentially agricultural and centres on the traditional production of spices, particularly nutmeg. Nutmeg, cocoa and bananas are the principal exports, although mace, sugar, cotton, coffee, coconuts, citrus fruit and minor spices are also significant. Flooding in 1979, a hurricane in 1980 and storms in 1981 held down exports and falling world prices, particularly of cocoa, further reduced export income in 1980 and 1981. The larger estates formerly belonging to Gairy are now worked as farming co-operatives and it is hoped to develop a co-operative sector alongside the private and public sectors throughout the economy. Cuba and the U.S.S.R. are providing Grenada with equipment and expertise to develop its fishing industry. The development of manufacturing industries has not kept pace with other activities, owing mainly to the small size of the local market. Tourism is an increasingly important sector of the economy, but in late 1980 was only just recovering from the effects of the coup. The Government's economic policy is based on the development of agro-industries and fisheries geared to import substitution, and the promotion of tourism. The Government is pledged to nationalizing agriculture and has begun to nationalize the marketing of agricultural imports through central agencies.

With the unemployment rate running at over 35 per cent and a trade deficit of EC\$91 million for 1980, the rebuilding of the economy took priority in 1981. Expenditure of EC\$70 million on capital projects was raised largely from foreign aid donors and in June the IMF granted a one-year stand-by credit of 3.425 million SDRs to support the Government's financial programme. Major co-operation agreements were signed with Canada and Mexico in 1981, and substantial Cuban aid for 1982 was to be directed primarily at development of infrastructure.

Transport and Communications

There are some 980 km. (610 miles) of roads in Grenada, most of which are suitable for motor traffic. A new highway linking St. Andrew's, St. David's and St. George's was being constructed in 1979. A programme of further road construction is also being planned. Several foreign shipping lines serve the island and there is an airport 30 km. (18 miles) from St. George's, although this is not fully equipped to cope with the demands of the growing tourist traffic. A new airport being built at Point Salines is expected to be fully operational in 1982.

GRENADA

Social Welfare

There was no system of social security payments in Grenada prior to March 1979. New initiatives launched in 1979 include the Youth for Reconstruction Programme to provide basic para-medical services and assistance to the elderly and disabled, a national milk distribution programme and the establishment of community-directed day care centres.

Education

Education is free and compulsory between the ages of six and fourteen years. The standard of education is high and is modelled to a large extent on the British pattern. There are 20 primary, 46 all-age, 4 junior secondary and 16 secondary schools. Technical Centres have been set up in each parish and there is a Technical and Vocational Institute in St. George's. The Extra Mural Department of the University of the West Indies has a branch in St. George's and there is also a Teachers' Training College. A School of Medicine has been established at St. George's, a School of Agriculture at Mirabeau and a School of Fishing at Victoria.

GUATEMALA

INTRODUCTORY SURVEY

Location, Climate Language, Religion, Flag, Capital

The Republic of Guatemala lies in the Central American isthmus, bounded to the north and west by Mexico, with Honduras and Belize to the east and El Salvador to the south. It has a long Pacific coastline and a narrow outlet on to the Caribbean. The climate is tropical in the lowlands with an average temperature of 28°C (83°F) and more temperate in the central highland area with an average temperature of 20°C (68°F). The official language is Spanish, but Indian dialects are widely spoken. Over 90 per cent of the people are Roman Catholics; there are a few Protestants. The national flag (proportions 3 by 2) consists of vertical stripes of blue, white and blue, the white stripe bearing the national coat of arms. The capital is Guatemala City.

Recent History

Under Spanish colonial rule, Guatemala was part of the Viceroyalty of New Spain. Independence was obtained from Spain in 1821, from Mexico in 1824 and from the Federation of Central American States in 1838. Subsequent attempts to revive the Federation failed and under a series of dictators there was relative stability, tempered by periods of disruption. A programme of social reform was begun by Juan José Arvalo (President in 1944-50) and his successor, Col. Jacobo Arbenz Guzmán, whose land reform policy evoked strong opposition from land owners. In 1954 he was overthrown in a coup led by Col. Carlos Castillo Armas, who invaded the country with U.S. assistance. Castillo became President but was assassinated in July 1957. The next elected President, Gen. Miguel Ydigoras Fuentes, took office in March 1958 and ruled until he was deposed in March 1963 by a military coup, led by Col. Enrique Perálta Azurdia. He assumed full powers as Chief of Government, suspended the Constitution and dissolved the Legislature. A Constituent Assembly, elected in 1964, produced a new Constitution in 1965. Dr. Julio César Méndez Montenegro was elected President in 1966, and in 1970 the candidate of the Movimiento de Liberación Nacional (MLN), Col. (later Gen.) Carlos Arana Osorio, was elected President after a turbulent campaign. Despite charges of fraud in the elections of March 1974, Gen. Kjell Langerud García of the MLN took office as President in July.

President Langerud sought to discourage extreme right-wing violence and claimed some success, although in September 1979 Amnesty International estimated the number of lives lost in political violence since 1970 at 50,000 to 60,000. In February 1976 a series of earthquakes in central Guatemala resulted in 23,000 dead, 77,000 injured and one million homeless. A National Reconstruction Committee was set up to co-ordinate reconstruction and foreign relief aid. In March 1978 Gen. Fernando Romeo Lucas García was elected President. Despite his promise to restore peace, the level of violence continued to increase, with more than 5,000 deaths and 1,500 people reported missing in the first six months of 1981.

Following the resignation in May 1980 of the Vice-President, Dr. Francisco Villagrán Kramer, because of government involvement in right-wing terrorism and

repression, certain government agencies were accused of carrying out a campaign of murder and torture against trade unionists, teachers, students and, in particular, Indian communities, as a reprisal for their alleged support of the guerrilla cause. Thousands of Indian peasants sought safety by fleeing across the northern border into Mexico, until July 1981 when the Mexican Government refused to allow refugees entry. The anti-Indian campaign has caused unrest in the army, whose rank-and-file is composed almost entirely of Indians.

Guatemala remains steadfast in its claims to the neighbouring former British dependency of Belize. In protest at the U.K.'s decision to grant independence to Belize, in accordance with a UN resolution of November 1980, Guatemala severed diplomatic relations with the U.K. An appeal was launched with the Security Council, only days before Belize's independence celebrations in September 1981, but was overruled.

Government

Guatemala is a republic comprising 22 departments. Under the 1966 Constitution, legislative power is vested in the unicameral National Congress, with 61 members elected for four years by universal adult suffrage. Executive power is held by the President, also directly elected for four years. He is assisted by a Vice-President and an appointed Cabinet.

Defence

In July 1981 the armed forces totalled 15,050, of whom 14,000 were in the army, 600 in the navy (including 200 marines) and 450 in the air force. There were paramilitary forces of 3,000. Military service is by conscription for two years. Defence expenditure in 1980 was 115.7 million quetzales.

Economic Affairs

The economy is predominantly agricultural, with over half of the country's active population being employed in agriculture, forestry and fishing. Guatemala is Central America's second leading coffee producer and in 1980 it received about 30 per cent of its total export earnings from coffee. The Government's policy of curtailing production in line with international coffee agreements and rising production costs have reduced the share of coffee production in real G.D.P. Other major crops are sugar cane, bananas, cardamom and cotton. Attempts to diversify agricultural production have resulted in increased exports of tobacco, vegetables, fruit and beef, and in 1980 the country was the largest Central American producer of basic grain crops. Extensive forests provide timber and chicle.

The liberal treatment granted to foreign capital in Guatemala has benefited export diversification as it has led to the modernization of the manufacturing sector and the expansion of mining activities. Exports of manufactured goods more than trebled between 1972 and 1978, partly due to increased trade with other Central American Common Market members, and official trade figures in

1980 showed a 22.5 per cent increase on the previous year. The main industries are food processing, rubber, textiles, paper and pharmaceuticals.

Commercial quantities of petroleum were discovered in 1974 and 1975, and the Rubelsanto and West Chinajá fields have reserves estimated at 27 million barrels. Further deposits were found in 1981 in Alta Verapaz and the Petén Basin and are now being exploited by Texaco, Amoco and Elf-Aquitaine. A pipeline, linking Rubelsanto and the Caribbean coastline, was completed in 1981. Oil sales in 1980 amounted to U.S. \$24 million.

The Exmibal consortium has invested 224 million quetzals in exploiting the nickel deposits, estimated at 60 million tons, near Lake Izabal at Chalac-El Estor. The nickel plant began operating in mid-1977 and at full capacity was to have produced 28 million lb. (12,700 metric tons) of nickel per year, but in November 1981 it was decided to close down the mine indefinitely as falling sales, the rising cost of fuel and new taxation had made the venture financially unviable.

Despite the earthquake, Guatemala experienced a strong economic revival in 1976. The G.D.P. rose by 9 per cent in 1976, but the rate dropped to 5.2 per cent in 1978 and to 3.4 per cent in 1980, as a result of reduced world prices for coffee, cotton and sugar and the decline in tourism. In 1980 the balance of payments registered an overall deficit of \$305.3 million and the current account showed a deficit of \$163.4 million because of increased payments for services as well as imports. Foreign exchange reserves rose to a record \$776.4 million in April 1979 but had fallen to \$147 million by September 1981. Government policy to reduce inflation by price controls on essential commodities brought the rate down from 11.5 per cent in 1979 to 8.8 per cent in 1980. A reconstruction programme was begun in 1976, to be completed by 1987 at a cost of over 2,000 million quetzales.

Transport and Communications

There were 1,828 km. of railways and 17,278 km. of roads in 1979. The chief ports are Puerto Barrios, San José, Santo Tomás de Castilla and Champerico. The construction of a 1,500-km. network of new highways, including a four-lane motorway from the capital to San José, began in 1981, and new port facilities are being provided at Champerico and San José. A new international airport is to be built at a cost of U.S. \$200 million at Santa Elena Petén by 1982.

Social Welfare

Social security is compulsory, all employers with five or more workers being required to enrol with the State Institute of Social Security. Benefits are available to registered workers for industrial accidents, sickness, maternity, disability, widowhood and hospitalization. A \$51 million project to improve health services, including two new hospitals in Guatemala City and one in Antigua, was announced in 1980.

Education

Elementary education is free and, in urban areas, compulsory between seven and fourteen years of age. Both primary and secondary education last for six years. There are five universities. The rate of illiteracy was about 50 per cent in 1980, but a "national literacy crusade" was launched by the Government in 1981 in an attempt to alleviate this problem.

Tourism

The main attractions lie in the mountain regions, with their volcanoes, lakes and mountain villages which remain much the same as in the days of the Maya Empire. The old capital, Antigua, retains the ruins of buildings wrecked in the great earthquake of 1773. The Government is expanding tourist facilities in the Izabal-El-Petén region.

Public Holidays

1982: May 1st (Labour Day), June 30th (Anniversary of the Revolution), August 15th (Assumption, Guatemala City only), September 15th (Independence Day), October 12th (Columbus Day), October 20th (Revolution Day), November 1st (All Saints' Day), December 24th, 25th (Christmas), December 31st (New Year's Eve).

1983: January 1st (New Year's Day), January 6th (Epiphany), March 29th-April 1st (Holy Week).

Weights and Measures

The metric system is in official use, but old Spanish weights and measures are used in local trade.

Currency and Exchange Rates

100 centavos = 1 quetzal.

Exchange rates (December 1981):

£1 sterling = 1.92 quetzales;

U.S. \$1 = 1.00 quetzal.

FINANCE

100 centavos=1 quetzal.

Coins: 1, 5, 10 and 25 centavos.

Notes: 50 centavos; 1, 5, 10, 20, 50 and 100 quetzales.

Exchange rates (December 1981): £1 sterling=1.92 quetzales; U.S. \$1=1.00 quetzal.
100 quetzales=£51.99=\$100.00.

Note: The quetzal's value is fixed at par with that of the U.S. dollar and this parity has remained in effect despite two devaluations of the dollar, in December 1971 and February 1973. In terms of sterling, the central exchange rate was £1=2.40 quetzales from November 1967 to August 1971; and £1=2.6057 quetzales from December 1971 to June 1972. The Central American peso, used for transactions within the Central American Common Market, is also at par with the U.S. dollar.

THE CONSTITUTION

The present constitution of Guatemala was decreed on September 15th, 1965, and took effect on July 1st, 1966. The main points are as follows:

Guatemala has a republican representative democratic system of government and power is exercised equally by the legislative, executive and judicial bodies. The official language is Spanish. Suffrage is universal and secret, obligatory for those who can read and write and optional for those who are illiterate. The free formation and growth of political parties whose aims are democratic is guaranteed. To register, parties must have at least 50,000 adherents, of which at least 20 per cent must be literate. There is no discrimination on grounds of race, colour, sex, religion, birth, economic or social position or political opinions.

The State will give protection to capital and private enterprise in order to develop sources of labour and stimulate creative activity.

Monopolies are forbidden and the State will limit any enterprise which might prejudice the development of the community. The right to social security is recognized and it shall be on a national, unitary, obligatory basis.

Constitutional guarantees may be suspended in certain circumstances for up to thirty days (unlimited in the case of war).

CONGRESS

Legislative power is in the hands of Congress, which is made up of deputies elected directly by the people through universal suffrage. Congress meets on June 15th each year

and ordinary sessions last four months; extraordinary sessions can be called by the Permanent Commission or the Executive. All Congressional decisions must be taken by absolute majority of the members, except in special cases laid down by law. Deputies are elected for four years; they may be re-elected after a lapse of one session, but only once. Congress is responsible for all matters concerning the President and Vice-President and their execution of their offices; for all electoral matters; for all matters concerning the laws of the Republic; for approving the budget and decreeing taxes; for declaring war; for conferring honours, both civil and military; for fixing the coinage and the system of weights and measures; for approving, by two-thirds majority, any international treaty or agreement affecting the law, sovereignty, financial status or security of the country.

PRESIDENT

The President is elected by universal suffrage, by absolute majority for a non-extendable period of four years. Re-election or prolongation of the presidential term of office are punishable by law. The President is responsible for national defence and security, fulfilling the constitution, leading the armed forces, taking any necessary steps in time of national emergency, passing and executing laws, international policy, nominating and removing ministers, officials and diplomats, co-ordinating the actions of Ministers of State. The Vice-President's duties include presiding over Congress and taking part in the discussions of the Council of Ministers.

ARMY

The Guatemalan Army is intended to maintain national independence, sovereignty and honour, territorial integrity and peace within the Republic. It is an indivisible, apolitical, non-deliberating body and is made up of land, sea and air forces. The President of the Republic is General Commander of the Army.

LOCAL ADMINISTRATIVE DIVISIONS

For the purposes of administration the territory of the Republic is divided into departments and these into municipalities, but this division can be modified by Congress to suit the interests and general development of the Nation without loss of municipal autonomy.

JUDICIARY

Justice is exercised exclusively by the Supreme Court of Justice and other tribunals. Administration of Justice is obligatory, free and independent of the other functions of State. The President of the Judiciary, judges and other officials are elected by Congress for four years. The *Supreme Court of Justice* is made up of at least seven judges. The President of the Judiciary is also President of the Supreme Court. The Supreme Court nominates all other judges. Under the Supreme Court come the Court of Appeal, the Administrative Disputes Tribunal, the Tribunal of Second Instance of Accounts, Jurisdiction Conflicts, First Instance and Military, the Extraordinary Tribunal of Protection. There is a Court of Constitutionality presided over by the President of the Supreme Court.

GUINEA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Popular and Revolutionary Republic of Guinea lies on the west coast of Africa, with Sierra Leone and Liberia to the south, Senegal to the north and Mali and the Ivory Coast inland to the east. The coastal strip is hot and moist, with temperatures ranging from about 17°C (62°F) in the dry season to about 30°C (86°F) in the wet season. The interior is higher and cooler. The official languages are French and one of the eight national languages, pending the introduction of either Soussou or Maninka as the official language. Most of the people are Muslims but some still adhere to traditional animist beliefs. There are a few thousand Roman Catholics. The national flag (proportions 3 by 2) consists of three vertical stripes of red, yellow and green. The capital is Conakry.

Recent History

Guinea was formerly French Guinea, part of French West Africa. It became the independent Republic of Guinea on October 2nd, 1958, after 95 per cent of voters had rejected the Constitution of the Fifth Republic under which the French colonies became self-governing within the French Community. The new state was the object of punitive reprisals by the outgoing French authorities; all aid was withdrawn and the government infrastructure destroyed. The administration was rebuilt on the basis of the Guinean *Confédération Général du Travail*, which had organized a series of strikes culminating in a general strike in 1953, and the *Parti démocratique de Guinée* (PDG), which won 58 of the 60 seats in the Territorial Assembly in 1957. Its leader, Ahmed Sekou Touré, became President and the PDG the sole political party. Under President Sekou Touré, Guinea has vigorously pursued the aim of socialist revolution with emphasis on its ideological content and on popular political participation. Opposition has been ruthlessly crushed at home and by 1978 over one million Guineans were estimated to have fled abroad. The Soviet bloc has been Guinea's most consistent ally.

There were attempted coups in 1961, 1965 and 1967 and in 1970 an invasion by Portuguese and Guinean exiles was repulsed, after which there were many arrests. During 1972 Sekou Touré made changes in the party structure and improved relations with other countries, but in 1973 he accused the Ivory Coast and Senegal of planning to invade Guinea. Reports of a "permanent conspiracy" by foreign powers to overthrow the Government continued to circulate but in 1975 Guinea resumed normal relations with its African neighbours and the Western powers, signing the Lomé Convention and joining ECOWAS.

All private trade was forbidden in 1975 and transactions were conducted through official co-operatives under the supervision of an "economic police". In September 1977 demonstrations against the abolition of the traditional market were held by women in Conakry and other centres, whose support had been the basis of Sekou Touré's power.

During 1977 and 1978 the regime was accused of widespread violations of human rights. These allegations were

denied but in that period nearly 1,000 prisoners were released and exiles encouraged to return. In March 1978 President Sekou Touré came to an understanding with Presidents Houphouët-Boigny and Senghor of the Ivory Coast and Senegal at a "Summit of Reconciliation" in Monrovia. In November the 11th Congress of the PDG was held, at which the membership of the central organs of the party was increased to allow the expression of new opinion and the merging of the functions of party and state was announced. The country was renamed the Popular and Revolutionary Republic of Guinea. The President reiterated Guinea's commitment to socialist aims but expressed its desire for co-operation with western investors. In December 1978 President Giscard d'Estaing made the first visit of a French President to independent Guinea and plans for economic co-operation between the two countries were discussed. During 1979 Guinea furthered relations with other countries and there was a general move away from rigid Marxism; from July 1979, private enterprise became legal, although substantial deposits, depending on the nature of the enterprise, are payable to the Guinean Government before starting operations.

The Government was reshuffled in June 1979 and again in May 1981. In legislative elections held in January 1980, the voters approved the list of 210 candidates to the National Assembly, and Sekou Touré remained President.

During anniversary celebrations of the PDG in May 1980, a grenade attack was made on Sekou Touré's life, killing one man and wounding many others. The attacker was not traced.

Relations with Guinea-Bissau deteriorated during 1980, owing to a dispute over territorial waters containing oil reserves.

Government

Under the 1958 Constitution, as amended in 1963, legislative power is vested in the unicameral National Assembly, with 210 members elected by universal adult suffrage for seven years. The Assembly elects a Commission to be its permanent organ. Full executive authority is vested in the President, also directly elected for seven years. He appoints and leads a Cabinet, including a Prime Minister. Guinea has a single political party, the *Parti démocratique de Guinée*, which exercises "sovereign and exclusive control of all sections of national life". The party's directing organ is the Central Committee.

National policies are enacted through the National Economic Council. Local government is centrally controlled but each Revolutionary Local Authority possesses wide responsibilities, including defence.

Defence

In July 1981 Guinea had an army of 8,500, a navy of 600 and an air force of 800. There was also a People's Militia of about 9,200. Each Revolutionary Local Authority has a local militia of about 100.

Economic Affairs

More than 80 per cent of the population are engaged in farming, the principal export crops being bananas, groundnuts, palm kernels, pineapples and coffee, though they contribute less than 5 per cent of total exports. Rice is the staple food crop, production of which was 350,000 metric tons in 1980. Only 1.4 million of the 7 million cultivable hectares are productive but there are plans to bring a further 48,000 hectares under cultivation. Drought during the 1970s caused severe crop failure, necessitating food aid from the U.S.A. Private commerce, which had been abolished in 1975, was resumed, subject to strict conditions, following protests in 1977. Some private fields have been integrated into collectively-owned farms. In 1979 action was taken to deal with low yields, poor application of modern technology and lack of crop specialization, but the reorganization was largely administrative and productivity has not improved. Foreign investment is being sought to develop the large areas of arable land as yet unexploited, and EEC aid has been granted for rural training and a variety of agro-industrial projects.

The economy relies on bauxite, with known reserves of 8,000 million tons, the largest in the world. In 1979 12 million tons were extracted, producing 700,000 tons of alumina. In June 1980 an agreement was concluded with companies from several Western states for the construction of a complex which will produce 1.2 million tons of alumina and 150,000 tons of aluminium from the Ayekoye field in the north-west. At present Cameroon processes much of Guinea's alumina. The Mount Nimba iron-ore mine has reserves estimated at 1,500 million tons and a "mixed" company, in association with the Government of Guinea, is mounting a project to extract 15 million tons per year. Production investment includes plans to construct a 1,200-km. railway to the mine, a steelworks and a second deep-water port at Conakry to export the ore. Offshore oil deposits are being explored. Diamond mining, suspended in the late 1970s due to smuggling and theft from the mines, was resumed in 1980, with a U.S. company expecting to produce up to 20,000 carats per month. Guinea also has considerable hydroelectric resources. The mining sector provides 75 per cent of revenue and a new Guarantee Code for foreign investment came into force in 1980. Most areas of trade and industry are controlled by the state and the economy is supervised by five sectoral companies responsible for all state enterprises. In 1977 income tax was abolished to stimulate productivity.

Despite its mineral wealth, Guinea is one of the world's poorest countries. The World Bank estimated its G.N.P. to be \$270 per head in 1979. Development aid from CMEA countries failed to generate the capital necessary to launch new projects and expand the industrial base and, since 1975, Guinea has received assistance from Western countries. Loan commitments from these sources for the period 1977-80 totalled \$250 million. At the end of 1978 Guinea's total foreign debt was U.S. \$1,050 million, servicing of which absorbed 27 per cent of export revenue in 1979. The Government has asked for the restructuring of its foreign debts for the duration of the 1981-85 development plan.

In 1980 Guinea became a member of both the Mano River Union (with Sierra Leone and Liberia) and the Gambia River Development Organization (with Senegal and The Gambia), thus strengthening economic links with the rest of West Africa.

Transport and Communications

The main port is Conakry. Bauxite is exported through Kamsar where a port was opened in 1973. There are rail links between Conakry and Kankan, Kamsar and Sangaredi, and Conakry and the Friguia aluminium factory. New lines are planned to transport iron ore from near the Liberian border to the coast. There is an international airport at Conakry. There are about 28,400 km. of roads, mostly soft-surfaced. A cross-country road runs 895 km. from Conakry to Bamako, the capital of Mali, and an international road crosses Guinea connecting Dakar, capital of Senegal, with Abidjan, capital of the Ivory Coast.

Social Welfare

All workers must belong to the National Confederation of Guinean Workers, which is affiliated to the General Union of the Workers of Black Africa. Wages are fixed according to the Government Labour Code. The 48-hour week is in force for industrial workers.

Education

Education is free, and compulsory for all children aged 7 to 12 years. Educational establishments are known as *Centres d'Education Révolutionnaire* (CER) and are divided into four cycles. Education is closely linked with society and the State, and, in addition to basic knowledge, pupils receive political and professional training. It is estimated that 80 per cent of Guinean children attend primary schools, and the literacy rate is high. University education is divided into two stages of 2 and 3 years, often interrupted for periods of practical experience in the chosen field. The eight national languages have been taught since 1968, though French is still widely used.

Tourism

Guinea is noted for the beauty of its scenery, especially in the mountains of the Futa Jallon.

Public Holidays

1982: May 1st (Labour Day), July 23rd (Id ul Fitr, End of Ramadan), September 28th (Referendum Day), October 2nd (Republic Day), November 1st (All Saints' Day), December 25th (Christmas), December 28th (Mouloud, birth of Muhammad).

1983: January 1st (New Year), April 4th (Easter Monday).

1,000 sylis=£24.59=\$47.30.

Note: The official value of the syli is 36 milligrammes of gold. The currency was introduced in October 1972, replacing the Guinea franc (FG) at the rate of 1 syli=10 francs. The Guinea franc was introduced in March 1960, replacing (at par) the franc CFA. The franc's value was fixed at 3.6 milligrammes of gold, worth 0.4051 U.S. cent (U.S. \$1=246.853 francs) until August 1971. The Guinea franc was equivalent to 2 French centimes (1 French franc=50 FG) until August 1969. Between December 1971 and October 1972 the Guinea franc was valued at 0.4398 U.S. cent (\$1=227.365 Guinea francs). In terms of sterling, the exchange rate between November 1967 and June 1972 was £1=592.447 Guinea francs. After the syli was introduced, it maintained its original value of 4.3982 U.S. cents (\$1=22.7365 sylis) until the dollar's devaluation in February 1973, when a new exchange rate of \$1=20.65 sylis (1 syli=4.8426 U.S. cents) was introduced. This remained in force until June 1975, since when the currency has been linked to the IMF Special Drawing Right at the rate of 1 SDR=24.6853 sylis. The average exchange rate (sylis per U.S. dollar) was: 20.67 in 1975; 21.38 in 1976; 21.14 in 1977; 19.72 in 1978; 19.11 in 1979; 18.97 in 1980. Some of the figures in this statistical survey are still in terms of Guinea francs.

THE CONSTITUTION

(promulgated November 1958; amended October 1963)

The Constitution was altered and enlarged according to Law No. 1 on October 31st, 1963. The principle of the Republic is "Government of the people by the people for the people".

1. The State is a Democratic Republic.

3. Sovereignty rests in the people, and is exercised by their representatives in the National Assembly.

The National Assembly

4-8. Equal and secret elections for the National Assembly on a national list are held every seven years.

9. The first duty of the Assembly is to pass laws.

10. Representatives enjoy the usual parliamentary immunity.

11. A permanent Commission elected from the National Assembly manages the business of the Assembly between sittings (two per year).

14. The President and the Representatives are responsible for the initiation and formulation of laws.

17. The Representatives are in control of the Budget and expenditure; limited only in that any proposal for an increase in expenditure must be accompanied by a corresponding increase in revenue.

The President

20. The President is Commander-in-Chief of the Armed Forces.

21. Executive power is practised solely by the President; the Cabinet is nominated by him and subordinate to him.

22. The President is elected for a period of seven years and can stand for re-election as often as he wishes.

24. The President is responsible to the Assembly, but there are no definite curbs upon the executive.

28. If the Presidency is vacant the Cabinet continues to govern until a new President is elected.

The Judiciary

35. The President guarantees the independence of the judiciary; he also has the power to pardon. The Judges are responsible only to the law.

36. The accused has a right to defence.

The Basic Rights and Duties of the Citizen

39. All the inhabitants of the Republic of Guinea have the right to vote.

40-46. The Constitution confers the right of freedom of speech, assembly, coalition, demonstration and conscience upon all citizens; the Press is free, the post is secret property is inviolable; all citizens have the right to work, go on holiday, to receive social support and education, and to go on strike.

42. It is the duty of all citizens to uphold the Constitution, to defend their country, and to fulfil social responsibilities.

45. Racial discrimination, or regional propaganda is punishable by law.

LEGISLATURE

ASSEMBLÉE NATIONALE

President: DAMANTANG CAMARA.

ELECTION, JANUARY 1980

All seats were won by the *Parti démocratique de Guinée*. The term is seven years, and the new National Assembly has 210 members, compared with 150 in the previous one.

POLITICAL PARTY

Parti démocratique de Guinée (PDG): B.P. 69; Conakry; f. 1947.

The Party is the ultimate source of authority in the country, possessing "sovereign and exclusive control of all sections of national life".

NATIONAL BODIES

Congress is the highest authority of the Party; 11th congress, November 1978. **National Revolutionary Council** meets between congresses. **Central Committee** since 1972 is the directing organ and executive body of the party; 25 members are elected for five years; in November 1978 it was decided to increase this number to 75. The **Political Bureau** is the main executive body; at the 11th Congress a 15-member Bureau was elected to run the party until the election of a new National Council.

Sec.-Gen.: Pres. AHMED SEKOU TOURÉ; **Perm. Sec.:** DAMANTANG CAMARA.

REGIONAL BODIES

Federal Congress is the decision-making body of the PDG in the 33 regions; there are 34 Federal Congresses (Conakry region having two), each with a Federal Secretary. **Federal Conference** meets between sessions of the Federal Congress. The **Federal Committee**, of nine members including the Governor of the region, is elected for three years as the executive body of the region.

DISTRICT BODIES

Section Congress is the decision-making body in the districts. The **Section Conference** meets between sessions

GUINEA

of the Section Congress. The **Directive Committee**, the executive body of the district, consists of eight members elected for a two-year term.

LOCAL BODIES

Revolutionary Local Authorities (*Pouvoirs Révolutionnaires Locaux—PRL*) are completely responsible for local social, economic and political affairs. There are 4,221 PRLs, each representing 1,500–2,000 people living within a 10-km. radius. Each one is directed by a

Political Party, Diplomatic Representation

committee of seven members elected for two years and headed by a mayor.

There are three special movements integrated into the Party structure. They are automatically represented on governing bodies at all levels:

Confédération Nationale des Travailleurs Guinéens (CNTG): (see Trade and Industry).

Union Révolutionnaire des Femmes Guinéennes (URFG):

Youth of the Democratic African Revolution: f. 1959.

FINANCE

BANKING

(cap. = capital; m. = million; amounts in sylis.)

CENTRAL BANK

In January 1980 the National Assembly approved the creation of The National Currency Institute, which has replaced the Central Bank and has control of all banking activity.

The following are the only three licensed banking organizations:

Banque Guinéenne du Commerce Extérieur: Conakry; f. 1961; cap. 15m.; Dir. LAMINE TOURÉ.

Banque Nationale de Développement Agricole: ave. de la République, Conakry; Dir. MORY FODÉ CONDÉ.

Crédit National pour le Commerce, l'Industrie et l'Habitat: 6e avenue, Conakry; f. 1961; Dir. M. GUILAO.

TRADE AND INDUSTRY

GOVERNMENT REGULATORY BODIES

National Economic Council: Conakry; f. 1974 by the President to manage national economic policy.

The economy of the country is supervised by five state-owned "sectoral companies" responsible for all state-owned enterprises. They are: COFICOM, SECOMEX, OCOFI, SERCOM and SECOFI. Private enterprise has been reintroduced, but foreign trade is supervised by:

Importex: B.P. 125, Conakry; f. 1975; has monopoly of all imports and acts for state-owned companies in foreign trade; Dir. MANSA KEITA.

There are six *Comités d'Etats* established in 1974, each under a member of the Political Bureau of the PDG, to supervise projects and co-operative agreements with foreign investors. The Committee responsible for co-operation with western Europe is:

Comité d'Etat pour la Coopération avec l'Europe Occidentale: Conakry; Pres. N'FAMARA KEITA.

In 1975 a number of *Conférences régionales économiques* were set up to supervise the workings of local economies.

NATIONALIZED INDUSTRIES

The Government has established a number of state companies responsible for all sectors of the economy. Among the most important are: AGRIMA (agricultural materials), ALIMAC (food produce), BATIPOINT (building materials), ONAH (petroleum products), SONATEX (textiles).

TRADE UNION

Confédération Nationale des Travailleurs Guinéens (CNTG): P.O.B. 237, Bourse du Travail, Conakry; 19 federations and national unions, 32 local administrative offices; integrated with PDG; 100,000 mems.; Sec.-Gen. KANDAS KONDE; publ. *Le Travailleur de Guinée*.

TRANSPORT

RAILWAY

Office National des Chemins de Fer de Guinée: B.P. 581, Conakry; Gen. Man. SEKOU CAMARA.

There are 662 km. of 1 metre gauge track from Conakry to Kankan in the east of the country, crossing the Niger at Kouroussa. A second line, 144 km. long, links Conakry and the aluminium works at Fria. In the west of the country a 136 km. railway has been built to carry bauxite from the Sangaredi mine to the port of Kamsar. A line links Conakry and Debele, also for the exploitation of bauxite deposits. In 1974 it was announced that work would soon begin on a 1,200 km Trans-Guinea railway linking Conakry and the iron mines of Nimba and Simandou near the Liberian border, at an estimated cost of U.S. \$555 million.

ROADS

Office National Rail-route (ONRR): Conakry.

There are 28,400 km. of roads and tracks, of which 1,300 km. are tarred. The main roads are those running along the coast from Sierra Leone to Guinea-Bissau (via Conakry) and from Conakry into the interior, with branches to the frontiers of Senegal, Mali and the Ivory Coast.

In 1979 loans from the Islamic Development Bank, the Arab Development Bank, and the IDA, totalled over U.S. \$20 million to finance road repairs in Guinea.

SHIPPING

Port de Conakry: B.P. 534, Conakry.

Conakry's 2,450 metres of quays provide 9 alongside berths for ocean-going vessels. The port facilities are being expanded to cope with increased freight traffic resulting

from the development of mining and a deep water port is being built to handle the traffic of the new Trans-Guinea railway. A new deep-water port at Kamsar came into operation in 1973. It exports bauxite from Sangaredi. The Government is to set up the *Office Guinéen pour le Transport Maritime* as a national company with foreign interests, to construct a merchant fleet and act for *Importex* (see Trade and Industry above) in all matters connected with maritime transport.

ENTRAT: P.O.B. 315, Conakry; state stevedoring and forwarding firm; Dir.-Gen. DAOUA DIAWARA.

Société Navale Guinéenne: P.O.B. 522, Conakry; f. 1968; state shipping firm; agents for Cie. Maritime des Chargeurs Réunis, Cie. de Navigation Fraissinet et Cyprien Fabre, Delta Steamship Lines Inc., Elder Dempster Line, Hanseatic Africa Line, Leif Hoëgh and Co. A/S, Lloyd Triestino, Nouvelle Compagnie de Paquebots (N.C.P.), Palm Line Ltd., Scandinavian West Africa Line, Société Navale de l'Ouest, United West Africa Service; Dir.-Gen. NABY SYLLA.

SOTRAMAR: Kamsar; f. 1971; bauxite export from mines at Boké through port of Kamsar.

CIVIL AVIATION

Aeroflot (U.S.S.R.), Air Afrique (Ivory Coast), Air Algérie, Air Mali, Air Maroc, Air Zaire, ČSA (Czechoslovakia), Interflug (German Democratic Republic), LIA (Guinea-Bissau), Sabena (Belgium), Sierra Leone Airways and UTA (France) also serve Conakry.

GUINEA-BISSAU

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Guinea-Bissau lies on the west coast of Africa between Senegal to the north and Guinea to the east and south. The climate is tropical although maritime and sahelian influences are felt. The average temperature is 20°C (68°F). The official language is Portuguese, but Crioulo and several dialects are widely spoken. The principal beliefs are animism and Islam. There is a small minority of Roman Catholics and other Christian groups. The flag has horizontal stripes of yellow above green and a red vertical stripe at the hoist with a five-pointed black star at its centre. The capital is Bissau.

Recent History

Guinea-Bissau was settled by the Portuguese in the 15th century. Small nationalist groups began to form in the 1950s and the *Partido Africano da Independência da Guiné e Cabo Verde* (PAIGC) was formed in 1956. Fighting broke out in the early 1960s and by 1972 the PAIGC was in control of two-thirds of the country. In 1973 a National Assembly was elected and the independence of the Republic of Guinea-Bissau was proclaimed in September, with Luiz Cabral as President of the State Council. The Government introduced measures to regularize relations with Portugal (which recognized the new Republic in September 1974), lay the foundations for a socialist state and enter into friendly relations with other states, in particular in Africa but also with the U.S.S.R. and European countries. At elections held in December 1976 and January 1977 voters chose regional councils from which a new National Assembly was later selected. In July 1978 Francisco Mendes, who had been Chief State Commissioner since 1973, was killed in a road accident. A new Council of State Commissioners was subsequently formed, led by Commander João Vieira, the former State Commissioner for the Armed Forces and President of the National Assembly.

Until 1980 the PAIGC supervised both Cape Verde and Guinea-Bissau, the two constitutions remaining separate, but with a view to eventual unification. However, on November 14th, four days after the Government had approved a new constitution which gave President Cabral almost total control and, some claimed, gave unfair preference to Cape Verdeans (who were permitted to hold top administrative and government posts), Cabral was deposed in a coup and Vieira installed as President of the Council of the Revolution.

At the PAIGC Congress in November 1981 it was decided to preserve the single-party status of the PAIGC, with Vieira as Secretary-General, despite Cape Verde's withdrawal. It was also announced that presidential and legislative elections were to be held in early 1982 and that a new constitution was to be drawn up before then.

Government

In November 1980 a new constitution, giving President Cabral greatly-increased powers, replaced that of 1973, which had proclaimed the PAIGC, the only permitted

political party, to be "the supreme expression of the sovereign will of the people". However, following the overthrow of Cabral, the 150-member National People's Assembly and the Council of State Commissioners were dissolved. Their functions were assumed by the Council of the Revolution, presided over by Vieira.

Defence

Since the independence of Guinea-Bissau the Republic has had control over its armed forces, consisting of about 6,250 troops, and all Portuguese military personnel have been withdrawn. The army is supported by a militia, the *Forças Armadas da Libertação*.

Economic Affairs

Subsistence agriculture is the mainstay of the economy, engaging about 80 per cent of the population. Rice is the staple food, and maize, beans, cassava and sweet potatoes are also grown. Groundnuts, coconuts and palm kernels are exported, providing about 65 per cent of export earnings. Cattle-breeding is important in the interior. The Government plans to make the country self-sufficient in essential foods, to increase production for export and to diversify crops; tobacco, cotton and sugar are being grown experimentally. Co-operative farming methods are being introduced. The fishing industry is being modernized and has expanded rapidly; in 1979 fish products made up 28 per cent of export earnings.

Industry, based on the processing of food and raw materials, is being developed in order to provide employment, reduce imports and satisfy consumer demand; however, only timber is exported. The agro-industrial complex at Cumeré, due to open in 1981, is capable of processing 50,000 metric tons of rice and 70,000 tons of groundnuts annually. The mining sector has still to be developed: the exploitation of bauxite, phosphates and petroleum deposits is being studied. However, there is a serious lack of basic infrastructure and transport facilities. Plans include the construction of a dam on the Corrubal river to supply hydroelectric power for the development of a modern aluminium industry.

Since independence the country has had a serious trade deficit, which has increased since 1977 because of the effects of the drought on crops, rising oil prices and world inflation, and stood at U.S. \$45 million in 1979. Commander Vieira's Government aimed to downgrade many of the prestigious projects begun under President Cabral and to emphasize rural development. The need for co-ordination was recognized and the first development plan was to be completed in 1981. Guinea-Bissau is receiving many foreign loans and credits and is a member of ECOWAS.

Transport and Communications

In 1979 there were 3,300 km. of roads, 540 km. of which were tarred. Plans have been made for an international road to link Guinea-Bissau with The Gambia and Senegal. There is an international airport at Bissalanca, which there are plans to expand. Transport on the network of inland waterways is being developed.

Social Welfare

Medical services are limited due to a severe shortage of facilities. The Government aims to set up one regional hospital in each of the eight regions. In 1976 only three regions had hospitals, but it was announced in 1977 that three further hospitals would be constructed with U.S. \$2.2 million aid from the EEC, while in 1979 the Netherlands agreed to pay for the building of 20 health centres. The People's Republic of China and Cuba are providing extensive help in these areas.

Education

In the school year 1978/79 there were 740 schools and colleges providing basic education for over 96,000 pupils. Mass literacy campaigns have been launched, but in 1977

the adult illiteracy rate was still 90 per cent. In 1977 the Government announced a programme of educational reform to be completed by 1982. This included provision for six years of primary education and three years of secondary education.

1,000 Guinea pesos = £13.79 = \$26.53.

Note: The Guinea peso was introduced in March 1976, replacing (at par) the Guinea escudo, itself at par with the Portuguese escudo. The link with the escudo was maintained until March 1977. In May 1978 the currency was tied to the IMF Special Drawing Right at a mid-point of 1 SDR = 44 pesos. The average exchange rate (Guinea pesos per U.S. dollar) was: 33.67 in 1977; 35.04 in 1978; 34.06 in 1979; 33.81 in 1980. For details of previous changes in the exchange rate, see the chapter on Cape Verde.

THE CONSTITUTION

Prior to the coup in November 1980, the Government approved a new constitution which gave wider powers to President Cabral and, unlike Cape Verde's constitution which stipulates that the archipelago's President must be Cape Verdean, the new Guinea-Bissau constitution contained no such provision for a Guinean President. Neither did it abolish the death penalty. These points were unacceptable to Commdr. Vieira and his supporters and contributed to the causes of the coup. It was announced in

March 1981 that a new constitutional law was to be published, reinforcing the powers of Commdr. Vieira, who would become C.-in-C. of the Armed Forces and Head of Government. The Council of the Revolution, consisting of nine members and four aides, was defined as the country's supreme directing body. It was decided at the PAIGC Congress in November 1981 that a new constitution would be drawn up before the elections, due to be held in early 1982.

INSURANCE

In June 1979 it was announced that a single state-owned firm would be set up to handle insurance. The Portuguese company **Ultramarina** was to cease its activities in this field by the end of the year.

TRADE AND INDUSTRY

Since independence the Government has been actively pursuing a policy of small-scale industrialization to compensate for the almost total lack of manufacturing capacity. It has adopted an elaborate state control programme and in late 1976 acquired 80 per cent of the capital of a Portuguese company, **Ultramarina**, a large firm specializing in a wide variety of trading, ship-repairing and agricultural processing. The Government has also acquired major interests in the **CIGER** brewery and created a joint venture company with the Portuguese concern **SAGOR** to sell petroleum products after the construction of new storage facilities. Since 1975 three fishing companies have been set up with foreign participation: **GUIALP** (with Algeria), **Estrela do Mar** (with the U.S.S.R.) and **SEMAPESCA** (with France). In December 1976 **SOCOTRAM**, an enterprise for the sale and processing of timber, was inaugurated. It operates a new factory in Bissau for the production of wooden tiles and co-ordinates sawmills and carpentry shops all over the country. The state-owned **Empresa Nacional de Pesquisas e Exploração Petrolíferas e Mineiras (PETROMINAS)** regulates all mineral prospecting. In 1979 the **Empresa de Automóveis de Guiné** opened an assembly plant at Bissau, capable of producing 500 cars a year.

GUYANA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Co-operative Republic of Guyana lies on the north coast of South America between Venezuela to the west and Suriname to the east, with Brazil to the south. The narrow coastal belt has a moderate climate with two wet seasons, from April to August and November to January, alternating with two dry seasons; inland there are tropical forests and savannah and the dry season lasts from September to February. The average temperature is 27°C (80°F). English is the official language but Hindi, Urdu and Amerindian dialects are also spoken. The principal religions are Christianity, Hinduism and Islam. The national flag (proportions 5 by 3 when flown on land, but 2 by 1 at sea) is green, with a white-bordered yellow triangle (apex at the right-hand edge) on which is superimposed a black-bordered red triangle (apex in the centre). The capital is Georgetown.

Recent History

Guyana was formerly British Guiana, a colony of the United Kingdom. A new constitution, providing for universal adult suffrage, was introduced in 1953. The elections of April 1953 were won by the left-wing People's Progressive Party (PPP), led by Dr. Cheddi Jagan. In October, however, the United Kingdom Government, claiming that a communist dictatorship was threatened, suspended the constitution. An interim administration was appointed. The PPP split in 1955, and in 1957 some former members founded a new party, the People's National Congress (PNC), under the leadership of Forbes Burnham. The PNC draws its support mainly from the African-descended population, while PPP support comes largely from the Indian community. Both parties adhere to Marxist-Leninist ideology.

A revised constitution was introduced in December 1956 and fresh elections held in August 1957. The PPP won and Dr. Jagan became Chief Minister. Another constitution, providing for internal self-government, was adopted in July 1961. The PPP won the elections in August and Dr. Jagau was appointed Premier in September. In the election of December 1964, held under the system of proportional representation introduced the previous year, the PPP won the largest number of seats but not a majority. A coalition government was formed by the PNC and the United Force, with Burnham as Prime Minister. This coalition led the colony to independence, as Guyana, on May 26th, 1966.

The PNC won the general elections held in December 1968 and again in July 1973, although the results of the latter were disputed by the opposition parties. In February 1970 Guyana became a Co-operative Republic, and Arthur Chung was elected President in March. In May 1976 the PPP, which had boycotted the National Assembly since 1973, offered the Government its "critical support". In October 1980 Forbes Burnham declared himself President of Guyana, a new constitution was promulgated and elections were announced for December. Internal opposition to the PNC Government increased after the

assassination in June 1980 of Dr. Walter Rodney, leader of the Working People's Alliance (WPA), as the Government was widely believed to have been involved in the incident. As all the opposition parties except the PPP called for a boycott of the December elections, the PNC under Burnham, was returned with a large majority, although allegations of substantial electoral malpractice were made. The Government's international reputation was further diminished when an international observer team denounced the elections as fraudulent. In 1981 arrests and trials of opposition leaders continued and a demonstration held by the WPA in September was broken up by the police with considerable force. Reports issued in 1981 by the U.S. State Department and the Guyana Human Rights Association detailed many abuses of human rights and were highly critical of the Government, the security forces and the PNC.

Guyana has border disputes with Venezuela and Suriname. In 1962 Venezuela renewed its claim to 130,000 sq. km. of land west of the Essequibo river (nearly two-thirds of Guyanese territory). The area was accorded to Guyana in 1899 and the Port of Spain Protocol of 1970 put the issue in abeyance until 1982. Tension intensified in 1981 and Venezuela based its claim on a papal bull of 1493 referring to Spanish colonial possessions. The area is thought to be rich in mineral resources. Suriname restored diplomatic representation in Guyana in 1979 and bilateral talks were resumed at the end of the year.

Government

Under the 1980 Constitution, legislative power is held by the unicameral National Assembly, with 53 members elected for five years by universal adult suffrage, using proportional representation, and 12 regional representatives. Executive power is held by the President, who leads the majority party in the Assembly and holds office for its duration. The President appoints and leads a Cabinet, which includes a Prime Minister, and may include Ministers who are not elected members of the Assembly. The Cabinet is collectively responsible to the National Assembly. Guyana comprises ten regions, each having a Regional Democratic Council which returns a representative to the National Assembly.

Defence

The armed forces are combined in a single service consisting of 7,000 men in July 1981. Paramilitary forces total 5,000. Defence expenditure in 1978 was \$G17 million. National Service was established in 1974.

Economic Affairs

The economy is based on agriculture and the production of bauxite. The chief crops are sugar cane and rice, while other important products are citrus fruits, coconuts, groundnuts, oil palms and a variety of vegetables.

By 1979 the country had become self-sufficient in sugar, rice, vegetables, fish, meat, poultry and fruit. Sugar accounts for about 30 per cent of export earnings. Low yields in other Caribbean countries, and the fact that

Guyana alone can harvest two sugar crops each year, made the country the leading sugar producer in CARICOM in 1978. Heavy rains, inefficiency and crop damage (by suspected arson) reduced production of sugar and rice in 1980 and 1981; sugar output of 270,000 metric tons and rice output of 163,000 tons were each nearly 20 per cent below the original target, and figures for the first six months of 1981 showed continued underachievement. Most severely affected by the rains were the small rice farmers, who in 1981 expressed dissatisfaction over the discrepancy between the price paid to the Guyana Rice Board (\$G108 per bag) and the price paid to them by the Board (\$G45). In 1981 work continued on three large drainage and irrigation schemes, the completion of which should double the current food production. The exploitation of the vast timber resources (over 80 per cent of Guyana is covered by tropical forest) has been hampered by inadequate transport facilities.

Bauxite is Guyana's chief export earner despite a fall in the production level from 3.6 million tons in 1973-74 to 1.8 million tons in 1980. Production in 1979 was severely curtailed by the 41 strikes in the industry during the first six months of the year. By the end of 1975 the whole bauxite industry had been nationalized and in 1977 came under the control of Guymine. Industrial development depends on the expansion of energy sources, and the 750 MW hydroelectric project on the Upper Mazaruni, scheduled for completion in 1985, should make possible the construction of a local aluminium smelter. In order to supplement the inadequate electricity supply, 1981 was declared a "year of energy" and feasibility studies were undertaken on three hydroelectric projects.

As world prices for sugar and bauxite have not kept pace with those for Guyana's imported commodities, there is a deficit on the current balance of payments. In 1980 this deficit was U.S. \$128 million, or 21.4 per cent of the G.D.P., and Libya offered a support loan of U.S. \$10 million. Although the G.D.P. grew by 1.5 per cent in 1980, compared with declines in 1977, 1978 and 1979, by 1981 Guyana was experiencing severe economic problems. In June a package of deflationary measures was introduced, including a 15 per cent devaluation (the Guyana dollar, previously tied to the U.S. dollar alone, was tied at a lower rate to a "basket" of five currencies), cuts in subsidies and capital spending and the levying of taxes on consumption. This package was approved by the IMF in July and an extended funding arrangement was agreed.

Guyana is a founder member of the Caribbean Common Market (CARICOM) and the International Bauxite Association.

Transport and Communications

The coastal strip has a well developed road system. In the whole country there are more than 3,000 miles (4,830 km.) of paved and good weather roads and trails. Long-distance buses link the principal towns, villages and sugar estates. Communication with the interior is still chiefly by river, the main rivers being the Mazaruni, the Potaro, the Essequibo, the Demerara and the Berbice. There is a

national railway line covering the 36 miles (58 km.) from Ituni to Mackenzie and Guymine operates the 80-mile (130-km.) standard gauge railway from Ituni to Linden; neither caters for passengers. There are airstrips at the more important settlements in the interior and an international airport at Timehri, 26 miles (42 km.) outside Georgetown.

Social Welfare

Improved water supplies, anti-tuberculosis campaigns and the control of malaria have steadily improved general health. A National Insurance scheme, compulsory for most workers and employers, was established in 1969, and was subsequently extended to cover self-employed people.

Education

Education is free and compulsory between 5 and 14. The estimated literacy rate is 90 per cent. In 1976 the Government took over all church and private schools. In 1980 Guyana had 374 nursery, 432 primary and 84 secondary schools. Children receive secondary education either in a general secondary school for five years or stay on at primary school for a further three years. The total number of pupils in all schools was 252,160 in 1980. There are also 16 technical, vocational, special and higher educational institutions. These include the University of Guyana in Georgetown and two colleges of education.

Tourism

Guyana does little to encourage tourism despite the beautiful scenery in the interior of the country. Tours to the interior, including the famous Kaieteur falls (with a drop of 741 ft. or 226 metres) and the diamond fields at Kurupung on the Mazaruni river, may be arranged.

Public Holidays

1982: May 1st (Labour Day), July 3rd (Caribbean Day), August 7th (Freedom Day), December 25th, 26th (Christmas).

1983: January 1st (New Year's Day), February 23rd (Republic Day), April 1st (Good Friday), April 4th (Easter Monday).

In addition, the Muslim festivals of Eid-ul-Ahaz (October or November) and Youman Naubi (February) and the Hindu festivals of Deepavali (October) and Phagwah (March) are celebrated. These festivals are dependent on sightings of the moon and their precise dates are not known until two months before they take place.

Weights and Measures

Imperial weights and measures are used. The metric system is being introduced and will be in force by 1982.

Currency and Exchange Rates

100 cents = 1 Guyana dollar (\$G).

Exchange rates (December 1981):

£1 sterling = \$G5.77;

U.S. \$1 = \$G3.00.

Coins: 1, 5, 10, 25 and 50 cents.

Notes: 1, 5, 10 and 20 dollars.

Exchange rates (December 1981): £1 sterling = \$G5.77; U.S. \$1 = \$G3.00;

\$G100 = £17.33 = U.S. \$33.33.

Note: The Guyana dollar was introduced in November 1965, replacing (at par) the West Indian dollar. The prevailing exchange rate was £1 = 4.80 dollars and this remained in effect until August 1971. From November 1967 the rate was U.S. \$1 = \$G2.00 and this relationship was retained until June 1972, despite the devaluation of the U.S. dollar in December 1971, when the sterling exchange rate became £1 = \$G5.2114. When the British currency was "floated" in June 1972 the Guyana dollar's link with U.S. currency was severed and it "floated" (in line with sterling) until October 1975, when a new exchange rate of U.S. \$1 = \$G2.55 was established. This remained in effect until June 1981, when a new rate of U.S. \$1 = \$G3.00 was introduced. The average rates (Guyana dollars per U.S. dollar) were: 2.087 in 1972; 2.127 in 1973; 2.229 in 1974; 2.355 in 1975.

THE CONSTITUTION

(Promulgated October 6th, 1980)

Guyana is a sovereign democratic state, and became a republic within the Commonwealth on February 23rd, 1970.

The Constitution declares the Co-operative Republic of Guyana to be an indivisible, secular, democratic sovereign state in the course of transition from capitalism to socialism. The bases of the political, economic and social system are political and economic independence, involvement of citizens and socio-economic groups, such as co-operatives and trade unions, in the decision-making processes of the state and in management, social ownership of the means of production, national economic planning and co-operativism as the principle of socialist transformation. Personal property, inheritance, the right to work, with equal pay for men and women engaged in equal work, free medical attention, free education and social benefits for old age and disability are guaranteed. Individual political rights are subject to the principles of national sovereignty and democracy, and freedom of expression to the state's duty to ensure fairness and balance in the dissemination of information to the public. Relations with other countries are guided by respect for human rights, territorial integrity and non-intervention.

The President

The President is the supreme executive authority, head of state and Commander-in-Chief of the armed forces, elected for a term of office, usually of five years' duration, with no limit on re-election. The successful presidential candidate is the nominee of the party with the largest number of votes in the legislative elections. The President may prorogue or dissolve the National Assembly (in the case of dissolution, fresh elections must be held immediately) and has discretionary powers to postpone elections for up to one year at a time for up to five years. He may be removed from office on medical grounds, or for violation of the constitution (with a two-thirds majority vote of the Assembly), or for gross misconduct (with a three-

quarters majority vote of the Assembly if allegations are upheld by a tribunal).

The President appoints a First Vice-President and Prime Minister who must be an elected member of the National Assembly, and a Cabinet of Ministers, which includes non-elected members and is collectively responsible to the legislature. The President also appoints a Minority Leader, who is the elected member of the Assembly deemed by the President most able to command the support of the opposition.

The Legislature

The legislative body is a unicameral National Assembly of 65 members; 53 members are elected by universal adult suffrage in a system of proportional representation, 10 members are elected by the 10 regional democratic councils and two members are elected by the National Congress of Local Democratic Organs. The Assembly passes bills, which are then presented to the President, and may pass constitutional amendments.

Local Government

Guyana is divided into 10 regions, each having a regional democratic council elected for a term of up to five years and four months, although it may be prematurely dissolved by the President. Local councillors elect from among themselves deputies to the National Congress of Democratic Organs. This Congress and the National Assembly together form the Supreme Congress of the People of Guyana, a deliberative body which may be summoned, dissolved or prorogued by the President and is automatically dissolved along with the National Assembly.

Other provisions

Impartial commissions exist for the judiciary, the public service and the police service. An Ombudsman is appointed, after consultation between the President and the Minority Leader, to hold office for four years.

JUDICIAL SYSTEM

The Judicature of Guyana comprises the Supreme Court of Judicature, which consists of a Court of Appeal and a High Court (both of which are superior courts of record), and a number of Courts of Summary Jurisdiction.

The Court of Appeal consists of the Chancellor as President, the Chief Justice, and such number of Justices of Appeal as may be prescribed by Parliament. This Court came into operation in June 1966.

The High Court of the Supreme Court consists of the Chief Justice as President of the Court and Puisne Judges. Its jurisdiction is both original and appellate. It has criminal jurisdiction in matters brought before it on indictment. A person convicted by the Court has a right of appeal to the Guyana Court of Appeal. The High Court of the Supreme Court has unlimited jurisdiction in civil matters and exclusive jurisdiction in probate, divorce and admiralty and certain other matters. Under certain circumstances, appeal in civil matters lies either to the Full Court of the High Court of the Supreme Court, which is composed of not less than two judges, or to the Guyana Court of Appeal.

A magistrate has jurisdiction to determine claims where the amount involved does not exceed \$1,500. Appeal lies to the Full Court.

HAITI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Haiti occupies the west of the Caribbean island of Hispaniola (the Dominican Republic occupies the rest of the island) and some smaller off-shore islands. Cuba, to the west, is less than 80 km. away. The climate is tropical but the mountains and fresh sea winds mitigate the heat. Temperatures vary little with the seasons, the average in Port-au-Prince being about 27°C (80°F). May to November is the rainy season. The official language is French but a Creole dialect is generally spoken. Roman Catholicism is the official religion, and voodoo is the folk religion. The national flag (proportions 2 by 1) has equal vertical bands of black and red, with a white rectangular panel, containing the coat of arms, in the centre. The capital is Port-au-Prince.

Recent History

A military coup in 1950 led to the present Constitution. There were further risings in 1956 and 1957, when Dr. François Duvalier was elected President. In May 1963 Dr. Duvalier's term of office was extended for a further six years, but in 1964 his tenure was changed to life Presidency. The Duvalier regime maintained its authority by means of a notorious private army, known as the Tonton Macoute (later renamed National Security Volunteers), which used extortion and intimidation to crush all opposition. There were several attempted coups.

In January 1971 the President's son Jean-Claude was designated his successor. This was subsequently ratified by referendum and, on his father's death in April, Jean-Claude Duvalier became President for life, since when a number of political prisoners have been released. President Jean-Claude Duvalier has been opposed by conservative elements led by his mother, Simone Duvalier. Elections held in February 1979 for the National Assembly produced disputed results and allegations of ballot rigging by the Government. The rearrest of Sylvio Claude, the leader of the Christian Democratic party, in October 1980 for alleged subversion was followed in December by over 300 arrests among the opposition. Detainees included Grégoire Eugène, the president of the Christian Democratic Party of June 27, the secretary of the Haitian Human Rights League, journalists and broadcasters. Eugène and nineteen others were expelled in December. Sylvio Claude, his daughter and 24 others were tried and sentenced to 15 years hard labour in August 1981.

In 1981 there was evidence of a power struggle between the President's mother and his new wife, who is seen to represent the mulatto business elite. In March and April the President had several relations and friends of his mother deported, and expelled the head of the secret police, and the title of First Lady was officially transferred from Simone Duvalier to Michelle Duvalier. Under an agreement between the Haitian and U.S. Governments aimed at halting the flood of illegal Haitian immigrants into southern Florida (an estimated 20,000 made the crossing in 1980), which was continuing in 1981 at the rate of around 4,000 per month, a U.S. coastguard cutter began patrolling the Windward passage in October to intercept boats carrying refugees and return them to Haiti. In January

1982 a much-publicized invasion attempt organized by an expatriate Haitian businessman Bernard Sansaricq, was rapidly crushed. Government forces dispersed a small group of dissidents who had seized a military outpost on Ile de la Tortue, killing five, and a boat carrying Sansaricq himself and a force of 26 was intercepted by the U.S. patrol vessel on its way to the mainland.

Relations with other countries, which deteriorated seriously under the elder Duvalier, have improved considerably since 1971, leading to a marked increase in foreign aid. Haiti is a member of the OAS.

Government

The President has absolute power, holds office for life and may nominate his successor. He governs with the assistance of an appointed Council of Secretaries of State. The unicameral legislative chamber has 58 members elected for six years by universal adult suffrage. There are nine *Départements*.

Defence

In July 1981 Haiti had a defence force with a total strength of about 7,500, including two companies of commando-type troops known as the *Léopards*. The army of about 7,000 men serves also as a gendarmerie. The navy has about 300 men, and the air force about 200. There is also a militia, the National Security Volunteers of some 7,000 men, and para-military forces total 14,900. In the 1981/82 budget U.S. \$22 million was allocated to defence.

Economic Affairs

Haiti is a predominantly agricultural country, with over 60 per cent of the working population on the land. Coffee, Haiti's principal export, has suffered from poor yields in recent years. Efforts to increase agricultural productivity through the improvement of power, transportation and irrigation are hindered by deforestation and soil erosion. Coffee accounts for about 40 per cent of Haiti's export earnings, followed by light industrial products, bauxite, essential oils and cocoa. The destruction of more than half the coffee crop by Hurricane Allen in 1980, coinciding with falling world prices, led to a decline of 61 per cent in export earnings between September 1980 and September 1981. Processing industries include the assembly of sophisticated electronic equipment. Tourism and the construction industry are also principal areas of growth. Trade is largely with the U.S.A., although the EEC is now a significant trading partner. As the poorest country in Latin America, Haiti is a major beneficiary of international aid organizations and up to 75 per cent of its budget is financed by foreign donors. In 1981 disbursement of aid was increasingly accompanied by demands for an end to administrative corruption; the U.S.A. cut its large aid programme and made further aid conditional on the satisfactory use of previous finance. Food aid is constantly supplied by the FAO, and some "food for work" schemes have been introduced. A U.S. \$20 million loan from the IMF to cover loss of earnings from coffee exports relieved a chronic shortage of foreign exchange in early 1982.

HAITI

Introductory Survey, Statistical Survey

Transport and Communications

An all-weather road from Port-au-Prince to Cap Haïtien on the northern coast has been completed with finance from the World Bank. Another major road, connecting Port-au-Prince with Jacmel, has been built and financed by France. Haiti has also received a \$15 million credit from the IDA for the reconstruction and upgrading of roads, the rebuilding of two major bridges and the development of port facilities at Port-au-Prince and two other ports. The only railway is run by the Haitian American Sugar Company. There are regular freight services to the U.S.A., Caribbean ports, Latin America, the Far East and Europe. An internal air service, Haiti Air Inter, is managed by Turks and Caicos Airways, and foreign lines provide international services.

Social Welfare

Industrial and commercial workers are provided with free health care.

Education

Education is free and is provided by the State, the Roman Catholic Church and missionary churches in nursery schools, elementary schools, secondary schools, including 21 lycées, and the State University. In 1978/79 the budget allocation for education was 47.4 million gourdes. Education is compulsory between the ages of 6 and 12 years, but a large majority of children do not attend school owing to lack of facilities and staff. Basic adult education in Creole dialect is being undertaken in rural areas, where 85 per cent of the peasants are illiterate.

Tourism

Haiti's bays, beaches, mountains, folklore and primitive art are of interest to tourists. Another attraction is the magnificent 150-year-old citadel and palace of King Henry Christophe. Tourism is Haiti's second largest source of foreign exchange. Most tourists are from the U.S.A.

Public Holidays

1982: May 1st (Labour Day), May 18th (Flag Day), May 20th (Ascension Day), May 22nd (National Sovereignty), June 10th (Corpus Christi), June 14th (Holy Trinity, half day), June 22nd (President's Day), August 15th (Assumption Day), October 17th (Death of Jean Jacques Dessalines), November 1st (All Saints' Day), November 2nd (All Souls' Day, half day), November 18th (Army Day), December 5th (Discovery Day), December 25th (Christmas Day).

1983: January 1st (National Day), January 2nd (Heroes of Independence), February 14th (half day) and February 15th (Shrove Tuesday), April 1st-4th (Easter).

Weights and Measures

Officially the metric system is in force but many United States measures are also used.

Currency and Exchange Rates

100 centimes = 1 gourde.

Exchange rates (December 1981):

£1 sterling = 9.62 gourdes;

U.S. \$1 = 5.00 gourdes.

Coins: 5, 10, 20 and 50 centimes.

Notes: 1, 2, 5, 10, 50, 100, 250 and 500 gourdes (U.S. currency notes also circulate).

Exchange rates (December 1981): £1 sterling=9.62 gourdes; U.S. \$1=5.00 gourdes;

100 gourdes=£10.40=\$20.00.

Note: The exchange rate is fixed at U.S. \$1=5.00 gourdes (1 gourde=20 U.S. cents) and this has remained in effect despite two devaluations of the U.S. dollar, in December 1971 and February 1973. The gourde's relationship to sterling is based on the pound-dollar rate. The central exchange rate was £1=12.00 gourdes from November 1967 to August 1971 and £1=13.0286 gourdes from December 1971 to June 1972.

HONDURAS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Honduras lies in the middle of the Central American isthmus. It has a long northern coastline on the Caribbean and a narrow southern outlet to the Pacific. Its neighbours are Guatemala to the west, El Salvador to the south-west and Nicaragua to the south-east. The climate ranges from temperate in the mountainous regions to tropical in the lowlands. The rainy season is from May to November. The national language is Spanish. Roman Catholicism is the predominant faith. The national flag (proportions 3 by 2) has three horizontal stripes of blue, white and blue, with five blue stars, arranged in a diagonal cross, in the centre of the white band. The capital is Tegucigalpa, D.C.

Recent History

Honduras was ruled by Spain from the sixteenth century until independence in 1821, when the Federation of Central America was formed. Honduras emerged as an independent state in 1838. Between 1939 and 1949 the country was ruled as a dictatorship by Gen. Tiburcio Carías Andino, leader of the Partido Nacional (PN). He was succeeded by Juan Manuel Gálvez. In 1954 the leader of the Partido Liberal de Honduras (PLH), Dr. José Ramón Villeda Morales, was elected President but was immediately deposed by Julio Lozano Díaz, himself overthrown by a military junta in 1956. The junta organized the elections in 1957, in which the PLH secured a majority in Congress and Dr. Villeda Morales was re-elected President for a six-year term. He was overthrown in 1963 by Col. (later Brig.-Gen.) Oswaldo López Arellano, Commander-in-Chief of the Army, who, following elections held on the basis of a new constitution, was appointed President in June 1965.

Presidential elections took place in 1971, in which Ramón Ernesto Cruz Uclés, the PN candidate, was elected, but popular discontent over government austerity measures and delayed land reforms culminated in a bloodless coup led by the former President, Gen. López Arellano, in December 1972. A group of young army officers, in favour of social reform, took control of the Supreme Council of the Armed Forces and in March 1974 replaced President López Arellano as Commander-in-Chief of the Army with Col. Juan Melgar Castro. The President's position was weakened by his apparent inability to cope with the reconstruction of the country after hurricane damage in 1974, and he was replaced by Col. (later Gen.) Melgar Castro in April 1975. In 1976 President Melgar Castro postponed the 1977 elections until 1979. The President was forced to resign by the Supreme Council of the Armed Forces in August 1978 and was replaced by a military junta comprising the commanders-in-chief of the army, air force and national police. Gen. Policarpo Paz García assumed the role of Head of State and the junta promised that elections would be held.

Military rule was ended officially when, in April 1980, elections to a Constituent Assembly were held. The PLH won 52 per cent of the vote but was unable to assume power. General Paz was appointed interim President for

one year and, as the armed forces were allowed to nominate four members of the coalition Cabinet, the PLH was in a minority. Hoping to extend his term of office, Gen. Paz attempted to postpone the elections scheduled for November 1981, but his hopes were destroyed when his Finance Minister, Valentín Mendoza, was involved in a land deal scandal. Elections were duly held, resulting in victory for the PLH, led by Dr. Roberto Suazo Córdova, who obtained 54 per cent of the vote.

Relations with El Salvador and Nicaragua have been strained by armed border incidents and the influx of refugees, following the overthrow of Presidents Romero and Somoza in 1979. In January 1981 a national commission was set up to deal with the problem of the estimated 30,000 refugees in Honduras. As a protest against the Government's granting asylum to some 5,000 former Nicaraguan National Guards, a bomb was set off in the National Assembly building in Tegucigalpa by supporters of the left-wing regime in Nicaragua. Honduras, traditionally regarded as one of the more stable countries of Central America, has had to turn to the U.S.A. for military aid to bolster its border security, which in turn has provoked further attacks by rebel factions.

Government

Honduras was under military rule from December 1972 until the elections of April 1980. The 1965 Constitution was revised by the Constituent Assembly, prior to the elections of November 1981: the party winning most votes appoints the President, usually the party leader. The President holds executive power and has a four-year mandate. Legislative power rests with the 82-member National Assembly, elected by popular vote for a term of four years.

Defence

Military service is by conscription. Active service lasts eight months, with subsequent reserve training. In July 1981 the armed forces totalled 11,200, of whom 10,000 were in the army, 200 in the navy and 1,000 in the air force. Para-military forces numbered 3,000 men. Defence expenditure in 1980 was 90.4 million lempiras.

Economic Affairs

Agriculture is the prime sector of the economy and accounted for 31 per cent of the G.D.P. in 1980. Bananas, coffee, timber and meat account for 70 per cent of all export earnings. Coffee became the leading export earner in 1975, after Hurricane Fifi destroyed 75 per cent of the 1974 banana crop. However, because of increased demand, banana sales rose by 41 per cent in 1979 and the crop resumed its traditional position as leading export. The coffee, banana and cotton crops were expected to rise annually by 11, 5 and 15.4 per cent respectively in the period 1980-83. All exported bananas are sold to U.S. companies as there is no national marketing organization.

Forests cover nearly 45 per cent of the land area and wood is the fourth largest export. A U.S. \$600 million forestry project at Olancho, involving the construction of three sawmills and a pulp and paper plant, should greatly

increase lumber exports by 1983. The project was adversely affected by fires in 1980, which destroyed a total of 44,000 hectares of woodland throughout the country. Silver, gold, lead and zinc are mined, and there are also deposits of copper and low-grade iron ore.

Although industry is still a small part of the economy, the sector grew by 20 per cent in 1979, with development mainly in the San Pedro Sula area. In 1975 a free trade zone was established at Puerto Cortés in an attempt to stimulate industry. Honduras became a member of the Central American Common Market (CACM) on its formation in 1960. Hurricane damage to crops and industries on the north coast in 1974 was estimated at U.S. \$900 million. In January 1975 a new agrarian reform law was passed, aiming at the distribution of 600,000 hectares of land to 100,000 families by 1980. However, only about one-third of the land had actually been expropriated, and still less redistributed, by 1979. This has provoked a campaign of protests, invasions and land occupations co-ordinated by the militant alliance of peasant unions, FUNACAMH.

Improvement in the economy after 1975 was the result of increased agricultural production, and in particular a temporary rise in the value of coffee exports. In June 1979 the IMF approved a three-year extended arrangement with Honduras, authorizing purchases of up to SDR 47.6 million and the economy continued to grow, although at a slower rate than in the previous three years.

In 1980, however, the G.D.P. growth rate fell to only 2 per cent as a result of events in neighbouring countries, lower world coffee prices and the rise in petroleum prices. The overall surplus in the balance of payments became a deficit (of U.S. \$81 million) for the first time in six years. The cost of living rose by 19.9 per cent in 1980, compared with only 8.8 per cent in 1979. The Government launched an austerity plan for 1981-82 in an attempt to reduce the public sector deficit and stabilize the balance of payments. A 10 per cent import tax was introduced, tax administration tightened up, and in October 1981 currency controls were imposed.

The 1976-81 Development Plan has helped to improve transport, communications and electricity supplies. The most important project included in the Plan was the construction of the 300 MW hydroelectric complex at El Cajón. About a third of the \$1,000 million invested in the Development Plan was allocated to agriculture and forestry, including the Olancho forest industries project, and the extensive land reform programme.

Transport and Communications

In 1981 there were 1,268 km. of railways, located entirely in the north and used mainly to carry bananas, wood and grains to the ports. Many areas are accessible only by air but the road network has been greatly improved in recent years. In 1981 the road network measured 8,695 km., including 1,674 km. of paved roads. An IDB loan of

U.S. \$25.2 million was negotiated in 1980 to reconstruct the Tela-La Ceiba road, damaged by floods in 1979, and to provide secondary roads for the Olancho pulp and paper enterprise. There are three international airports serving Tegucigalpa, La Ceiba and San Pedro Sula. In 1979 the port at San Lorenzo was opened, and the port at Puerto Castilla, to serve the Olancho forestry project, was completed in 1980.

Social Welfare

There is a state social security system in operation; it provides benefits for sickness, maternity, orphans, unemployment, accidents, and also family and old-age allowances. A Labour Code affords guarantees for employees. In 1979 Honduras had 43 hospitals and 449 rural health centres. There was a total of 4,893 hospital beds available.

Education

Education is free and compulsory from 7 to 12 years of age. Estimated enrolment in 1979 was 80 per cent at primary schools but only 25 per cent at secondary schools. On completion of the first period of compulsory education, every adult must teach at least two illiterate adults to read and write. In 1979 there were 5,748 primary schools and 242 secondary and technical schools. There is an autonomous national university in Tegucigalpa and private universities were opened in San Pedro Sula and Tegucigalpa in 1978. In 1979 the illiteracy rate was 47.5 per cent.

Tourism

The ruins of Copán, second largest city of the old Mayan Empire, attract tourists and archaeologists. Lake Yojoa, near San Pedro Sula, and Trujillo Bay provide fishing and boating, and there is bathing on the Bay Islands and along the beaches of the Northern coast. A number of new hotels, forming part of the 50 million lempira tourist complex in the San Pedro Sula-Tela area, were completed in 1981.

Public Holidays

1982: May 1st (Labour Day), September 15th (Independence Day), October 3rd (Morazán Day), October 12th (Discovery Day), October 21st (Army Day), December 25th (Christmas).

1983: January 1st (New Year's Day), March 31st-April 2nd (Easter), April 14th (Pan American Day).

Weights and Measures

The metric system is in force, although some old Spanish measures are used, including: 25 libras = 1 arroba; 4 arrobas = 1 quintal (46 kg.).

Currency and Exchange Rates

100 centavos = 1 lempira.

Exchange rates (December 1981):

£1 sterling = 3.85 lempiras;

U.S. \$1 = 2.00 lempiras.

THE CONSTITUTION

Note: Following the elections of April 1980, the Constitution is being revised.

A Constitution was passed by the Constituent National Assembly on June 5th, 1965.

The following are some of its main points:

Honduras is constituted as a democratic Republic. All Hondurans over the age of 18 are citizens.

The Suffrage and Political Parties: The vote is direct and secret. Any political party which proclaims or practises doctrines contrary to the democratic spirit is forbidden. A National Electoral Council will be set up at the end of each Presidential term. Its general function will be to supervise all elections and to register political parties. A proportional system of voting will be adopted for the election of Municipal Corporations.

Individual Rights and Guarantees: The right to life is declared inviolable; the death penalty is abolished. The Constitution recognizes the right of *habeas corpus* and arrests may be made only by judicial order. Remand for interrogation may not last for more than six days, and no-one may be held *incomunicado* for more than twenty-four hours. The Constitution recognizes the rights of free expression of thought and opinion, the free circulation of information, of peaceful, unarmed association, of free movement within and out of the country, of political asylum and of religious and educational freedom. Civil marriage and divorce are recognized.

Workers' Welfare: All have a right to work. Day work shall not exceed eight hours a day or forty-four hours a week; night work shall not exceed six hours a night or thirty-six hours a week. Equal pay shall be given for equal work. The legality of trades unions and the right to strike are recognized.

Education: The State is responsible for education, which shall be free, lay, and, in the primary stage, compulsory. Private education is liable to State inspection and regulation.

Legislative Power: Deputies are obliged to vote, for or against, on any measure at the discussion of which they are

* Following the constitutional revision of 1981, the President is appointed for a four-year term by the political party gaining the most votes in the legislative elections.

present. Congress has power to grant amnesties to political prisoners; approve or disapprove of the actions of the Executive; declare part or the whole of the Republic subject to a state of siege; declare war; approve or withhold approval of treaties; withhold approval of the accounts of public expenditure when these exceed the sums fixed in the Budget; decree, interpret, repeal and amend laws, and pass legislation fixing the rate of exchange or stabilizing the national currency. Congress may suspend certain guarantees in all or part of the Republic for sixty days in case of grave danger from civil or foreign war, epidemics or any other calamity. Deputies are elected in the proportion of one deputy and one substitute for every 30,000 inhabitants, or fraction over 15,000. Congress may amend the basis in the light of increasing population.

Executive Power: The Executive Power is exercised by the President of the Republic, who is elected for six years, by a simple majority of the people.* No President may serve two terms in succession

Judicial Power: The Judiciary consists of the Supreme Court, the Courts of Appeal and various lesser tribunals. The seven judges and five substitute judges of the Supreme Court are elected by Congress for a period of six years. The Supreme Court can declare laws unconstitutional, and can censure the misconduct of ministers or officials when Congress has declared there is a case to answer.

The Armed Forces: The armed forces are declared by the Constitution to be essentially professional and non-political. The President exercises his power through a Commander-in-Chief who is designated for a period of six years by Congress, which alone, by a two-thirds majority, may dismiss him. Military service is obligatory.

Local Administration: The country is divided into eighteen departments for purposes of local administration, and these are subdivided into autonomous municipalities; the functions of local offices shall be only economic and administrative.

INDIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Union of India forms a natural sub-continent with the Himalayas to the north and is flanked by the Arabian Sea and the Bay of Bengal. Its neighbours are Xizang (Tibet), Bhutan and Nepal to the north, Pakistan to the north-west and Burma to the north-east. Bangladesh is surrounded by Indian territory except for a short frontier with Burma in the east. The climate ranges from temperate to tropical with an average summer temperature over the plains of approximately 27°C (85°F). There are heavy monsoons in June and July and rainfall varies widely. The official language is Hindi, and English is used as an associate language for many official purposes. Sixteen regional languages are also recognized in the Constitution, and many others are widely spoken. According to the 1971 census, about 83 per cent of the population are Hindu and 11 per cent Muslim. There are also Christians, Sikhs, Buddhists, Jains and other minorities. The national flag (proportions 3 by 2) consists of horizontal stripes of saffron, white and green with the Dharma Chakra (Wheel of the Law) in blue on the white stripe. The capital is New Delhi.

Recent History

India became independent on August 15th, 1947, when Britain's Indian Empire was partitioned on broad religious lines between India and Pakistan. The principal nationalist movement opposing British rule was the Indian National Congress (later known as the Congress Party). At independence the Congress leader, Jawaharlal Nehru, became India's first Prime Minister. Sectarian violence, the movement of 12 million refugees, the integration of the former princely states into the Indian federal structure and a dispute with Pakistan over Kashmir presented major problems. The republican constitution was adopted in January 1950, although India remained a member of the Commonwealth.

Nehru established the dominance of the Congress Party. The lack of effective opposition aided the process of social reform and industrialization, but India's occupation of Goa in 1961 and the Chinese attack of 1962 damaged Nehru's prestige. He died in 1964 and in 1966 his successor, Lal Bahadur Shastri, concluded an agreement with Pakistan aimed at a peaceful settlement of the Kashmir dispute. He died the next day, however, and Nehru's daughter, Mrs. Indira Gandhi, formerly Minister of Information and Broadcasting, became Prime Minister.

In the 1967 general elections the Congress Party's majority was reduced and after the Presidential elections of August 1969, when two wings of Congress supported different candidates, the success of Mrs. Gandhi's candidate split the party. The Organization (Opposition) Congress, led by Morarji Desai, a former Deputy Prime Minister, was formed in November 1969. At the general elections in early 1971, however, Mrs. Gandhi's wing of Congress gained an overall majority in the Lok Sabha.

Border incidents in 1971 led to a 12-day war with Pakistan. The Indian army rapidly occupied East Pakistan,

which India recognized as the independent state of Bangladesh. In 1972 India and Pakistan agreed on their ceasefire line in Kashmir. In 1975 the inclusion of Sikkim in the Indian Union soured relations with Nepal.

In 1975 Mrs. Gandhi was found guilty of electoral malpractice in the 1971 elections and was barred from holding elective office for six years. She then declared a state of emergency, and arrested over 900 political opponents. In November the Supreme Court cleared her of electoral malpractice. The general elections in March 1977 resulted in victory for the Janata (People's) Party chaired by Morarji Desai, who became Prime Minister.

In January 1978 Mrs. Gandhi became leader of a new political group, Congress (I). The interim reports of the commission of inquiry investigating the alleged excesses of her regime found her guilty of corruption. In June Charan Singh, the Home Minister, and Raj Narain, the Health Minister, were dismissed for their criticism of Desai's Government. In November Mrs. Gandhi was elected to the Lok Sabha, but the House found her guilty of breach of privilege during the emergency rule, and she was expelled from the Lok Sabha.

In January 1979 Singh returned to the Cabinet as Finance Minister and Desai's deputy. The Government's inability to handle the worsening domestic situation provoked a wave of defections by Lok Sabha members of the Janata party. Many joined Narain, who formed the Lok Dal party based on secularism. Congress (I) lost its position as official opposition party after defections from its ranks to the then official Congress party by members protesting at Mrs. Gandhi's authoritarianism. The resignation of Desai's Government was followed by the resignation from the party of Singh, who became the leader of the Lok Dal party and, shortly afterwards, Prime Minister in a coalition with both Congress parties. When Congress (I) withdrew its support in August, Singh's 24-day Government fell, Parliament was dissolved, and at the mid-term poll in January 1980 Congress (I) gained an overall majority in the Lok Sabha. Mrs. Gandhi was reinstated as Prime Minister. Presidential rule was imposed in nine states ruled by opposition parties in February and, in elections for these in June, Congress (I) gained majorities in eight of the nine states.

Mrs. Gandhi's Government faced serious problems as disturbances in several states, particularly in Assam, continued into 1980 and 1981 with violent protests against the presence of Bengali immigrants. Alleged police corruption and the resurgence of caste violence (notably in Bihar and Gujarat) placed added burdens on the Government. In December 1980 a new law, legalizing preventative detention without trial, and another in July 1981, banning strikes in essential services, provoked an angry reaction from the opposition and the unions.

By-elections held in June 1981 for six seats in the Lok Sabha and 23 seats in State assemblies were notable owing to the landslide victory obtained by Rajiv Gandhi in his late brother Sanjay's former constituency and the

failure of the fragmented Janata party to win any seats. In January 1982 Mrs. Gandhi reshuffled the Council of Ministers, appointing a new Defence Minister, a portfolio that she had previously held.

The Janata Government had embarked on a policy of improving relations with all neighbouring countries. In 1977 India signed an agreement with Bangladesh over the sharing of the Ganges waters, but disputes continued. In 1981 the disputed ownership of a new island in the Bay of Bengal caused further problems. During 1980 and 1981 relations with Pakistan deteriorated owing to Pakistan's prospect of nuclear capability and major U.S. arms deliveries to that country. India felt that such deliveries would upset the balance of power in the sub-continent and precipitate an arms race. During 1981 there was a marked improvement in Indo-Chinese relations, which had suffered a setback after India's recognition of the Heng Samrin Government of Kampuchea in July 1980. Both countries agreed to find an early solution to their border dispute and to seek to normalize relations.

The U.S.S.R. is a major contributor of economic and military assistance to India. In 1973 a 15-year accord was concluded between the two countries and in 1981 India became the U.S.S.R.'s leading trade partner in the developing world. While there are close ties between the U.S.A. and India in economic and scientific affairs, little advance has been made in strengthening political co-operation between the two countries, partly because of disagreements over the supply of nuclear fuel to India's Tarapur atomic reactor and India's refusal to sign a nuclear non-proliferation treaty.

Government

India is a federal republic. Legislative power is vested in Parliament, consisting of the President and two Houses. The Council of States (*Rajya Sabha*) has 244 members, including 236 indirectly elected by the State Assemblies for six years (one-third retiring every two years) and 8 nominated by the President for six years. The House of the People (*Lok Sabha*) has 544 members elected by universal adult suffrage for five years (subject to dissolution). The President is a constitutional Head of State elected for five years by an electoral college comprising elected members of both Houses of Parliament and the State legislatures. He exercises executive power on the advice of the Council of Ministers, which is responsible to Parliament. The President appoints the Prime Minister and, on the latter's recommendation, other Ministers.

India contains 22 self-governing States, each with a Governor, appointed by the President for five years, a legislature elected for five years and a Council of Ministers headed by the Chief Minister. Andhra Pradesh, Bihar, Jammu and Kashmir, Maharashtra, Karnataka, Tamil Nadu and Uttar Pradesh have bicameral legislatures, the other 15 State legislatures being unicameral. Each state has its own legislative, executive and judicial machinery corresponding to that of the Union. In the event of the failure of constitutional government in a State, Presidential rule can be imposed by the Union. There are also nine Union Territories, administered by Chief Commissioners, Lieutenant-Governors or Administrators appointed by the President.

Defence

In July 1981 India had armed forces of 1,104,000: an army of 944,000, a navy of 47,000 and an air force of 113,000. Military service has been voluntary, but under the amended Constitution it is the fundamental duty of every citizen to do national service when called upon. Net defence expenditure for 1981/82 was estimated at 42,000 million rupees.

Economic Affairs

Some 65 per cent of the working population is employed in agriculture, which accounts for almost half the national income. The major part of the sown area is taken up by cereals, the staple crops. Extensive plantations produce tea, rubber and coffee, while cotton, jute, sugar, oilseeds, tobacco and other cash crops are also grown. Crops are frequently damaged by drought and floods. Since 1975/76 improved irrigation, the increased use of chemical fertilizers and the introduction of high-yield strains of rice and wheat, as well as favourable monsoons, have led to record harvests. India's harvest of food grains in 1978/79 totalled 130.5 million metric tons but, after a severe drought in 1979, food grain output fell to 117 million metric tons in 1979/80. In 1981, despite a record harvest of 132 million metric tons, the Government took the unprecedented step of purchasing 1.5 million tons of wheat from the U.S.A. to rebuild grain stocks that had been heavily drawn upon owing to the 1979 drought.

India has the fourth largest coal reserves in the world, and large reserves of iron ore in Bihar and Orissa, as well as bauxite, titanium ore, manganese, rare metals and mica. Less than half of the annual crude oil consumption of 28 million metric tons is produced locally; inshore deposits of petroleum have been found in Assam, Gujarat and Nagaland, and off-shore oilfields have been discovered in the Western continental shelf off the Maharashtra coast, in the Cauvery Basin and in the Bay of Bengal. In 1980 it was announced that foreign companies would be allowed to search for petroleum both on and off shore and India plans to double its oil refining capacity by 1985. Production at the Bassei off-shore gas field (one of the largest in the world) is expected to begin in 1983.

India ranks among the first ten industrial nations in the world and yet manufacturing employs only one in ten of the country's workers. New industries, such as heavy engineering, iron and steel, chemicals and electronics, have expanded rapidly and by 1978 engineering goods had superseded tea or jute as India's largest single earner of foreign currency. Annual growth in industrial production reached a peak of 10.6 per cent in 1976/77 but, although growth in 1978/79 was only 2 per cent below this, in 1979/80 it fell by 1.4 per cent, due to falls in both agricultural and industrial output caused by the drought and a shortage of power and coal. The position improved slightly in 1980/81 and overall industrial growth was estimated at 4.1 per cent. Various measures have been introduced to try to improve both power generation and industrial relations, the two main hindrances to increased production.

G.N.P. rose by 6.5 per cent in 1980/81 after a decline of 4.5 per cent in 1979/80 and inflation reached an estimated 15 per cent (compared to 23 per cent in 1979/80). In 1980/81 the trade gap widened alarmingly to over Rs. 54,000 million owing to the rising cost of imports,

which showed an estimated 40 per cent increase over 1979/80. Foreign exchange reserves fell (as in 1979/80 when they fell for the first time in five years), showing that exports and invisible earnings could no longer compensate for the steep price rises in imported petroleum products. India turned increasingly to foreign aid and in 1981 the IMF sanctioned a U.S. \$5,760 million loan, the largest single borrowing by India, to help overcome balance of payments difficulties and to try to restructure the economy.

In 1981 the delayed sixth Five-Year Plan (1980-85) was finally announced. It allows for a total investment of Rs. 1,587,000 million (double that of the fifth Plan) and aims at an average annual growth rate of 5.2 per cent. The main emphasis is on the creation of jobs by improving agriculture and encouraging labour-intensive small-scale industrial units and there are to be some budgetary liberalizations and relaxation towards foreign investment. In July 1980, long-standing restrictions on the expansion of private sector companies were eased in a bid to accelerate the modernization of industry and to stimulate manufactured exports.

Transport and Communications

There are about 60,933 km. of railway track and some 16,180 km. of rivers are navigable by power-driven craft and 3,631 km. by large country boats. There are over 1.6 million km. of road, including about 30,000 km. of national and 94,100 km. of state highways connecting the main towns. The Indian Airlines Corporation provides internal air transport and also serves India's immediate neighbours. Air India provides international services. Their subsidiary, Vayudoot Private Ltd., provides air links to smaller towns in north-eastern India.

Social Welfare

Health programmes are primarily the responsibility of the State Governments, but the Union Government provides finance for improvements in public health services. The structure of the health system is based on the primary health centres, of which there were 5,372 and 37,745 sub-centres in rural areas in 1977. The doctor/population ratio, which was 1 : 5,150 in 1968, improved to 1 : 2,915 in 1976. Various national health programmes exist to combat leprosy, malaria and tuberculosis; smallpox was declared eradicated in 1977. The family planning programme was launched in 1952 and under the sixth Five-Year Plan has been allocated Rs. 10,000m. The emphasis now is on advice and education through Family Welfare Centres.

Education

Education is primarily the responsibility of the individual State Governments. Elementary education to the age of 14 is theoretically compulsory in all States except Nagaland and Himachal Pradesh. Lower primary education for the age group 6-11 is free in all the States. Upper

primary education for children aged 11-14 is free in 12 States. In 1978 90 per cent of the 6-11 age group were enrolled. A new pattern of education, consisting of 10 years' elementary education, two years at higher secondary level and three years for the first degree course, was planned to be introduced in all the States by 1980. The Sixth Plan aims for universal free and compulsory education to age 14 by 1983. A National Board for Adult Education has been set up and in 1978 launched a massive programme to combat illiteracy. At the 1981 census only 36.17 per cent of the population were literate. In 1981 female literacy was only 24.88 per cent and women's education, especially in rural areas, has made few advances.

Tourism

The tourist attractions of India include its scenery, its forts, palaces and temples and its rich variety of wild life. Tourist infrastructure has recently been expanded by the provision of more luxury hotels and means of transport. In 1980 there were 800,150 foreign visitors to India.

Public Holidays

The public holidays observed in India vary locally. The dates given below apply to Delhi. As religious feasts depend on astronomical observations, holidays are usually declared at the beginning of the year in which they are to fall. It is not possible, therefore, to indicate more than the month in which some of the following holidays will fall.

1982: June 23rd (Rath Yatra), July 23rd (Id ul Fitr, end of Ramadan), August 12th (Janmashtami), August 15th (Independence Day), September 1st (Onam), September 24th-26th (Durga Puja-Dussehra), September 28th (Id-uz-Zuha), October 2nd (Mahatma Gandhi's Birthday), October 16th (Diwali), October 28th (Muharram), November 1st (Guru Nanak Jayanti), December 25th-26th (Christmas).

1983: January (Pongal), January 26th (Republic Day), February (Maha Shivratri), March (Holi), April (Ram Navami, Mahabir Jayanti and Good Friday), May (Buddha Purnima).

Weights and Measures

The metric system has been introduced although both imperial and traditional Indian weights and measures continue in use:

1 tola = 11.66 grammes
 1 seer = 933.1 grammes
 1 maund = 37.32 kg.
 1 lakh = (1,00,000) = 100,000
 1 crore = (1,00,00,000) = 10,000,000

Currency and Exchange Rates

100 paise = 1 Indian rupee.

Exchange rates (December 1981):
 £1 sterling = 17.65 rupees;
 U.S. \$1 = 9.81 rupees.

FINANCE

100 paise (singular, paise) = 1 Indian rupee.

Coins: 1, 2, 3, 5, 10, 20, 25 and 50 paise; 1, 10 and 50 rupees.

Notes: 1, 2, 5, 10, 20, 50 and 100 rupees.

Exchange rates (December 1981): £1 sterling = 17.65 rupees; U.S. \$1 = 9.18 rupees;

100 Indian rupees = £5.67 = \$10.90.

Note: Between September 1949 and June 1966 the Indian rupee had a par value of 21 U.S. cents (U.S. \$1 = 4.7619 rupees). From June 1966 to December 1971 the exchange rate was \$1 = 7.50 rupees (1 rupee = 13.33 U.S. cents). In terms of sterling the rate between November 1967 and August 1971 was £1 = 18.00 rupees. In December 1971 a new central exchange rate of £1 = 18.9677 rupees was established. Until the "floating" of the pound in June 1972 this was equivalent to a rate of U.S. \$1 = 7.279 rupees. Until September 1975 the Indian authorities maintained the exchange rate against sterling, thus allowing the rupee to "float" in relation to other currencies. Since September 1975 the rupee has been pegged to a "basket" of currencies of India's principal trading partners. The average market rates (rupees per U.S. dollar) were: 7.594 in 1972; 7.742 in 1973; 8.102 in 1974; 8.376 in 1975; 8.960 in 1976; 8.739 in 1977; 8.193 in 1978; 8.126 in 1979; 7.863 in 1980.

THE CONSTITUTION

The Constitution of India, adopted by the Constituent Assembly on November 26th, 1949, was inaugurated on January 26th, 1950. The Preamble declares that the People of India solemnly resolve to constitute a Sovereign Democratic Republic and to secure to all its citizens justice, liberty, equality and fraternity. There are 397 articles and 9 schedules, which form a comprehensive document.

Union of States. The Union of India comprises 22 states and 9 Union Territories. There are provisions for the formation and admission of new states.

The Constitution confers citizenship on a threefold basis of birth, descent, and residence. Provisions are made for refugees who have migrated from Pakistan and for persons of Indian origin residing abroad.

Fundamental Rights and Directive Principles. The rights of the citizen contained in Part III of the Constitution are declared fundamental and enforceable in law. "Untouchability" is abolished and its practice in any form is a punishable offence. The Directive Principles of State Policy provide a code intended to ensure promotion of the economic, social and educational welfare of the State in future legislation.

The President is the head of the Union, exercising all executive powers on the advice of the Council of Ministers responsible to Parliament. He is elected by an electoral college consisting of elected members of both Houses of Parliament and the Legislatures of the States. The President holds office for a term of five years and is eligible for re-election. He may be impeached for violation of the Constitution. The Vice-President is the *ex officio* Chairman of the Rajya Sabha and is elected by a joint sitting of both Houses of Parliament.

The Parliament of the Union consists of the President and two Houses: the Rajya Sabha (Council of States) and the Lok Sabha (House of the People). The Rajya Sabha consists of 244 members, of whom 8 are nominated by the President. One-third of its members retire every two years. Elections are indirect, each state's legislative quota being elected by the members of the state's legislative assembly. The Lok Sabha consists of 544 members elected by adult franchise; not more than 17 represent the Union Territories. It may also include a number of members nominated by the President.

Government of the States. The governmental machinery of states closely resembles that of the Union. Each of these states has a governor at its head appointed by the President for a term of five years to exercise executive power on the advice of a Council of Ministers. The state's legislatures consist of the Governor and either one house (legislative assembly) or two houses (legislative assembly and legislative council). The term of the assembly is five years, but the council is not subject to dissolution.

Language. The Constitution provides that the official language of the Union shall be Hindi. (The English language will continue to be an associate language for many official purposes.)

Legislation—Federal System. The Constitution provides that bills, other than money bills, can be introduced in either House. To become law, they must be passed by both Houses and receive the assent of the President. In financial affairs, the authority of the Lower House is final. The various subjects of legislation are enumerated on three lists in the seventh schedule of the Constitution: the Union List, containing nearly 100 entries, including external affairs, defence, communications, and atomic energy; the

State List, containing 65 entries, including local government, police, public health, education; and the Concurrent List, with over 40 entries, including criminal law, marriage and divorce, labour welfare. The Constitution vests residuary authority in the Centre. All matters not enumerated in the Concurrent or State Lists will be deemed to be included in the Union List, and in the event of conflict between Union and State Law on any subject enumerated in the Concurrent List the Union Law will prevail. In time of emergency Parliament may even exercise powers otherwise exclusively vested in the states. Under Article 356, "If the President on receipt of a report from the Government of a state or otherwise is satisfied that a situation has arisen in which the Government of the state cannot be carried on in accordance with the provisions of this Constitution, the President may by Proclamation: (a) assume to himself all or any of the functions of the Government of the state and all or any of the powers of the Governor or any body or authority in the state other than the Legislature of the state; (b) declare that the powers of the Legislature of the state shall be exercisable by or under the authority of Parliament; (c) make such incidental provisions as appear to the President to be necessary": provided that none of the powers of a High Court be assumed by the President or suspended in any way. Unless such a Proclamation is approved by both Houses of Parliament, it ceases to operate after two months. A Proclamation so approved ceases to operate after six months, unless renewed by Parliament. Its renewal cannot be extended beyond a total period of three years. An independent judiciary exists to define and interpret the Constitution and to resolve constitutional disputes arising between states, or between a state and the Government of India.

Other Provisions of the Constitution deal with the administration of tribal areas, relations between the Union and states, inter-state trade and finance.

Amendments. The Constitution is flexible in character, and a simple process of amendment has been adopted. For amendment of provisions concerning the Supreme Courts and the High Courts, the distribution of legislative powers between the Union and the states, the representation of the states in Parliament, etc., the amendment must be passed by both Houses of Parliament and must further be ratified by the legislatures of not less than half the states. In other cases no reference to the state legislatures is necessary.

Numerous amendments were adopted in August 1975, following the declaration of a state of emergency in June. The Constitution (39th Amendment) Bill laid down that the President's reasons for proclaiming an emergency may not be challenged in any court. Under the Constitution (40th Amendment) Bill, 38 existing laws may not be challenged before any court on the ground of violation of fundamental rights. Thus detainees under the Maintenance of Internal Security Act could not be told the grounds of their detention and were forbidden bail and any claim to liberty through natural or common law. The Constitution (41st Amendment) Bill provided that the President, Prime Minister and state Governors should be immune from criminal prosecution for life and from civil prosecution during their term of office.

In November 1976 a 59-clause Constitution (42nd Amendment) Bill was approved by Parliament and came into force in January 1977. Some of the provisions of the Bill are that the Indian Democratic Republic shall be named a "Democratic Secular and Socialist Republic";

that the President "shall act in accordance with" the advice given to him by the Prime Minister and Cabinet, and, acting at the Prime Minister's direction, shall be empowered for two years to amend the Constitution by executive order, in any way beneficial to the enforcement of the whole; that the term of the Lok Sabha and of the State Assemblies shall be extended from five to six years; that there shall be no limitation on the constituent power of Parliament to amend the Constitution, and that India's Supreme Court shall be barred from hearing petitions challenging Constitutional amendments; that strikes shall be forbidden in the public services and the Union Government have the power to deploy police or other forces under its own superintendence and control in any state. Directive Principles are given precedence over Fundamental Rights: ten basic duties of citizens are listed, including the duty to "defend the country and render national service when called upon to do so".

The Janata Party Government, which came into power in March 1977, promised to amend the Constitution during the year, so as to "restore the balance between the people and Parliament, Parliament and the judiciary, the judiciary and the executive, the states and the centre, and the citizen and the Government that the founding fathers of the Constitution had worked out". The Constitution (43rd Amendment) Bill, passed by Parliament in December 1977, the Constitution (44th Amendment) Bill, passed by Parliament in December 1977 and later redesignated the 43rd Amendment, and the Constitution (45th Amendment) Bill, passed by Parliament in December 1978 and later

redesignated the 44th Amendment, reversed most of the changes enacted by the Constitution (42nd Amendment) Bill. The 44th Amendment is particularly detailed on emergency provisions: An emergency may not be proclaimed unless "the security of India or any part of its territory was threatened by war or external aggression or by armed rebellion." Its introduction must be approved by a two-thirds majority of Parliament within a month, and after six months the emergency may be continued only with the approval of Parliament. Among the provisions left unchanged after these Bills were a section subordinating Fundamental Rights to Directive Principles and a clause empowering the central Government to deploy armed forces under its control in any state without the state government's consent. In May 1980 the Indian Supreme Court repealed sections 4 and 55 of the 42nd Amendment Act, thus curtailing Parliament's power to enforce directive principles and to amend the Constitution. The death penalty was declared constitutionally valid.

The Panchayat Raj scheme is designed to decentralize the powers of the Union and state Governments. This scheme is based on the Panchayat (Village Council) and the Gram Sabha (Village Parliament) and envisages the gradual transference of local government from state to local authority. Revenue and internal security will remain state responsibilities at present. By 1978 the scheme had been introduced in all the states except Meghalaya, Nagaland and 23 out of 31 districts in Bihar. The Panchayat existed in all the Union Territories except Lakshadweep, Mizoram and Pondicherry.

POLITICAL PARTIES

In 1907 Congress was split in two—the Extremists and the Moderates. In 1969 Congress again split into two distinct organizations, with Indira Gandhi's Government continuing in office while the Indian National Congress (Organization) became India's first recognized opposition party. A further split occurred in January 1978, when Mrs. Gandhi formed a breakaway group. In July 1981 a Supreme Court ruling confirmed Congress (I) as the official Congress party.

Indian National Congress (I): 24 Akbar Rd., New Delhi 110011; f. 1978 when Mrs. Gandhi formed a breakaway group; Pres. INDIRA GANDHI; Gen. Secs. G. KARUPPIAH MOORPANAR, SHYAM SUNDAR MOHAPATRA, Dr. RAJENDRA KUMARI BAJPAL, M. SATYANARAYANA RAO, KALPNATH RAI, KALPNATH RAI, VASANTDADA PATIL.

Indian National Congress (S): 3 Raisina Rd., New Delhi 110001; f. 1885. Aims: the well-being and advancement of the people and the establishment by peaceful means of a socialist, co-operative Commonwealth based on equality of opportunity and rights, aiming at world peace; the provision of basic needs and opportunities for culture; full employment; Government control of large-scale industries and services; co-operative industry and agriculture; a neutral foreign policy; Pres. SHARAD PAWAR.

The five other principal parties are:

Janata Party: 7 Jantar Mantar Rd., New Delhi 110001; f. May 1st, 1977, by the official merger of the Indian National Congress (Organization), the Bharatiya Lok Dal (BLD), the Bharatiya Jana Sangh (People's Party of India) and the Socialist Party, who had combined as the Janata Party to fight the general election of March 1977; Congress for Democracy, a party formed in February 1977 by Jagjivan Ram, merged into the Janata Party in May 1977; aims to achieve by democratic and peaceful means a socialist society, free from social, political and economic exploitation of individual by individual and nation by nation; Leaders MADHU DANDAVATE (Parliament), PILOO MODY (Rajya Sabha); Pres. JUDICIAL SYSTEM

THE SUPREME COURT

The Supreme Court, consisting of a Chief Justice and not more than 17 judges appointed by the President, exercises exclusive jurisdiction in any dispute between the Union and the states (although there are certain restrictions where an acceding state is involved). It has appellate jurisdiction over any judgment, decree or order of the High Court where that Court certifies that either a substantial question of law or the interpretation of the Constitution is involved.

Provision is made for the appointment by the Chief Jus-

tice of India of judges of High Courts as ad hoc judges at sittings of the Supreme Court for specified periods, and for the attendance of retired judges at sittings of the Supreme Court. The Supreme Court has advisory jurisdiction in respect of questions which may be referred to it by the President for opinion. The Supreme Court is also empowered to hear appeals against a sentence of death passed by a State High Court in reversal of an order of acquittal by a lower court, and in a case in which a High Court has granted a certificate of fitness.

The Supreme Court also hears appeals which are certified

by High Courts to be fit for appeal, subject to rules made by the Court. Parliament may, by law, confer on the Supreme Court any further powers of appeal.

Chief Justice of India: The Hon. YESHWANT VISHNU CHANDRACHUD.

Judges of the Supreme Court: Hons. P. N. BHAGWATI, R. S. SARKARIA, A. C. GUPTA, S. MURTAZA FAZAL ALI, V. D. TULZAPIRKAR, D. A. DESAI, R. S. PATHAK, A. D. KOSHAL, O. CHINNAPPA REDDY, A. P. SEN, E. S. HIGH COURTS

The High Courts are the Courts of Appeal from the lower courts, and their decisions are final except in cases where appeal lies to the Supreme Court.

LOWER COURTS

Provision is made in the Code of Criminal Procedure for the constitution of lower criminal courts called Courts of Session and Courts of Magistrates. The Courts of Session are competent to try all persons duly committed for trial, and inflict any punishment authorized by the law. The President and the local government concerned exercise the prerogative of mercy.

The constitution of inferior civil courts is determined by regulations within each state.

THE PRESS

Freedom of the Press was guaranteed under articles 13 and 19 of the Constitution. A measure giving the Press the right to publish proceedings of Parliament without being subjected to censorship or the fear of civil or criminal action was popularly known as the "Feroz Gandhi Act". This privilege was withdrawn when Mrs. Indira Gandhi's Government declared a state of emergency in June 1975 and article 19 of the Constitution, which guaranteed the right to freedom of speech and expression, was suspended. In order to facilitate censorship of all news, a merger of the existing news agencies was enforced in January 1975, and *Samachar*, the state news agency, was established. However, pre-censorship was declared illegal by the courts in September 1975, and censorship of foreign correspondents ended in September 1976, but the Prevention of Publication of Objectionable Matter Act, passed by Parliament in early 1976, still greatly restricted press freedom. In April 1977 the new Government introduced bills to repeal the Prevention of Publication of Objectionable Matter Act and to restore the rights of the "Feroz Gandhi Act", which were both subsequently approved by Parliament. The right to report Parliamentary proceedings was further guaranteed under the Constitution (45th Amendment) Bill of December 1978, later redesignated the 44th Amendment. In April 1978 *Samachar* was disbanded and the original agencies were re-established.

In March 1979 a Press Council was set up (the previous one was abolished in 1975). Its function is to uphold the freedom of the Press and maintain and improve journalistic standards. In 1980 a second Press Commission was appointed to inquire into the growth and status of the press since the first commission gave its report, and suggest how best it should develop in the future.

The growth of a thriving Press has been made difficult by cultural barriers caused by religious, caste and language differences. Consequently the English Press, with its appeal to the educated middle-class urban readership throughout the States, has retained its dominance. The English metropolitan dailies, such as the *Times of India* (published in three cities), *Indian Express* (published in ten cities), the *Hindu* (published in five cities) and the *Statesman* (published in two cities), are some of the widest circulating and most influential newspapers. In 1979 there were 17,168 newspapers and magazines: 1,087 were dailies, 2,180 weeklies and 13,901 other periodicals. More were published in Hindi than in English, and the total circulation for Hindi papers was 11,408,000, while the English language press had a total circulation of 10,224,000. The readership of daily newspapers is just over 21 per thousand.

The main Indian language dailies, such as the *Navbharat Times* (Hindi), *Malayala Manorama* (Malayalam), the *Jugantar* (Bengali), and *Ananda Bazar Patrika* (Bengali), by paying attention to rural affairs, cater for the increasingly literate provincial population who know no English. Most Indian language papers have a relatively small circulation.

The more popular weekly and fortnightly periodicals include the cultural Tamil publications *Kumudam*, *Kalhi*, *Rani* and *Ananda Vikatan*, the English *Illustrated Weekly of India*, *India Today*, *Sunday*, and *Indian Express* (Sunday edition) and the sensationalist *Blitz*, published in English, Hindi and Urdu. The main monthly periodicals are the *Reader's Digest* and the Hindi *Manohar Kahaniyan*.

The majority of publications in India are under individual ownership (64.5 per cent in 1977), whilst newspapers owned by joint stock companies claim the largest part of the total circulation (38.5 per cent in 1979). The most

powerful groups own most of the large English dailies and frequently have considerable private commercial and industrial holdings. Four of the major groups are as follows:

Times of India Group (controlled by ASHOK JAIN and family): dailies: the *Times of India*, *Economic Times*, the *Evening News of India* (Bombay), the Hindi *Navbharat Times*, the *Maharashtra Times* (Bombay); periodicals: the *Illustrated Weekly of India*, the Hindi weeklies *Dharmayug* and *Dinaman*, the English fortnightlies *Femina* and *Filmfare* and the Hindi publications *Parag* and *Sarita*, etc.

Indian Express Group (controlled by the GOENKA family): dailies: the *Indian Express*, the Marathi *Loksatta*, the Tamil *Dinamani*, the Telugu *Andhra Prabha*, the Kannada *Kannada Prabha* and the English *Financial Express*; periodicals: the English weeklies the *Indian Express* (Sunday edition), *Screen*, *Cinema Express* (fortnightly) and the Telugu *Andhra Prabha Illustrated Weekly*.

Hindustan Times Group (controlled by the BIRLA family): dailies: the *Hindustan Times* (Delhi), the *Searchlight* (Patna), *Pradeep* (Patna), the Hindi *Hindustan* (Delhi) and *Bharat* (Allahabad); periodicals: the weeklies the *Overseas Hindustan Times*, the *Eastern Economist*, the Hindi *Saptahik Hindustan* (Delhi) and the Hindi monthly *Nandan* (New Delhi).

Ananda Bazar Patrika Group (controlled by ASOKE SARKAR and family): dailies: the *Ananda Bazar Patrika* (Calcutta), the English *Business Standard* and *Hindustan Standard*; periodicals: the English weeklies *Sunday* and *Sports World*, the English fortnightly *Business World*, Bengali weekly *Desh*, Hindi weekly *Ravivar*, Bengali monthly *Anandamela*, Bengali fortnightly *Anandlok*, etc.

RADIO AND TELEVISION

Radio broadcasting in India began in 1927 and was taken over by the Government in 1930. Commercial television began in 1976 and by 1978 covered about 15 per cent of the population. In 1978 it was decided that All India Radio and Doordarshan India should become autonomous corporations. To enable broadcasting to reach as many people as possible the Government installs and maintains radio and television sets in community centres. Both radio and television carry advertising.

TRANSPORT

RAILWAYS

Indian Government Administration (Ministry of Railways, Railway Board): Rail Bhawan, Raisina Rd., New Delhi; Chair. M. S. GUJRAL.

The Indian Government exercises direct or indirect control over all railways in the Republic of India through the medium of the Railway Board.

ZONAL RAILWAYS

The railways are grouped into nine zones:

Northern: Delhi; Gen. Man. R. SRINIVASAN.

Western: Bombay; Gen. Man. S. SARATH.

Central: Bombay-VT; Gen. Man. A. K. CHAKRAVARTY.

Southern: Madras; Gen. Man. VERGHESE ANVER.

Eastern: Calcutta; Gen. Man. C. K. SWAMINATHAN.

South Eastern: Calcutta; Gen. Man. R. P. SINGH.

South Central: Secunderabad; Gen. Man. T. N. JOSHI.

North Eastern: Gorakhpur; Gen. Man. A. K. BHADURI.

Northeast Frontier: Maligaon and Gauhati; Gen. Man. K. T. V. RAGHAVAN.

India's railway system is the largest in Asia and the fourth largest in the world. The total length of Indian railways in March 1980 was 60,933 route km.

Note: An underground railway for Calcutta is scheduled for completion by 1986. It is expected to serve more than one million people daily and to total 17 km. in length.

ROADS

In December 1979 there were 1,604,110 km. of roads in India, 29,340 km. of which were main roads and 485,997 km. secondary roads. Estimated expenditure on roads in 1978/79 was Rs. 1,000m.

Ministry of Shipping and Transport (Roads Wing): Transport Bhawan No. 1, Parliament St., New Delhi 110001; responsible for the maintenance of India's system of National Highways, with an aggregate length of about 29,340 km. in 1980, connecting the State capitals and major ports and linking with the highway systems of its neighbours. This system includes 57 highways and they constitute the main trunk roads of the country. There are also four express highways and work on a fifth was in progress in 1979.

Border Roads Development Board: f. 1960 to accelerate the economic development of the north and north-eastern border areas; it has constructed 7,470 km. of new roads, improved 4,904 km. of existing roads and surfaced 8,913 km. (1976).

SHIPPING

India is sixteenth on the list of principal merchant fleets of the world. In 1980 the fleet had 384 vessels totalling 9.35 million d.w.t. There are some 60 shipping companies in India. The major ports are Bombay, Calcutta, Cochin, Kandla, Madras, Mangalore, Mormugao, Pradip (Paradeep), Tuticorin and Vishakhapatnam (Visakhapatnam). An auxiliary port to Calcutta at Haldia was opened to international shipping in 1977 and in 1979 a five-year plan was launched to modernize the port. Its coal berth is complete and will eventually have an annual throughput capacity of 5 million metric tons. An auxiliary port to Bombay is also proposed, at Nhava-sheva. Provision of Rs. 3,900m. has been made in the Sixth Plan for development of the ten major ports.

Among the largest shipping companies are:

BOMBAY

INDONESIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Indonesia consists of a group of some 13,700 islands between South-East Asia and Australia and stretching from the Malayan peninsula to New Guinea. The principal islands are Java, Sumatra, Kalimantan (Borneo), Sulawesi (Celebes), Irian Jaya (West New Guinea), the Moluccas and Timor. The climate is tropical, with an average temperature of 26°C (80°F) and heavy rainfall during most seasons. The official language is Bahasa Indonesia but more than 200 languages and dialects are spoken. About 90 per cent of the population are Muslims, 9 per cent Christian and the remainder are either Hindu or Buddhist. The national flag (proportions 3 by 2) has two horizontal bands of red and white. The capital is Jakarta on the island of Java.

Recent History

Except for East Timor (*see* below), Indonesia was formerly the Netherlands East Indies. During the Second World War the territory was occupied by Japanese forces from March 1942. In August 1945, after the Japanese surrender, a group of nationalists proclaimed the independence of Indonesia, with Dr. Sukarno as President. The Netherlands formally transferred sovereignty in December 1949. West New Guinea (now Irian Jaya) remained under Dutch control until 1962 but, following a brief period of UN administration, was transferred to Indonesia in May 1963.

Dr. Sukarno established himself as virtual dictator, following a policy of extreme nationalism. Inflation, widespread corruption and Sukarno's Marxist tendencies led to opposition from students, the army and Muslim groups. Following an attempted communist coup in 1965, military commanders led by Gen. Suharto assumed emergency executive powers in March 1966. The President handed all power to Suharto in February 1967. In March the People's Consultative Assembly removed Sukarno from office and Gen. Suharto became President in March 1968.

Under Suharto's "New Order", real power passed from the legislature and Cabinet to a small group of army officers and to *Kopkamtib*, the chief security organization. Left-wing movements were suppressed, and a liberal economic policy adopted. In May 1977 there was a rebellion in Irian Jaya, said to have been organized by the Free Papua Movement, which seeks unification with Papua New Guinea. Fighting continued until 1979, when in December Indonesia and Papua New Guinea finalized a new border administrative agreement.

General elections held in May 1977 gave *Golkar*, the organization representing the Government, a majority and Suharto was re-elected President unopposed in March 1978. Between 1977 and 1979 political prisoners held since the 1965 coup attempt were released. In 1980 criticism of the Government was provoked by the continuing rigidity of Suharto's regime, the political role of the army, censorship of the media and the narrowness of the Government's political base. A petition criticizing the Govern-

ment was channelled constitutionally through the Indonesian Assembly. The 50 signatories included former Minister of Defence Col. Nasution. Other petitions have followed, and that of August 1981 was signed by 360 people, including many of the initial group of 50. Throughout 1981 there were a number of anti-Chinese disturbances, probably manipulated by dissenting groups in order to embarrass the Government.

In 1975 Portugal withdrew from East Timor and, in order to prevent Fretilin, the independence movement, from taking control, Indonesian troops intervened and set up a provisional government. In July 1976 East Timor was fully integrated as the 27th province of Indonesia. However, resistance to Indonesian rule continues and the UN does not yet recognize Indonesia's absorption of the territory. In 1979 there were reports of widespread starvation in East Timor, but by 1981 conditions had improved. The Government allocated U.S. \$100 million for development in East Timor in 1981/82. Official estimates suggest that the population of the region has fallen by one-seventh since 1974.

Indonesia's foreign policy is one of non-alignment, although it maintains close relations with the West. Indonesia is a member of ASEAN and contributes to its solidarity in opposing Viet-Nam's presence in Kampuchea.

Government

The highest authority of the state is the People's Consultative Assembly, with 920 members who serve for five years. The Assembly includes 460 members of the House of Representatives, the country's legislative organ. The House has 100 appointed members and 360 directly elected representatives. The remaining 460 seats of the Assembly are allocated to Government appointees, delegates of regional assemblies and to representatives of parties and groups in proportion to their elected seats in the House. Executive power rests with the President, elected for five years by the Assembly. He governs with the assistance of an appointed Cabinet, responsible to him.

There are 27 provinces and local government is through a three-tier system of Provincial, Regency and Village Assemblies. Provincial Governors are appointed by the President.

Defence

Military service is selective. In July 1981 total strength was 273,000 men: army 195,000, navy 52,000 and air force 26,000. There was also a Police Mobile Brigade of 12,000 and about 70,000 militia. Defence expenditure for 1981 was budgeted at 1,500,000 million rupiahs.

Economic Affairs

The economy is predominantly agricultural. In 1979 agriculture, forestry and fishing provided 32.2 per cent of the G.D.P. and employed 61.8 per cent of the labour force. The staple crop is rice, while rubber, oil palm, coconuts, sugar cane and coffee are among the cash crops grown. In 1980 production of husked rice was a record 20.3 million

metric tons, and a harvest of 21.8 million tons was expected for 1981. However, Indonesia had to import 2 million tons of rice in 1980. Two-thirds of Indonesia's land area is covered by forest and output of industrial logs rose from 16.4 million cubic metres in 1975 to 27.5 cubic metres in 1979. In 1980 exports of forest products slumped, due to falling demand and restrictions on exporting unprocessed timber, and earnings fell from \$1,710 million in 1979 to \$1,600 million.

Indonesia's principal mineral resource is petroleum, of which it produced a record 615.1 million barrels in 1977. However, output fell to 577 million barrels in 1980, although Repelita III (*see* below) forecasts a rise to about 668 million barrels by 1984. Revenue from crude oil exports reached U.S. \$8,858 million in 1979. The production of liquefied natural gas (LNG) is a significant new development. Output rose from U.S. \$547 million in 1978 to U.S. \$2,300 million in 1980 and is planned to triple by 1990 when LNG is to become Indonesia's prime earner of revenue. Tin, bauxite, nickel, copper and coal are also mined. Tin production was 30,460 metric tons in 1980, making Indonesia the world's third largest producer (after Malaysia and Thailand). Manufacturing has developed slowly, contributing 12.9 per cent of the G.D.P. in 1979. Major industries include petroleum refining, fertilizers, pharmaceuticals, cement and textiles.

Despite its extensive natural wealth, Indonesia remains a relatively poor country, with an estimated average per capita G.N.P. of \$265 in 1980. Repelita III (1979-83), the third Five-Year Plan, aims to increase employment opportunities, raise food production, create a more equitable distribution of wealth and achieve an average annual economic growth of 6.5 per cent. In 1980 the economy performed well, achieving a growth rate of 9.6 per cent. Foreign reserves reached a record \$7,003 million in 1980 and prompted the Government to announce a 31.7 per cent increase in budgetary spending for 1981/82.

Indonesia's development plans have been financed largely by foreign aid. In 1981 projects included a hydroelectric power plant and water supply schemes in Java. Despite improvements in the country's financial position, Indonesia has received an assurance of continuous aid from the Inter-Governmental Group for Indonesia (IGGI) for the completion of Repelita III, and total aid is expected to amount to U.S. \$15,000 million during the Plan period.

In 1978 the rupiah was devalued by 34 per cent against the U.S. dollar and was floated against a weighted basket of currencies. Although the economic outlook has improved since the devaluation, the inflation rate rose to 22 per cent by the end of 1979, but was kept to 15.9 per cent in 1980.

Indonesia has a healthy trade balance, with a surplus amounting to U.S. \$9,300 million in 1980. Due to oil price increases and the growth of LNG exports, export trade almost quintupled in value between 1974 and 1979 from \$3,210 million to \$15,578 million. However, Indonesia's inadequate refining capacity has meant that 59 per cent of the country's consumption of refined petroleum products is imported, equal to 42.5 per cent of gross oil revenues in 1979, although plans were announced in November 1980 to double the refining capacity. In April 1980 the Government announced a 50 per cent rise in domestic fuel prices in order to cut consumption and reduce subsidies. In May

1981 Indonesia agreed to freeze oil prices in line with OPEC policy.

Indonesia's major trading partner is Japan, trade with which accounted for 31.5 per cent of imports and 49.3 per cent of exports in 1980. Indonesia's main imports are machinery, foodstuffs and iron and steel.

Transport and Communications

Inter-island shipping is in the hands of state and private shipping lines and there are many small craft. There are railways on Java, Madura and Sumatra totalling 5,881 km. (1978). In Java there are adequate roads but on most of the other islands traffic is by jungle track and river boat, although in 1980 five new road construction projects were begun in Sumatra. In 1978 there were about 103,000 km. of roads, of which over one-quarter were surfaced. Domestic air services link the major cities and international services are provided by the state airline, P.T. Garuda Indonesian Airways, and many foreign lines.

Social Welfare

In 1978 a new social insurance scheme was introduced, covering about 1.6 million workers. Benefits include life insurance and old-age pensions. The provision of medical facilities is the responsibility of the provincial governments. In 1981 there were some 1,208 major state-run and private hospitals with over 98,600 beds. In addition, there were 4,753 rural health centres and 5,160 clinics.

Education

In 1980 25.5 million pupils were enrolled in primary schools, 5.1 million in secondary and high schools. It is hoped to introduce universal compulsory primary education by 1984. There are 29 state and 21 private universities, and in 1980 there were 454,000 students in academies and universities. In 1979 the average adult illiteracy rate was about 35 per cent.

Tourism

Tourism is based mainly on the islands of Java, famous for its volcanic scenery and religious temples, and Bali, renowned for its traditional dancing and religious festivals. In 1980 561,178 foreign tourists visited Indonesia. The Government aims to make tourism the fourth largest foreign exchange earner under Repelita III and to achieve 1 million tourists by 1984.

Public Holidays

1982: May 20th (Ascension), May 21st (Ascension of the Prophet Muhammad), July 22nd, 23rd (Idul Fitr, end of Ramadan), August 17th (Indonesian National Day), September 28th (Idul Adha), October 18th (Islamic New Year), December 25th (Christmas Day), December 28th (Mouloud, Prophet Muhammad's Birthday).

1983: January 1st (New Year), April 1st (Good Friday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 sen = 1 rupiah.

Exchange rates (December 1981):

£1 sterling = 1,224.3 rupiahs;
U.S. \$1 = 636.5 rupiahs.

FINANCE

100 sen = 1 rupiah (Rp.).

Coins: 5, 10, 25, 50 and 100 rupiahs.

Notes: 100, 500, 1,000, 5,000 10,000 rupiahs.

Exchange rates (December 1981): £1 sterling = 1,224.3 rupiahs; U.S. \$1 = 636.5 rupiahs;
10,000 rupiahs = £8.17 = \$15.71.

Note: The new rupiah, equal to 1,000 old rupiahs, was introduced in December 1965. For converting the value of foreign trade transactions the average import rates (rupiahs per U.S. dollar) were: 78.0 in 1966; 153.7 in 1967; 300.1 in 1968; 326.0 in 1969; 365.0 in 1970; 393.4 in 1971. In August 1971 new rates of U.S. \$1 = 374 rupiahs (exports) and U.S. \$1 = 415 rupiahs (imports) were introduced. The import rate remained in force as the market rate until November 1978. In terms of sterling the exchange rates from December 1971 to June 1972 were £1 = 974.54 rupiahs (exports) and £1 = 1,081.37 rupiahs (imports). In November 1978 it was announced that the rupiah would be subjected to a "managed float", with an initial exchange rate of \$1 = 625 rupiahs. The average rate (rupiahs per dollar) was: 442.05 in 1978; 623.05 in 1979; 627.00 in 1980.

THE CONSTITUTION

(A Summary)

Indonesia has had three provisional Constitutions: August 1945, February 1950 and August 1950. In July 1959 the Constitution of 1945 was re-enacted by Presidential decree. The General Elections Law of 1969 supplemented the 1945 Constitution, which has been adopted permanently by the People's Consultative Assembly.

GENERAL PRINCIPLES

The 1945 Constitution consists of 37 articles, 4 transitional clauses and 2 additional provisions, and is preceded by a preamble. The preamble contains an indictment of all forms of colonialism, an account of Indonesia's struggle for independence, the declaration of that independence and a statement of fundamental aims and principles. Indonesia's National Independence, according to the text of the preamble, has the state form of a Republic, with sovereignty residing in the People, and is based upon the *Pancasila*:

1. Belief in the One Supreme God.
2. Just and Civilized Humanity.
3. The Unity of Indonesia.
4. Democracy led by the wisdom of deliberations (*musyawarah*) among representatives.
5. Social Justice for all the people of Indonesia.

THE STATE ORGANS**Majelis Permusyawaratan Rakyat—MPR** (*People's Consultative Assembly*)

Sovereignty is in the hands of the People and is exercised in full by the People's Consultative Assembly as the embodiment of the whole Indonesian People. The Consultative Assembly is the highest authority of the State, and is to be distinguished from the legislative body proper (*Dewan Perwakilan Rakyat*, see below) which is incorporated within the Consultative Assembly. The Consultative Assembly, with a total of 920 members, is composed of all members of the Dewan, augmented by delegates from the regions and representatives of the functional groups in society (farmers, workers, businessmen, the clergy, intelligentsia, armed forces, students, etc.). The Assembly sits at least once every five years, and its primary competence is to determine the Constitution and the broad lines of the policy of the State and the Government. It also

INDONESIA

elects the President and Vice-President, who are responsible for implementing that policy. All decisions are taken unanimously in keeping with the traditions of *musyawarah*.

The President

The highest executive of the Government, the President, holds office for a term of five years and may be re-elected. As Mandatory of the MPR he must execute the policy of the State according to the Decrees determined by the MPR during its Fourth General and Special Sessions. In conducting the administration of the State, authority and responsibility are concentrated in the President. The Ministers of the State are his assistants and are responsible only to him.

Dewan Perwakilan Rakyat—DPR (*House of Representatives*)

The legislative branch of the State, the House of Representatives, sits at least once a year. It has 460 members: 360 elected, 100 appointed from Functional Groups. Every statute requires the approval of the DPR.

The Constitution. The Government

Members of the House of Representatives have the right to submit draft bills which require ratification by the President, who has the right of veto. In times of emergency the President may enact ordinances which have the force of law, but such Ordinances must be ratified by the House of Representatives during the following session or be revoked.

Dewan Pertimbangan Agung—DPA (*Supreme Advisory Council*)

The DPA is an advisory body assisting the President who chooses its members from political parties, functional groups and groups of prominent persons.

Mahkamah Agung (*Supreme Court*)

The judicial branch of the State, the Supreme Court and the other courts of law are independent of the Executive in exercising their judicial powers.

Badan Pemeriksa Keuangan (*Supreme Audit Board*)

Controls the accountability of public finance, enjoys investigatory powers and is independent of the Executive. Its findings are presented to the DPR.

JUDICIAL SYSTEM

There is one codified criminal law for the whole of Indonesia. Europeans are subject to the Code of Civil Law published in the State Gazette in 1847. For Indonesians the civil law is the uncodified customary law (*Hukum Adat*) which varies from region to region. Alien orientals (i.e. Arabs, Indians, etc.) and Chinese are subject to certain parts of the Code of Civil Law and the Code of Commerce. The work of codifying this law has started out in view of the great complexity and diversity of customary law it may be expected to take a considerable time to achieve.

Supreme Court. The final court of appeal (cassation).

High Courts in Jakarta, Surabaya, Medan, Ujungpandang (Makassar), Banda Aceh, Padang, Palembang, Bandung, Semarang, Banjarmasin, Menado, Denpasar, Ambon and Jayapura deal with appeals from the District Courts.

District Courts deal with marriage, divorce and reconciliation.

INSURANCE

Regulations have been introduced to limit the number of foreign companies licensed to operate to 12. In February 1974 a statement was issued by the Ministry of Finance emphasizing the need to form bigger units among the domestic companies, advising foreign companies to co-operate with domestic companies in joint ventures, and forbidding foreign investment in the life insurance sector. By 1980, all twelve foreign companies licensed to operate had merged with one or more domestic companies. In July 1976 the Government ruled that foreign non-life insurance companies should conduct business through local companies.

In 1980 there were 75 insurance companies, including 55 non-life companies, 12 life companies and 3 reinsurance companies.

IRAN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Iran lies in western Asia, bordered by the U.S.S.R. to the north, Turkey and Iraq to the west, the Persian Gulf and the Gulf of Oman to the south, and Pakistan and Afghanistan to the east. The climate is one of great extremes. In summer temperatures of over 55°C (130°F) have been recorded, but in the winter the great altitude of much of the country results in temperatures of -18°C (0°F) and below. About 50 per cent of the population are Persian, and speak Farsi. Turkic-speaking Azerbaizhanis form about 27 per cent of the population, and Kurds, Arabs, Baluchis and Turkomans form less than 25 per cent. The great majority of Persians and Azerbaizhanis are Shi'i Muslims, while the other minority groups are mainly Sunni Muslims. The national flag (proportions 3 by 1) has green, white and red horizontal stripes with the emblem of the Islamic Republic centrally positioned in red and the inscription *Allaho Akbar* (God is Great) repeated 22 times at the top and bottom. The capital is Teheran.

Recent History

Iran, called Persia until 1935, adopted its first imperial constitution in 1906. In 1921 Reza Khan, a Cossack officer, staged a military coup and became Minister of War. In 1923 he became Prime Minister and in 1925 the National Assembly deposed the Shah and handed full power to Reza Khan. He was subsequently elected Shah, taking the title Reza Shah Pahlavi, and began the modernization of the country. During the Second World War Reza Shah favoured Nazi Germany. British and Soviet forces entered Iran in 1941, forcing the Shah to abdicate in favour of his son, Mohammed Reza Pahlavi.

After the Second World War British and American forces left Iran, Soviet forces remaining in Azerbaizhan until 1946. The *Majlis* (National Consultative Assembly) approved the nationalization of the petroleum industry in March 1951. The leading advocate of this measure was Dr. Mohammed Mussadeq, leader of the National Front, who became Prime Minister in April 1951. After internal disturbances Mussadeq was deposed in August 1953 in a coup supported by the U.S.A. and other western countries. The dispute over oil nationalization was settled in August 1954, when an agreement was reached with foreign interests whereby oil concessions were granted to a consortium of eight companies. The Shah assumed total control of government in 1963, when he began an extensive redistribution of large estates to small farmers. In 1965 the Prime Minister, Hassan Ali Mansur, was assassinated, reportedly by a follower of the Ayatollah Ruhollah Khomeini, a Shi'i Muslim religious leader (exiled in 1964) who opposed the Shah's "White Revolution" because it conflicted with traditional Islamic customs. The next Prime Minister was Amir Abbas Hoveida.
